A private telegram, *via* Point de Galle, received this morning by Messrs. Sillar and Bateman, brings the following dates from China:— Hong Kong, Dec. 15; Shanghai, Dec. 8; Foo-chow-Foo, Dec. 9. Export of tea for the fortnight, 3,000,000 lbs. Market quiet. Rate of freight at Whampoa, under £2. Exchange on Hong Kong, 4s. 7d. Quiet.

List of Passengers.

PASSENGERS OUTWARD.

Per P. and O. steamer Massilia, from Southampton, Jan. 4.—To Singapore: Rev. C. A. Kock, Mr. H. C. Prinsep. To Ceylon: Surgeon W. S. Roche, R.N. To Hong Kong: Lieut. Stewart, A.D.C. to the Governor of Hong Kong, Dr. A. Cochrane. To Shanghai: Mr. E. McKean, Mr. A. Harvey, Mr. F. R. Porter, Mr. Steel, Mr. Jerdein, Mr. Cunningham, Dr. Bell.

From Marseilles, Jan. 12.—To Hong Kong: Rev. F. S. Turner, Mr. A. W. Glenie, Mr. F. J. Greene, Mr. J. A. Sitwell. To Shanghai: Mr. and Mrs Grant Gordon, Mr. R. S. Gundry, Mr. E. Pickwood, Mr. Brunat. To Singapore: Mr. E. L. Hedden, Mr. G. J. Buchanan To Ceylon: Mr. J. T. Molison, Mr. McLachlan, Mr. A. Sinclair, Mr. Todd, Mr. and Miss Wall, Mr. J. Stevens.

From Suez, Jan. 19.—To Hong Kong: Sir Richard and Lady MacDonnell.

Per P. and O. steamer Ripon, from Southampton, Jan. 20.—To Penang: Mr. J. Macfarlane. To Ceylon: Mr. and Mrs. Shipton, Mr. R. G. Burne, Mr. G. F. Walker, Mr. J. Brodie, Mr. J. Mouat. To Shanghai: Mrs. Hargreaves and two children. To Hong Kong: Miss Arnot, Mr. W. E. Jowitt, Mr. Melhuish, Mr. W. H. Seaton.

From Marseilles, Jan. 28.—To Hong Kong: Mrs. J. B. Endicott and child, Baron Von Carlotvitz, Mr. and Mrs. F. B. Johnson, Miss Kate Newton, Mr. D. M. Forbes. To Shanghai: Mr. F. E. Wright, Mr. and Mrs. Digby Smith. To Singapore: Mr. V. T. Van Dolder, Mr. A. Bavier and friend.

Summary of News from the Far East.

JAPAN

YOKOHAMA.

From this port we have not received our usual files of papers. The following, however, from a correspondent, contains much interesting information regarding the late expedition to Osaka:—

The morning of the departure of the last mail steamer saw also the departure of the fleet for the Inland Sea. The movement took us all a good deal by surprise, though the event had been rumoured of a few days previous. I think the Japanese were quite as much surprised, and certainly more anxious than the foreign community, for no official documents on the subject had passed between the foreign and native authorities. The Japanese love long despatches and detest personal communications; the 2-inch margined foolscap has a peculiar charm fo them. In truth, the whole official system in Japan is the quintessence of red-tapeism; it is the eternal *mio-nitchi* (to-morrow) from the Tycoon downwards. They reverse our proverb, and say, "Never do to-day what you can put off till to-morrow," and perhaps they even go so far as to declare that "procrastination is the soul of business," and punctuality something very bad indeed. The whole fleet consisted of nine vessels:—five English, headed by the *Princess Royal* (Admiral King); three French, and one Dutch. The Ministers of England, France, and America, and the Consul-General of Holland, accompanied the fleet, and from all appearances are prepared to act on a perfectly good understanding one with the other. Two objects are mooted as the cause of the expedition; one is to obtain the Mikado's signature to the treaty, and the other is to insist on the immediate opening of the port of Osaka, in accordance with instructions from Europe. Both will probably have an important bearing on our future relations with this country. The first, if obtained, may settle the question of the relative positions of the Mikado and Tycoon, which for so long has defied solution, and may also perhaps be the means of making officially known the wishes and demands of the various Princes who, with some justice, claim to be admitted to the benefits of foreign trade.

I am sure that the feelings of a large portion of the powerful aristocracy of Japan towards foreigners are but imperfectly understood in Europe; it has suited the purpose of the Tycoon's Government to keep them as much as possible in the background, and to represent them as more or less hostile to any movement opposed to the traditional policy of the country; but I could at this moment tell off on my fingers many influential Princes whose chief ambition is to be put in the same position as the Tycoon, and have foreign trade forced (?) upon them. In reviewing the short history of Japan since the foreign treaties have come into force, it needs no deep observer to detect the scheme of the Tycoon's Government to keep the foreign nations and the native Princes as far apart as possible, knowing but too well that contact may be productive of too good an understanding and too cordial a feeling. At Kagosima the Tycoon had a double purpose to serve, for Satsuma is a powerful Prince, and may one day prove a dangerous rival. The result, however, must have been disappointing, for Prince Satsuma has not been humbled by his defeat, and is now an ardent advocate for free intercourse with foreigners. You will recollect what an ambiguous part the Japanese Government played previous to the Simonoseki expedition; but as soon as the defeat of Prince Nagato was known, and the opening of Simonoseki to trade was mooted, the Japanese Government took the alarm and hastened to declare Prince Nagato a rank rebel. The event however which the Tycoon so much dreaded, viz., the opening of Simonoseki, was looked upon by the Prince and his party as an unmitigated blessing, well worth the sacrifice of the men and guns it involved; and many informal messages were conveyed to the British authorities expressing a hope that the threat of the Treaty Powers would be carried into effect.

Digitized by Google

The Tycoon, however, knew his ground, and represented that the opening of Simonoseki would be entirely inconsistent with the existing treaty, and would be transferring powers that belonged exclusively to the central Government, to the hands of a rebellious Prince.

It cannot be denied that there are many difficulties in the way of a recognition of the sovereign rights of the Japanese Princes, and not one of the least difficulties will be the question of the representation and protection of subjects residing in the territories of the Daimios. If we refuse to recognise the powers of the Tycoon as otherwise than despotic, and claim the privileges of treating direct with the Daimios, we must of course abrogate the right of holding the Tycoon's Government responsible for any grievance that may arise in other than the ports of the Tycoon. This would involve an enormous multiplication of treaties, and a vast increase to our consular service; and I fear that the question of expediency will have more weight in European councils than that of the abstract rights of Japanese Princes. If, however, on the other hand, we are prepared to acknowledge the Tycoon as absolute Sovereign in the country, it will not be unreasonable of us to urge on him the justice of admitting to the benefits of foreign trade those Daimios who have already given us such convincing proofs of their liberal tendencies. Satsuma, Nagato, Hejo, Hazin, Etchizen, Awa, Shendir, Osha, and many other influential Daimios are anxiously awaiting an opportunity for declaring their desire for a free and unrestricted intercourse with foreigners. At present, with the single exception of Satsuma, who is allowed considerable license, no Prince can have any transaction with a foreign house without the intervention of the officers of the Tycoon. This is the grievance of which they so bitterly complain. If a Prince wishes to purchase a foreign vessel, enter into a contract for foreign machinery, or make arrangements for sending any of his subjects to Europe, nothing can be done until the Custom-house authorities are conciliated and bribed; even then there may be many difficulties. The Prince may be suspected of whiggish principles, and be told that steamers and machinery are not good for him, and that his principles would certainly not be improved by an infusion of European ideas. In a word, he is told to go back to his native mountains and be a respectable old Tory again—"the new state of things is not for such as him." Even the ordinary civilities and hospitalities cannot be exchanged between foreigners and the native Princes or their respresentatives except through the medium of a Government official—called by courtesy "interpreter," but in common parlance "a spy." Immediately a Prince's representative shows himself in a foreign settlement, he is fastened upon by one of these "poisonous parasites," and all his words are taken down in a note book, "learned and conn'd by rote," unless he pays for them to be forgotten. I must not here, however, make a sweeping accusation against *all* Government officials. I have had the good fortune to meet many agreeable and intelligent men—honest in purpose and speech—who, though compelled to obey orders, have no relish for the objectionable duty of espionage. The sum of the evil is simply this: in a liberal sense of the term, we cannot have free intercourse with the Japanese so long as this detestable system of espionage is exercised by the Tycoon's officials; and unless the Japanese Government adopt more liberal principles, they must not be surprised to learn some day that foreign Powers are disposed to meet those Princes who are willing to meet them in such a way as will secure both trade and social intercourse from Imperial obstructions and vexatious restrictions.

With regard to the benefits likely to be derived by foreign trade from the opening of Osaka, opinions here are much at variance. I think the bulk of the mercantile community are against it; but then it must be remembered the majority of the community have some stake in Yokohama, in the material shape of houses and ground, and, of course, they dread an exodus from this port. Those who are doing a fair business here are averse to the opening of Osaka, because they deem it essential that their firm must be represented, and this cannot be done without extra outlay. So long as they can sell so many thousand pieces of shirtings per month, and get their orders for silk, they are content with things as they are. This, however, is reasoning somewhat after the style of the well-to-do grocer who objects to new streets in the neighbourhood, because new streets will probably bring an enterprising vendor of tea and sugar into the field, and he must set up an opposition—at any expense. The subject deserves to be argued on a broader basis than that of individual interests; or even that of exclusively mercantile interests; for, without losing sight of the fact that commerce forms one of the foundation-stones on which the prosperity of our country has been raised, the high aim of foreign policy should be to weld into one common chain the interests and sympathies of all nations. This may be utopian in the view of some people, and a little in advance of the ideas of our Foreign-office, but it would not be productive of harm to adopt it a little. I do not think with many people, either, that our Yokohama trade will suffer much by the opening of Osaka; our imports may fall off a little at first, but after all, the two millions and a half of people in Yedo constitute our chief market. As regards silk, nearly the whole districts lie east and north of Yedo, and it is not likely that producers will send so valuable a commodity 250 miles away when they have a market close at hand. When the Dutch had the monopoly of foreign trade at Nagasaki, and sold their imports at 500 per cent. profit, we should certainly not have gone to them for advice as to the opening of other ports It was not till the foreign treaties came into operation that the Japanese as a nation had an opportunity of appreciating foreign manufactures. The few thousand pieces of camlets, broadcloth, and taffechelas that were annually doled out at enormous prices by the cautious old Dutch traders of Decima may have served to gratify the fancies of the "upper ten" of Japan, but conveyed no notion to the Japanese of the commercial value of foreign intercourse. Osaka, as a treaty port, while it opens to us the resources of the numerous territories bordering on the Inland Sea, will stimulate those Princes whose existence as yet is almost unknown to us to cultivate foreign intercourse, and will carry conviction home to the Japanese Government that their frail defences of obstructiveness and evasion will not prevail against our treaty being carried out in the comprehensive spirit in which it was conceived. Education has made it a second nature with the Japanese to accept the inevitable with resignation. They will wriggle, kick, or passively resist, as long as they see a chance of escaping from unpleasant obligations; but, once thoroughly convinced of the hopelessness of their endeavours, they resign themselves to what must be—not sulkily, and with malicious reservation, like the Celestials, but fully, freely, and with good grace, resolved to make the best of their fate.

You will have heard of the capture and execution of the reputed confederate of Shimidza Seji, one of the assassins of Baldwin and Bird. The whole affair was got up with such theatrical effect that one was almost inclined to doubt the genuineness of the story. The Japanese, perhaps, wanted to make a little "political capital" out of it, but I dont think they gained their point. At the same time it is a great concession to foreigners, and we musn't look a "gift horse in the mouth."

HAKODADI.

The Japanese authorities have placed a light vessel in the situation of the "spit-buoy" off this harbour. She has not yet received her light. She is a low dismasted schooner with black hull, and one short mast forward. Her paint will probably be changed to red. More information will be given hereafter. The "spit-buoy" is not yet removed.

CHINA.

PEKING.

Sir Rutherford Alcock has arrived at the capital.

In the *Peking Gazette*, dated the 1st day of the 9th moon, appears the following important announcement, which at once explains the object of Messrs. Caine and Forrest's late visit to to the city of Chaochow, by giving the results of their journey. The spirit of the edict appears highly satisfactory, and gives promise of a determination on the part of the Chinese authorities to conform to treaty rights, and also to enforce their conformance by the populace of the several treaty ports. We at once subjoin a translation of the edict:—

1st Day 9th Moon.

IMPERIAL EDICT.

Ley Suy Liu (the acting Governor-General of the Two-kuang) repair with all speed to Chao-Chao-Fu, that he may imperatively direct the local officials and plainly inform the gentry and people that, all matters relating to intercourse with foreigners must be conducted in accordance to, and exact agreement with the treaties, so that the harmony which prevails may be made manifest to all.—Respect this.

TIENTSIN.

This port was expected to be almost deserted during the winter, as Messrs. Jardine, Mathieson and Co., Dent and Co., Russell and Co., and some others intended closing their establishments during that season, and it was anticipated that some

Digitized by Google

firms would do so permanently if trade did not revive in the spring.

It is reported that two English gentlemen travelling on horseback from Tientsin to Peking had been waylaid and murdered by Chinese. The exact time and place are not yet known, nor has the report as yet been fully authenticated. It is only a rumour, but it is said to bear the appearance of an unpalatable truth. This is the first outrage of any description that has been recorded as occurring in the neighbourhood of Tientsin or Peking since the signature of the treaty, and it is strange that it should follow so closely the withdrawal of our forces from the Taku forts.

These forts, we are informed have already been garrisoned by the Chinese Government, and have been repaired and renovated to a considerable extent.

SHANGHAI.

Our files of Shanghai papers have not come to hand. There seems, however, to be little news of importance from this settlement. G. W. Bennett, master of the receiving ship *Wellington*, was summoned before the Police Court attached to the Supreme Court on the application of five Chinamen, labourers on board a cargo boat employed by the Tug and Lighter Company to carry opium from the P. & O. steamer *Aden* to the receiving ship *Wellington*, for having on the 9th instant been guilty of aggravated assaults upon them. The backs of the Chinamen were on the issuing of the summons examined by the Law Secretary, the presiding Magistrate, and showed clearly that they had been severely flogged with a rope's-end, presenting the appearance of a mass of weals. They complained that after unloading the cargo-boat they were summoned on deck and informed by the captain that opium was missing. They were then tied hand and foot upto the stanchions of the ship and the captain ordered a black man to flog them, telling them he would stop the flogging if they would confess and tell him what had become of the opium. At the hearing, Captain Bennet admitted having ordered the men to be flogged, but justified himself on the ground of his conviction that the Chinamen had stolen some of his opium, and that the only way to make them confess the truth was to flog them; that he on a previous occasion followed the same course successfully, and that it was the only way to treat Chinamen.

The Court, after hearing in long detal the alleged justification, took a different view of the case, declaring that it was not to be tolerated within the jurisdiction of competent courts of justice that any one, Chinaman or European, was to be so treated. Here the Captain took upon himself the character of complainant (on suspicion), of judge, and of executioner. The Police Magistrate further remarked that the so-called justification increased rather than mitigated the original offence; it was, in fact, its own condemnation. How could English authorities insist upon good and fair treatment of foreigners on the part of the Chinese, if Englishmen committed acts of this description and were allowed to go unpunished? It was monstrous to suppose that a series of aggravated assaults were to be committed simply because a similar series had been committed before, and because in the judgment of the party committing the assaults it was the only way to treat Chinese. Captain Bennett had chosen to make a law for himself, and he could not complain that the law which ruled the conduct of Englishmen punished him for it. The sentence upon him was that he suffer one month's imprisonment with hard labour. The prisoner was removed expressing great surprise and contrition. His application for a commutation of the sentence to a pecuniary penalty was refused by the Chief Judge.

A missionary gentleman has arrived at Shanghai who has penetrated into the Szechuen Province and to the frontiers of Thibet, some thousand miles further than Hankow, distributing bibles on his track. It is stated that he met at some places with bad treatment from the natives; but as yet full particulars of his adventures have not been made public.

At the monthly meeting of the Royal Asiatic Society, Mr. Jamieson read a very valuable paper upon the Hieroglyphics of the Chinese language: explaining fully the nature of the system adopted, and showing the signs used to be expressive directly of ideas, independently of any sound associated with them. The paper read by Mr. Jamieson was clear and concise, and of such a nature as to form a subject of interest to those who, though not acquainted with the Chinese language, might be desirous of obtaining some information with regard to the nature and structure of this most curious of tongues. An animated discussion took place subsequently to the reading of the paper.

A Naval Court was held at H.B.M.'s Consulate to enquire into the circumstances attending the loss of the British schooner *Qualee*, in the Gulph of Pecheli, on the 10th ult. The Court found that the loss was occasioned by the master's mistaking his position through his being unable to obtain accurate observations at noon on the day previous. The master was censured for continuing his course instead of heaving to, during such thick weather, while in close proximity to the land, when his position was uncertain.

Mansfield, the Englishman lately imprisoned at Kau-chow fu, and subsequently surrendered to H.B.M.'s Consul at Kiukiang, arrived in Shanghai in the steamer *Poyang*. He now lies in the Consular Jail, awaiting his trial.

Mr. C. M. Grant, who initiated the scheme of an express, with telegraphic messages between Tientsin and Kiatchta, was still endeavouring to get subscribers to carry out his proposal. A final meeting was held to determine what should be done in the matter, but we find no record of the result. If unfavourable, however, we believe it was Mr. Grant's intention to return to Europe *via* Siberia.

The judgment in the case of Cann v. Reid is as follows:—

This is a claim by a broker for commission upon a chop of tea sold by the defendants to Messrs. Olyphant and Co., through his intervention. The demand is disputed, on the ground that the defendant's tea-taster, in employing the plaintiff as a broker in the transaction, exceeded his authority, well knowing that he was not empowered to engage the services of a foreign broker in the sale of teas. There is no doubt, on the evidence, that Ringer, Messrs. Reid's tea-taster, represented himself to the plaintiff as having power to entertain his services, and that he did entertain them, and in consequence the plaintiff became the medium of communication with Messrs. Olyphant, and a sale of the tea was the result. There is no evidence that it is actually against the custom of the tea-trade here to employ foreign brokers, although regular tea-brokers may more commonly be employed, and Ringer's position of buyer and seller of teas for his principals is one which in the absence of public notification to the contrary or trade custom negativing the presumption, would naturally imply the power of doing that which they might possibly do themselves, that is, using the services of a broker. Did the case go no further than this I should be disposed to hold Messrs. Reid bound by the act of their agent Ringer, however much it may have been against their orders privately given to him. But Mr. Maitland, the tea-taster of Messrs. Olyphant, proves that previous to his concluding the bargain with Mr. Reid, upon the latter observing that he had an offer from Olyphant and Co., he (Maitland) replied that Mr. Cann's (the plaintiff's) offer was Messrs. Olyphant's. If Mr. Reid had then wished to repudiate the plaintiff's services altogether, his course under the circumstances was to have declined to go on with the business, but by concluding the bargain he must be held to have virtually overlooked Ringer's excess of his authority, and to have adopted his acts.—Judgment must be for the plaintiff, with costs.

HONG KONG.

We have received files of the *Daily Press* to the 27th November, from which we glean the following items of intelligence:—

The regatta of the 16th November was a most pitiably slow affair, the weather being far too boisterous for anything like racing. Only two races took place, the one for men-of-war's gigs and the other for home boats, in which Messrs. Lane and Crawford's gig was victor, Messrs. Cunningham and Co. taking the second prize. The attendance was poor, as might have been expected; and from the state of the weather the whole of the afternoon, the affair ought certainly to have been postponed. The breeze was capital for yachts and large sailing boats, but outriggers and racing boats had not the slightest chance to do anything. One boat containing two Europeans capsized, but its occupants only sustained a ducking. The following day the regatta recommenced, but the weather was still unfavourable, and the whole affair seems to have been a melancholy failure.

The following narrative is published, being the statement of George Baffey, a prisoner sent in by the Chinese authorities to H.B.M.'s Consulate at Canton:—I joined the rebels at Changchow about the 16th March. I went up from Amoy to join them. When the rebels evacuated Changchow, I came with them into the province, and stayed with them until the 14th July, when I deserted them in disgust. The name of the chief I joined at Changchow was the Tze Wang, and it was with his party, to the number of 20,000, that I left Changchow. There were twelve Europeans with them at that time. Eleven days after leaving Changchow the Tze Wang's division became disorganised near Yingting, on a branch of the Han river, and I joined the Kan Wang. It was with the latter that I entered this province. The Kan Wang numbers his force at 100,000, but he has not more than 15,000 fighting men, who, however, are well armed. I got disgusted with them at last; the slaughter was dreadful. At the city of Chenping they took 1,600 Imperial braves prisoners, who surrendered on the promise of their lives, but

Digitized by Google

the same night they beheaded the whole number, and I saw the creek run with blood for four hours. On the night of the 14th July I took advantage of my being with a party at a point some 60 li in advance of the city of Chenping to desert, by floating down the river on a plank, and the next day I took to the mountains. I wished to avoid the troops, as I knew I should be put to death if taken prisoner by them, so I made inquiries previously to my flight from the country people within the rebel lines respecting the direction of Kia-ying-chow, and at length I gave myself up to a village mandarin. Previously to this I was seized by some boatmen belonging to the village, who bound my hands and feet, and were about to behead me, when a respectable old man induced them to desist and led me to the mandarin. The latter sent me to Kia-ying-chow, where I was confined in an office belonging to the magistrate, and treated well by the officials, but very badly by the people. I only had rice and water. I was then sent down to Canton by boat in charge of a small mandarin, who treated me kindly. I arrived at Canton the night before last, and was taken in a chair into the city, here I was lodged in a yamun, and last night was examined before two magistrates. It was at a Chinese prison; a linguist interpreted, but so badly that I could understand nothing.

To go back. I was originally employed in Colonel Gordon's force as Captain of Artillery, and on its being broken up I served under the Futai Li for three months as drill instructor, and then, wages being reduced from $211 to $150 a month, I went to Foochow and took service under Baron de Meritens, who put me under the orders of a Frenchman at Amoy with whom I disagreed; and, in consequence of this, I went to Shanghai and endeavoured to get employed in the Customs. I had previously endeavoured to get employment at Amoy and Ningpo, but had been refused everywhere; and so at length, having been unemployed for seven months, and receiving offers from Rhode and others who had joined the rebels, I went to Amoy and joined them.

Rhode was one of the 13 who left Changchow with the rebels of these only three besides myself are now alive. They are Williams, an American; McAuliffe (who made the mortars and shells, &c., at Changchow), an Irishman; and Rhode. Williams was very ill with dysentery when I left. The remainder, I believe, were all murdered at different times.

While with the Tze Wang, after leaving Changchow, I was four days without food; but the Kan Wang had been well supplied by pillage. When left, the rebels were talking of retreating towards Kiangsi. The rebels have great confidence in the Kan Wang; the latter is an exceedingly clever man, very fond of European ideas, but very distrustful of foreigners. None of the Europeans were allowed to hold any authority, and none received the fulfilment of the promises by which we were enticed over. The Baron de Meritens sent Gerard and others into Changchow with letters and passes, endeavouring to get the Europeans over; but Gerard having previously cheated the Tze Wang out of $3,000, the latter seized and beheaded him.

The greatest number of Europeans ever at Changchow was sixteen. I attempted to escape out of Changchow, but was prevented by information given against me by a German. The cause of my wishing to desert was seeing two Chinese mandarins burnt alive by the rebels in the city of Changchow. For every tail of a mandarin soldier produced the Kan Wang gives $6 reward. The Kan Wang is about 35 years of age. He is the principal rebel chief at the present moment. I have never heard the rebels speak of coming near Canton, but they are very anxious to get to the coast so as to obtain arms. There is very little money among the rebels, and this province is not productive enough to support them. They threw up fourteen fine stockades around the city of Chenping, very different from the wretched ones erected by the Imperial troops.

The country people are very hostile. They had cut down the unripe paddy around Chenping to prevent its falling into the hands of the Kan Wang. The latter, unlike the Tze Wang, does not allow useless devastation among the villages.

(Signed) GEORGE BAFFEY.

Housebreaking is again beginning to attract attention and engage the energies of the thieving portion of the Chinese population. Two cases are reported; one upon a bungalow up the hill, and another on a house between Lascar-row and Queen's-road. In the former case, a Parsee gentleman was slightly hurt in the scrimmage, after having fired without apparent effect at the thieves.

The Danish schooner *Caroline* reports the loss of the Prussian barque *Vampyr*, in the Gulf of Pechili.

The Hamburg barque *Therese* reports having fallen in with the British barque *Parsee*, Captain Wishart, from Swatow, bound to Shanghai, in a sinking condition; took off the crew, comprising sixteen, along with thirty-four Chinese passengers, and brought them on to Hong Kong.

The following will serve to throw some further light upon the coolie trade as now practised in Macao:—

A mutiny, of which the newspapers have already more than once spoken, occurred amongst the coolies on board a ship which was about to leave Macao. The captain, wishing to restore order, and at the same time to avoid bloodshed, commanded some of his men to fire, but to fire over the heads of the rebellious coolies. Many, as has been already made known to the public, threw themselves into the sea and were drowned. The following fact, however, seems not to have been hitherto known. Notwithstanding the captain's precautions, one coolie was severely wounded. He was sent ashore in order to be put into hospital. The captain knew that Christianity and civilisation had reigned for hundreds of years in Macao, and doubted not but that the poor sufferer would be received there, as such persons are always received in Christian and civilised countries. Alas! He little knew how effectually this infamous traffic sears the conscience, and extinguishes every finer feeling of our nature in those who have been for some time engaged in it. The poor coolie is not allowed to enter the town of Macao. "We have fed this man for so many days"—thus probably did certain men in Macao reason—"we have lost so much money by him. He is now unfit for the market. Why not keep him on board? Why send him back to us? Why thus give publicity to an affair which had better be hushed up with the utmost care? No one has as yet seen this man, as he is concealed in the bottom of the boat; take him back to the ship, and let us hear no more of him." The boat returns, but the wounded man never reaches the ship; he dies in the harbour. Yes, in Macao, in the year 1865, are there found men capable of listening unmoved to the groans of a wounded fellow-creature begging admission into an hospital; capable of closing the door of that hospital in his face—of beholding his life's blood flow drop by drop, and of sending him while in that state back to a ship to die.

Of the 30 ships now lying at anchor in Macao, sixteen are chartered for Havana with slaves. All these vessels will, as is the custom, ship a certain number of coolies in excess of their contract, in order to have the means of supplying the places of those who may die on the voyage (of disease or by violence, what matters it!). It is curious that no one has, as yet, found out why so many of the coolies lose their sight on the voyage! Out of a cargo of 500, 40 will be completely blind before they arrive at their destination, and as, according to the terms of the charter party, the baracoon owner will only pay for and receive those that arrive in possession of their eyesight, the unfortunate blind are probably cast into the sea or landed on some desert island, for the Government will not permit any Chinaman to live in Havana unless he belongs to a master.

Among the obituary announcements we regret to observe the name of Mr. Kemp, editor and proprietor of the *China Mail*, who expired at his residence in Hong Kong on the 27th of November.

The two prisoners convicted of piracy on board the *Kum Kwong Wo*, on the 16th July last, have been sentenced to five years' penal servitude, and during the first six months thereof to be thrice publicly whipped each time receiving fifty strokes. On this absurdly lenient sentence the *Daily Press* has the following remarks:—

"The judgment rendered in the case of these pirates is one that must carry comfort to every one of the numerous horde that are now ravaging the coast. If from henceforth anyone of them gets hanged, it is purely his own fault, for the Chief Justice has plainly demonstrated the method to be followed, in order to avoid the disagreeable finale that is supposed to be awaiting every one of those ruffians at the hands of a retributive justice. We doubt not but the legal adviser and plenipotentiary of all the pirates will not fail to issue to his numerous clients along the coast, and in Macao in particular, a circular, conveying the glad tidings. The statute says, that whosoever shall commit an act of piracy upon the high seas, and shall immediately after endanger the life of anyone, shall be guilty of felony and shall suffer death. But Chief Justice Ball has decided that if the pirates made prisoners of those whom they find on their

Digitized by Google

prize, and confine them a month or so in the hold and then throw them into the sea, that alters the thing altogether, and they shall then not be hanged, but merely sent to penal servitude for five years with the addition of the same amount of flogging which is generally administered to ear-ring snatchers; superadded, we presume, just in order to show them that their past conduct is not upon the whole approved of by Government. Now any man who has had the misfortune in his youth to have entirely neglected the study of the law would conclude that imprisoning a man in the hold of a ship for four or five weeks before you throw him into the sea, is rather an aggravation than an extenuation of the offence; and perhaps if possessing a casuistical turn of mind, he might conclude that stowing a number of men away in a small cabin for an indefinite period is in itself an endangering of their lives; but all those conclusions are wrong; for here we have it laid down plainly and unmistakably, that if you commit an act of piracy and carefully abstain from hurting any one seriously at the time, you can throw them all into the sea at your leisure in a month or two afterwards, without risking your neck in the least. Just run your vessel ashore as near as is convenient, and then heave them overboard one after the other and let them have a swim for it."

The vessels of war in harbour are:—

The British steamers Cormorant, Coromandel, Hesper, and Leven; the gunboats Clown, Drake, Firm, Forester, Grasshopper, Haughty, Janus, Oppossum, Snap, Watchful, and Woodcock. At Amoy: the British steamer Scylla. At Ningpo: the British gunboat Cockchafer. At Shanghai: the British steamers Barrossa and Manilla, and the gunboats Hardy, Starling, and Staunch. At Yang-tze-Kiang: the British steamers Algerine, Osprey, and Slaney. On the North: the British steamer Swallow, and the gunboats Dove and Insolent. At Japan: the British steamers Adventure, Argus, Leopard, Pelorus, Perseus, Princess Royal, and Rattler, and the gunboats Bouncer, Bustard, Havoc, and Kestrel.

PHILIPPINES.

MANILA.

The French Opera Company is creating a great sensation in Manila. The following is extracted from a letter:—"The performances take place twice a week, and Mesdames Maugard and Vierdini sing uncommonly well. We had quite a sensation opera the other evening. Maugard, the manager, got into the bad books of a lot of rowdy frequenters of the theatre, and when he appeared they hissed and hooted so long that they closed the scene, and sent a person out to say in French, 'Your enmity is for Maugard the manager, not Maugard the actor. Monsr. M. is changing his dress and will be here to answer any question in a moment.' M. came running in, in evening costume, *pulling on a white kid glove;* now to the Dons this is an awful insult—they therefore hooted, and called out 'bruto,' 'feura,' &c., and threw opera glasses at him; till on rushed the head of the police with two constables and forced down the curtain. Maugard was sent to jail and fined next day $150. The justice of this you can imagine. The Captain-General was very wroth about it, as he is a backer of Maugard. We thought we were to lose the company, but the General won't let them go. Once here they are pretty much in the hands of the Philistines. We fancy the actors will have a more grateful recollection of the barbarous English, so far as music is concerned, than the natives of musical Spain, where nearly every don and donna can tinkle the guitar, and 'warble their native woodnotes wild.'"

SIAM.

BANGKOK.

The English Mail of 26th Sept. had arrived out. Dates are down to the 16th Nov. The following items are from the *Siam Times*:—

"Thursday, the 14th day of the waxing moon of the 12th month (Nov. 2nd), commences the Royal Festival for raising lanterns upon poles. Sunday, the first day of the waxing moon 1st month (Nov. 19th), the festival ceases. Let all the members of the Royal family, and all the nobles and officers with the common people who will keep this festival, know and follow according to these directions. Saturday, the 1st day of the waning moon 12th month (Nov. 4th), is the day in which the Brahmins celebrate the royal festival of *Krittekaya* in the temple of *Phra Tewastan*.

"The rains have been rather heavy during the past week for this season of the year. No damage, as far as we have heard, has been done to the rice crop. According to the Siamese mode of reckoning the rainy season, it closes this week, but frequent showers occur some seasons to the middle and even to the end of November. Rice and paddy are still falling a little, and there is much confidence in a good harvest. Prices will probably fluctuate somewhat until the grain is gathered and secured.

"The return of a part of the Siamese vessels from China and the arrival of a few foreign ships is giving some employment to the steam tug boats, and begins to break the dull monotony of the long state of stagnation which has hovered over our former busy port.

"The Chinese have commenced repairing and putting their old fashioned sugar mills in order for the coming season. So far as reports have reached us the prospect of the coming sugar crop is not very good. The long dry season affected the growth of the cane unfavourably in many places.

"The Steamer *Chow Phya* took rice as part of her cargo on her trip to Singapore on the 25th Oct. This we believe is the first shipment since the prohibition was removed."

MALACCA STRAITS.

SINGAPORE.

We have received files of the *Singapore Free Press* to the 4th December. The mails of the 26th October had arrived.

The following gives some interesting particulars of the new works for utilising the hitherto neglected husk of the cocoanut:—Hitherto the husk of the cocoanut has been cast out as refuse by our planters, and been burnt, or buried, or allowed to rot on the estates at great loss to the proprietors, although it has always been valuable for the manufacture of rope and a textile material, and for the stuffing of beddings, couches, and chairs; at length, however, our enterprising townsman, Dr. Little, has erected a coir manufactory at Arthur's Seat, and the husk is likely in future to be profitably used. The husk is first steeped in water for a few days, then it is passed between rough rollers which crush and soften it; then it is combed by two mills which are technically called devils, which clean the fibres; if the latter are not quite clean they are drawn over sharp spikes by hand labour. These rollers and mills are worked by a ten-horse power high pressure engine. All the short fibres that are thrown out by the mills are screened and cleaned. The fibre thus cleaned and combed is spread out in the sun till dry, and is then ready for exportation. The long fibre, which runs from twelve to fourteen inches in length, is fit for brooms and brushes, and the short is a splendid substitute for horsehair stuffing. The soft pithy substance cleared from the fibre will, when burnt, form excellent manure. The dried branches of the cocoa-palm, which has also been of little use hitherto, serve now to keep up the fire in the boiler furnaces. We have no doubt the coir will fetch a remunerative price, but we think it would sell better if converted into cordage, which might be easily done by adding a rope walk to the present buildings, as the engine is quite powerful enough to work half-a-dozen spinning machines. We fancy a sufficient quantity of coir could be obtained here to keep the manufactory supplied; if not, it is certain the inhabitants of the neighbouring islands would bring their husk to this if they were certain of finding sale for it. In connection with the manufacture of coir rope we believe the common plantain tree of this island would furnish nearly as good fibre as the *Abaca* of Manila, a species of banana. We have tried the fibre of two kinds of plantains, the *pisang batu* and *pisang Almeida*, and found them exceedingly tough and strong, and of great length. It would be possible, we think, in the manufacture of cordage, to mix the coir and plantain fibre together.

PENANG.

The *Penang Gazette* contains the following:—"One of those landslips which occasionally occur on the island took place on the 8th inst. On the left side of the road leading to the waterfall, and before reaching the Alexandra Baths, is a hill from the foot of which the Municipal Commissioners and others have for years past been in the habit of quarrying away earth and stones. The hill had been thus cut away in an almost perpendicular line, and as the soil is of a soft friable nature interspersed with large boulders, the unusually heavy rains which have marked this season of the year had so loosened the earth that a large portion of it, chiefly from the top, came down at about 10 o'clock on the night of the 8th with a loud report, which was heard in the suburbs of the town. It is estimated that from about 60,000 to 70,000 tons of earth and rocks came down from a height of about 400 feet, burying the road and a plantation of young cocoanuts, lying to the right of it, to the depth of about 20 feet, and to an extent of 200

Digitized by Google

square yards. The family of a stone mason living within a few yards from the hill narrowly escaped destruction, and fortunately no one was passing along the road at the time. This is the largest landslip within recollection. On the following day the spot was visited by almost every one, and the usual drive to the Jetty abandoned for a visit to the foot of the hill. There are at present about 60 men engaged in carting away the soil and blasting the rocks, so that in about 4 or 5 days more the road will be again passable for carriages."

On the 10th November the town was the scene of another disgraceful faction fight between rival Chinese Kongsis. The Hoh Seng and Hoh Hap Seea, Chinese, it appears, combined and attacked the Ghi Hins in Penang and China streets; one man was killed by a spear or knife wound, and another received five wounds, inflicted apparently by a charge of slugs, or No. 1 shot. The police were quickly on the spot, and the disturbance was soon quelled, three men being arrested. In connection with this disturbance, a number of Chinese, all armed with spears, landed from a junk and proceeded up China and Penang streets, attacking the shops and people. The police, who were headed by Inspector Magness, would probably have succeeded in arresting several more of the rioters had the men seconded their officer and pursued the Chinamen into the water; but they took the precaution to take off their shoes first, by which time was lost, and the Chinamen escaped.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

MELLISH—On the 16th Nov., at Hong Kong, the wife of Edward Mellish, of a daughter.

WIGNALL—On the 11th Nov., at Shanghai, the wife of J. H. Wignall, of a son.

MARRIAGE.

COOLEY—FOX.—On the 11th Nov., at Shanghai, at Trinity Church, by the Rev. C. H. Butcher, M.A., Cousular Chaplain, Charles John, third son of the late Lieutenant Cooley, R.N., of Cooley, in the County of Limerick, Ireland, to Henrietta Emma, eldest daughter of Henry Fox, of Liverpool.

DEATHS.

KEMP—On the 17th Nov., at Hong Kong, James Kemp, Editor and Proprietor of the *China Mail* and *Evening Mail*, aged 34 years.

SWAN—On the 12th Nov., at Shanghai, at the Commercial Bank-buildings, James Cumming Swan, aged 26 years.

THE REV. DR. LEGGE ON JAPAN.

We find the following report of Dr. Legge's very interesting address on Japan in the *China Mail*:—

JAPAN AND THE JAPANESE.

The usual quarterly tea-meeting of the Union Church here was enlivened the other evening by a homely and extemporaneous, but nevertheless interesting address from the Rev. Dr. Legge, descriptive of his recent visit to Japan. The following is pretty nearly as taken down in the speaker's own words.

He began by saying that, although he went to Japan with the intention of keeping a journal, he was so puzzled with the difficulty of coming to conclusions, that he found himself unable to do so:—

We left Shanghai on the 25th of July, and about the end of the month (the 29th) we drew near to Japan, and caught the first sight of the outlying islands. I had been reading about the Japanese, and speculating in my own mind where they originally came from, and about the nature of their language; and now we should see them, hear them speak, and mix with them. I was all at sea about them when we drew near to their shores, and I must say I was all at sea when I left. The subject came up in conversation in every company which you entered; still one was unable to get to any conclusions of a more satisfactory kind other than those floating about regarding them.

My first impression was of the loveliness of the country; there were flowers in abundance—spots that seemed thick with daisies and buttercups, or gowans, as we call them in Scotland; spots where the soul seemed to find a repose, such as nowhere can be found in this country; and the atmosphere, too, was so clear and balmy. As we neared the harbour of Nagasaki our attention was attracted at the entrance by the island of Pappenberg, which possesses a peculiar interest. It was here that two centuries and a-half ago hundreds of Japanese Christians were precipitated over the steep and killed. Turning and advancing into the harbour I was forcibly reminded of that part of Lord Elgin's letters in which he makes a very happy allusion to this prospect. He says that the approach to Nagasaki is just a succession of Mount Edgecombes. Many of you will be familiar enough with the Edgecombe near Plymouth, famous as the loveliest spot in the South of England. Well, the entrance to Nagasaki harbour is quite equal to it in every respect.

Going in we dropped anchor: and if I was much impressed with the loveliness, I cannot but say I had an equally favourable impression of the people. They are, I think, originally descended from a colony of Chinese; but the Chinese element is here found better than in China, owing partly to the mixture of an older and better looking race of people, and partly to the better climate of Japan. The country very much resembles our own dear British land; it is hilly, full of metals, rocky, and surrounded by the sea. It is said by geologists that the formation of the soil of England is such as makes it the best place in the world for fully developing the human species; and I would say the same of the climate and soil of Japan. Even the Chinese who go there are better looking men than those we see here in Hong Kong. The features of the Japanese are well developed. I saw some who had noses as good as myself, with a full round eye, looking you full in the face. And then you would see the oxen coming from the country laden with the farm produce, and attended by the farmers' daughters, with their plump and ruddy faces—"sonsie lasses," such as I used to see some years ago in the north of Scotland—in Aberdeenshire. Now let me notice one little point more before we leave Nagasaki. Ascending to the top of a hill, where my family was, we found ourselves upon a beautiful flat of some acres' extent. I wish you could all of you go there for six weeks next summer, and see it for yourselves; it was so lovely a spot. Behind the house, overlooking the bay, upon a kind of platform, was a grove of fir trees, growing to about sixty—oh, a hundred feet overhead; and here the children of our friends and our own would be seen playing from morning to evening barefoot, as we used, some of us, contrary to our mothers' wishes, perhaps, to run about at home; no use for shoes—no use for anything but the branches of the trees. I had still the dregs of fever upon me, however, and did not enjoy the beauties as I should otherwise have done.

After about five days' stay, we left Nagasaki on our way to Yokohama. Entering the Inland Sea by the Straits of Simonoseki, we passed the place where the fighting occurred some time ago. Through the kindness of the captain, the vessel came to an anchor, and we were thereby able to enjoy ourselves all the better, and to walk on shore, and inspect closely the scene of the fight. The Inland Sea may be described as a mimic Mediterranean, and the Simonoseki Straits might be compared to those of Gibraltar; you pass from the one sea into a succession of immense lakes, as it were, and then out into the vast sea once more, on your way to Yedo Bay. It was on a fine evening, like those we have here now, that, having slipped anchor, we passed out of the Straits and into the Pacific of Japan, towards Yokohama, which lies in the Bay of Yedo. Approaching to the entrance there is an island called Breesa, or Ooshema, which is volcanic and continually active. We could see the smoke rising in columns, and resting over the island, by the light of the moon, and it brought to my mind the pillar of cloud mentioned as guiding the Israelites in the Wilderness. About a month afterwards we had even a better view of it, when there was no moonlight; then, looking through a glass, we could see as if the whole island were on fire, in the darkness of the night. Yokohama itself is a wonderful place. The growth of only a very few years, the town built by the merchants has a very compact and regular appearance; compared to Hong Kong, it is arranged with much more regularity. In Yokohama the impressions which I received at Nagasaki as to the loveliness of the country were confirmed. There the people were, in the month

Digitized by Google

of August—some may have had white trousers, but most with cloth; very few with alpaca coats, while many wore woollen ones; and all looked healthy. What a contrast there was when the *Adventure* arrived, bringing the skeletons of our soldiers and their wives and children from Hong Kong. The common remark was, "See, after being here for a while, how they will look!" and it was quite true. One friend whom I knew, and who looked miserable on his arrival, showing every appearance of consumption, was so changed after some short stay that I scarcely knew him to be the same person. This loveliness of country and salubrity of climate pervades all over the country. Walking for five or six miles into the country near Yokohama, you see this to great advantage. You can go along the Tokaido, the eastern road that is, extending along the eastern side of the island from Yedo; or you can go along another road—and a good road it is, some six miles long, which the Japanese have recently constructed for the use of Europeans, so as to keep them from frequenting the Tokaido. But we thought it much better to go into the fields; so we crossed the canal, and ascended a tall bluff of beautiful green. Then we wended our way through pathways, different from those in China, amongst fields of grain, turnips, cotton, potatoes, and cabbage, just as at home. By the paths also, and on either side of them, was a profusion of flowers—violets, pinks, clematis, camelias, and others, such as are not to be found in any other country. Even the children would soon gather a large bouquet. You could walk on for any distance through the fields, now hill and now vale, up and down into dells—or "dens" as we call them in Scotland—between hedges and among trees; in truth, the walks were endlessly diversified wherever we went.

We crossed the harbour from Yokohama to Kanagawa, and had a very pleasant walk to visit a temple there. The lawns are here very often prettily cultivated; the grass is soft and velvety; and before many of the merchants' houses in Yokohama you would see lawns equal to those so common in the family residences at home. Through the fields on this side, we noticed that they were equally well cultivated, every spot seemed to be availed of, either for grain or shrubs, or flowers. Any one staying a week or two about Yokohama and Kanagawa must be very reluctant to come back.

At Yokohama, my impression of the Japanese people received a little modification. Now, there is one thing which is not very pleasant in the Japanese, and that is the scantiness of their clothing. The expenditure of the mass of the people for clothing must be very small indeed in the course of a year. In this they bear a strong contrast with the Chinese. They are descended from a less cultivated race: and I was reminded of a line, which might read, "When wild in woods the naked savage ran." The women are equally pleasing with those in Nagasaki, but there is a freedom about their manners which is obtrusive and unpleasant. They are very cleanly, and their houses are kept wonderfully clean; which is another advantage they have over the Chinese, who we all know are very dirty and keep even their temples in a filthy condition. In Japan, the temples are not less clean than our own chapel, new as it is, and in the first blush of its beauty. Still, with all that, there was something in their social life I did not like. I asked our Chinese nurse, who was somewhat jealous for her people, what she thought of them; when she replied, "Perhaps they are clean and more comfortable; but what think you of their manners and their proprieties?" It was evident she was much less favourably impressed with their character and habits than I was myself.

Another habit in which I found the Japanese to indulge was intemperance. They are certainly more sociable than the Chinese; and it was not uncommon to see them fraternising with the soldiers, and walking together with their hands round the soldiers' necks, a thing not likely to be met with amongst the Chinese. The soldiers and the people, however, were fond of frequenting the grog-shops together, and the grog-shops there are even a greater nuisance than they are here. The Japanese are, in truth, an intemperate set, as compared with the Chinese; and on this fact being apparent, they seemed to go down in the scale. I was strongly reminded of an incident which I met with in London some years ago. When at the West End of the city one fine morning, and requiring a cab, I ascended the box beside the cabman in order to see about me and have a conversation with him. I told him that I had been in many parts of the world, in Malacca and China, when he asked inquiringly, "What sort of creatures are they in those countries? Are they at all civilised? Do they take their gin of a morning?" Such was cabby's idea of civilisation; and there is but little doubt but the Japanese are too much given to their saki in the morning as well as throughout the day.

Another point is of some interest regarding the Japanese customs. We are all very prone to form incorrect ideas about other nations and peoples; and are often amused to hear and read of the paper pocket-handkerchiefs which are used by the people of Japan, and which they sometimes throw away and sometimes put up their sleeves. It is a matter for us to smile at; but not so much either as we might think. The paper used for that purpose is quite different from our paper—is smooth and soft and even more comfortable than the grass-cloth of China, so often used in this manner by ourselves.

And now we may proceed to Hakodadi, the most northern of the ports open at present to foreign commerce. It is the capital of Yesso, the most northern of the larger islands which constitute the Japanese Empire. It is considerably colder than the southern ports, and its aspect is more akin to Scotland than anywhere, I think. I have ever been—of course a little more balmy and salubrious than Scotland is. We spent a fortnight at Hakodadi, and saw much of the Japanese. Near the establishments of Messrs. Dent and Co., where we resided, was the great area for burning the dead, which is a custom followed among the lower classes of the Japanese. I have seen sometimes as many as half-a-dozen bodies burning at once. Altogether there appears to be less regard for their dead amongst the Japanese than amongst almost any other nation. Burning seems repugnant to our natural feelings; and when they do not burn the bodies they bury them, and in a somewhat strange way; they are able somehow to double up the body of a large man into a box about three feet square.

Near this was situated a large Buddhist temple, where we saw the mechanical practice of wheel-praying, somewhat similar to the windmills used by the Kalmuk Tartars so ingeniously and effectively for the same purpose. The Japanese, however, have not attained to the windmill. They have a wheel in their temple doors, which, when in good preservation, well oiled, and in good condition, would run round on a tap for say thirty times; every bead which drops is a prayer ascended, and some may obtain fifty or even a hundred such. The wheels are common enough throughout Hakodadi. Another curious thing I noted here was this. Boxes of toothpicks were fixed up on the walls—about a foot square, and filled with bundles of toothpicks made of fragrant wood. These are put up by the owners, each bundle costing so many iron cash; and the people as they pass take their bundle and leave their money, which is, curiously, never taken away. I have often looked into the box and seen the cash accumulated; when empty, the money is taken by the owner and the box replenished. It brought to my recollection that part of the life of Confucius, in which it is said that his government was so effective, that every one got so honest that a purse found by any one was never kept by the finder. A European resident remarked, "What can you say against the Japanese? Would a box full of pence hang anywhere in England and not be touched?" Certainly the incident of the toothpick boxes took my fancy as a peculiarity of the Japanese people.

The Island of which Hakodadi is the capital is not one-tenth peopled, which is a proof that Japan is comparatively an infant nation—probably within our Christian era. Remains still exist in the extreme north of the aboriginal race, who have been driven up country before the Chinese immigrants; but this island is even yet not one-tenth inhabited. We started one morning for a ride, and rode about 22 miles before noon, halting on the shore of the Camona lakes, the banks of which were finely wooded; and which, with their wooded islets in the water and girdling mountains of beauteous fertility, make them one of the most attractive spots for travellers in Japan. Next day, after being a few miles on the road, we turned off to visit a very, or comparatively, high mountain, between 3,000 and 4,000 feet in height. In the side of it lies the crater of a volcano, which though not at present in eruption, may break out any day: to the top of this was a toilsome journey, but we were well repaid on reaching the top. All the way up was strewn with pumice stone and other rubbish, and the smell of sulphur was very strong as we drew near. The whole side of the mountain had been thrown out; and the depth of the crater was 70 feet, and probably a mile and a half in circumference. Walking down about a furlong, the smoke we could see issuing, as it were, from a hundred furnaces, and the noise seemed like that of a hundred steam engines. A little farther on still, and we reached the centre, where were three or four holes steaming like fire-engines. Stones and mud which we put in here were thrown up several feet; and I was never more impressed with the resistless energy and the power of God. The entire side of the mountain had been thrown out upon the woods below. It was in eruption the last time in 1855, when the earthquake destroyed Simoda and Yedo; and the woods for several miles round were altogether destroyed by the earth and lava which had been thrown down. New woods were now growing, but all through the forest were seen the tall dead trunks of the former growth. Descending from the volcano, we continued our ride to Suwara Bay, in all nearly fifty miles into the interior. The country was very thinly peopled, and few villages existed on the way. The trees we saw were the oak, horse-chestnut, beech, elm, and in fact every tree familiar in Scotland; and the people were always civil. There appeared to be no fear of the natives felt whatever; and no lady in Japan ever loses her sleep from fear of the people. Wherever you go, there are tea-houses, where you are supplied conveniently with refreshments, and are able to pass the night very comfortably.

I have not had time to say anything of the religions of Japan, nor was I able to satisfy myself as to their nature while I was there. I have referred to the destruction of Christians precipitated from the Island of Papenberg. In the sixteenth century Xavier and other missionaries entered Japan; but there was not then the same exclusiveness as now. They were received in a friendly way, and the truth made great progress, the converts being estimated at 1,800,000. Many of the feudal princes—for Japan is a feudal empire, as our own country was some hundred years ago—became adherents of the Catholic party. In its feudalism, I thought Japan was more like what England had been a few hundred years ago than any other country in the world; and many passages from Chaucer occurred to my mind, and seemed to apply most peculiarly to Japan as it now is. Many princes, as I have said, were adherents of the Catholic party; but suspicion was somehow awakened, and persecution broke out. The Christians formed a party of resistance, but they could not effectually defend themselves, and were consequently exterminated. The final blow was struck at the Fort of Simabara, in the island of Kiu-siu. At the reduction of this fort, even the Dutch were found fighting against the Christians; in fact, the entire history of that period is a strange tangled web. At all events, when the fort was reduced, and the Christians slain, thousands were buried in one large grave, and the following inscription put up by the Japanese:—"As long as the sun shall warm the earth, let no Christian be so bold as to come to Japan; and let all know that the King of Spain himself, or the Christians' god, or the great God of all, if he violate this command, shall pay for it with his head." By the Christians' god, I fancy they must have meant the Pope; but more blasphemous and bolder language was certainly never published on the face of the earth before. This policy has been continued much the same up to the present time. In travelling, you can see, on the gateways leading into many villages, the statutes against the Christians, offering rewards for the teachers or followers of the truth. Were missionaries to preach in public, not one of the people would dare to listen to them. After the Christians were exterminated, there used to be a particular day of the year set apart for trampling publicly upon the cross. This is now, however, abolished; and we are permitted to build churches, while Protestant and Roman Catholic missionaries are often asked to teach Japanese officers English, French, and different sciences, only they must not use the Scriptures. Many pupils privately read the Bible, and inquire of its meaning; some merchants have even applied to me, for copies to give to their retainers and some of the Daimios. A change is evidently coming over the people; and I felt I should bring before the English public the field now opened to Christianity there. Missionaries are learning the language and preparing for it; America has forestalled us there, and there is not a protestant European missionary there at all, although our commerce is ten times that of America.

NOTICES TO CORRESPONDENTS.

No notice can be taken of anonymous correspondence. Whatever is intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication, but as a guarantee of good faith.

A REGISTER is kept of the addresses of all persons connected with the FAR EAST and reference can be made to the same by personal application at the office or by letter.

Any information required by Subscribers, in reference to Commercial or General matters in CHINA, JAPAN, SINGAPORE, *and other parts of the* FAR EAST, *will be supplied on application at the Office, where files may be seen of the Journals published in those countries.*

THE LONDON AND CHINA EXPRESS.

PUBLISHED on the departure of the Mails *via* Marseilles on the 10th, 17th, and 26th, contains a Summary of European, American, and General News; Commercial and Shipping Reports, and Special notices of Trade with the FAR EAST.

Subscription 54s. per annum, including Postage. Export Supplement 12s. extra.

The London & China Telegraph.

LONDON, THURSDAY, JAN. 4, 1866.

OUR JAPANESE VISITORS.

HIS Excellency Shibata Hionga no Kami and suite leave London to-day for Paris, intending to make a short stay in France, and leave Marseilles for Japan by the Messageries Imperiales steamer on the 19th instant. During a stay of barely three weeks in this country they have visited under the able guidance of Major Brine, a great number of national institutions and other places of interest, as will be seen by the following outline of their itinerary. It is worthy of remark that they have wasted no time in pleasure-seeking, or mere sight-seeing; their investigations having been strictly confined to objects of a useful and thoroughly practical nature. On the 18th December they inspected Woolwich Dockyard, examined Her Majesty's ships *Prince Albert* and *Black Eagle*, and visited the Army and Navy Club. On the 19th *The Times'* office, the Bank of England, and the Mint were visited. On the 20th, the Blakely Ordnance Works, the Royal Exchange, the Tower, and the London Docks. On the 21st, Chelsea Hospital, the Naval and Military Asylum, and the Metropolitan Railway. On the 22nd they proceeded to Portsmouth by the South-Western Railway, and went on board the *Royal Alfred* the same day. On the 23rd Portsmouth Dockyard was inspected, as also the iron-clads *Minotaur* and *Scorpion*. On the 23rd Hilsea Barracks, Fort Southwick, and Gosport were visited. On the 26th they proceeded by railway to Plymouth, and the following day visited Devonport, the Raglan Barracks, Plymouth Breakwater, and the Albert Bridge at Saltash; also the dockyards at Devonport and Keyham. On the 28th the party returned by the Great Western Railway to Paddington terminus, and resumed their former quarters at the Langham Hotel. On the 29th they went to Westminster Abbey and the Houses of Parliament, and the following day to Millbank Penitentiary and Williamson's sword factory. On the 1st of January they started for Ipswich, and there visited Messrs. Ransome and Sims' manufactory of agricultural implements, and the works of the Patent Concrete Stone Company. On the 2nd they visited Mr. Herbert Watkins, photographer, of Regent-street, and afterwards went to the South Kensington Museum, and the Horticultural Society's grounds, also the London Fencing Club. And on the 3rd, the day preceding their departure, his Excellency the Commissioner had a farewell interview with Lord Clarendon at the Foreign-office.

On the evening of the 29th December his Excellency gave a banquet at the Langham Hotel to a large party of naval and military officers, and gentlemen connected with the various institutions visited by the party. The Commissioner, who possesses in an eminent degree that courtly bearing for which his countrymen are noted, received the guests in a most hospitable and kindly manner, in which he was aided by Colonel Brine. The dinner was unexceptionable, and when the party broke up at a late hour it was evident that the entertainers and their guests were mutually pleased with each other. Thirty-five persons sat down to dinner, among whom were the following:—General Sir J. Burgoyne, Bart, G.C.B., Constable of the Tower; Colonel Sir J. Wilson, C.B., Chelsea Hospital; General Hutt, C.B., Secretary, Chelsea Hospital; Commodore Dunlop, Superintendent of Woolwich Dockyard; the Master of the Mint; Colonel Whimper, (Tower of London); Colonel Adams, Secretary of the Naval and Military Asylum; Captain Burgoyne, C.B., H.M.S., *Wyvern;* Captain the Hon. G. Wrottesley, A.D.C.; Mr. Sydney Locock, Secretary of the Japan Legation; Mr. Briggs, Secretary to the Admiralty; Mr. Horley, Secretary, Bank of England; Mr. Myles Fenton, General Manager of the Metropolitan Railway; Mr. Wright, of the *London and China Telegraph;* Mr. Paice, Superintendent of the London Docks. Among those invited, whose engagements prevented their presence, were—Gen. Sir A. Woodford, G.C.B., the Governor and Deputy-Governor of the Bank of England; Mr. Simonds, of *The Times;* Lieut.-General Buller, Admiral Sir Michael Seymour, and Colonel Sir Wm. Gordon.

It is not generally known, we believe, that H. E. Shibata Hionga no Kami, and Midzousima, the chief secretary, were among the party who visited this country in 1862. They have a vivid recollection of the splendours of the International Exhibition of that year, but state that they have found so many novelties and evidences of progress as to render their present visit most interesting and instructive.

RAILWAYS FOR CHINA.

SIR RUTHERFORD ALCOCK'S arrival in China as Minister-Plenipotentiary at Peking has been availed of by the colonists at Hong Kong, and the English residents at Shanghai, to lay before his Excellency matters of public interest for the further development of British relations in that country. Among these, the important subject of introducing railways into China, was brought forward by a deputation from the Railway Committee at Hong Kong, which we noticed at length in our last issue. It would appear that the supporters of Sir MACDONALD STEPHENSON'S project for opening up the interior and bringing it into connection with the Indian lines of railway, are not hopeful of carrying out the preliminary section from Canton to Fatshan, and they asked the advice of Sir RUTHERFORD upon the question generally, hoping that he would aid the company in accomplishing the objects in view. His answer was so far favourable that he agreed with the proposed introduction of railways, and they might depend upon his support and influence with his colleagues at Peking. This is satisfactory, seeing that his predecessor, Sir FREDERICK BRUCE, was decidedly opposed to any such undertakings, and when STEPHENSON was intending to visit Peking on his mission, he wrote to Mr. LAY to "choke him off." However, the new Minister does not hold out much hope, at least of a speedy realization of their wishes; and recounts the opposition of the mandarins, and the people hostile to foreign innovations. On these questions few can speak with greater authority than Sir RUTHERFORD, whose experience in China is of such long standing. "It was clear," he replied to the deputation, "that every measure which tended to remove and "annihilate distance between the central seat of Government and "the provincial governors would be very unpopular with the "latter, as it must necessarily diminish their authority, and "create a close supervision of their proceedings. Great oppo-"sition must naturally be looked for from the local autho-"rities." We entirely agree with these remarks; and the great error committed by the representatives of the company was in applying to the Governor of the Quantung province at all, as his refusal would tend to damage their prospects, while his assent would have been of little or no use. Now that our new Minister at the Court of Peking entertains a favourable opinion of the project, all future applications for privileges should be made at head-quarters. But these applications must not be all one-sided—the direct pecuniary profit to go into the pockets of English or other foreign shareholders; while the boon to the Chinese takes no tangible shape. If the Government are asked to grant certain concessions of land and other benefits to the company, they are certainly entitled to a royalty for the concession. In view of some substantial income for allowing the innovation, there is no doubt that, with the prospect of replenishing the Treasury, there would be little difficulty in securing ample powers for the construction of railways in China. Under the Regency that exists the time is propitious, as it is well known that the Prince of KUNG and the Chief Minister, WEEN-SEANG, are both well-disposed towards foreigners, especially the English.

The next point for consideration is the general scheme proposed by Sir MACDONALD STEPHENSON. As we have formerly expressed our opinion, so we still hold that it is too gigantic for any practical mind to entertain. Hence it should be shorn of its exuberant proportions, and reduced to some more feasible

Digitized by Google

plan. On this point Sir RUTHERFORD ALCOCK gave good advice, as to where the preliminary line should be laid down. "He thought that a line as near as possible to the central seat "of Government would be preferable, as coming more under "the immediate notice of those whose attention should be "drawn to the desirability of railways." Not only is that an important consideration, but the northern provinces present many more advantages for the construction of short lines, both in a profitable and engineering point of view, than the south of China. The merchants of Hong Kong and adjacent ports cling to the fond hope of restoring the faded glories of Canton by laying down a line of railway from thence across the Meiling Mountains to the tea districts and Hankow. This is a futile conception, for the purpose, apparently, of benefiting the few individuals who have property in the Shameen Settlement. The days of southern monopoly of trade are gone, and since then the current of commerce has flowed in its natural channel down the Yang-tsze River, from the central tea districts. It would be a waste of capital to commerce laying down a line in that direction, which might never be completed. If the company are in earnest let them take Sir RUTHERFORD'S advice, and look for some locality in the north for laying down a short preliminary line. Had Sir MACDONALD STEPHENSON gone to Shanghai instead of Hong Kong to enlist the co-operation of the mercantile community, he might have seen a line of country more favourable for railways, but the residents less inclined to assist his views. At that time the merchants of Shanghai were of the BRUCE stamp, and inclined to "choke him off." Since then, however, things have changed in the "model settlement," and the infusion of new blood, together with the transfer of the central legal institutions from Hong Kong, make it now a less prejudiced community at local improvements than formerly. Under these circumstances it just possible that the first line of railway in China may be from Shanghai to Woosung.

In our remarks upon this subject we are only anxious not to underrate the difficulties which, from the causes referred to, attend it. We feel assured that, taken up as the question o railways in China has been by the leading houses connected with the country, and by others whose previous exertions in the same direction have been so signally successful, there can be no doubt of their introduction into China, and, once introduced, of their rapid extension throughout the empire. "*Ce n'est que le premier pas que coute*" is nowhere more applicable than to the undertaking before us. It is a question of time, but probably of a much shorter period than may be supposed. Events are occurring, with previously unknown rapidity, which are changing all our preconceived ideas and habits. The China of the present day is not the China of the past, and the party of progress at Peking is at least as powerful as the anti-foreign party. Whatever motives may hereafter induce the Chinese Government to adopt railways, we may be sure of one thing, that, once convinced of their remunerative character, the Chinese are sufficiently alive to their own interests to find the means to remove all minor obstacles in the way of their adoption.

SILK IN FRANCE AND ITALY.

THE silk markets of the Continent begin to exhibit some slight changes in their condition. The returns of silk registered at Lyons during the two past weeks showed an increase of nearly nine thousand pounds, in weight, in the former, and more than double that amount in the latter case. Comparing these weeks with the corresponding ones of last year, we find an increase, for the two taken together, of more than thirty thousand kilogrammes, or thirty tons! The silk which arrived lately from the East was purchased eagerly enough, but it is said that there is now an inclination in favour of French and Italian silk, although their price is still higher than the Chinese and Japanese. The *bulletins* of the Lyons *Conditioners* certainly exhibit a slight increase in that direction, and some accounts from Marseilles said that the late large arrivals of silk and cocoons have rendered the holders a little less firm as respects terms, but later advices say that the market at the last named place has only become calm since the late public sales, that the position is still good, and that cocoons are in demand at very good figures. At Aubenas the silk winders, who had closed their factories for want of French silk, are now re-opening them, in order to wind Chinese and Japanese silk. Accounts from Genoa and Milan show that the trade is waking up in these quarters. In fact, the scarcity of the fabricated article will practically compel the winders and weavers to work; the only question is, whether there is any danger of the European market being overstocked with silk from the East, and there is no evidence of such a tendency yet, although the danger may exist nevertheless.

The complaints of the unfortunate French silkworm breeders and the discussions thereon have brought out an interesting fact respecting the cultivation of silk in France. HENRY the FOURTH determined, with the aid of the great horticulturist, OLIVER DE SERRES, to relieve his subjects from the annual tax which they paid to foreigners for silk stuffs, and had fifteen thousand mulberry trees planted in the gardens of the Tuileries; France now possesses twenty millions of these trees, produces on an average two millions of pounds weight of silk annually, and yet to keep her hundred thousand looms going is obliged to buy twice as much of the raw material as she produces at home. The progress of the silk trade has been far more rapid of late years than ever, so that even should the silkworm, or mulberry tree disease suddenly disappear, and the French crop resume its average importance, there is likely to be still a large demand for raw silk from the East, for the produce of other countries in Europe is no more likely to become super-abundant than that of France, especially now that Italy has commenced, as to all appearance she has, a new era of commercial activity. Silk dresses are not likely to fall out of fashion, and no sumptuary laws or tendency towards economy is likely to diminish the amount of the dressmaker's bills.

PRINCE NAPOLEON GOING EASTWARD.

IT is said at Havre that orders have been received to prepare the vessel in which Prince NAPOLEON visited the north a few years since for a long voyage, and rumour declares that the next excursion of his IMPERIAL HIGHNESS will be a voyage of exploration, for scientific and artistic purposes, to the Far East, and that he will depart, with several companions, in the month of April next. If we remember rightly, the vessel alluded to was much too small for a trip to the Chinese or Indian seas, and therefore either the excursion will be confined within narrower limits than those suggested, or it will be made in a vessel of larger capacity. Moreover, it has been expected in Paris that the PRINCE would resume the presidency of the Commission of the Universal Exhibition of 1867; and a voyage to China commencing in April would not leave much time for the president to take part in the preliminary arrangements connected with that important undertaking. On the whole, we are inclined to conclude that Prince NAPOLEON will not visit China, just at present at any rate.

PIRACY IN THE CHINESE SEAS.

(MITCHELL'S MARITIME REGISTER.)

The French Government has taken up the question of the increase of piracy in the Chinese waters, and the Minister of Marine has, it is stated, addressed a circular to the Chambers of Commerce at the French ports, strongly recommending shipowners who send vessels to those seas to furnish them with arms and ammunition. More than twelve months since we made a similar suggestiou to our shipowners, and this defensive movement has been facilitated by the shipment of men belonging to the Royal Naval Reserve, who are trained to the use of guns. It is very well that merchant ships in the China trade should be provided with the means of meeting any of those sudden attacks to which they may be exposed in the Chinese waters, but piracy there has assumed dimensions which can only be successfully dealt with by a properly organised and sufficiently numerous naval force; and it is quite time that such a force was placed at the disposal of the commanding officer on the station. Since the *Netherby* was attacked and nearly captured by a horde of Chinese pirates in the April of last year, in the Formosa Channel, these miscreants have greatly increased in numbers and audacity, and their depredations have combined massacre with pillage. The squadron on the China station is confessedly unequal to the task of checking, much less of suppressing, this state of things. Many of the gunboats are said to be unseaworthy, and those vessels that are fit for service are not of the requisite speed and draught of water for hunting up and catching the piratical junks and lorchas which now abound on the Chinese coast, taking advantage of its configuration to elude, if not to defy, pursuit. It is under these circumstances that we find it announced that Sir Rutherford Alcock has been despatched to Peking, and that the French Government has taken up the subject, and have communicated their views to the French shipowners in the China trade. The latter cannot, any more than our shipowners, meet the occasion—which, if it be effectually met at all, must be by the co-operation of the two Governments. It has been suggested, and with much apparent propriety, that a share of the cost of maintaining a sufficient force on the coast of China should be borne by the Imperial Treasury. The suppression of piracy is quite as much the concern of the Chinese themselves as of the States trading with them. Many of these pirates are, no doubt, the remains of that rebel horde which we were instrumental in subjugating to the Imperialists, and who now take to the calling of sea robbers, being without occupation on land. It is stated, indeed, that many of the pirate captains are Europeans, and not a few Americans, and that in some districts the pirates are protected by the Chinese local authorities,

Digitized by Google

who may, possibly, participate in their gains. The trade with China since the Treaty of Tien-tsin has been gradually and steadily on the increase, and the revenue derived from it by the Chinese Government is said to be not less than three million sterling per annum. The Government of Peking can, therefore, well afford to pay the few thousands which may be required to put down an organisation which, if it be not taken in hand resolutely, will shortly render the navigation of the Chinese waters a simple impossibility. We have no reason to suppose that the Government of Peking will refuse to co-operate in the necessary work, and to contribute their quota towards the expenses it may involve. A combined fleet of French, English, and American gunboats, of the requisite speed and draught of water, and commanded by smart, energetic officers, would very soon clear the Chinese coasts, bays, and islands of the pest which now infests them. Nothing short of an adequate force will do this. The Chinese Government are powerless to abate the nuisance; but seeing that they have profited, and are profiting, so largely by the commercial enterprise of the foreigners trading in the waters of China, they cannot, in common fairness, object to contribute towards the protection of the trade from which those profits are derived. We are at a considerable cost in maintaining a military establishment at Hong Kong, where the troops are not required, and where the climate is most unhealthy. The expenses of that establishment might be reduced considerably, and the money thus saved appropriated as our share of the cost of exterminating piracy. The French Government, beyond suggesting measures of self-defence to the French shipowners engaged in the China trade, do not appear to have determined on any course of action. But France is so deeply interested in clearing away all difficulties in the way of the expansion of that trade, that we shall be much surprised if, in our efforts to put down piracy in the Chinese waters, we have not the hearty co-operation of the French Government. The pirates of Borneo and of the adjacent islands were some years since scattered by the display of a little resolution, and the seas they infested have since been comparatively safe. It is time the example set by the Rajah Brooke and "Nemesis" Hall should be followed by our commanders on the coast of China.

MORTALITY AMONG THE TROOPS AT HONG KONG.

The following letter appeared in the *Standard*:—

Sir,—As the mortality and sickness amongst the troops, women and children, stationed at Hong Kong, has brought forth various letters, permit me to suggest, through your influential paper, that the Government could not perform a wiser or a cheaper act than to send half-a-dozen of our useless wooden men-of-war, now anchored (I suppose to rot away) in the Medway, to Hong Kong as floating barracks for the troops during the hot months of the year. Those who have resided in Hong Kong, and ever slept off the island on the Kowloong side of the harbour, on shipboard, can appreciate the value of the pure sea air, and a night's sleep during the hot months. Medically, I can vouch for the value of the proposition. Ships should not be crowded, but actually a double space allowed for free ventilation. Men, women, and children could go on shore by day, or when necessary for light duty or private wants; but sleep, by all means, off the land; especially in such poison-holes as, chosen and built on, "the Murray Barracks and Hospital." I would suggest another matter through your journal. It is a larger allowance of fresh provisions for troops in such a climate, and a liberal allowance of proper stimulants. Major-General Jervois, in 1851 to 1854, under whose command I served at Hong Kong, gave me really a *carte blanche* to give my poor soldiers, women and children, of various regiments then under my direction, anything I thought would restore health or support the feeble or sickly. Immediately I dealt, "not in physic," but drew largely on the commissariat department "for all things good," and from nature and sea-air ventilation the results were satisfactory to all; and the thanks of Sidney Herbert, Secretary at War, through the Commander-in-Chief in China, were given me afterwards.—Yours obediently,

J. M'GRIGOR CROFT, M.D., Member of the Royal College of Physicians, London, formerly Medical Officer of Her Majesty's Ceylon Rifles, China and Ceylon; and Staff-Surgeon to Her Majesty's Forces.

Mandarin Villa, St. John's Wood, Dec. 27.

CAPTAIN RICHARD BOROUGH CRAWFORD, R N.—The above gallant officer, who died at 12, Belgrave-road, St. John's Wood, on the 24th of December, aged 62, entered the navy Aug. 1, 1814, and when midshipman of the *Esk*, and in charge of a prize slaver with one gun and five men, beat off, after an action of two hours, in which he was wounded, the Spanish pirate *Caroline*, of 10 guns and 97 men, for which he was officially mentioned in the *Gazette* and promoted. He was frequently engaged in the capture of slavers while serving in the *Esk*. When subsequently mate of the *Etna* he was severely wounded at Algiers. He was a volunteer on the coast of China, and served in the *Phlegethon*, at Amoy, where he planted the British colours for the first time, and led a party of 50 men at the destruction of barrack, &c., at Kittom Point; also at Canton, Chusan, and Shanghai, in 1842. He commanded the *Mutine* in the Mozambique, where he was actively employed in suppressing the slave trade in 1845 and 1846. He commanded the *Goryon* from 1854 to 1856, May 10 of which year he obtained post rank. He commanded the *Sidon*, 22, at Cape of Good Hope, from 1859 to 1862, and was placed on the retired list July 1, 1864.

PATTERN POST TO THE COLONIES.—On the 1st of January, and thenceforward, the prohibition which now exists to the transmission, as patterns, of articles of intrinsic value by the post, between the United Kingdom and the colonies, will be withdrawn. Further, the rule which forbids the transmission through the post of any article which might injure the contents of the mail bags or the officers of the Post-office, is so far relaxed as to permit the transmission of scissors, knives, razors, forks, steel pens, nails, keys, watch machinery, metal tubing, pieces of metal or ore, and such like, as samples, provided that they be packed and guarded in so secure a manner as to afford complete protection to the contents of the mail bags and the officers of the Post-office, while at the same time the samples may be easily examined. If any packet containing such articles as these be posted which is found not to be sufficiently guarded it will be stopped. Samples of seeds and similar articles may also be sent in bags entirely closed, if transparent, so that the officers of the Post-office may satisfy themselves of the nature of the contents. In exception to the rule permitting articles of intrinsic value to be forwarded, it must be understood that such articles cannot be forwarded to the colony in the mails *viâ* Marseilles.

PACKETS POSTED FOR TRANSMISSION ABROAD.—On the 1st of January, and thenceforward, any letter or packet whatever, with the following exceptions, posted for transmission to any British colony or foreign country, which may be found to exceed two feet in length, or one foot in breadth or depth, will be stopped and sent to the returned letter branch. The exceptions are as follows, viz.:—1. Packets to or from any of the Government offices or departments, or public officers. 2. Petitions or addresses to the Queen, whether direct to Her Majesty or forwarded to any member of either House of Parliament. 3. Petitions to either House of Parliament, forwarded to any member of either House. In the case of packets of books and samples addressed to France or Algeria, the dimensions must not exceed 18 inches in length, breadth, or depth.

BOARD OF TRADE RETURNS.

The Board of Trade returns for the month and eleven months ended the 30th November show that commerce generally is in a satisfactory and improving state. The total value of exports for the November of the present year was £15,567,742 against £12,065,213 in the corresponding month of 1864, and £12,758,323 in that of 1863, showing an increase of £3,502,529 over the former period, and of £2,809,419 over the latter. For the eleven months of the present year the total was £150,832,344, against £148,340,865 in 1864, and £132,135,368 in 1863, being an increase over 1864 of £2,491,479, and of £18,696,976 over 1863. These returns exhibit the important fact that, with the aid of the large increase which has taken place during the month of November, the exports of the present year have now exceeded in amount those of the busiest years in our commercial history. In the fact that we are now doing a larger export business than we have ever done before, and that a great portion of this business is conducted upon credit, we have an explanation of the increased demand for money lately experienced. The simultaneous increase in the imports points in the same direction. Under this head there was a decided augmentation in the month of October, the import figures, as regards the chief articles, being £23,606,789 for October, 1865, against £20,309,746 in October, 1864, and £20,394,503 in October, 1863. So far as distinctively classified, the trade with the Far East is represented in these returns by the figures following:—

EXPORTS TO CHINA AND HONG KONG.

	1863.	1864.	1865.
	For the Month ended 30th November.		
Cotton yarn	379,474 ..	72,800 ..	3,000 lbs.
Cotton manufactures ..	3,158,419 ..	8,279,580 ..	18,945,839 yds.
Worsted stuffs	874,883 ..	1,261,850 ..	2,143,111 ,,
Woollen and worsted cloths	89,867 ..	111,053 ..	148,566 ,,
Lead	1,450 ..	680 ..	354 tons.
	For the Eleven Months ended 30th November.		
Cotton yarn	2,004,184 ..	1,835,693 ..	924,178 lbs.
Cotton manufactures ..	43,007,461 ..	65,906,083 ..	117,300,067 yds.
Worsted stuffs	8,276,044 ..	13,145,096 ..	15,665,443 ,,
Woollen and worsted cloths	1,518,192 ..	1,616,541 ..	1,531,368 ,,
Lead	13,457 ..	7,319 ..	2,056 tons.
	Value for the Eleven Months ended 30th November.		
Cotton yarn	£215,084 ..	£226,090 ..	£88,566
Cotton manufactures ..	1,063,212 ..	1,832,465 ..	2,572,640
Worsted stuffs	581,017 ..	874,363 ..	1,156,922
Woollen and worsted cloths	279,639 ..	280,569 ..	248,515
Lead	287,112 ..	159,915 ..	43,562

The Cotton Manufactures exported to other ports and countries in the Far East were, in quantity for the month, and in value for the eleven months, as follows:—

	1863.	1864	1865.
	Quantity for the Month ended 30th November.		
Ceylon	3,229,567 ..	653,638 ..	2,372,303 yds.
Singapore	3,596,694 ..	3,693,817 ..	824,028 ,,
Java	1,742,706 ..	— ..	1,547,149 ,,
Philippine Islands ..	180,019 ..	— ..	2,190,798 ,,
	Value for the Eleven Months ended 30th November.		
Ceylon	£430,607 ..	£391,024 ..	£342,315
Singapore	595,829 ..	644,016 ..	790,208
Java	347,334 ..	484,882 ..	588,339
Philippine Islands ..	324,391 ..	546,257 ..	676,606

Of Cotton Yarn the quantity forwarded to Singapore in the month of November in the present year was 18,200 lbs., and in the eleven months 1,092,600 lbs.; the value for the latter period being £103,494, against £126,790 in 1864, and £203,045 in 1863. To Ceylon 45,700 lbs. of cotton yarn was sent forward in the month, and 312,900 lbs. in the eleven months; the value for that period being £30,541, against £26,707 in 1864, and £58,413 in 1863.

IMPORTS.

The import of Raw Cotton from the East presents the figures following:—

Digitized by Google

Quantity for the Month ended 30th November.

	1863.	1864.	1865.
British India.. ..	352.293 ..	428,815 ..	296,925 cwts.
China	23.682 ..	82.458 ..	6,805 „
All parts	494,726 ..	621,100 ..	630,588 „

Quantity for the Eleven Months ended 30th November.

British India.. ..	2,964.278 ..	3.784,562 ..	3,422,830 cwts.
China	235.244 ..	691.594 ..	315,836 „
All parts	4,720,853 ..	6,767,896 ..	6,946,153 „

Value for the Ten Months ended 31st October.

British India.. ..	£22,051,712 ..	£29,183,930 ..	£18,555,442
China	1,545,833 ..	5,174,553 ..	1,509,235
All parts	37,675,165 ..	62,098,915 ..	43,899,564

Of Unrefined Sugar the quantity imported from Java and the Philippine Islands during the month of November was 1,550 cwts. of the 3rd quality, and 24,448 of the 4th. The comparative importation for the three years is stated as follows:—

Quantity for the Eleven Months ended 30th November.

	1863.	1864.	1865.
Of all qualities (cwts.)	730,358 ..	408,114 ..	554,365

Value for the Ten Months ended 31st October.

Of all qualities	.. £649,178	.. £258,670	.. £521,793

Of Hemp the import from the Philippine Islands in the month of November was 15,158 cwt., and the business for the year is given thus:—

	1863.	1864.	1865.
Quantity to 30th Nov. (cwts.)	254,507 ..	160,246 ..	194,846
Value to 31st Oct.	£319,772 ..	£235.085 ..	£275,411

Of Raw Coffee the quantity delivered from Ceylon in November was 9,991,036 lbs., and the trade of the three years is represented by the figures following:—

	1863.	1864.	1865.
Quantity to 30th Nov. (cwts.)	66,108,754 ..	64,254,355 ..	77,947,653
Value to 31st Oct.	£2,252,999 ..	£2,041,456 ..	£2,334,907

The Declared Value of British and Irish Produce and Manufactures exported to the Far East for the ten months of the three years is returned thus:—

Exports for the Ten Months ended 31st Oct.

To	1863.	1864.	1865.
China (exclusive of Hong Kong).	£2,036,926 ..	£2,456,578 ..	£2,778,556

FREIGHTS AND CHARTERS.

Since our last impression, the Christmas holidays having intervened, no change of any note has taken place in outward freights, but up to the present time no difficulty is experienced in placing ships for the outward voyage.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Shanghai: 40s. weight, 30s. to 35s. meast. To Hong Kong: 40s. weight, 30s. meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Ceylon: 40s. weight, 20s. measurement.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per Keel. For Batavia: £30. For Hong Kong: £44. For Galle: £35. For Singapore: £32. For Shanghai: £53.—From Newport, Cardiff or Swansea, per ton. For Batavia: £1. 7s. For Hong Kong: £2. For Manila: £1. 11s. For Galle: £1. 7s. 0d. For Singapore: £1. 12s. 6d. For Shanghai: £2. 10s.

CASUALTIES.

The Dovercourt, Heigho, from London, for Singapore, put back into the Downs Dec. 30, and was supplied with an anchor and part of chain to replace other lost.

MISCELLANEOUS.

The Kew Kee, Fuller, from Liverpool, for Shanghai, which put into Rio Janeiro Oct. 6, has been surveyed, and has been recommended to restow part of her cargo, after which she will be fit to proceed for her destination.

LAUNCH.—On the 1st instant there was launched at Aberdeen, from the building-yard of Messrs. John Duthie, Sons, and Co., the fine clipper ship *Sir William Wallace*. The vessel was named by Mrs. Tulloch (wife of James Tulloch, Esq., junior, the owner), and entered her native element amidst the cheers of a large party of friends and spectators. The *Sir William Wallace* measures 1,091 tons, and is certainly one of the noblest and finest finished vessels ever launched at Aberdeen. She is to be commanded by Captain A. H. Taylor, late of the China clipper *City of Aberdeen*, and will leave London for China, *via* Sydney, the end of February.

PORT OF AMOY.

SHIPOWNERS, AGENTS and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power ensuring despatch in all states o the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer, and a Blacksmith. Dry Godowns for the reception of vessel's stores, &c., when requiring to discharge them.

Amoy, March, 1865.

IMPORTANT ANNOUNCEMENT

JOSEPH GILLOTT,

METALLIC PEN MAKER TO THE QUEEN

BEGS to inform the Commercial World Scholastic Institutions, and the Public generally that by a novel application of his unrivalled Machinery for making Steel Pens, he has introduced a NEW SERIES of his useful productions which, for EXCELLENCE OF TEMPER, QUALITY OF MATERIAL, and above all, CHEAPNESS IN PRICE, must ensure universal approbation, and defy competition.

Each Pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with label outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition J. G. has introduced his WARRANTED SCHOOL and PUBLIC PENS, which are especially adapted to their use, being of different degrees of flexibility, and with fine medium, and broad points, suitable for the various kinds of Writing taught in Schools.

Sold Retail by all Stationers and Booksellers. Merchants and Wholesale Dealers can be supplied at the Works, Graham-street, Birmingham; at 91, John-street, New York, and at 37, Gracechurch-street London

Keating's Cough Lozenges.

JUDGED BY THE IMMENSE DEMAND this Universal Remedy now stands the first in public favour and confidence: this result has been acquired by the test of fifty years' experience. These Lozenges may be found on sale in every British colony, and throughout India and China. They have been esteemed wherever introduced. For COUGHS, ASTHMA, and all affections of the Throat and Chest, they are the most agreeable and efficacious remedy.

Prepared and sold in boxes and tins of various sizes, by THOMAS KEATING, Chemist, &c., 79, St. Paul's Churchyard, London. Sold retail by all druggists and patent medicine vendors in the world.

N.B.—To prevent spurious imitations, please to observe that the words "KEATING'S COUGH LOZENGES" are engraven on the Government Stamp of each Box, without which none are genuine.

IMPORTANT

TO PERSONS RESIDING IN HOT CLIMATES.

ASH'S PATENT "PISTON" FREEZING MACHINE AND WINE COOLER is the FIRST REALLY EFFECTIVE APPARATUS for TROPICAL CLIMATES.

It will produce PURE BLOCK ICE, FREEZE and MOULD DESSERT ICES, and ICE WINES in any temperature. It is remarkably simple, will not corode or get out of order, and can be worked (with or without Ice) by the most ignorant servant. The Freezing Salts employed are indigenous to most hot climates, easily and cheaply obtained. A *bona fide* Receipt for preparing them given with each Machine. It is not too much to say that the "Piston" Freezing Machine is rapidly becoming indispensable to all European residents in India and China.

PRICES:—For 1 Bottle, 1 Block of Ice, 1 Dessert Ice... ... ... £4 0 0
For 2 Bottles, 2 Blocks of Ice, 2 Dessert Ices 6 10 0
For 4 Bottles, 4 Blocks of Ice, 4 Dessert Ices 11 5 0
If without fittings (merely as Wine Cooler

For 1 Bottle £2 0 0
For 2 Bottles 3 0 0
For 4 Bottles 4 5 0

When Dessert Ices are never required, these Wines Coolers can be fitted with BLOCK ICE MOULD at 30s. for each Mould so fitted.

SOLE MANUFACTURER:

GEORGE SIMPSON, 315, OXFORD-STREET, LONDON.

Orders enclosing remittance can be sent direct, or through Messrs. H. FOGG & Co., Shanghai.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

CAUTION.—*Vice-Chancellor Wood affirmed in Court that Dr. J. COLLIS BROWNE was undoubtedly the Discoverer of Chlorodyne; that the statements of the Defendant Freeman were deliberately untrue, and he regretted to say they had been sworn to (see "The Times" of July 13, 1864); all others must be spurious.*

Earl Russell has graciously favoured J. T. Davenport with the following extract of a despatch from Mr. Webb, H.B.M.'s Consul at Manila, dated Sept. 17, 1864:—"The remedy most efficacious in its effects (in Epidemic Cholera) has been found to be CHLORODYNE, and with a small quantity given to me by Dr. Burke I have saved several lives." Earl Russell communicated to the College of Physicians that he had received a despatch from Her Majesty's Consul at Manila, to the effect that Cholera had been raging fearfully, and that the ONLY remedy of any service was CHLORODYNE.—See *Lancet*, December 31, 1864. No home should be without it.

Eminent Hospital Physicians of London stated on oath that they prescribe CHLORODYNE largely, and mean no other than Dr. Browne's.

The General Board of Health, London, state as to its efficacy in Cholera and Dysentery:—"So strongly are we convinced of the efficacy of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. Montgomery, Esq., late Inspector of Hospitals, Bombay:—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health, after eighteen months' severe suffering, and when all other medicine had failed."

From W. Vesalius Pettigrew, M.D.:—"I have no hesitation in stating that I have never met with any medicine so efficacious as an anti spasmodic and sedative. I have used it in Consumption, Asthma, Diarrhœa, and other diseases, and am most perfectly satisfied with the results."

Dr. M'Grigor Croft, late Army Staff, says:—"It is a most valuable medicine."

Dr. Gibson, Army Medical Staff, Calcutta:—"Two doses completely cured me of Diarrhœa"

Government supply both the Army and Navy with it. A Sheet of Medical Testimonials accompanies each Bottle.

Sold in Bottles, 2s. 9d. and 4s. 6d., by all Chemists. None genuine without the words

"DR. J. COLLIS BROWNE'S CHLORODYNE" on the stamp.

SOLE MANUFACTURER:—

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s. 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty and by Special Appointment to H.R.H. the Princess of Wales, London.

HOLLOWAY'S OINTMENT AND PILLS.—DANGEROUS DISEASES.—How many life-long maladies spring from neglected trifling symptoms. The pimple readily curable in the nursery becomes, through carelessness, the irremediable torment of after-life. With a knowledge of the curative power of Holloway's Ointment and Pills, those who fail to use them for extirpating the first seeds of hereditary ailments will have to bear the punishment resulting from their folly. Holloway's remedies will remove eruptions of the skin, scorbutical diseases and scrofula, and heal every description of ulcer, sore, wound, or abrasion. By the employment of Holloway's excellent, speedy, and safe medicaments much pain and immense expense will be saved, and a great benefit conferred on the present and succeeding generation.

THE BANGKOK DOCK COMPANY'S NEW DOCK.

This magnificent Dock is now ready to receive Vessels of any burthen, and the attention of Shipowners, Agents, and Masters is respectfully solicited to the advantages for REPAIRING and SPARRING VESSELS, which no other Dock in the East can offer.

The following description of the Premises is submitted for the information of the public. The dimensions and depth of water being:—

Length ... ... 300 feet.
(To be extended.)
Breadth ... ... 100 „
Depth of water ... ... 15 „

The Dock is fitted with a Caisson, has a splendid entrance of 120 feet from the River, with a spacious Jetty on each side, where vessels of any size may lay at any state of the tides, to lift Masts, Boilers, &c., with powerful Lifting Shears, which are now in the course of construction.

The Dock is fitted with Steam Pumps of great power, insuring despatch in all states of the tides.

WORKSHOPS.

The Workshops comprise the different departments of Shipwrights, Mast and Block Makers, Blacksmiths, Engineers, Foundry, &c.

The whole being superintended by Europeans, who have had many years' experience in the different branches.

The workmen are the best pitked men from Hong Kong and Whampoa.

The Company draws particular attention to the great advantages this Dock offers, being in a Port where the best Teak and other Timber can be had at the cheapest cost.

A Steam Saw Mill is also in connection with the Dock, to insure despatch in work.

The Keel Blocks are four feet in height, and can be taken out or shifted without cutting or causing any expense to ships having to get them removed.

The Company is also prepared to give estimates or enter into Contracts for the Repairs of Wooden or Iron Ships, the Building of New Ships, Steamboats, &c., or any kind of work connected with shipping.

All Material supplied at Market price. Vessels for Docking may lay at the Company's Buoys or Wharf free of charge, until ordered to remove by the Superintendent.

Captains of vessels before leaving the Dock must approve and sign their Dockage Bills.

All communications respecting the docking to be addressed, until further notice, to the undersigned, by whom all Bills will be signed and collected.

JOHN BUSH, Managing Director.

Fox, Mrs. Bell and European servant, Mrs. Hill and two infants, Mr. A. E. Harriss, Mr. J. Gilbert, Mrs. Bamfield, Mr. Reid, Ensign Ford, Mr. C. Lloyd, Ensign Farwell, Capt. A. Orr, Mr. H. Ball, Miss C. Macnamara, Miss D. McIver, Mr. D. M. Yeats, Assistant Surgeon Ironside, Mr. Forbes, twelve second-class passengers and three children. To Madras: Capt. J. Crawford, Mr. and Mrs. H. E. Stokes, Mrs. Gordon and child, Mr. C. B. Gaskell, Capt. and Mrs. Hooper, Mr. Duke, Mr. P. Melville, Mr. A. W. Shedden, Mr. R. Keith and two second-class passengers. To Alexandria: Mr. and Mrs. Hughes, Miss Hughes, governess, and female servant, Mr. Wigram, Capt. R. E. Pinkey, Mr. W. H. Walford, Mr. W. B. Squance and eight second-class passengers.

From Gibraltar.—To Hong Kong: Three naval officers.

From Marseilles, Jan. 12.—To Hong Kong: Rev. F. S. Turner, Mr. A. W. Glenie, Mr. F. J. Greene, Mr. J. A. Sitwell, Lieut. Stewart, A.D.C. Governor of Hong Kong, and one second-class passenger. To Shanghai: Mr. and Mrs. Grant Gordon, Mr. R. S. Gundry, Mr. E. Pickwood, Mr. Brunat, Mr. Cunningham. To Singapore: Mr. W. H. Walker, Mr. G. J. Buchanan. To Ceylon: Mr. D. W. Skrine, Mr. Malcolm, Mr. A. N. Scott, Mr. J. R. Fulton, Mr. J. T. Molison, Mr. McLachlan, Mr. A. Sinclair, Mr. J. Stevens and four second-class passengers. To Calcutta: Mr. and Mrs. A. Stuart and European servant, Capt. and Mrs. Birch, Mr. W. Blundell, Major and Mrs. J. H. Jenkins, three Misses Swinley, Mrs. Williams and two daughters, two Misses Atkinson and European servant, Miss Langdale, Mr. and Mrs. E. J. Boldero, Mr. A. H. Brooks, Mr. M. Fox, Miss Fox, Messrs. Mylne, J. and A. Carnegie, Marillier, Stormer, and E. W. Logan, Mr. and Mrs. Gavin, Mrs. G. Copley, Capt. E. L. Hawkins, Moonshee Bugloor Rukeem and two native servants, Major A. Blackwood, Messrs. Heckle and E. C. Maclean, Capt. Manderson, Miss Parry, Dr. A. Lethbridge, Mr. J. L. Mackuzie, Capt. Wyatt, Mr. A. Sprenger, Mr. and Mrs. Flinders, Mr. F. du Vernet, Messrs. Perry, Phillips, and A. Porter, Capt. Thackeray, Major Warner and two second-class passengers. To Madras: Mr. G. D. Mitchell, Mr. and Mrs. Scharlieb and one second-class passenger. To Alexandria: Rev. and W. E. and Mrs. and Miss Appleton.

From Suez, Jan. 19.—To Hong Kong: Sir Richard and Lady MacDonnell. To Madras: Lieut. and Mrs. Scharlieb.

Per P. and O. steamer Ripon, from Southampton, Jan. 20.—To Singapore: Dr. J Rowell. To Penang: Mr. J. Macfarlane. To Ceylon: Mr. and Mrs. Shipton, Mr. R G. Burne, Mr. G. F. Walker, Mr. J. Brodie, Mr. J. Mouat, Mr. Harper and six children To Shanghai: Mr. R. J. Schwabe, Mrs. Hargreaves and two children. To Hong Kong Miss Arnot, Mr. W. E. Jowitt, Mr. Melhuish, Mr. W. H. Seaton.

From Marseilles, Jan. 28.—To Hong Kong: Mr. J. A. Maitland, Mrs. J. B. Endicott. and child, Baron Von Carlotvitz, Mr. and Mrs. F. B. Johnson, Miss Kate Newton, Mr. D. M. Forbes. To Shanghai: Mr. F. E. Wright, Mr. and Mrs. Digby Smith. To Singapore: Mr. V. T. Van Dolder, Mr. A. Bavier and friend, Mr. Wright. To Ceylon: Mr. C. Rose.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The *Dupleix* and *Granada* had arrived at Shanghai, from this port, bringing dates to the 16th November. The only item of intelligence is a disgraceful affair which has led to a trial in the British Consulate. The details fill many columns in the Yokohama papers, but are summarised as follows in the *Hong Kong Daily Press*:—Gustave Glackmeyer, a United States citizen, was clerk at a linen and woollen drapery store, kept by Messrs. McKechnie and Co., who are British subjects. Mr. McKechnie suspected Gustave of embezzlement, and having him carefully watched, his suspicions were fully realised and confirmed. Gustave had a homestead of his own which, like his nationality, was rather a peculiar one, for it was presided over and guarded by a Chinese female, and his habit was to send her goods out of his master's shop wherewith to decorate her celestial person. Mr. McKechnie, obtaining most incontestible proofs of this pernicious habit, unwittingly evoked the services of the Municipal police, who took Glackmeyer into custody and conveyed him to the gaol at the British Consulate, which it appears is also the Municipal gaol The gaoler, however, had his doubts about the legality of the step, and immediately consulted the Vice-Consul, who at once set the adopted American citizen free. Gustave instantly repaired to the United States Consul, and so wrought upon his national feelings as to induce Colonel Fisher to take up his case with the utmost warmth and zeal. The Colonel took it all upon himself—he made himself not only sponsor for his *protege*, but both plaintiff and advocate, commencing an action in the British Consular Court *in propria personæ* for defamation and false imprisonment, laying the damages at five hundred dollars. The British Consul suggested that, as Mr. McKechnie had made a mistake in applying to the Municipal police, and had subsequently commenced proceedings against Glackmeyer in the United States Consular Court, it would be better to wait until the issue had been there decided, because on the guilt or innocence of Gustave would the measures of damages depend. This suggestion Colonel Fisher strongly objected to—he said that he had laid his plaint first by one hour and a half, and that therefore his case should be tried first. The British Consul waived the point and tried the case. Mr. McKechnie distinctly proved numerous cases of embezzlement against Gustave, and declared that he applied to the Municipal police entirely through ignorance. The Consul consequently dismissed the case, and ordered the plaintiff to pay the costs. This most righteous decision greatly disturbed the equanimity of the colonel, who, game to the last, instituted an appeal to Sir Edmund Hornby on behalf of his client. What has become of the case in the U. S. Consulate against Gustave does not appear, but of course, in the frame of mind in which Colonel Fisher has worked himself into on the subject, it would be

Digitized by Google

mere folly to proceed. Gustave, finding himself under such potent protection, took a strange mode to vindicate his character. The *Japan Times* had given him deep offence by reporting the above case, and that journal was selected for his vengeance. On Monday afternoon, at about three o'clock, as Mr. Rickerby was passing through the street at the back of the club, towards his office, he was overtaken by an individual who immediately attacked him from behind, striking him a heavy blow across the ear and side of the face with a stiff riding whip. On turning round to see the source of attack, he was met by another cut across the eyes, and would have been most seriously injured but for the yielding of his spectacles, which, however, cut the bridge of his nose severely. Mr. Rickerby had only a small umbrella in his hand, with which, being an excellent master of fence, he warded off many more blows that were aimed at him. He was taken entirely by surprise, but had the good sense, when once he found he could defend himself, not to return the blows of his assailant. It turned out that the attack was made by Mr. Glackmeyer, whose indignation at being mentioned unfavourably in the columns of the *Japan Times* thus found vent. A plaint has, of course, been laid before the American Consul, but—why we cannot possibly imagine—this young ruffian is still permitted to be at large without bail, until the trial, which has been fixed for a day, five days after the offence was committed. This presents a sad reflection on U.S. Consular justice. It is explosive and dangerous, for once ruffle its nationality and it becomes like a porcupine or a hedge-hog.

CHINA.

PEKING.

By the present mail we have some particulars of Sir Rutherford Alcock's arrival at the capital. On the arrival of H.M.S. *Barrossa* at the mouth of the Peiho, his Excellency and suite were transferred outside the bar to H.M. despatch steamer *Manila*, and encountered some adventures on their way to Tientsin which could have afforded anything but pleasure. In the first place, the boat in which the treasure for the Legation was being transhipped, capsized alongside the *Barrossa*, and the whole, amounting to some $19,000, was lost. In the next place, the *Manila*, on her passage up the Peiho, grounded on a mud bank about 18 miles from Tientsin, and stuck hard and fast. The gunboat *Hardy* was fortunately in attendance, and took Sir Rutherford and suite on to Tientsin.

Both the pro-foreign and anti-foreign parties appear to be represented in the Peking Cabinet, the latter being led by Tseng-kwo-fan, who was appointed to the command of Sanko-lin-sin's army on the death of that general. Tseng is said to be showing his anti-foreign teeth pretty plainly. He is determined to sever all celestial connexions with foreigners, and to be entirely independent of them. At his instance it has been decided to do away with the foreign element in the maritime customs at the end of the current Chinese year.

HANKOW.

A correspondent informs us that on the night of the 15th November a severe gale occurred at that port which did considerable damage. On the night of the 18th, Stevens, one of the men implicated in the murder of Macdonald, escaped from prison, and had not been heard of up to the 19th. A reward of 100 tls. was offered for his apprehension.

The First Annual Report of the Hankow Medical Mission Hospital, under the charge of Mr. F. Porter Smith, M.B., has been issued. The society under which Dr. Smith works is the Wesleyan Mission, and the hospital has now been open for about eighteen months. The report gives the result of one year's practice amongst the natives, viz., from July 1st 1864 to June 30th 1865. The number attended amounted to 11,764, of whom 16,032 were male out-patients, 2,700 female out patients, 30 male in-patients, and 2 female in-patients, besides a large number of children. The hospital is open on three days in each week, and therefore on each day there must have been an average attendance of at least one hundred and twenty. Every grade of Chinese society has been represented amongst the patients, even the Hsiaotai of the province having requested Dr. Smith's aid on behalf of his daughter.

SHANGHAI.

From this port we have advices to the 25th November. We find the following items of news in the *Overland Herald and the Commercial Record*:—

"Mr. Grant's Trans-Mongolian Telegraph scheme was said to be so far advanced as to give reason to believe that telegrams would be received by the first steamer from Tientsin after the breaking up of the ice. Mr. Grant left per *Corea*, steamer, for Taku, whence he will proceed to Kiatcha, with the purpose of forming the line of couriers between that place and Tientsin.

Two significant despatches had been addressed to the foreign Consuls by the Chinese authorities. The first was from Ying Taotai, requesting that for the future all criminals who under the present system are sentenced by the Mixed Court to work in the chain-gang, be sent into the city for punishment in accordance with Chinese custom. We are glad to find that the foreign authorities held out, and insisted on continuing a mode of punishment which, from the disgust wherewith the natives regard it, will in all probability prove more effective in diminishing crime in the settlement. The other dispatch was addressed by the Hsien to the Consuls, under orders from Governor-General and Fantai. It is to the effect that, inasmuch as the Imperial Government is about to construct a map of the provinces of Kiangsu, Kiangsi, and Anhuei, exact measurements of the foreign settlement will be necessary, and the Consuls are, therefore, requested to give the officers appointed for the purpose every facility for the completion of their task. The Consuls have, of course, complied with this request; but, as the proposed map is to be drawn on a scale of two inches to 50 *li*, it is difficult to imagine the use of accurate measurements of the English settlement which would not, on such a map as is proposed, take up a space of more than one-seventieth of a square inch.

Li-Futai had been appointed to take the post of commander-in-chief against the Nienfei rebels in Honan, where they seem to have gained strength again.

Great sensation has been caused by the sentence of imprisonment and hard labour passed on Capt. Bennet of the *Wellington*, for flogging Chinese. Two petitions have been presented to the Chief Judge asking him to reverse the sentence. To the first a courteous but firm reply was given in the negative, in which his lordship explained that he would be exceeding his powers in reversing the sentence, and that he scarcely thought the request was one which should have been made to him. No reply had been received to the second petition.

A more serious charge had been brought against the chief officer of the *Wellington*, resulting in an inquest being held at the Municipal Police Station upon the body of a Chinaman, whose death was alleged to have been caused by ill-treatment and kicking. Mr. Lewis, of the American Consulate, was in attendance; and, as no evidence of violence was to be found upon the body, he pointed out that a post-mortem examination would be necessary, but the Chinese magistrate objecting to such a proceeding the investigation had to be abandoned.

The Municipal Council held their monthly meeting on the 10th November, and the report which they published was one of the most valuable which has been made by that body. It opens several very important questions with reference to the local government of Shanghai. Among them we have to notice the system of making Chinese criminals perform hard labour in the settlement; a plan which will have the double advantage of turning this work to some account, and will secure that the Chinese prisoners so employed undergo the sentence passed upon them. The Chinese authorities raised some objection to this plan; but by judicious management this has been overruled.

Mr. Hart, the Inspector-General of Customs, had just returned to Shanghai from Peking. A well-authenticated rumour was current to the effect that he had received instructions to withdraw all the foreign element from the Customs' service by the end of the current Chinese year.

HONG KONG.

The present mail brings intelligence from Hong Kong to 1st December. The English mail of the 10th October was much overdue, and its non-arrival occasioned great anxiety and inconvenience. The French mail of 19th October was also quite due, as also the Calcutta tenth sale steamers. The monsoon was very boisterous and severe. The latest postal dates from England were 26th September, being no less than sixty-five days old.

The *Overland Trade Report* has the following, with regard to designs on Formosa said to be entertained by the Prussian Government:—"We are afraid that we shall startle the community by conveying to them the fact that we have received positive information to the effect that the Prussian Government had determined, before the breaking out of the war in the

Digitized by Google

Duchies, to take and occupy the island of Formosa. A certain frigate was deputed to land a strong party at a defined point of the island, and on intelligence reaching Berlin of the event, reinforcements would be instantly dispatched. The pretext for this act of appropriation was an alleged insult offered to the Prussian store ship *Elbe*, which vessel, in her cruise in these waters, called at Formosa. Some of our readers may remember that it was the commander of this very vessel who behaved so discourteously to the civil authorities both here and at Singapore. Our authority for this statement has no doubt that the intention of appropriating Formosa will still be carried out. We believe it, because we think the aspirations of Prussia are to make herself a maritime Power."

The following is said by the *Overland Trade Report* to be an authentic account or the affair with pirates at Amoy. The *Grasshopper* (the only gunboat present) engagd four large well-armed junks for three hours and a-half. A shell from her gun blew up the largest, which was a fine vessel. The *Grasshopper* then captured the other three, which with sixteen prisoners were carried to Amoy. It appears this fleet was manned with desperate ruffians, who had murdered several of their captives in cold blood, and had ripped open the bowels of two sons of the master of one of the junks they had taken shortly before their own time came. There is no doubt the mandarins will make short work of them.

The criminal sessions of the Supreme Court, which lasted for six days (being the first sessions after vacation), came to a close on the 25th November. The gaol delivery comprised sixty-nine persons who were tried on twenty-two indictments, and upon the whole (with the exception of one case) both the crimes and the punishments were of a mild character. The only European convicted was one charged with embezzlement, who was sentenced to nine months' imprisonment. The most severe sentence was one of five years penal servitude and one hundred and fifty lashes each, passed upon two natives convicted of piracy, and which may in itself be considered a commutation of sentence of death, as the Chief Justice declared that their guilt was so evident as to preclude any hope of mercy; but at the eleventh hour they were saved by a legal juggle over the meaning of a word.

Mr. Henry Charles Caldwell has been admitted as an attorney, solicitor, and proctor of the Supreme Court, having passed the necessary examination, and been presented by the Hon. the Acting Attorney-General.

The detention of the last French mail steamer at Hong Kong arose from the inability of the coast boat to make the trip to Shanghai, Japan, and back between the time of the arrival and the fixed day for the departure of the European mails. The system of the Messageries Imperiales, says the *Daily Press*, appears disjointed—first, one of the company's large ships has to arrive at Hong Kong, then the boat to Shanghai is despatched, and on that boat reaching Shanghai the Japan boat is despatched. Then the Shanghai boat waits until the Japan boat returns, when the former proceeds to Hong Kong to meet the same steamer with whose mails she was despatched. The consequence is, should the large boat with the European mails be late in arriving, the time to do all this transhipping and changing is insufficient, and the northern mails cannot be got back in time.

Piracy on the coast continues unabated; the energy of the British naval officer commanding on the spot is severely taxed, and it is understood he has at last obtained authority to place more gunboats in commission. The *desideratum* is to obtain the co-operation of the Mandarins to eradicate the evil after it shall be suppressed. The singular *dicta* of the Supreme Court of the colony in piracy cases is a great stumbling-block to this consummation.

Bribery and corruption on the part of the Hong Kong police force had been brought to light to a vast extent during the fortnight.

(FROM A CORRESPONDENT.)

Much indignation is loudly expressed here at this moment in regard to late movements of the P. and O. Company's steamers. The last mail was brought by the *Salsette*, and was fully a week overdue, the steamer having been obliged to make constant stoppages in consequence of the rotten state of her boilers. A protest was signed by her passengers, and published in the local papers here, and will doubtless be reproduced in England. It was stated at the time that the *Salsette* was sent to China in so dangerous a condition only because she was coming here to be thoroughly repaired; but even this very lame excuse has been disproved by the fact of her being advertised to take the out-going mail, so there may reasonably be doubts of this letter ever reaching you. Nor is this all. The mail of Oct. 10, due here on the 25th inst. by the time-table, and expected in, as usual, some days earlier than that date, has not yet arrived. It is being conveyed, we learn, by the *Orissa*, another of the many lame ducks with which the P. and O. Company earn their dividends, and entirely incapable of making headway against the monsoon at this season. The P. and O. Company, in their royal magnificence, appear to have forgotten that companies, like kings, are mortal, and to look with equal disdain on public complaints and the warnings of competition. Will not, however, the point one day be reached when the authority of the Post-office, long-suffering as it is, may well be exerted to compel something like an approach to the fulfilment of the terms of a heavily-paid contract?

Apropos of steamers, the first month of existence of the new Canton River Steam Company (Limited) has passed, and both directors and shareholders appear to be well satisfied with the results of the undertaking. The company has a daily steamer to both Canton and Macao, the only opposition being that of the *Plymouth Rock*, the unwieldy steamer under Messrs. Russell and Co.'s flag, and, owing to the adroitness with which nearly the entire trading community was induced to invest in its shares, an overwhelming proportion of the traffic falls to the share of the company's boats. The permission of the Chinese authorities at Canton has just been obtained for the erection of a wharf for the company's vessels in front of the Old Factory site, that melancholy expanse of ruin which remains as a striking memento of days gone by. In my next letter I will endeavour to give you a picture of this desolate site of former prosperity, and of its younger sister, the Shameen Settlement.

The last of this year's crop of silk has now been gathered in, and business at Canton has almost ceased. Owing to the protracted season of dry weather, the production of silk in the adjacent districts has been extended for a fortnight longer than usual, with a proportionate increase in the amount available for export. You will receive the statistical tables in the usual way.

There is positively no local news to chronicle. Intelligence has just been received of the loss and foundering at sea of the British barque *Geelong*, of Singapore, bound from Swatow to Chefoo, the only survivors from which, a party of Lascar seamen, were brought into Macao the other day by some fishing junks. A more disastrous season, in respect of wrecks, is scarcely on record.

Apropos of Macao, fresh scandals have occurred there with respect to the coolie kidnapping trade, and the Governor, a most energetic but apparently far from scrupulous individual, has been brought into collision with the native clergy. In a previous letter I have touched upon the villany of the coolie traffic, as carried on by French and Portuguese at Macao, whence kidnapped wretches to the number of from 10,000 to 20,000 annually are shipped off to the guano-island, of Peru, or the sugar plantations of Cuba. The largest proportion of the so-called emigrants are villagers of the interior who are lured to Macao by professional crimps with promises of high wages and pleasant employment, and who, once in the clutches of the barracoon-keeper, are threatened, and, if need be, tortured, until they sign the contract which consigns them to "voluntary" servitude. On a recent occasion a coolie, escaping from one of those barracoons, laid the history of his wrongs before a priest whom he encountered, and the latter boldly denounced the abominable traffic before his congregation on the following Sunday. For this he was called to account by the Governor, who, however, failed in intimidating the priest into retracting his denunciation. Can it be wondered at that China still fears and hates the foreigners, when such abominations are carried on defiantly at her doors?

The following is the protest alluded to in the above letter. It is signed by sixteen first-class passengers on board the *Salsette*:—

"We, the undersigned passengers by the Peninsular and Oriental Company's steamer *Salsette*, which left Galle on the 26th October for Hong Kong, deem it our duty to place on record the strong conviction we entertain that this steamer was not in an efficient condition to undertake the said voyage with reasonable hope of accomplishing it with safety.

Digitized by Google

"It is not our intention to enter upon the question of the cause of unfitness—it may, however, be well to state the very general impression that the disasters and the delays experienced may be entirely attributed to the dangerous and leaky condition of the boilers. From Galle to Singapore with fair wind and favourable weather the steamer made tolerable progress; and from Singapore, which was left at 7 A.M. on the 3rd November, to latitude 15.30 N., moderate speed was attained. As soon, however, as a contrary wind was encountered, the speed of the steamer rapidly diminished, and dwindled down to about three to four knots per hour.

"On the morning of the 10th November the engines were stopped, the leakage from the boilers washing a quantity of coal into the limbers, checking the drain of water from the stoke hole to the engine room, and flooding the former with scalding water, in which no one could work. After a delay of thirteen hours a start was made, and the engines worked until 4 P.M. of the 11th, when a second stoppage occurred from the same cause, involving a delay of nearly twenty-one hours; at about 12.30 P.M. on Sunday, the 12th, the engines were again started and worked until 2.15 P.M. of the 13th, when again, from the same cause, a third stoppage was necessary, and a further delay of seventeen hours experienced. The steamer, again under way, made between five and six knots until 1 P.M. of the 15th, when the condition of one of the pumps required another stoppage, and a delay of five hours. The steamer arrived at Hong Kong at 4 P.M. on the 15th November.

"It will be seen from the foregoing that seven days have been occupied in making about 500 miles, and that the steamer has been in a most disgracefully helpless condition for days at a very dangerous season of the year, and in the teeth of the N.E. monsoon.

"Remonstrance is the more loudly called for because, notwithstanding the deplorable condition of the boilers, a certificate, dated Bombay, 5th September, 1865, and signed by J. Mackinlay, hangs at the companion, and states the engines and boilers to be in good order, and all equipments sufficient for six months ending 11th March, 1865.

"Of the undersigned those marked thus * were passengers on board the *Rangoon* from Suez to Bombay, and would also here record their conviction that that steamer was in a most dangerous condition, and that the safety of their arrival was owing entirely to the fine weather experienced throughout that voyage. In conclusion we wish to express our strong sympathy with the captain, officers, and others engaged in the management of the steamer under the trying and annoying situation in which they were placed by the unfit condition of the vessel."

MALACCA STRAITS.

SINGAPORE.

The *Overland Straits Times* of the 9th December contains the following items:—

We hear from Galle what we trust will prove to be true, namely, that new arrangements are about to be made regarding the P. and O. Company's steamers on the China route from the beginning of 1866; it is said the China steamer will proceed to Suez, after receiving the Calcutta passengers and cargo on board, and the steamer from Calcutta proceeds, we suppose, to Bombay. The advantage is doubtless in the saving of time required to tranship the large cargoes of silk from the China boats to the Calcutta steamers at present. The largest steamers will of course now be placed on the Suez, Galle and China line, a much smaller class meeting the requirements of the Calcutta and Bombay line.

We have been given to understand that Mr. Tan Seng Poh, the opium farmer, has succeeded in raising a sum of $500 from his fellow-countrymen, which will be added to the $500 given by Mr. W. W. Shaw a year or two ago for the foundation of a Chinese scholarship, to be competed for yearly by the European and Eurasian scholars of the Raffles Institution.

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

BARTON—On the morning of the 15th November, at Hong Kong, the wife of Mr Zeph. Barton, of a son.

DE VOS—On the 20th Nov., at his residence, Beach-road, the wife of Mr. D. de Vos, of a son.

HERRING—On the 29th Nov., in Stewart-lane, the wife of Captain Charles John Herring Webb, of a son.

LESSLER—On the 4th Dec., at Bangkok, the wife of Paul Lessler, Esq., of a son.

REHDER—On the 3rd Jan., at Lubeck Villa, Brixton-rise, the wife of Adolf Rehder, Esq., of a son.

TURNER—On the 1st Nov., at Yokohama, Japan, the wife of Henry Turner, Esq., Manager Bank of Hindustan, of a daughter.

WATERHOUSE.—On the 31st Dec., at Egham, Surrey, the wife of the Rev. C. J. Waterhouse, Chaplain at Singapore, of a son.

WITHERS—On the 9th Nov., at Nagasaki, the wife of Lieut. W. Withers, R.N.A. Commander British barque Dolphin, of a daughter.

MARRIAGES.

OWENS—PHILLIPS.—On the 10th Jan., at St. Mary's, Southwark, by the Rev. T. R. White, rector of Finchley, assisted by the Rev. A. W. Snape, incumbent of St. Mary's, Mr. Luke Owens, late of Manila, Philippine Islands, to Francis, elder daughter of the late Henry Phillips, Esq., of Finchley, Middlesex.

DEATHS.

ATKINSON—On the 6th Dec., at Rochore Cottage, Albert-street, Mrs. A. Atkinson, the beloved sister of Mrs. J. C. Smith.

BREITHAUPT—On the 13th Nov., at Shanghai, at the General Hospital, H. B. Breithaupt, a native of Bremen, master of the Bremen barque Brema.

GRAY—On the 27th Nov., suddenly at Samarang, James Crawford Gray, aged 30, deeply regretted.

HARDING—On the 9th Nov., at Singapore, on board the Amy Warwick, Captain Samuel Harding.

JOSEPHS—On the 20th Nov., at Shanghai, Levin Josephs, Esq., aged 56.

MURRAY—On the 24th Dec., at 54, Brompton-crescent, London, Colonel Murray, of the 87th (Royal Irish Fusiliers), second son of the late Lord Cringletie.

MCCUNN—On the 3rd of January, at Ardhallow House, Dunoon, Argyleshire, John McCunn, Esq.

MCILDOWIE—On the 19th Nov., at Hong Kong, W. McIldowie, of Messrs. Logan and Co., Engineers and Shipbuilders, West Point.

READ—On the 1st inst., at Clyde Villa, Surbiton, Christopher Rideout Read, Esq., late of Singapore, aged 79.

WOOLCOCK—On the 21st Nov., at Shanghai, at the General Hospital, Henry Clatworthy Woolcock, of Penzance, Cornwall, aged 45 years.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—A good business has again been transacted during the fortnight, at fully previous rates for Black and at an advance for Green. Stocks still hold out at all the ports of export, though at Canton and Hankow they do appear to be getting low. The total export to Great Britain will probably be a little smaller this season than it was last, but to the United States it will be far larger, and there can be small doubt that the profits derived this season by the teamen will induce a large culture and manipulation for the ensuing season.

CANTON.—Our market has continued quiet throughout the fortnight, and but few transactions have taken place. No inquiry seems to have been made for the remaining Country Congous (2 chops common Oonahm), for which the teamen are asking extreme prices. Country Greens: 850 half-chests have been settled at 2 taels advance on last prices, which nominally closes the season. Canton Greens: Some 4,000 boxes have found buyers; they consist principally of very common description, and are bought for the English market. Canton-made Teas: A very limited quantity of Scented Teas have been settled at fully previous prices, and the quality is deteriorating from the want of sufficient scent. 1,000 boxes Congou were taken at 26 to 72 taels. Sales, prices, and stocks we quote as follows:—Scented Orange Pekoe, 5,000 boxes, 18 to 37 taels; Scented Caper, 6,500 do., 17 to 31; Canton packed Congou, 1,000 do., 26 to 27; Gunpowder (Canton), 4,000 do., 11 to 23; Pouchong, 2,500½-chest, 21 to 23; Country Greens, 850 do. The stock consists of 2 chops Country Congou, 1,000 half-chests old Oolongs, and a quantity of Canton Teas in various stages of preparation.

FOOCHOW—Congou: We have to report an animated market since the departure of the last mail; large settlements having been made for both England and the colonies. Prices are about on a par with last quotations, except for the better flavoury kinds, which are half a tael worse value. Comparing rates at present ruling with those of last season at same date, we quote:—Last year, with exchange at 4s. 10d., and freight £3, tls. 17.5 to 18.5=1s. 3½d. to 1s. 4¼d. per pound; and the same qualities as this, with exchange at 4s. 7⅛d., and freight £2 10s., tls. 22 to 23=1s. 5⅝d. to 1s. 6¼d. per pound. The quantity to arrive is now estimated at 30,000 chests, which will make our total receipts 67,000 chests in excess of 1864-65. The market closes firm with an upward tendency. Flowery Pekoes: Have been taken for England at very irregular rates, 2 tls. more being paid, in some instances, than was asked two weeks ago. Oolong: Our stock now consists of very undesirable qualities, for which extravagant prices are asked. Scented: Large purchases have been made at advanced rates. Settlements reported are—Congou: 32,450 chests, 29,380 half-chests, and 2,702 boxes, at tls., 7 to 14 for dust and broken leaf, 14 to 17½ tls. for common to good common, and 18 to 26 tls. for flavoury to good flavoury. Souchong: Fair, 239 chests at tls. 20 to 23. Pekoe: Fair mixed leaf, 405 chests at tls. 23 to 28. Common to fine even leaf, 607 chests at tls. at 19.5 to 37. Oolong: Inferior to common cargo, 2,770 half-chests at tls. 11 to 18. Fair cargo to fine, 10,234 half-chests at tls. 20.5 to 29. Scented: Dust and dusty leaf, 2,360 boxes at tls. 6 to 16. Common to medium, 11,140 boxes at tls. 18 to 27.5.

SHANGHAI.—The market for Congous has continued firm, and a good business has been done at a further advance of one tael per picul. The demand has been chiefly for medium grades, of which but few now remain in stock, the bulk being inferior and common Oonams. Arrivals during the fortnight have been larger than was expected, but future supplies will only come in small quantities to the end of the season. Settlements amount to 13,800 chests at 19½ to 25tls. for common to good Oonams, and 26 to 31 tls. or fair to good Oopacks and Ningchow kinds. Re-shipments have been 2,200 chests, and the stock comprises about 50 chops or 17,800 chests. Total shipments from 1st June to date (inclu-Hankow re-shipments)—234,100 chests, against 330,200 chests at the same date last year. This deficiency is partly due to the increase in the direct export from Hankow as compared with last year. Quotations:—Hohow, common to good, 18 to 22 tls per pcl.; Oonam, common to fair, 19 to 24; Oonam, good, 26 to 27; Ningchow, fair to good, 26 to 30; Oopack, fair to good, 26 to 30.—Green teas have been in brisk demand for America, and prices have advanced fully two taels on our last quotations for Fychow and Moyunes, and one tael for Pingsueys. Arrivals of good and fine teas have been limited, and our stock consists chiefly of common qualities. Several chops of Moyunes have found buyers as high as 46 tls. proportion. Settlements have been 44 chops, or 24,600 half-chests Fychow and Moyune at tls. 27 to 46, and 5 chops, or 3,300 half-chests Pingsueys at tls. 33 to 36 proportion. Re-shipments have been 11,800 half-chests, and the stock is estimated at 16,000 half-chests Fychow and Moyunes, 5,900 half-chests Pingsuey, and 5,200 half-chests local packed Fychows. Total shipments from 1st June to date—124,400 half-chests, against 117,700 half-chests at same date last year.

HANKOW.—Our latest date is the 18th instant. Nearly all the teas brought to market had been readily taken, and prices remained very firm. The total settlements reached 12,200 chests, and only 3,000 chests remained on offer. Arrivals had begun to be scanty, the season quickly drawing to a close. Quotations were—Oopacks and Oonams, common to fair, 15 to 21 tls. Total shipments to date:—654 chops or 316,200 chests or 31,839,000 lbs., against 680 chops or 342,200 chests or 34,637,900 lbs. to same date last year.

KIUKIANG.—We have advices from this port to the 20th inst. Black Teas: Only one chop had arrived during the fortnight, which, with the 2,000 packages previously on offer, had been taken at the quotations below, and the market was left quite bare. Quotations were: Ningchows, common to fair, 16 to 19½ taels; Hohows, common, 14 taels. Total shipments to date, 108,600 chests, or 8,447,600 lbs., against 112,600 chests, or 9,182,700 lbs. to same date last year. Green Teas: The arrivals for the fortnight with the previous stock amounted to 14,000 packages, of which nearly the whole had been taken at prices showing in some cases an advance of four taels within the month. A large quantity of fine teas was close at hand, but the supply of that class for the season would be certainly below that of last year. Only 1,200 packages were left on the market. Quotations were—Fychows and Moyunes, common to fair, tls. 26 to 32. Fine to finest, tls. 33 to 39. Total shipment to date.—45,200 half-chests or 2,715,600 lbs., against 19,000 half-chests or 1,132,600 lbs. at same date last year.

YOKOHAMA.—During the first fortnight of the past month a deficiency of supply coupled with numerous and anxious buyers, caused a rapid rise in nearly all descriptions, since then receipts have been more plentiful, but still far short of the wants of purchasers who have eagerly bought up almost every class on offer, and the finer grades show an advance of $3 to $4 per picul. Settlements, irrespective of several reported contracts for America, are estimated at about 7,100 piculs. Unsold stock, composed almost entirely of the lower kinds, about 500 piculs.

RAW SILK.—The French mail, despatched on the 28th ult., took 632 bales silk and 58 cases silkworms' eggs. The Salsette, despatched herewith, takes 692 bales and 100 cases silk to Southampton, 105 bales do. to Marseilles, 300 cases do. to Bombay, and about 80 cases silkworms' eggs to Suez.

CANTON.—Has been steadily inquired for throughout the fortnight, and prices for the finer sorts have been again advanced $10 to 15, the transactions having exceeded 500 piculs. The season is now getting to an end, and as the native manufacturers are coming in the market, very little more good silk will come forward. Our export to date for England has been about 4,000 bales, against 414 bales to December last year.

SHANGHAI.—The slight fall quoted in our last has been recovered in the better classes, and good Tsatlees and Taysaams are a little higher than a month ago. The settlements, in all 900 bales, have about kept pace with the arrivals, and the stock remains at about 2,500 bales, and is composed chiefly of medium and inferior Tsatlees. About 200 bales of Szechuen silk have come forward from Hankow and been placed at our quotations. The French and English mail steamers from Japan bring a total of 628 bales silk and 500 boxes silkworms' eggs. About 1,000 bales had been settled at full prices, and best Mybash closed at $810,

Digitized by Google

Only 800 bales remained in stock, and the total crop would probably not exceed 12,000 bales. The Dupleix takes 951 bales, and the Aden 489 bales of *silk* to Europe. The current quotations are :—Tsatlees: Chops No. *615* to 620 tls.; do. 2, 595 to 600 tls. Taysaams: Chops No. 1, 590 to 540 tls.; do. 2, 500 to 510 tls.

YOKOHAMA.—There was no activity of demand or change of prices for this staple in the early part of the month, but the European advices received on the 23rd ultimo, produced more inquiry especially for the finest grades of Hank silk, and owing to their great scarcity prices have been daily advancing, closing from $40 to $60 above last rates. The settlements for the month do not exceed 900 bales, and have no doubt been much curtailed by the large proportion rejected on inspection, in consequence of the great mixture in each bundle in colour, quality, and size. Arrivals from the interior continue on a fair scale, but with the exception of a few small parcels of Coshio, Ida and Sodi, consist entirely of medium grades of Dyepots. Unsold stock about 500 piculs. This steamer has engaged 363 bales and the English mail 80 bales. In silkworms' eggs little or nothing doing, the season for shipping have all but closed. Qnotations are :—1da, medium, 830 to 850; Mybash, best, 860 to 880; medium, 830 to 850.

DRUGS, &c.—CANTON.—Cassia Lignea: $18 to 18.20, at which rates the remaining stock of 1,500 piculs has been taken. Cassia Buds: $49 to 50, sales 15 piculs, stock 20 piculs, which may be soon augmented, the new crop being favourably reported on. China Galls quite out of stock, and quoted nominally $15½ to 16. Galangal remains entirely neglected at $2 to 2.40. Rhubarb: The market remains without supplies. Vermilion: $38½ to 39½ per box of 50 catties.

CAMPHOR.—HONG KONG.—800 piculs Formosa has been sold during the fortnight at $24 per picul unpacked, leaving but a small stock on hand; quotations are $24 unpacked, and $25 packed.

CHINA IMPORTS.

The tenor of the advices from the North is very satisfactory. The Hong Kong market has been slightly depressed. The native cotton crop having failed, and the price of the staple having advanced in consequence, the standard of rates current for cotton goods is likely to be maintained. Stocks of woollens are rather low, and metals fully support last quotations.

HONG KONG.—The imports of cotton goods have been pretty large, and consisting as they did principally of goods sold to arrive at rates much below those now current, they have been placed on the market too freely, and prices have consequently declined. Yarn is in very small stock, and low numbers are wanted. Grey Shirtings: The cause above-named has operated principally on these goods, and a decline has taken place. White Shirtings: The higher reeds have advanced 20 cents. T-Cloths: The stock is too low to admit of quotations. Of Fancy Goods, Velvets, Brocades and Red Turkey Shirtings are saleable, whilst Damasks and Brocades are scarce and wanted. Woollens: Long Ells are very scarce and are much wanted. Spanish Stripes are in reduced stock and tend up. Camlets: The demand is confined to fine qualities and is slack. Lastings are in steady though moderate demand, and fully maintain late quotations. Metals.—Iron: Hoop saleable. Nail rod, no sales. Lead is held for an advance. Tin Plates are saleable in moderate quantity. Quicksilver tends up.

CANTON.—A very small amount of business has been done in cotton and woollen goods during the fortnight, and for the first prices remain nearly the same as those last quoted. Yarns are quoted $7, Grey and White Shirtings, 20 cents and 10 cents higher. In metals, also, only moderate transactions have taken place, holders expecting a further advance in lead and quicksilver, which have risen since our last. The following are the sales of the fortnight. Metals, nail rod iron, 840 piculs at $3 to $3.35, per picul. Lead, W. B., 700 piculs at $6.95 to $7.10 per picul, common, 300 piculs at $6.55 to $6.60 per picul. Stock 7,000 piculs. Quicksilver, 300 flasks at $69 to $70 per picul. Stock 400 flasks.

SHANGHAI.—During the past fortnight there has been an active demand for piece goods. The stocks of all kinds upon the market are much reduced, and the bulk of the sales effected have been for arrival; 6½ catty Shirtings have steadily advanced from 3.6.5 to 4.0.5 tls. on the spot, and from 3.5 to 3.9 tls. for arrival. T-Cloths have been much inquired for, but there are scarcely any in stock. There has been some inquiry for Woollens for Japan. Metals: Lead has been largely purchased on English speculative account, and the price has been forced up to 4.7 to 5.2.5 tls. Stocks are very heavy, and as yet there is no inquiry for consumption. Iron, Nail Rod, 2.5 to 2.8 tls.; square and round bars, 2.3 to 2.4 tls.

YOKOHAMA.—Demand has continued moderately active throughout the month, and transactions in Camlets to a fair extent have taken place; for the moment however there is less inquiry for Woollen Goods, native dealers apparently holding off until former purchases are cleared, in which they seem to experience great difficulty; still holders are firm, and the tone of the market may be considered healthy and a return of animation fairly expected when present sales have been taken. Delivery of Cotton Goods continues in active request, and a large business has been done in Grey Shirtings at the reduction quoted. Velvets more inquired for and fairly saleable at quotations. Yarns still in favour and readily placed at previous rates.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—None.

At SHANGHAI.—None.

At HONG KONG.—From London: 20 Nov., Sydney Eggers; 22, Violet; from Sunderland, 20, Prudhoe; 22, Moravia; 24, Clara Morse; from Shields, 24, Mary Frances; from New York, 24, Nieman.

At MANILA.—None.

At SINGAPORE.—None.

At PENANG.—From Liverpool, 26 Nov., Avery.

DEPARTURES.

From YOKOHAMA.—For New York, 2 Nov., Samuel Russell; 11, Raphael.

From SHANGHAI.—For London, 18 Nov., Robin Robin Hood; 19, Whitehall; 20, Invincible; 23, Horsa; for Amsterdam, 11, Maalstroom; for New York, 14, Sea Snake; 18, George Becker; 21, Queen of the Forth; 23, Lucy E. Ashby.

From FOO-CHOW.—For London: Nov. 20, Teemah; 23, Corea; for New York: 18. Henry Harbeck; 20, Tynedale: for Falmouth: 18, Johanna Christoff.

From AMOY.—For New York: 25 Nov., Esmeralda. Benefactress.

From HONG KONG and CANTON.—For London: 25 Nov., Stirlingshire: for New York: 23 Nov., Tanjore.

VESSELS LOADING.

At YOKOHAMA.—For London: Cleveland.

At NAGASAKI.—For London: Chanticleer.

At SHANGHAI.—For London: Glencoe, City of Quebec, Indus, Patrician, Rajah of Cochin, Earl Dalhousie.

At FOO-CHOW.—For London: Portland (full), Lammermuir (full), Gleucune (full) Peterborough.

At HONG KONG and CANTON.—For London: James Ruasell, Arab Steed, Layard.

At MANILA.—For London: Lottie Warren, Monsoon; for Liverpool: Labrador.

At SINGAPORE.—For London: Roselle, County of Ayr; for Liverpool: Excelsior, Arab Steed; for Falmouth: Hermelin; for New York: Caroline Elizabeth, Attila; for Boston: Alexander.

At PENANG.—For London: Maraquita; for Boston: Monitor.

FREIGHTS AND CHARTERS.

SHANGHAI.—There is no improvement to note in home rates, and but little cargo is offering. A slight demand exists for large vessels for coasting, and some inquiry for smaller craft for Formoso. To London the Anolalion is £1 5s. to £1 10s. per ton, and New York £2.

FOOCHOW.—To London: £2 10s. per ton of 50 cubic feet. To New York: $9½ (gold) per ton of 40 cubic feet.

HONG KONG.—The Circular of G. Holmes gives the following settlements:—James Russell (768), on the berth at Whampoa and Macao for London, at £1 15s. per ton; Jane Woodburn (299), Iloilo to London or Liverpool, at £2 per ton; Redbreast (315), Iloilo, to London or Liverpool, at £2 per ton; Antelope (261), Iloilo to United Kingdom or Continent, at £2 per ton; Violet (406), Rice Ports to United Kingdom, at £2 12s. 6d. per ton, if Continent £2 15s. per ton. There are several other charters to load at Rice Ports at the same rates. From the Rice Ports to Hong Kong the rate is 45c. per picul, if to Shanghai 70c. The estimated number of disengaged vessels in harbour is 123, representing 50,417 tons.

SINGAPORE.—To London: Dead weight, 20s; light freight, 20s. to 30s. per ton. Tonnage in harbour much in excess of the requirement.

PENANG.—To Great Britain: Light freight, £1 to £1 10s: dead weight £1 to £1 2s. 6d. per ton.

VESSELS PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA, &c.—15 Nov., H.M.S. Serpent, from England to Hong Kong; 20, Mathilda, Hamburg to Shanghai.

From CHINA, &c., to ENGLAND and CONTINENT.—12 Nov., Friedrich, Batavia to Amsterdam; 14, Areta, Foo-Chow to London; Hampton Court Bangkok to London; Pathfinder, Macao to Hamburg; Manfred, Foo, Chow to London; Nelson, Manila to London; 15, Zanthippe, Singapore to London; 17, Yaratilda, Macao to London; 18, Lord Clyde, Shanghai to Glasgow; Merse, Foo-Chow to London; 19, Overmann, Macao to Hamburg; 19, Florentius, Foo-Chow to Falmouth; 20, Lady Ann, Batavia to Amsterdam; 21, Helen Nicholson, Shanghai to London; 22, John Lidgett, Hong Kong to London; Thurse, Foo-Chow to London.

From CHINA, &c., to UNITED STATES.—17 Nov., Jeanie, Foo-Chow to New York; Azelia do.; 19, Podesta, Shanghai to New York; 19, Japan, Amoy to New York; 18, Cutwater, Manila to Boston.

COMMERCIAL POSTSCRIPT.

The annexed is from the bullion circular issued by Mr. F. M. Page :—"The market is now very flat, with a considerable decline in price, some transactions having lately taken place at 61⅜d. The settlements during the fortnight probably exceed a million sterling, almost entirely for Bombay, the bulk *via* Marseilles by the steamer of the 5th inst., with a good amount of business in advance for the Marseilles steamer of the 20th inst. The price has ranged from 61½d. to 61⅜d., latterly declining to 61⅜d. The aggregate shipments recorded since the 24th of December amount to £957,826, and, in addition, about £300,000 is engaged for the Bombay steamer from Southampton on the 12th inst."

The screw-steamer *Agamemnon*, over 2,000 tons, one of three built for Messrs. Holt, of Liverpool, is announced for Singapore and China.

MANCHESTER MARKETS—JAN. 9.—Very little doing either in yarns or goods; prices show weakness, but no very material decline can be quoted; without actual pressure to sell, there is some anxiety to obtain orders, Grey shirtings, 7 lbs., 14s. 9d. to 15s. 3d.; 8 lbs. 4 oz., 18s. Water twist, Nos. 16-24, 2s. 2d. to 2s. 3d.

ARRIVALS NOT INCLUDED IN THE TABLES.—Jan. 5, off Plymouth from Batavia, Maria Diederika; at Gironde, from Singapore, Giscours; 8, at Texel, from Batavia, Aletta Augusta; Dec. 28, at New York from Manila, Shirley; 27, at Boston from Singapore, Rainbow; Jan. 9, off Dungeness from Batavia, Jodad (?), Theodore Dill; at London from Shanghai, Ti Wan.

DEPARTURES.—Jan. 5, from Yarmouth for Batavia, Hendrina; 6, from Liverpool for Shanghai, Prudhoe; for Batavia, Edith Haviland; 4, from Broomielaw for Manila, Union; 9. From London for Hong Kong, Devana; 10, from Clyde for Galle, Kurrachee; 11, for Batavia, County of Argyle.

CASUALTIES.—The Singapore, from Liverpool for Singapore, ran

Digitized by Google

ashore off Formby, near the boathouse, and lost two of her crew, and it is feared will become a wreck.

The Hollandia, De Jonge, from Newcastle for Singapore, which put into Falmouth, January 4, leaky, has been surveyed, and is ordered to discharge.

The Singapore, from Liverpool for Singapore, which was driven ashore near Formby, is full of water, and part of her cargo has been landed.

The Etheldreda, Winsborrow, from Samarang for Falmouth, was wrecked at Martha, about twenty miles east of Sharp Point, all hands saved.

The Lammina Elizabeth, Pot, from Rotterdam for Java, lost an anchor and chain in Browwershaven Roads during the gale of the 9th January.

LAID ON.—At London: For Singapore and Penangder, Ferica; at Liverpool: for Shanghai, Persia, Vigil; for Hong Kong: Eagle, Favorite.

THE CHINESE GIANT.—The Christmas programme of Chang and his companions includes the performance upon the pianoforte, by Mr. Weaver and Mr. Chisholm, of some valses and polkas, founded on Oriental themes. This music serves to fill up the intervals in the several appearances of Chang, of his wife, of his interpreter, and of the dwarf Chung Mow. Chang's capacity for theatrical display is but moderate; he is still as modest and unassuming as ever, and relying on his extraordinary stature as his great claim to distinction, he limits his action to a walk among the audience and a chin-chining, which consists of offering to them individually a friendly shake-hands. The lady gives a similar welcome to her visitors, and then allows them to obtain a glimpse of her singularly diminutive feet. But the busiest figure in the group is the dwarf, who sings a song, and goes with strange cries, and not less strange gesticulations, through what seems to be a desperate struggle, in which he or some imaginary enemy is worsted and disabled. The whole exhibition maintains its interest with the public from the exceptional history and character of the actors, and the light which their appearance sheds on one of the varieties of human life and manners in the Far East.

VISIT OF THE JAPANESE COMMISSIONERS TO IPSWICH.—On the 1st inst. the extensive agricultural implement works of Messrs. Ransomes and Sims, at Ipswich, were visited by these distinguished Japanese gentlemen, who are commissioned by their Government to inspect the principal industrial establishments in this country, and to report upon the various kinds of machinery most suitable for introduction into the dominions of the Tycoon. The party comprised Shibata Hiongano Kami, chief commissioner, and suite, accompanied by Major Brine, R.E., and Captain Mason, R.N., and on their arrival at the manufactories the various agricultural operations of thrashing, grinding, ploughing, and irrigating by steam-power were exhibited and explained to them; several small machines specially adapted to the produce of the East and Japan were also shown, and elicited numerous comments, which displayed that keen and intelligent observation for which the Japanese are so well known. A new traction engine, combining the most recent improvements for agricultural purposes, was the subject of marked attention. After taking lunch at the residence of the senior partner, Mr. F. A. Ransome, the party were conducted to the Patent Stone Works, where they were much astonished to see sand transformed into hard stone in a few minutes, by Mr. Frederick Ransome's ingenious process. They expressed themselves as highly satisfied with all they saw in Ipswich.

COLONEL MURRAY.—We have to record the death of Colonel Alexander Murray, commanding the 87th Fusiliers, on the 24th of December, after a short illness. Colonel Murray served in the 18th on the China Expedition (medal), and was present at Canton, Amoy, Chusan, Chinhae, Ningpo, Chapoo (wounded), Woosung, and Chin-Kiang-Foo. The deceased officer was buried at Portsmouth, and the funeral conducted with military honours.

MARINE DISASTERS IN THE UNITED STATES TRADE WITH THE FAR EAST.—Mr. C. S. Hopkins, of San Francisco, estimates the losses through marine disasters in the trade with the Far East, carried on by the ports of Boston, New York, and San Francisco, at between three and four per cent., on the total value employed in the commerce. The moral he seeks to draw from an increasing annual rate of loss is that insurance multiplies losses; that it always has been so, and always will be so, but the conclusion is plainly vitiated by the admitted statement that the proportion of total to partial losses is tolerably uniform, thus showing that the additional percentage of loss noticed is due more than anything else to the augmented value of general cargoes.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, JAN. 8.

It is very probable that the Cabinet will undergo another loss, without the aid of the Opposition. The Minister of the Marine Department, Mr. Huyssen van Kattendyke, is seriously ill, so that it is feared that he will die; but if he should recover, then it is quite certain that he will ask for his dismissal.

The rinderpest spreads more and more, and every day the sanitary cordon must be enlarged. The returns issued yesterday by the Home Department give the following results:—Number attacked in the week ending Dec. 30, 3,421; of which 381 were killed, 609 died, and 232 recovered. Cases from the commencement of the disease:—Attacked, 22,541; died, 6,715; killed, 5,732; recovered, 6,121. As the markets are prohibited, good meat is very scarce, while that of calves is twice as dear as in ordinary was the case.

The Government has resolved that from the 1st of January 240,000f. of every Government cargo from the East Indies shall remain uninsured.

COMMERCIAL.

COFFEE.—The market remains unaltered and firm, without transactions.

SUGAR.—Several parcels Java, amounting together to 1,500 kr., were sold at unaltered prices; there were, however, not many buyers, in consequence of the measures taken by the directors of the French, Dutch, and English Banks to raise their rates of discount.

TEA.—The market is dull, and without affairs, in waiting for the cargoes which are about to arrive from China.

SPICES.—Trifling quantities are bought for consumption at unaltered prices. The nominal quotations are:—Nutmegs: No. 1, 83 to 85 c.; No. 2, 74 to 75 c.; No. 3, 55 to 57 c.; No. 4, 34 to 36 c. Mace: D., 90 to 91c.; E., 86 to 87 c. Cloves: No. 2, 27c.; No. 3, 26c.

RICE.—By want of supply, without transactions. Prices nominal.

COTTON.—Very firm, and a large business was done last week in East India sorts.

HIDES by inscription were sold, 337 p. damaged East Indian ex Maria Magdalena, at 34½ c.; 387 p. damaged do., ex do., at 35½ c.; 245 p. at 40½ c.; 209 p. at 36 c.; 156 do. at 38½ c.; 293 p. at 21½ c.

INDIGO.—For Java there was a good demand, and all that was brought into the market (about 40 ch.) was sold at very firm prices. 20 cer. Caracas changed hands at 10 c. above last auction prices.

BANCA TIN.—1,000 slabs were sold in the beginning of the week at 57¼f., but since then the market became flatter, and in consequence the rate of discount was raised.

COCOANUT OIL.—Prime Cochin, 34f. to 35f.

DRUGS.—Camphor very firm, and a good business was done in Japan and China. Gum Damar: The 67 chests imported per Arrow were sold at firm prices, but which did not transpire. Gum Elasticum: Several parcels, loco and floating, were sold at firm but secret prices. Japan Wax: Scarce. A, 45f.; B, 43f.

RATTANS.—With a good demand. 4,300 bundles were sold, besides 182 piculs just arrived per Mainlust.

MONEY.—Notwithstanding that New Year's-day has passed, money remains scarce and daily dearer in the open market, where very little amounts are offered at 7½ to 8 per cent. In consequence of the measures taken by the directors of the Bank of England, our Bank discount was also raised, and is fixed now at 6½ per cent. for bills and 7 per cent. for acceptances. The transactions in bonds are very unimportant. Dutch Two-and-a-Half per Cents., 61¼; Three per Cents., 71¼; Four per Cents., 95⅜. Neth. Bank, 248. Trading Company, 146¼. Rotterdam Bank, 99¼

RUSSIA, GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, JAN. 7.

A letter from Berlin in the *Hamburg Correspondent* gives an account of some presents recently arrived in that city from the Tycoon of Japan to the King of Prussia. They consist of arms, lackered wares, porcelain, and objects of art. Some correspondence on the subject preceded the presents, and was conducted by Herr von Brandt, officiating as Prussian Consul-General at Kanagawa, the chief emporium of the Prussian trade. A letter had been received by the Prussian representative from the three Ministers for the Foreign Department, informing him that the Tycoon having been greatly pleased by the favourable reception of his last Embassy from the Court and the inhabitants of Berlin, had resolved to give the King of Prussia a proof of his amicable feelings and gratitude, and had therefore sent him the above mentioned presents, which are particularised as consisting of five Japanese swords, forty-five rolls of velvet, a quantity of silk and gauze manufactures, two lackered cabinets, a lackered writing table and a smaller one, two red flower pots, an exagonal procelain vase, sundry table ornaments, a ball of crystal and two statuettes,—all of native Japanese origin and manufacture.

The Board of Trade of this city gives notice that after the lapse of six months there will be a competition for the vacant Hamburg Consulate at Point de Galle, in Ceylon. Applications, accompanied by testimonials, must be sent in to the Secretary of the Board of Trade here.

The *St. Petersburg Gazette* announces the appointment of Mr. Mark Daly to be Russian Vice-Consul at Foo-chow, and of Mr M. Bridges in the same capacity at Hankow. On the other hand, Mr. Williams is released from his employment as Consular Agent for Russia at Hankow.

COMMERCIAL.

COFFEE.—The market has not yet recovered from the inactivity of the holidays, and there is but little disposition to purchase, owing to the scarcity of money and the high rate of discount. What little has been sold realised former rates. Sales under 10,000 bags.

SUGAR.—No demand for raw, and prices nominal. Refined firm, with but limited sales.

RICE.—Nothing has been sold by importers.

SPICES.—Trifling purchases at former rates, for the execution of pressing orders.

SPELTER is again looking up; 4,000 centners Silesian for spring delivery sold at 14.14, and 2,500 Polish at 14.10, since which 2,000 centners for delivery realised 15.2. 2,500 centners fetched 15.4, and 5,000 more sold at same price. To-day 12,000 centners were sold in three parcels at same figure, and market closes firm.

DISCOUNT, 7 to 7½ per cent.

SHIPPING.—ARRIVED.—Dec. 19, Costa Rica, from Canton; 25t Boy Bendixen, from Canton.

The London & China Telegraph.

LONDON, SATURDAY, JAN. 13, 1866.

CHINA AND JAPAN.

IMMEDIATELY after the departure of the mails of the 26th of December a telegram was received from Shanghai, dated 25th November, stating that the MIKADO had refused to open the ports; the Foreign Ministers had referred the question to their respective Governments, and the fleets had returned to Yokohama. From this we were naturally led to infer that the expedition so suddenly resolved on had resulted in a complete failure, and that fresh complications, of a most undesirable nature, would be the consequence. On the 5th inst., however, advices were received from Shanghai, dated 5th December, announcing that the MIKADO had since consented to ratify the treaties, and that the ports were to be opened on the 1st of January. So contradictory are these telegrams that we feel some reluctance in commenting upon them; it is to be hoped, however, that the last-quoted message may convey the truth, and that the commencement of 1866 may inaugurate, with the opening of Osaka, a new era in our relations with Japan. It will be observed that in each telegram the word "ports" is used, as if more than one were indicated; but we believe Osaka is the only one likely to be opened on the 1st of January, unless Sir HARRY PARKES exercises great promptitude in selecting one to take the place of Ne-e-gata.

From Peking we hear that Sir RUTHERFORD ALCOCK had arrived at a critical period, as the anti-foreign party were making a strong effort to regain the ascendency and carry out an exclusive policy. We have already taken occasion to remark on the extraordinary lull which there has been in the affairs of the Legation, and this news tends to confirm our impression that this long quietude on the part of Mr. WADE has boded no good. Sir RUTHERFORD will have a good deal of lost ground to recover, but we trust in his ultimate success.

The sudden dismissal of Mr. HART, the Inspector-General of Customs, without any ostensible cause, is an instance of the caprice of a despotic government which we are quite at a loss to account for, especially after the evidence of the favor in which he was held given in Dr. RENNIE'S valuable records of "Peking and the Pekingese." We look upon this act as a very distinct augury of evil for our future relations.

THE MORTALITY OF TROOPS IN HONG KONG.

THE serious sickness and mortality prevailing amongst our troops at Hong Kong having been occupying so large a share of public attention for the last few weeks, we may be expected to say something on the subject. As Hong Kong is a station wherein no security can be placed on health or life from one year to another, notwithstanding that lately the place has been earning for itself a somewhat better reputation than it formerly had, we are not inclined to condemn the military authorities so conclusively as some of our contemporaries have done, as the parties chiefly responsible for the more than decimation which has happened to the unfortunate 11th Regiment. That better arrangements might have been made for the reception of this corps on its arrival from the Cape there would seem to be no doubt, but from collateral facts which come to our knowledge it appears that the season was generally unhealthy—in fact, a return to that form of climate the mortality attending which in former years stamped Hong Kong as one of our most deadly stations. Though we therefore do not endeavour solely to identify with mismanagement the nigh extermination, as far as efficiency is concerned, of the 11th Regiment, we feel that it is impossible to relieve the military authorities altogether from blame; there having been manifestly inadequate accommodation provided for the regiment, and what is even more serious, inadequate medical attendance available in the command,—the number of army surgeons present apparently being much below that required to meet the contingencies of such an uncertain climate. From the *Overland China Mail* of the 15th November we learn that, on the 1st of that month, General GUY inspected the 11th Regiment at Hong Kong. It was represented by *one hundred and two men*, some of them so weak as not to be able to appear with their arms, these men being the *effective* representatives of upwards of 700 men who landed in the island six months previously. With reference to the General and the principal medical officer, the same paper states:—"All we can safely say is that the commandant's power here "(Hong Kong) has been extremely limited by the General "(GUY), while the latter, instead of being here looking after the "health of the troops, has been in Yokohama, enjoying an ex-"cellent climate, with the additional advantage of the itzeboo "exchange, which rumour states has put at least a thousand "pounds sterling into his pocket. Again, the principal medical "officer, Mr. DICK, has been absenting himself to Japan, and "doubtless sharing in the luxuries and profits of that noted "sanitarium, while, at the same time, the medical services re-"quired by the Hong Kong garrison could not be discharged, "with any approach to efficiency, without necessitating the "assistance of *three surgeons from the Navy*." In our opinion a very serious question is here involved, and one that demands close investigation, and the adoption of such means as will protect the public service in China from being made subservient to private interests. There is no evading the fact thus referred to in the *Overland China Mail*, that when the heads of the military and medical services at Hong Kong are absent on duty in Japan, however nominal it may be, they do, while thus residing in the latter country, enjoy pecuniary advantages so great as to be a powerful inducement to them to prolong their residence beyond the limits of necessity. That our readers may understand this question of itzeboo exchange we will shortly state that the itzeboo is the current silver coin of the Japanese as the dollar is that of the foreign mercantile community, as well as being also the coin in which our naval and military services are paid in China and Japan. Originally three itzeboos were the equivalent of one dollar; a compulsory rate of exchange fixed by the treaty of 1858, and which ceased in 1860. From the latter date the value of the dollar has been governed by the rates of exchange of the day; its average value since not having exceeded two-and-a-half itzeboos. Though the mercantile community thus ceased to enjoy the advantage of getting three itzeboos per dollar, a special arrangement was made by the foreign Ministers and Consuls, namely, that each Legation should receive 15,000 itzeboos monthly, and each Consulate 3,000 itzeboos monthly, in exchange for 5,000 and 1,000 dollars respectively. This highly lucrative diplomatic arrangement has been in force ever since, and, we need not add, carefully taken advantage of. In addition to this, a further arrangement has been made that every naval or military officer the Treaty Powers have employed in Japan, at the open ports, shall be allowed to exchange three dollars per diem, at the rate of three itzeboos per dollar, and every soldier or sailor one dollar at the same rate of itzeboos, the higher officers, such as admirals, &c., being allowed to exchange a much larger number than the other officers. This arrangement leads to large sums of money being made by exchanging dollars at this fixed rate, and immediately afterwards buying dollars back at the ordinary market rate of the day, which, as already stated, is much under that of three itzeboos per dollar. Now we decidedly question the policy of imposing this tax on the Japanese Government, and are of opinion that the time has arrived for the Government taking action in this matter, and directing that the same rule shall regulate the exchange of dollars into itzeboos as is now in force for the foreign mercantile community generally in Japan. The existence of this exchange privilege has a tendency to operate very injuriously on the fair distribution of our naval forces in China, and it need not be a matter of

IMPORTS FROM THE STRAITS, JAVA, CHINA, AND ALL PARTS EAST OF INDIA.

From SINGAPORE to LIVERPOOL, per Vigil, entered December 23—192 bags black pepper—Shaw and Co.; 904 slabs gutta percha, 2 chronometers, 969 buffalo hides, 6552 sticks sapanwood, 8905 bundles rattans, 1723 bales 549 baskets gambier, 440 bags black and 16 bags white pepper, 1093 bags 159 boxes pearl sago, 2902 bags sago flour—Order.

From MANILA, &c., to LONDON, per Zealander, entered December 26.—300 bags coffee, 50 cases pearl shells, 5 cases cigars, 7 cases sundries—Parr, Hermann, and Co.; 60 cases cigars—Bomes and Co.; 30 cases ditto—R. and J. Henderson and Co.; 6 cases ditto—J. Conell; 20 cases ditto, 1140 bags coffee—F. Huth and Co.; 30 cases cigars in transit, 286 cases cigars, 4327 bags coffee, 7 cases sundries, 376 cases gum, 5 cases merchandise, 26644 bags sugar, 25 bales hides, a quantity sapanwood, 29 cases indigo—Order. Remainder of cargo from Cape of Good Hope.

From HANKOW to LONDON, per Fychow, entered December 27.—7205 chests 2379 half-chests 738 packages tea, 28 packages sundries—Order; 687 chests tea; Reiss Brothers; 4 chests—Smith, Elder, and Co.—77 packages—A. Bills; 1 package—J. Glossoof.

From HONG KONG to LONDON, per Scawfell, entered, December 27.—8340 boxes 12380 packages 320 half-chests tea, 200 boxes galls, 230 packages merchandise—Order; Canton, 5225 packages 411 half-chests 10063 boxes tea, 8 packages sundries, 28 bales waste silk, 113 packages canes, 18 cases gongs, 43 cases preserves, 20 casks soy—Order; 117 packages merchandise—Baring Bros.

From FOO-CHOW-FOO to LONDON, per William Mitchell, entered Dec. 28.—1975 chests 1243 half-chests 722 boxes 12421 packages tea, 205 fms chain, 9 packages merchandise—Order.

From PENANG to LONDON, per Edinburgh Castle, entered Dec. 27. 9562 slabs tin, 40934 bundles bark, 4 bags coffee, 6040 bags pepper, 52 cases nutmegs, 6 cases mace, 10 casks 21 cases fish-maws, 200 packages galangal, 1808 buffalo hides, 31 baskets india-rubber, 234 bags cutch, 28 cases sundries, 281 blocks gutta-percha, 41 bags tapioca, 1003 bundles rattans, 3 cases spices, 12 baskets snail shells, 1136 cow-hides—Order.

From SINGAPORE to LONDON, per Ernst Merck, entered Dec. 28—995 slabs tin, 1917 bales gambier, 640 bags coffee, 127 boxes pearl sago, 123 cases gum damar, 19 bales hemp, 670 bundles canes, 24,000 bundles rattans, 1047 pieces buffalo horns, 85 cases shells, 251 baskets 93 bags 593 blocks gutta-percha—Order; 17 baskets india-rubber—Albers and Co.; 50 bags coffee—Jameson and Son.

From SINGAPORE to LONDON, per Hastings, entered December 29.—2322 bales gambier, 821 hides, 1984 bags sago, 130 baskets india-rubber, 1945 bags pepper, 1960 slabs tin, 403 baskets 1844 blocks gutta-percha, 2811 horns, 864 bundles canes, 10 cases of dragons' blood, 12651 bundles rattans—Order. Remainder of cargo to Freemantle.

From FOO-CHOW-FOO to LONDON, per Bella, entered December 29.—739 chests 53 half-chests 7293 packages 12 boxes tea—Order; 961 packages—Huth and Co.; 482 packages—Simpson Bros.; 2 boxes sundries—Order.

From SINGAPORE to LONDON, per Unicorn, entered December 21.—1862 barrels gambier—Fruhling and Co.; 288 barrels 522 baskets gambier, 875 bags pepper, 4185 bundles rattans, 118 boxes pearl sago, 7727 buffalo horns, 769 buffalo hides, 47 bundles cow hides, 415 bundles canes, 656 slabs gutta-percha—Order; 1289 bags pepper—Blow and Co.

From CANTON to LONDON, per Mary Nicholson, entered January 5.—1187 chests 5758 boxes 1570 packages tea, 10 cases preserves, 14 cases chinaware, 2 cases ivory, 60 bales cocoons, 59 boxes raw silk, 200 packages canes—Order; 2 packages tea—G. Rennell. To Macao: 10 chests 3983 half-chests 4380 boxes 1449 packages tea, in transit—Order.

From FOO-CHOW-FOO to LONDON, per Lorton, entered January 6.—Tea: 1723 chests 2487 half-chests 1572 boxes—Smith, Kennedy and Co.; 681 chests 805 half-chests—H. Howe; 435 chests—G. H. Langton and Co.; 408 chests 452 half-chests 1722 boxes—Gibb and Co.; 182 chests 134 half-chests—A. Andrews and Co.; 240 chests 211 half-chests—A. Heard and Co.; 773 chests 1872 boxes—J. Foster and Co.; 2 boxes—F. W. Kitchine; 1 chest—Fearon and Co.; 1 case cheroots—Foster and Co.; 1 box china, &c.—Smith, Kennedy and Co.; 3 boxes preserves—F. H. Kitchin; 6 cases ginger, 1 box nutmegs—Fearon and Co.

From PENANG to LONDON, per Peter Rohland, entered January 8.—7690 slabs tin, 4976 bundles rattans, 1157 bags sugar, 54 hogsheads 71 puncheons rum, 6513 bags pepper, 62 cases gum benjamin, 43 bags cassava, 256 bags cassava flour, 8 cases nutmegs, 7 cases fish maws—Order.

Digitized by Google

surprise that piracy is so alarmingly on the increase in the China seas, when every vessel of war that can find an excuse to be there has its anchor down in one of the treaty ports of Japan, enjoying the advantages of the itzeboo exchange, as the *China Mail* alleges General GUY and Mr. DICK have been doing. Several minor questions arise out of the major evil to which we now draw attention. For instance, we would like to know —and we consider the Government have the right to ask the question—as to what purposes the gain made by itzeboo exchange is put in our naval and military services in Japan. An inquiry into the whole matter, as well as the adoption of means for its discontinuance, seems to us very necessary. We hope to see the question taken up by some of our influential contemporaries.

THE CHINA CHALLENGE CUP.

IT will be remembered that the selection of a design for this 500 guinea cup was deferred until the arrival of some drawings sent for by Major BRINE from Hong Kong, as it was thought desirable to give the preference to a purely Chinese design, should one be found worthy of adoption. Four drawings have lately been received, prepared by various Chinese silversmiths of Hong Kong, all of them highly characteristic in treatment, and one of these has been finally selected by the Committee. The vase is cup-shaped, supported by three dragons intertwined, on a pedestal of suitable form. Two dragons form the handles, and another, *couchant*, surmounts the cover. The body of the cup is divided into panels, each filled with scenes of Chinese life, and the general effect is bold and striking.

This design, we believe, was originally intended to be used for the cup which is to be presented by the Hong Kong Volunteers to Major BRINE as a testimonial, in recognition of his valuable services in organising and commanding that corps. The Hong Kong community is, however, not the only one so indebted to Major BRINE, as he also organised the volunteer corps at Hankow, Canton, and Yokohama.

COMMUNICATION WITH CHINA *VIA* SIBERIA.

The following official notice with respect to increased facilities of overland postal and parcels communication with China has just been published by the Russian Post-office. It will be seen that the cost of conveying letters and parcels by this route is much heavier than by the P. and O. mail steamers, while there is no saving of time to compensate for it, as the transit from St. Petersburg to Kiakhta alone takes five weeks :—

"In consequence of information received from the Governor-General of Eastern Siberia, the postal department has to inform the public that postal communication was opened on the 5th of last October between Kiakhta and Tientsin by way of Ourga, Kalgane, and Peking. Single letters, or letters containing enclosures of money or documents, as also parcels and telegraphic despatches, are forwarded four times a month both ways at the undermentioned dates :—

"In the direction of Kiakhta to Peking.—From Kiakhta, the 5th, 12th, 19th, 26th; from Ourga, the 7th, 14th, 21st, 28th; from Kalgane, the 16th, 23rd, 30th, 7th; from Peking, the 18th, 25th, 2nd, 9th. In the direction of Peking to Kiakhta.—From Peking, the 4th, 11th, 20th, 27th; from Kalgane, the 6th, 13th, 22nd, 29th; from Ourga, the 15th, 22nd, 1st, 8th; from Kiakhta, the 17th, 24th, 3rd, 10th.

"The charge upon correspondence for China is fixed as follows:—A. The charge from the point of departure in the interior of the empire to the frontier post-office at Kiakhta is the rate fixed by the postal tariff for the interior. B. The charges between Kiakhta, Ourga, Kalgane, Peking, and Tientsin are :—

"(*a.*) Single rate.—1. For every single letter with documents, credit or bank-notes, small objects in silver or gold, and for telegraphic despatches, per loth (half-ounce). From Kiakhta to Tientsin, Peking, Kalgane, and *vice versa*, 30 copecks; from Kiakhta to Ourga, and *vice versa*, 10 copecks; from Ourga to Tientsin, Peking, Kalgane, and *vice versa*, 20 copecks; from Tientsin to Peking and Kalgane, and *vice versa*, 10 copecks.

"2. For parcels ordinary or containing documents, per livre (pound). From Kiakhta to Tientsin, Peking, and Kalgane, and *vice versa*, 40 copecks for single parcels, and 65 copecks if they contain documents; from Kiakhta to Ourga and *vice versa*, for single parcels, 15 copecks, with documents, 25 copecks; from Ourga to Tientsin, Peking and Kalgane, and *vice versa*, for single parcels, 25 copecks, with documents, 40 copecks; from Tientsin to Peking and Kalgane, and *vice versa*, for single parcels, 15 copecks, with documents, 25 copecks.

"3. Parcels containing objects of value, if weighing under a pound, will be charged letter rate upon every loth (half-ounce); if weighing exactly a pound, or over, will pay per pound parcel rate. Coin and goldsmiths' work can only be forwarded by the Mongol post in parcels not exceeding 10lb. weight, package included. Parcels containing coin or goldsmiths' work should be packed in the most substantial manner.

"(*b.*) Charges upon unpaid parcels are reckoned in the same proportion as for their transmission from the point of departure in the interior of the empire to the frontier post-office at Kiakhta.

"The charge of couriers between Kiakhta and Tientsin is for one horse, 98 roubles; for two, 147 roubles. The department thinks it right to add that the post leaves St. Petersburg for Kiakhta every Tuesday and Friday; and reaches Kiakhta in five weeks."

ADDRESS AND TESTIMONIAL TO JOHN SMALE, ESQ., ATTORNEY-GENERAL OF HONG KONG.

On the return of Mr. Smale from Hong Kong to England the Parsees and Mahomedans of Hong Kong drew up and signed an address to him, of which the following is a copy :—

"The Honourable John Smale, Attorney-General of Hong Kong. Sir,—We, the undersigned, constituting and representing the Parsee and Coja community of this colony, moved by the respect and esteem which we have ever entertained for you during your residence amongst us, desire to place on record our appreciation of your private worth and of your public character. Believe us, Sir, knowing as we do that flattery ill suits our present purpose, and that undue adulation would be distasteful to you, we seek to clothe our sentiments in language expressive of our thoughts, and to avoid giving vent to our feelings in those stereotyped panegyrics which are but too often resorted to on occasions like that which now prompts us to address you. As for the zeal and ability which marked the performance of your public functions, it may not be within our province to speak. We cannot, however, refrain from bearing testimony to the approval of the public in your unceasing devotion to their welfare in this respect. But with regard to the perfect harmony which has prevailed in your department, the dignity and decorum which have ever marked your proceedings, the respect and deference which were so cheerfully accorded to you, we feel more competent to speak; and we find great pleasure in being able to compliment you on the tact, ability, and *suaviter in modo* which have enabled you to perform your functions effectively, satisfactorily, and scrupulously. Even this consideration, however, is not that which induces us now to address you. In your private capacity we have found so much to admire that we shall ever think upon it with gratitude and reverence. Your urbanity and untiring patience, your excellent and matured judgment, your disinterested and sound advice, your repugnance to litigation, and your reliable legal acumen, combine to make us feel your loss as irreparable, and to merit at our hands some tangible token of our esteem. We desire to have these sentiments perpetuated and certified by the special gift of a silver dinner set, the cost of which has been raised by voluntary subscription, and which token will be presented to you by Messrs. Mody and Co. in London. It were waste of words to add that we wish you health, happiness, and long life, but in conformity to the usages of society, we cannot conclude without that customary benison, feeling sure that it was never better merited nor more sincerely given.—We are, Sir, your faithful and sincere friends,

(Signed by 125 Parsee and Coja Merchants.)

"Hong Kong, April 15, 1865."

This address was signed by all the Parsees and Mahomedans of India resident in Hong Kong, to the number of 125 merchants. A sum exceeding $1,500 was subscribed, and silver plate in dinner and tea services were manufactured in Canton, in elegant designs, by Chinese workmen. The plate was transmitted to England (where it cost about £70 for duty), and was, on Monday, the 8th inst., presented to Mr. Smale, with the address, by a deputation of four Parsee gentlemen. Mr. Smale replied as follows :—

"Messrs. Mody and Co. and Gentlemen,—Words fail me adequately to express the surprise and satisfaction with which I first heard of the address which you, who constitute all the Parsee and Indian Mahomedan firms and residents in Hong Kong, by a deputation, now present to me. My duties as Attorney-General at Hong Kong have (owing to the very special state of the colony) been onerous and delicate, but I trust that the public service has not suffered by reason of any want of independence, or of grave error on my part. It is gratifying to find that my efforts are not unappreciated by you. You, however, properly confine yourselves to the expressions of your recognition of my conduct in my more private capacity of advocate and legal adviser. I feel that, in common with the majority of my countrymen, I have tried to act and be in the East as Christian gentlemen and English lawyers act and are in England; and it is in the highest degree gratifying to me to find that the descendants of the ancient Persians and of the Mahomedans of India—races formerly in mutual hostility, but now, under the security of British law, friendly rivals in peaceful commerce—concurring in assuring me that, in their opinion, my efforts have not been unsuccessful. I have been legal adviser to most, opposed to some of you, and I feel that your testimony to my 'repugnance to litigation' is the highest compliment you can pay to a practising lawyer. I must state that I do not remember a case in which I advised compromise or arbitration when anyone of you persevered in litigation. The unbounded liberality with which my professional services have ever been spontaneously acknowledged was such as to add extreme surprise to the gratification with which I receive your splendid gift of silver plate in dinner and tea services, costly specimens of Chinese workmanship, far exceeding the requirements of my moderate means and habits, but which I gratefully accept to become a memorial in my family of your munificence, and as stimulants to my children to an honourable career in life. Believe me that whatever my future lot may be, whether again to face the tropics in the East, or to retire from public life, I shall ever feel that my most useful and, consequently, happiest years have been spent in Hong Kong, and the recollection of your unbounded confidence and kindness will be among my brightest memories. Permit me, gentlemen, in conclusion to say that I hail with satisfaction the fact that many of you have sought and found homes and friends in England. I augur the happiest results from our consequent increased familiarity of intercourse, and whilst I wish you all great commercial prosperity, I must add that I earnestly hope that you will find the highest and most enduring satisfaction as the result of a deeper insight into our habits and institutions."

Naval and Military.

An order has been received from the Horse Guards, directing a detochment of the Royal Artillery to be held in readincss to proceed to China.

The Salamis, 2, paddle despatch-vessel, Commander Suttie, fitting at Portsmouth for service in China and Japan, will be ready for sea about the middle of next month. Her crew are on leave until the 22nd inst.

The Salamis, paddle-wheel despatch vessel, Commander F. G. Suttie, has been formally paid out of commission at Portsmouth, and immediately recommissioned by Commander Suttie for service in China and Japan. All the officers belonging to the Salamis in her late commission have volunteered to continue on board under their old commander, and accompany him to China. They will consequently be reappointed to their ship.

It would seem that Vice-Admiral Sir James Hope would not take upon himself the responsibility of trying Captain Wake and the officers of Her Majesty's late sloop Bulldog, but has sent them home in the Galatea to be at the disposal of the Lords of the Admiralty. A court-martial has, therefore, been ordered to assemble on board Her Majesty's ship Royal Adelaide at Devonport, with the Port Admiral as president; before which Captain Wake will have to give an account of the proceedings which led to the destruction of a valuable ship, and, of what is of more consequence, much valuable life.

His Netherlands Majesty's screw steamer De Watergens, Commander Escher, of 6 guns, 115 men, and 280-horse power, from the Texel for the East Indies, has put into Falmouth owing to stress of weather, partial leak, and several of the crew invalided. She encountered most severe weather in the Channel, and had been at sea ten days.

Captain E. G. Horne, 25th foot, has been appointed major of brigade to the 2nd brigade, at Malta, in succession to Captain Swann, 22nd foot, who, as lately announced, has become deputy assistant quartermaster-general of the Cork district. Captain Horne passed out of the Staff College in December, 1863.

Lieut. H. S. Stewart, 11th foot, has been gazetted aide-de-camp and private secretary to Sir R. G. MacDonnell, C.B., Governor of Hong Kong. Mr. Robert J. Callander, who is senior clerk in the private office of the First Lord of the Admiralty, is about to proceed to Ceylon, where he has accepted an appointment under the Colonial Department. Colonel J. F. M. Browne, C.B., Royal Engineers, has been appointed assistant adjutant-general of Royal Engineers at the Horse Guards, in succession to Colonel the Hon. H. F. Keane, promoted to be deputy adjutant-general.

The Whitworth and Armstrong guns used in the competitive examination have been subjected to destructive tests at Woolwich, and have been cut in two. On investigation, it appears that the initial or centre tube of the Whitworth is destroyed; that the second coil is cracked; that the third coil is cracked; and that only the outer coil is sound. The inner tube of the Armstrong is split; all the others are sound.

The announcement made by us last week (says the *Army and Navy Gazette* of the 6th instant) of the approaching reduction of the army was met with something which was probably intended to be an official contradiction, but which was not, in fact, a contradiction at all. Our statement that two companies were to be struck off each battalion of the line was pronounced to be exaggerated, or at least premature; while a minor organ said that it would not be possible to reduce regiments abroad, doubtless forgetting that, some nine years since, four companies were struck off every regiment that had been in the Crimea, although very many of them were still serving abroad. We need not say that, if the authorities wish it, there is no greater difficulty in diminishing the numbers of a regiment in the colonies than in one at home. At present, however, we believe what is actually decided is, that each battalion in the United Kingdom is to be reduced from twelve to ten companies. As each regiment now abroad will undergo this reduction when it arrives in England, it follows that, in the course of time, every battalion in the army will be thus brought down by two companies. We understand that a corresponding increase will not be made in those going upon foreign service; so that our announcement, after all, was not very much exaggerated or premature.

Some months since we recommended to the Admiralty (remarks our professional contemporary before quoted) the good policy of agreeing to defer the launch of Her Majesty's iron ship-of-war, the Northumberland, from the end of the year that has just expired, until the spring of the one on which we have just entered. The result has justified our recommendation, as we find that, under the immediate personal superintendence of Mr. Charles Lungley, the works have made such excellent progress that the gigantic vessel will be ready for launching about the middle of March. Moreover she is in a more forward state now than she would have been by next midsummer, supposing that the intention of removing her from the dock in which she has been built had been carried out in December.

Lieutenant Blane, commanding the Psyche, writes:—"You will greatly oblige me by inserting these few lines in your paper, and will tend thereby to put people on their guard on board ships where saloons or cabins are fitted with 'round bull's-eye' scuttles. Fire has often occurred on board ships when the origin has never been traced. Therefore it is that I now address you. Yesterday afternoon, about three P.M., the steward detected the smell of fire, and came into the saloon first, as there had been a fire in the stove; but, finding nothing wrong with that, he looked round and discovered one of the curtains, that was drawn over a 'bull's-eye' scuttle, smouldering and all but in a blaze, from the rays of the sun striking through the glass. Two holes are burnt quite through.—I am, Sir, your obedient servant,—A. RODNEY BLANE."

The paddle-wheel steamer Hermes, 6, attached to the third division of the Chatham Steam Reserve, having been surveyed at the hands of the officials connected with the master shipwright's staff, and been found unfitted for further service, was taken in tow and removed round to the ship-breaking yards of Messrsr Castle and Beach, at Deptford, for the purpose of being taken to pieces. The whole of the smaller class of sailing frigates and sloops, together with many of the steamers which had for some years been lying rotting on the Medway, and impeding the navigation of Chatham-harbour, have now been got rid of by the Admiralty, and have ther been sold out of the service by public or private contract, or, when cumstances rendered it necessary to do so, have been broken up.

SHIP LAUNCHES,

Messrs. Vernon and Son launched on the Mersey, on the 1st inst., the first iron vessel they have constructed at Seacombe, named the Cape Clear. She is 172 feet 6 inches long, 28 feet 6 inches width of beam, 19 feet 3 inches depth of hold, and 669 tons old measurement and 726 tons new measurement. She is fitted with iron topmasts and lower masts, each in one length, and the upper and lower topmast yards are of steel. The vessel has been built with all the latest improvements, and will class A A 1 at Lloyd's, and has been constructed for Messrs. W. J. Myersden, Son, and Co., of Liverpool.

On the morning of the 3rd instant a fine clipper ship was launched from the yard of Messrs. John Wray and Son, Burton Stather, Lincolnshire. Her dimensions are:—Length over all, 171 feet; breadth, extreme, 27½ feet; berth in hold, 14ft. 11 inches; and builder's tonnage, 550; built under Lloyd's special survey, to class nine years A 1. She is diagonally strapped with iron outside her frame, and is extremely strong. She is intended to be one of the White Cross line of clipper packets, trading between London and Natal, owned and managed by Messrs. Bullard, King and Co., 30, Great Tower-street, London. She was named the Burton Stather, by Miss Wray, daughter of Mr. W. Wray.

At Aberdeen, on the 1st inst., from the building-yard of Messrs. John Duthie, Sons, and Co., the clipper ship Sir William Wallace. The vessel was named by Mrs. Tulloch, wife of James Tulloch, junr., Esq., of Aberdeen, the owner, and entered her future element amidst the cheers of a large party of friends and spectators. The Sir William Wallace measures 1,091 tons, is to be commanded by Captain A. H. Taylor, late of the China clipper City of Aberdeen, and is to form Messrs. Houlder's packet ship for February.

Messrs. T. Vernon and Son launched from their building-yard at Seacombe, on the 2nd, an iron ship named the Achilles. Her dimensions are:—Length between perpendiculars, 223 feet; beam, 37 feet 6 inches; and depth of hold, 25 feet. Her tonnage is 1,503, old measurement, and her registered tonnage will be 1,535. She is fitted with iron lower masts and bowsprit, and will have iron lower yards and steel upper and lower topsail yards. She will class A A 1 at Lloyd's, and 20 years in red in the books of the Liverpool underwriters. Mr. W. H. Dixon, of this town, is the owner of the ship, which is intended for the East India trade.

On the 2nd Messrs. Charles Connell and Co. launched from their east shipbuilding-yard at Overnewton, on the Clyde, a composite sailing ship, of 630 tons register, named the Huntley Castle. She is owned by the Glasgow and Asiatic Shipping Company, and is intended for the East India trade.

On the 3rd inst. a barque, named the Eastern Star, was launched from the building-yard of Messrs. Joseph Birnie and Co., Montrose. For a considerable time previous to high-water large crowds of people assembled on the quay and in the yard to witness the ceremony; and about twenty minutes past three the vessel glided smoothly down the "ways" to the water, the ceremony of naming being performed by a young lady. The barque is a capital model, is handsomely fitted up and coppered, and in every respect suited to the trade in which she is to be engaged. She measures in length 134 feet; in breadth of beam, 26 feet; in depth of hold, 15 feet; and her tonnage is 350 tons register. She is classed A 1 at Lloyd's for ten years, clipper-built, and intended for the Straits and China trade. The owners are Messrs. Mactaggart, Tidman, and Co., Lime-street, London—the same firm who purchased the Belle of Southesk. The Eastern Star is to be commanded by Capt. Kirkaldy, from Dundee, who is well known in the China trade; and we believe the vessel is to leave for London shortly, thence to proceed to Singapore, where she is to remain trading. The carpenters and others employed in the building-yard were entertained in the evening by Messrs. Birnie and Co., the whole finishing off with a ball.

ROYAL ASIATIC SOCIETY.—At a meeting held on the 18th ultimo, Sir E. Colebrook, Bart., President, in the chair, a translation by the Rev. S. Beal, of "The Confessional of the Omnipotent and Omniscient Kwan-yin," a Chinese Buddhistic tract, was laid upon the table, as was also the original Chinese work, consisting of two long paper rolls, the second of which contained pictorial illustrations of the text. In the "introductory remarks," which formed the subject of the paper, the translator began by controverting the current opinion that annihilation of all existence is the last end to which any considerable number of Buddhists look forward. Buddhism, he said, may or may not have at one time taught its gloomy doctrine of absolute nothingness awaiting all its votaries,—certainly it does not do so now. What it teaches, at least in China and Japan, is cessation of life, under the aspect of birth, decay and death, but not of life in its highest form, as unaffected by any accident whatever, and the belief in the paradise of Amitabha, and the power of Kwan-yin to guide the faithful to that blessed abode. After giving a brief sketch of the development of the religious views of the Buddhists, from the time of Aryasangha, the founder of the Yogacharya system, the writer proceeded to enter into a discussion concerning the meaning of the name of Kwan-yin (Kwan-shai-yin, Kwan-tsentsai), who in China takes the place of the Bodhisattva Avalokitesvara of Sanskrit authors, "the manifested Voice" or "the manifested Deity," being the translation which he proposed to substitute for the current one, "the goddess of Mercy." Of the various forms under which this deity is worshipped in China, all of which indicate supreme wisdom, power, or beneficence, the most curious is the one in which he is described as the "Great Manes," no doubt referring to the Persian Manes, the founder of the Manichæan sect. The original work forms part of the Imperial Collection of Sacred Books, and has a preface written by Yungloh, the second Emperor of the Ming dynasty, A.D. 1412.

THE AILANTHUS SILKWORM IN FRANCE.—The silk husbandry societies in France have for some time paid great attention to the breed of worms which feed on oak leaves, and the result is reported as satisfactory. The breed has been propagated with great success in several departments. It is announced that a joint-stock company is about to be organized on a large scale for extending the breed of this silkworm, which comes opportunely to replace the old silkworm, whose destruction by disease has for the last 10 or 15 years caused so much distress and suffering in the silk-producing departments in France.

TEA AND COFFEE.

(*Travers' Circular.*)

TEA.

The depreciation in the quality of tea imported from China is hardly to be deemed a feature peculiar to the market of the last year. The tendency amongst the teamen in China for some years past has no doubt been to hurry on the tea harvest, in order to be amongst the first in the market. Such a course necessarily pre-supposes hurried preparation and imperfect manipulation of the leaf; the "firing" is carried on hastily and negligently, and by inexperienced hands, instead of undergoing a leisurely and elaborate process by skilled workmen; the same too may be said of the "packing." The consequence of this is that the form, flavour, and aroma are all more or less deteriorated; and thus teas, which with proper attention might have been amongst the most valuable, are deprived of all their most significant attributes, and find their place amongst the most ordinary kinds. The great increase in the demand without a corresponding increase in the extent of land planted with tea, has led to the practice of frequent "pickings," and although this was perhaps, unavoidable, the quality of the crop was of course injured. Formerly, two or sometimes three crops in the year were considered as sufficient to test to their extreme limit the producing powers of the tea-plant: it is no uncommon feature at the present time to read in the China circulars of a "fourth" crop. No wonder then, that complaints prevail respecting the quality of the tea produced; and, if no other monitor could be heard, nature herself would vent her indignant protests against such a course, in refusing to clothe the branches with leaves. It is, in fact, the old fable of the "Goose with the Golden Eggs" re-enacted before our eyes, and with exactly similar results. But the continued remonstrances on this subject on the part of the merchants and brokers interested in the trade, have been, it is to be hoped, not without some effect on the native growers; and we may, consequently, feel justified in expecting some improvement in this respect.

The sure though gradual diminution in the number of sales "with reserve," warrants us in bestowing only a passing notice on a subject, the effects of which are greater than one might at first sight be inclined to suppose. The first and most obvious evil is the loss of time needlessly consumed in affecting to put up to public auction an article, the reserved price of which is far higher than that which dealers would be justified in offering. Time, the proverb tells us, is money, and this needless waste of so precious an article is in itself an evil of no slight magnitude. But so far it concerns only those who are more immediately engaged in the pretended sale. But when on the withdrawal of these teas, fancy prices were privately paid for them, and these prices were understood by the Chinese teamen as indicating the market value of the tea so purchased, the full consequences of the pernicious system were at once apparent. Higher rates were unhesitatingly demanded, unsupported by any reasonable pretext of improved quality in the tea itself, and the result of this indiscretion was ultimately disastrous to the merchant. Among the minor inconveniences left from the time when the tea trade was a small one, may be reckoned the delays constantly arising from the obsolete warrant and weight-note system; an improvement for this might be found in the temporary employment of additional hands whenever an unusual press of business required it; but the only remedy would be the adoption of the plan which has been found to answer so well with sugar, coffee, and fruit—delivery by sub-orders.

The only important facts we have still to notice are the reduction of stock and the increase of consumption; and due weight must be given to these, in attempting to estimate the probable course of prices. The stock of tea, which in December, 1864, was officially reported as amounting to 106,254,761 lbs., is this year estimated at only 88,000,000 lbs., whilst an increase in consumption has taken place to the extent of 10,000,000 lbs.; the consumption for the year 1864 was, in round numbers, 89,000,000 lbs., and this year it will probably amount to nearly 100,000,000 lbs.

According to the Board of Trade Returns, the quantity of tea entered for home consumption amounted, during the month of November last, in round numbers, to about nine million pounds, showing an increase of one million and a-half as compared yith the corresponding month in the year 1864, and of nearly two millions over that of November, 1863. Taking the first eleven months of the year as the period for our comparative estimates, we find that the consumption during that period in the year 1865 was ten millions in advance of 1864, and twelve millions over the consumption during the same period in 1863. These favourable returns are the natural results of the reduction of the tea duty last year, and each successive official statement tends to demonstrate the financial wisdom (to say nothing of the justice) of reducing to their lowest point the duties on articles of general consumption. The superior productiveness of low duties on commodities which are comprised under this head is a subject which cannot be too often recommended to the attention of political economists and financiers. It cannot be said that the tea duty is as yet sufficiently low for the interests of the public and the revenue, although it is of course less oppressive than of old.

Reverting once again to the extended cultivation of the tea plant, a topic often discussed in these columns, we are gratified to see, from the *Colombo Observer*, what great progress is now being made in this respect in Ceylon. It is said that the tea lands in the Himalayas alone are quite capable of producing ten times the whole amount of tea imported into England from all the other tea growing countries in the world. Even though this be the case, the policy of extending its cultivation wherever the capabilities of the soil admit it is none the less desirable. We have learned, at all events, one practical lesson from the cotton famine—the foolishness of depending on one country only for any article of general consumption. "A considerable quantity of tea seed," says Dr. Thwaites in his official report on the subject, "has been distributed during the past year. The climate of Ceylon seems admirably adapted for the successful cultivation of tea. The plant grows well from the elevation of Peradenia (1,600 feet) to that of Hakgalla (5,000 feet), and it would no doubt thrive in situations somewhat higher than the latter; and, as there are extensive tracts of forest land in the island, too high for coffee, but quite suitable for tea, it may reasonably be anticipated that the cultivation of the latter will at some future time assume large proportions. In view of such a contingency, and in order to secure the production of a larger quantity of seed than is at present procurable in the island, an addition is being made to the number of tea-plants now growing in this garden (Peradenia); a certain number have been planted out at Hakgalla and several planters are, at my suggestion, forming small nurseries of tea upon their estates. When sowing tea-seeds, it is of importance to know that, to ensure success, they should be perfectly fresh; for they will not germinate if they have been allowed to become dry."

It is also reported on good authority that the tea-plant is being successfully cultivated in California and Georgia; and an experimental plantation has proved perfectly successful in Spain; there can be little doubt that Spain, Italy, and other Southern European countries, are admirably adapted for the growth of the tea-plant.

No public sales have been held during the week, and transactions in the private market have been inconsiderable, business having as yet hardly recommenced after the Christmas holidays. Recent purchases of most descriptions of Congou have been made on more favourable terms, but the transactions reported have been of somewhat an exceptional nature, and have, moreover, been too small to justify the assumption that there has been any quotable fall in prices; but with a rising money market, and a large quantity afloat, not to mention the heavy purchases made by the trade during the last two months, it does not seem improbable that the correctness of late valuations will be borne out by the sales made during the next few weeks. There is very little inquiry for fine Congous, but medium Kaisows and Monings have attracted some attention, and the larger proportion of the sales made has consisted of these kinds. A few parcels of Broken Leaf Congous have been sold at rates considerably lower than those paid about three weeks since. There is now a good selection of Scented teas on offer, but the trade have not as yet made any large contracts. There is no demand for export. About 1,900 packages of Indian teas are advertised for sale on Tuesday next, and the larger proportion of these is of the Assam Company's growth. The market price of common Congou is 1s. 1d. per lb. Broken Leaf cannot be bought under 9d. per lb.

COFFEE.

In taking a review of the progress and cultivation of coffee for the present year, Ceylon, when compared with its two rivals, Brazil and Java, shows the largest average increase in exports; but notwithstanding this, Brazil shows a very fair increase; Java, on the contrary, exported a much smaller quantity of coffee this year than she did in 1863: the exports last year from that island cannot be brought into comparison, as during that season there was a failure in the crop, as will be seen by referring to the figures we gave a short time since. With regard to the probability of the exports from the island of Ceylon exceeding those from Java, as has been observed in the columns of a contemporary, it does not appear unlikely that such will be the case eventually, but it must be borne in mind that Ceylon has produced during the present year more than she ever did before; also, that after a season of extraordinary good yield, it very commonly happens that the produce of the ensuing year, and in some cases for several years, falls off considerably.

The conclusion of the American War has had a most important effect upon coffee, and the prospects of the market are fairly good. With regard to plantation Ceylon it is to be remarked that during the year all the better kinds have been in good demand and have realised good prices, a decline only being shown in the inferior and badly picked parcels. The finer kinds of native Ceylon have sold remarkably well, and have in many instances realised prices nearly as high as those ruling for the lower kinds of plantation Ceylon. Costa Rica, whica has been rather scarce throughout the year, has generally fetched high prices. East Indian kinds have realised high rates, and have also been in fair supply, which latter remark cannot be applied to Mocha coffee, which has been very scarce, especially during the last few months, when it has almost entirely disappeared from the market.

It is satisfactory to hear that the coffee plantations in Penang are in a flourishing condition. We understand the coffee-plant was first introduced there by the late Mr. David Brown, the original seed being from Mocha, and although not invariably equal to Mocha coffee as regards flavour and strength, it is nevertheless one of the best sorts cultivated in the East, and has always commanded a comparatively high price in the market. There is, therefore, every reason to conclude that the cultivation of coffee in Penang will eventually prove remunerative; a large quantity of waste land, which is at present lying idle, might very profitably be planted with coffee.

Monetary and Commercial.

The steamer *Massilia*, which left Southampton on the 4th, took £115,180 in specie for China and the Straits, the whole of which was silver except £600. In consequence of the rise in the rate of discount the silver market is extremely flat, and were sales to be pressed the fall in prices would probably be considerable. During the last few days the market has been very quiet, the wants of exporters to India having apparently been satisfied for the moment.

Biddings for £350,000 in bills on India have taken place at the Bank of England. The proportions allotted were, to Calcutta, £227,300; to Madras, £22,700; and to Bombay, £100,000. The *minimum* price was as before, 1s. 11½d. on Calcutta and Madras, and 1s. 11¾d. on Bombay. Tenders on Calcutta and Madras at 1s. 11⅛d. will receive about 24 per cent., and on Bombay at 2s. 0⅜d., about 27 per cent.; above these prices in full.

The Crown Agents for the Colonies invited tenders, to be received on the 9th of January, for £100,000 of Mauritius Government Six per Cent. Debentures, being the last instalment

Digitized by Google

of the loan for £400,000 authorised by an ordinance passed by the Governor in Council on the 30th of May, 1864, and since confirmed by the Crown. The principal will be repaid by means of a sinking fund in thirty years from the date of issue.

The application by Mr. Montgomery Martin to the Court of Chancery for a winding-up order on the late Imperial Bank of India, China, and Japan (amalgamated with the Bank of Hindustan), has been dismissed by the Master of the Rolls with costs. Mr. Martin objected to the amalgamation, but a large majority agreed.

On making up their books to the termination of the last year, the banking firm of Messrs. Prescott, Grote, Cave, and Co. celebrated the centenary of the establishment of their bank, which was opened on the 1st of January, 1766.

The Earl of Leven and Melville, having been elected representative Peer of Scotland, has retired from the banking-house of Messrs. Williams, Deacon, and Co., and is succeeded by his son, Viscount Kirkdale.

The Liverpool Overland Company have advertised to convey goods to Singapore and ports in China and Japan, by the *Shaftesbury* from Suez, the through rates being—Singapore, £10; Hong Kong, £11; Shanghai, £12; Yokohama, £13. This is an enormous reduction on the P. and O. Co.'s rates, which will be of course very welcome.

The directors of the National Discount Company have resolved to recommend, at their meeting on the 24th inst., a dividend at the rate of 20 per cent. per annum, and an issue to the then shareholders of 40,000 new shares, at £5 premium; thus making the paid up capital £800,000, with a reserve fund of £500,000.

The amount of bullion by the P. and O. Company's steamer *Massilia*, from Southampton on the 4th inst., was: In gold—to Singapore, £600. In silver—to Galle, £92,000; to Hong Kong, £20,380; to Foo-Chow-Foo, £500; to Shanghai, £1,700; to Singapore, £11,400. Total: in gold, £600; in silver, £125,980.

ARTICLES OF IMPORT.

TEA.—Our market has been rather quiet, the rise in the value of money checking purchases, whilst importers have been free sellers, and the result has been a decline of ½d to 1d per lb. in broken-leaf and common, old flavoury and blackish-leaf kinds of Congou. In new season, both flavoury, and blackish-leaf kinds of medium quality have been sold fully 2d per lb. lower. Fine are firmly maintained. Oolongs, Souchongs, and Flowery Pekoes show no alteration. Scented Teas have sold to a fair extent at rather lower prices. Indian, Japan, and Green Teas show no change. The Circular of Messrs. Shepard, Harrison, and Rehden, quotes as follows:—"The year opens with a moderate stock, but a full range of prices for all good medium to finest new crop Teas. The Bank rate at 8 per cent., and many holding the belief in a high average value through the year, with periods of great stringency. The advices from China speak with confidence that supplies will be short of black-leaf, but we lean to the opinion that the satisfactory results, so far achieved this season, will encourage the teamen to bring forward unlooked for supplies of common and useful grades, and that competition may force up the price of such to a dangerous point the latter part of the season. The business of the last few days has been larger than usual, as importers have rather pressed sales, and we quote a decline of 1d to 2d per lb. in Kaisow kinds to medium Kaisow, and 1d in medium black-leaf kinds, and Canton scenteds 1d to 1½d per lb." The Circular of Messrs. Sillar and Bateman as follows:—"The year has opened with the same lively feeling noticed in our last; and though business may hardly be said to have commenced, sales have been made in second-class Oopacks and Monings from 1s 8d to 2s; Kaisows may be said to be rather easier. Souchongs are wanted up to 1s 10d, and sales are reported from 2s to 2s 3d per lb., and in Siftings from 9d upwards. Flowery Pekoe: Little or no inquiry. Oolongs: Unchanged. Scented Teas: Canton Scented Orange Pekoes are in request. In Foochow kinds transactions have taken place at 2s 3 per lb. Capers may be called a shade easier. Greens and Japans remain quiet."

SILK.—The silk market has on the whole been quiet since last mail. In China Silk business has continued on a limited scale, but the recent advices from Japan led to some excitement in the better descriptions of Mibash, &c., which has subsided since the advance in the Bank rate of discount to 8 per cent. Deliveries from 1st to 8th inclusive:—China, 853 bales; Japan, 335 bales; total, 1,188 bales.

COTTON.—Business recommenced after the holidays in the London markets about the middle of last week, and a fair business was done at prices fully up to those of the week previous, till progress was checked on the 4th by the rise in the Bank rate. On Monday, the 8th, there was less disposition to buy, and prices declined about ¼d per lb., both for spot and arrival parcels. On that day 40 bales of Tinnivelly realised 17¼d for good fair. The closing quotations are:—Tinnivelly, middling fair, 16d; fair, 16¾d; good fair. 17¼d; China, the same; Japan, middling fair, 16¼d; fair, 17¼d; good fair, 17¾d. The stock in London on the 5th was 36,716 bales, against 111,293 at same time last year; of which 322 are China and Japan, against 17,292 last year. Of Ceylon and Tuticorin there were 38,109 bales afloat on the 5th January, against 28,632 at this period of last year. The stock in Liverpool on the 5th was 389,500 bales, against 496,260 bales in 1865. There is little of China and Japan offering in that market, the stock being so limited. The closing quotations on the 5th were—Middling Orleans, 21d; and fair Dhollerah, 17¾d, but prices have been rather easier there also, during the present week. The *Cotton Supply Reporter* remarks:—"The official annual report of the stock of cotton presents some features which are not altogether discouraging, for though the actual quantity in Liverpool is stated to be 370,275 bales, against 466,300 bales in 1864, there are of the large American bales 143,722, against only 23,210 at the corresponding period of the previous year, whilst of the small bales from China and Japan the returns show only 4,971, against 78,420 in 1864. The discrepancy between the actual stock of cotton at the close of each of the last two years is not in reality so great as might at first sight appear, if the weight rather than the number of the bales be in each case taken into calculation. The large quantity now in the hands of spinners, as compared with what was the case twelve months ago, must also be considered in estimating the stock of cotton at present available for consumption."

SUGAR.—The market closed last week with extreme languor; of the parcels of West India Muscovades in auction on the 5th only a small proportion was taken, so that, including the trifling sales privately, barely 230 casks have been sold, making the total in the week 840 casks. No offers being made for 1,601 bags Mauritius at public sale, they were withdrawn; 255 bags brown Native Madras were partly realised at 29s. The stock of Penang in London on the 30th December was 40,212 bags, &c., against 46,788 in 1864; of Siam and China, and Manila, 555,679 bags, &c., against 357,188 in 1864. Prices in bond on the 5th inst.:—Penang, grey and white, 27s to 28s 6d; brown and yellow, 20s to 27s; Siam and China, white, 26s 6d to 28s 6d; brown and yellow, 19s 6d to 26s; Manila, clayed, brown and yellow, 23s 6d to 25s; Muscovado, 21s to 22s. Prices at same date of 1865:—Penang, grey and white, 24s 6d to 27s; brown and yellow, 17s to 24s; Siam and China, white, 24s 6d to 27s 6d; brown and yellow, 17s to 24s; Manila, clayed, brown and yellow, 20s to 21s; Muscovado, 17s to 18s.

COFFEE.—The market for colonial sorts has opened with a languid tone, and prices in some instances have rather materially given way. The public sales of Plantation Ceylon have been confined to 260 casks, 190 barrels and bags, which were mostly realised, the common qualities at a decline of 1s to 2s per cwt.; fine ordinary mixed to fine fine ordinary, 72s 6d to 78s; low middling to good middling, 79s to 86s. Forty casks, 700 bags Native

Digitized by Google

were held for the previous value, and withdrawn, and privately very little has transpired. The quotations on the 5th inst. were:—Ceylon: Native, good ordinary to fine, 68s to 75s; ordinary, 63s 6d to 67s 6d—against, in 1865, 69s to 74s, and 65s to 68s 6d. Plantation, ordinary to fine ordinary, 70s to 76s; fine fine ordinary to middling, 77s to 85s; good middling to fine, 86s to 104s—against, in 1865, 72s to 81s, 81s 6d to 85s, and 85s 6d to 98s. Singapore, ordinary and good ordinary, 52s to 74s—against, in 1865, 53s to 74s.

RICE.—The market has been extremely quiet, and no sales of any importance are reported.

PEPPER.—Some inquiry has prevailed for Black, but as first hand parcels are held for stiff prices, no purchases have been made beyond small parcels for immediate wants, principally Singapore at 3⅞d cash, and Penang at 3¼d.

CASSIA LIGNEA.—Sales of about 500 boxes have been made privately at higher prices; middling to good middling, 95s to 98s; mouldy, 92s.

TOBACCO.—Manila Cheroots and Segars: No sales worthy of note; an arrival took place during December, the bulk of which, we believe, is for transhipment. Manila Leaf: A rather better demand has been experienced for the more leafy qualities; holders continue firm at asking prices. Japan: The recent import sold at a considerably enhanced price; supplies would be readily placed.

HIDES.—The import of Batavia, Singapore, &c., for the year 1865 has been 65,059 buffalo hides, against 40,794 hides in 1864, and 33,548 hides in 1863; from Manila, 725 hides, against 675 hides in 1864, and 2,962 hides in 1863. Buffalo hides met a ready sale without alteration in value up to March, when an advance of ¼d to ½d per lb. was established, and in September an increased demand caused a further rise of ¼d to ¾d per lb.; since then the arrivals have been large, and prices have rather receded, but are still ¼d to ¾d per lb. above those current in December, 1864. 450 Singapore buffalo have been sold during the month, best heavy at 5½d per lb. The stock consists of 10,874 Singapore, 3,974 Java, and 625 Manila buffalo hides, against 1,016 Singapore and 3,461 Java buffalo hides in 1864.

HORNS, TIPS, &c.—The import has again been small, and generally met a good demand at advancing prices throughout the year. Buffalo Horns are 2s to 5s per cwt., whilst Deer Horns are 10s to 12s per cwt. higher than in December 1864.

The Colonial Produce Market will only recommence activity during the present week, after the Christmas and New Year holidays, so that prices for most articles remain unchanged.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £7 to £7. 5s.; nail rod, £8. 10s. to £9; hoops, £9. 15s. to £10; sheets, single, £10. 10s. to £10. 15s.; Staffordshire bars, £8. 10s. to £9. 10s.; rails, £7.

STEEL.—Swedish keg, £15. 10s.

COPPER.—Sheet and Sheathing, £107 to £103 per ton; yellow metal, 9d. to 9¼d. per lb.

TIN.—£102 for block; £103 for common bars. Tin plates, best charcoal, I.C. 33s. 6d. to 35s.

LEAD, &c.—English pig, W.B., £22s. 10s.; shot, patent, £24. 5s.; sheet, £22. 5s. to £22. 10s.; spelter, £22. 5s.; zinc, English sheet, £30; quicksilver, £8.

The following is from the Circular of Messrs. French and Smith:—The year now closed has not been a prosperous one for the metal trade generally; until October business was particularly dull, but in November and December a fair share of business was transacted, notwithstanding the rate of money was evidently on the advance. Iron: Both Welsh and Staffordshire have continued steady, and it is seldom that prices maintain so uniform a rate during an entire year. Scotch Pig Iron has fluctuated considerably, showing, however, a continuous advance from about 50s. to 59s., the close of November. In December, owing, to large speculative operations, it advanced to about 64s. The large decrease in the stock has told considerably in favour of improved rates; but the higher prices will without doubt increase the production, and probably check shipments. The price to-day is 65s., cash. Copper: This metal fluctuated in value the past year considerably. Commencing with the price of £90 for Tough quality, at which it continued, with some unimportant changes until the end of June, when the smelters reduced their quotations £4 per ton. This price remained steady until the middle of October, when the smelters announced an advance to £91 per ton, and later in the same month to £96 for Tough. Early in November large transactions were entered into at rather improved prices, owing to the report of a possible blockade of the Chilian port by the Spaniards, and on the announcement that the blockade was actually declared, the smelters (Nov. 15th) advanced their price £10 per ton, and the following day a further £10 per ton, making their quotations £116 for Tough Cake, but at this price they could do but very little business, as many second-hand parcels were offered at much lower rates, these parcels being gradually taken off the market, the rates improved, but notwithstanding, on the 18th ult., the smelters being tired of inactivity, reduced their quotation £10 per ton, viz., Tough to £106 per ton, which is the present price. As under the most favourable circumstances we must expect a considerable diminution in the supplies from Chili, we look for a strong market. Tin: English has been and continues in demand. Foreign: At the beginning of the past year the price of Straits tin was 90s., and went back to about 86s. 6d. to 87s. in March, which was the lowest price during the year, afterwards we had some little improvement, but the heavy stocks here and in Holland checked any material advance. The sale in Holland in June went off at several guilders higher than was anticipated, and in consequence the three months following we had a very dragging market; towards the end of September some orders of importance were received from America, and the price improved to 97s., but has now gone back to 95s., for fine quality. The quantity of Straits Tin afloat for Europe is about 1,528 tons, against 1,056 tons in 1864, and 602 tons in 1863. In addition to the stock here, there is upwards of 600 tons in ships arrived, not yet landed. Tin Plates: The makers are very full of orders, mainly for America, and during the past twelve months the price has advanced fully 5s. per box. The shipments last month were 85,000 boxes, against 50,000 boxes in December, 1864. The value of Tin Plates exported in 1865 was £1,450,000; do. in 1864, £1,250,000; do. in 1863, £1,310,000. Lead: Until nearly the end of September, Lead continued very quiet. Since that period great improvement has taken place, and the market is now very firm at quotations. Spelter: This metal has fluctuated very much, beginning the year at £19 per ton; it has varied between that price and £22. 15s. The price to-day is £22. 5s., quiet The stock on the 1st inst. was 6,419 tons, against 11,180 tons in January 1865. In other metals there is nothing to notice.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton rom the 1st January by the P. and O. Company's mail steamers.

FREIGHTS AND CHARTERS.

The improvement in outward freights, both for general cargoes from London, and especially for coals from Wales and the North of England, is still maintained, as our quotations below will show.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Shanghai: 40s. weight, 30s. to 35s. meast. To Hong Kong: 40s. weight, 30s. meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Ceylon: 40s. weight, 20s. measurement.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per Keel. For Batavia: £26. 10s. For Hong Kong: £50. For Galle: £36. For Singapore: £35 to £36. For Shanghai: £60.—From Newport, Cardiff or Swansea, per ton. For Batavia: £1. 7s. For Hong Kong: £2. 5s. to £2. 7s. 6d. For Manila: £1. 16s. For Galle: £1. 15s. For Singapore: £1. 15s. For Shanghai: £2. 15s. to £2. 17s. 6d.

CASUALTIES.

The Hollandia, de Jonge, from Newcastle for Singapore, put into Falmouth Jan. 4, with damage to rigging.

The Dovercourt, Heigho, from London, for Singapore, put back into the Downs Dec. 30, and was supplied with an anchor and part of chain to replace other lost.

MISCELLANEOUS.

At Algoa Bay, Nov. 18, from Hong Kong, Minnie Black.

The Kew Kee, Fuller, from Liverpool, for Shanghai, which put into Rio Janeiro Oct. 6, has been surveyed, and has been recommended to restow part of her cargo, after which she will be fit to proceed for her destination.

THE BANGKOK DOCK COMPANY'S NEW DOCK.

This magnificent Dock is now ready to receive Vessels of any burthen, and the attention of Shipowners, Agents, and Masters is respectfully solicited to the advantages for REPAIRING and SPARRING VESSELS, which no other Dock in the East can offer.

The following description of the Premises is submitted for the information of the public. The dimensions and depth of water being:—

Length ... ... 300 feet.
(To be extended.)
Breadth ... ... 100 ,,
Depth of water ... ... 15 ,,

The Dock is fitted with a Caisson, has a splendid entrance of 120 feet from the River, with a spacious Jetty on each side, where vessels of any size may lay at any state of the tides, to lift Masts, Boilers, &c., with powerful Lifting Shears, which are now in the course of construction.

The Dock is fitted with Steam Pumps of great power, insuring despatch in all states of the tides.

WORKSHOPS.

The Workshops comprise the different departments of Shipwrights, Mast and Block Makers, Blacksmiths, Engineers, Foundry, &c.

The whole being superintended by Europeans, who have had many years' experience in the different branches.

The workmen are the best picked men from Hong Kong and Whampoa.

The Company draws particular attention to the great advantages this Dock offers, being in a Port where the best Teak and other Timber can be had at the cheapest cost.

A Steam Saw Mill is also in connection with the Dock, to insure despatch in work.

The Keel Blocks are four feet in height, and can be taken out or shifted without cutting or causing any expense to ships having to get them removed.

The Company is also prepared to give estimates or enter into Contracts for the Repairs of Wooden or Iron Ships, the Building of New Ships, Steamboats, &c., or any kind of work connected with shipping.

All Material supplied at Market price. Vessels for Docking may lay at the Company's Buoys or Wharf free of charge, until ordered to remove by the Superintendent.

Captains of vessels before leaving the Dock must approve and sign their Dockage Bills.

All communications respecting the docking to be addressed, until further notice, to the undersigned, by whom all Bills will be signed and collected.

JOHN BUSH, Managing Director.

Bangkok, 18th Sept., 1865.
Hong Kong, 20th Oct., 1865.

ED. PINAUD, CHEMIST-PERFUMER, Rue St. Martin, No. 298. PARIS.

ED. PINAUD, whose House we specially recommend, is distinguished by the strictly hygienic and tonic quality of his productions, and for this reason his articles are in high favour with the *beau monde*.

HIS Establishment is the only one of its kind in which the recent Discoveries in Chemistry and the Arts have been put into practice. The proof is that ED. PINAUD obtained the Medal at the last London Exhibition.

The Productions of this House may be obtained at the Chief Perfumers in France and Abroad.

BOYVEAU LAFFECTEUR'S ROB.

The only one authorised and adopted in France, Belgium, Austria and Russia.

THIS Vegetable Syrup, prepared and guaranteed genuine by the signature of Dr. GIRAUDEAU DE ST. GERVAIS, is very superior to the purifying syrups. It effects a radical cure, without mercury in all affections of the skin, scurf, scrofula, &c., and symptoms arising from the acrid state of the humours. The Rob is especially valuable in diseases which have resisted the effect of mercury or iodide of potash. The general entrepot of 12, RUE RICHER, PARIS.

Sold Retail.—London: Jozeau, Hannay. New York: Fougera, Gaudelet, Milhau. Gibraltar: Patron and Danilowich Malta: Dr. Pirotti, Bugeja, Magri, and Eolando, Esperanza. Alexandria: Bellamore, Galette, Pernnie, Bombay: Framjee Nesserwanjee and Co. Singapore: Martin and Little Batavia: L. Platon and Co. Macao J. D. Freati.

HOLLOWAY'S OINTMENT.—Turn which way you will, go where you please, persons will be found who have a ready word of praise for this Ointment. For chaps, chafes, scalds, bruises, and sprains, it is an invaluable remedy; for bad legs caused by accident or cold it may be confidently relied upon for effecting a sound and permanent cure. In cases of swelled ankles, erysipelas, gout, and rheumatism, Holloway's Ointment gives the greatest comfort by reducing the inflammation, cooling the blood, soothing the nerves, adjusting the circulation, and expelling the impurities. This Ointment should have a place in every nursery. It will cure the long list of skin affections which originate in childhood and gain strength with the child's growth.

Bottled Ales and Wines, &c.

"NO BUYERS for the BEST BRANDS, unless RE-PACKED," in consequence of repeated BREAKAGE.—Melbourne Journal of Commerce, Nov. 16. Heating and Breakage entirely prevented, and 15 per cent. saved in Freight of Cases by using SYMER'S BOTTLE PACKINGS AND COOLERS.

Price 4d. per doz. Bottlers contracting for large quantities effect so great a saving in labour, &c., that they can supply them at one-fourth less in price to Shippers, who will find it most profitable to order their goods to be so packed in future. In use by all the leading London houses.—T. WHITEHEAD, 37, EASTCHEAP, E.C Sole Manufacturer.

THE CHINA TRADERS' MARINE INSURANCE SOCIETY OF HONG KONG (Limited).

CAPITAL, 1,000,000 dols.

Silk, Alpaca, Gingham Steel Frames, Canes, Fittings and all kinds of Materia for the Trade. Oiled and japanned silks and cambrics.

CAUTION.

THE GROSS FRAUDS which continue to be practised by obscure manufacturers, more particularly in Germany, by imitating the Labels attached to JOHN GOSNELL and Co.'s PERFUMERY, render it imperative upon the Proprietors to Caution the public against such nefarious proceedings, and to request their friends and patrons to purchase only of respectable dealers, who import direct from JOHN GOSNELL and Co., and invite special attention to the address, 12, THREE KING-COURT, LOMBARD-STREET, LONDON, E.C.

JOHN GOSNELL and Co.'s SELECT PERFUMES.—Ess Bouquet, Royal Yacht Club Bouquet, Jockey Club Perfume, Essence of Wood Violet, Victoria Bouquet, Garibaldi Bouquet, Frangipanni, Military Bouquet, The Bride's Bouquet, Tea Rose, Russian Leather Perfume.

JOHN GOSNELL and Co.'s Toilet Vinegar, Inexhaustible Salts, Aromatic Vinegar, Aromatic Eau de Cologne.

JOHN GOSNELL and Co.'s Prince of Wales Perfumes

JOHN GOSNELL and Co.'s Princess Alexandra Perfume.

JOHN GOSNELL and Co.'s La Noblesse Perfume.

JOHN GOSNELL and Co.'s La Noblesse Pomade.

JOHN GOSNELL and Co.'s La Noblesse Soap.

JOHN GOSNELL and Co.'s Real Old Brown Windsor Soap.

JOHN GOSNELL and Co.'s Golden Oil—Moelline—Macassar Oil, Bear's Grease, &c., for the Hair.

JOHN GOSNELL and Co.'s Extra Highly Scented Toilet and Nursery Powder.

JOHN GOSNELL and Co.'s Stereodesmic or Dentists Tooth Brushes and Trichosaron Hair Brushes, warranted to purchasers.

JOHN GOSNELL and Co.'s Instantaneous Hair Dye.

JOHN GOSNELL and Co.'s Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s. 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty and by Special Appointment to H.R.H. the Princess of Wales, London.

From Marseilles, Feb. 28.—To Hong Kong: Dr. J. Carnegie, Dr. Manson. To Shanghai: Miss Finlay, Mr. F. E. Wright.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The latest date from this port is 1st December. The allied fleets returned from Hiogo on the 27th November, having accomplished the object of their mission. The *Japan Herald* gives the following account of the negotiations which happily terminated in the Mikado giving his consent to the ratification of the treaties:—

"The Tycoon and his Government had information (more or less) of the intention of the foreign representatives to visit Osaka.

"On the arrival of the fleet the Tycoon was at Kioto awaiting the final orders of the Mikado respecting Nagato. On the very day on which the foreign ships dropped anchor off Hiogo he received a *djeen baori* (war dress) and a *tatchi* (war sword).

"The foreign Ministers at once sent officers to Osaka to take to the Gorojio letters, in which was stated the requirements of the treaty Powers, viz.:—

"1. The ratification of treaties by the Mikado.

"2. The opening of Hiogo.

"3. The revision of the tariff.

"Two or three days afterwards the members of the Gorojio came themselves to Hiogo, and had an interview with our Ministers. After relating what had been done to induce the Mikado to sanction the treaties, after having repeatedly asserted that without this sanction the execution of the treaties was almost impossible, they added the declaration that the question was a very dangerous one, on account of the hostile feelings entertained by many towards foreigners. At the close of a very long conference, the Gorojio promised to add their exertions to those of the Tycoon, and spare no trouble to obtain this sanction, which, they said, was 'as necessary to the Tycoon himself as to the foreigners.'

"Accordingly the following day high officials were sent to Kioto; and meanwhile the officers of the various legations were at work at Osaka, busily employed in explaining and illustrating the intentions and fixed resolutions of the representatives.

"Our Ministers considered that a prompt and energetic diplomatic action was requisite to effect the desired end. The Gorojio called again, and agreed with the Ministers that the utmost efforts of the Tycoon and his Government were indispensable, and that no time should be lost in discussing the matter with the Council of the Mikado. Ten days were then given for a final reply.

"Whilst these negotiations were going on at Osaka Kioto was in an indescribable state. Emissaries of Daimios rushed in to counter-order the departure of the Tycoon. Rouins made horrible threats against the life of the Tycoon, and even of the Mikado himself.

"The Mikado begged that the men-of-war should be removed at once, and declared he would not sanction the treaties. He then ordered the removal of Abe Boungo-no Kami and Matsmai Idzumino Kami from the Gorojio, and took from them their title of Kami.

"These two Daimios were ordered at once to retire to their dominions, and to express their regret for the favour they had shown to the foreign cause.

Digitized by Google

"The Tycoon and his Government were stupefied at this unexampled audacity of Kioto; they thought that from such an act to the deposition of the Tycoon by the Mikado the distance was small.

"Osaka and Kioto were in a state of revolution. The foreign representatives were informed of all these changes, but they became more determined than ever, encouraged by the Tycoon and his Ministers.

"A letter, which we hope we shall be permitted to publish in a few days, was to be sent to the Mikado. In this letter the Tycoon offered to retire, and begged that the Tycoonate might fall into the hands of Stots-bashi, and the command of the army be entrusted to his relatives, the Daimios of Owari and Kichou. In order to prove to the Mikado and his Court that he was in earnest, he ordered the eight Japanese steamers at anchor before Hiogo to move at once to Osaka, to be ready to convey him to Yedo.

"Happily, this letter was stopped, and the Tycoon was told that it was a shame for himself, and a disgrace to his ancestors, to abdicate, when he was at the head of an army numbering 300,000 men, and to yield to a miserable faction, tyrannising over the Mikado and his Council.

"Another most remarkable document, which we shall probably be hereafter authorised to publish, was at once prepared and dispatched to Kioto. In this masterpiece of Japanese literature the Tycoon entreats the Mikado to give his sanction—and, to support his diplomatic note, he moved with 34,000 of his best troops to Foushimi, about eight miles from Kioto. There he sent for some members of the Mikado's Council, but the reply was that the emissaries of hostile Daimios and the Ronins were in such a rage that it was unsafe for them to undertake the journey. The Mikado, indeed, gave the Tycoon to understand that his presence was necessary to protect his own sacred person.

"The Tycoon at once proceeded to Kioto, with 2,000 troops, ordered some Daimios, officers, apparently Ronins, and in the employ of high members of the Mikado's Council, to be apprehended, and assembled all the representatives of the Daimios actually at Kioto.

"The excitement was great, the crisis fearful. The officers of the legations sent to Osaka, on a special mission, met only the stern and sorrowful faces of the Tycoon's followers, all more or less ready to perform the haru kiri, should the Tycoon be compelled to retire. This painful excitement lasted three days. The representatives of the four Powers, almost hourly informed of the state of affairs, were during all this time busily engaged day and night.

"The Japanese fleet was now ordered to leave Hiogo and Osaka, and take refuge in the Bay of Youra.

"The crisis was hourly approaching. The member of Gorogio Ogasawara Iki-no Kami, throughout the whole of the night of November 22, discussed with thirty-six deputies of the Daimios, the question of the sanction of the treaties. He succeeded in persuading them; but there were invisible enemies round the Mikado, and he himself feared for his life.

"At last all the members of the Gorojio, the great Matskis and high officials of the Tycoon, with Stots-bashi at their head, called on the Mikado, and prostrated themselves at his Majesty's feet. The Mikado was moved; but messages containing threats were brought in every minute, and the Sacred Emperor was still hesitating, when all the high officers declared they would die at once should they not obtain what they had been sent for. Stots-bashi went so far as to take hold of the Mikado, respectfully swearing that he would not loosen his hold until his Majesty sanctioned the treaties. Finally, Knambaku, the first officer of the Mikado, was directed to bring him the book of the irrevocable wills, and the sanction was given.

The change was instantaneous. Where all was fear and distrust, confidence and resolution became triumphant. All congratulated each other on the issue of their patient labours; all expressed the strongest confidence in the future; and they could well say with the utmost truth, 'We have accomplished a good and great work!'

The following is a copy of the notification in which Sir Harry Parkes announced the result:—

"NOTIFICATION.

"The undersigned, Her Britannic Majesty's Envoy Extraordinary and Minister Plenipotentiary, has the satisfaction of making known for the information of all subjects of Her Majesty, that the negotiation in which he has been engaged at Osaka, in concert with his colleagues the representatives of France, the United States of America, and Holland, have been attended with the following results:—

"1. The Mikado has given his formal sanction to the treaties concluded by the Tycoon with the foreign Powers.

"2. Negotiations for the revision of the tariff on a basis agreed upon will at once be proceeded with at Yedo.

"3. The opening of the port of Hiogo and the city of Osaka is guaranteed at the time mentioned in the London Convention of 1862, or an earlier date if circumstances should permit.

"HARRY S. PARKES,
"Her Britannic Majesty's Envoy Extraordinary and Minister Plenipotentiary in Japan."

The *Overland Herald* says:—

"As to the opening of the port of Hiogo and the city of Osaka, some disappointment will probably be felt by those who imagined that the aim of the negotiations, which have for some time been pending, was the curtailment of the period assigned by the Convention of London. It is now arranged that no subterfuges will be accepted as valid reasons for still further postponing the fulfilment of the third article of the Treaty of 1859, but that on the day named, if not sooner, Hiogo and Osaka will be added to the three ports already open. This, indeed, is all that we could have expected, for Japan, as a Sovereign State, has in no way injured us since the ratification of the treaty. That is to say, we have been unable to trace any of the deeds of violence of which we have had to complain further than to their perpetrators or immediate instigators, who have in all cases been princes or Daimios whom we could not recognise diplomatically. But we have at length reached the fountain head, and we have now every reason to believe that the treaties have been made with Japan, and not with one out of a number of isolated potentates. The importance of such a measure has already been amply proved in China. But for our penetration within the walls of the capital our relations would now be in the same state as that into which they fell after the treaty of 1842. We have only to congratulate ourselves that by courage and tact the British Minister with his colleagues have, without bloodshed, gained an advantage in Japan to gain which in China cost the lives of thousands."

Sir Harry Parkes had left in the *Perseus* for Shanghai to meet Lady Parkes, who was expected by the next mail. The *Leopard* had gone to Nagasaki, and several of the other ships for Hong Kong, to be recommissioned.

The trial of G. Gluckmeyer for an assault on Mr. Bickerby (particulars of which were given in our last issue) took place at the United States Consulate on the 18th November, and ended by a verdict of damages for the plaintiff, 6¼ cents. The proceedings fill many columns in the local papers, showing throughout a degree of incompetence and injustice that render Mr. Fisher a disgrace to the flag he represents. The day after the trial, a public meeting was held at the residence of Mr. Morrison, the manager of the Central Bank of Western India, for the purpose of eliciting opinion on the subject of the conduct of the Consul. We have not full details of the proceedings, but the general result was the adoption of a memorial, addressed to the Consuls of England, France, Holland, Prussia, Portugal, and Switzerland, protesting against the gross injustice of the decision.

NAGASAKI.

The Russian steamer *America*, having the Admiral of the Siberian squadron on board, arrived from Nicholaiefsk on the 24th November. The *America* was to have left for Shanghai on the 3rd December. The Admiral was to return home by the present mail, and the *America* to be docked. The *Variag*, which arrived in Nagasaki on the 30th November, was under orders to proceed to Hakodadi, but she will immediately return to winter quarters at Nagasaki. The steamer *Sir Harry Parkes* has been sold to the Prince of Kaga, but the amount paid for her is not yet known. The sale of the *Elgin* is reported. The Japanese have not yet taken delivery of the *Wild Wave*, *Union*, or *Ayrshire Lass*.

CHINA.

PEKING.

A Gazette dated Nov. 14th has reinstated Prince Kung, all his honours and dignities. The former edicts are virtually repealed, and the Prince now stands higher than ever in Imperial favour.

We have no reports as to the official reception of Sir R. Alcock. The above notification, however, appears to distinctly refute the telegrams received lately that the anti-foreigners were in the ascendancy, unless, indeed, Prince Kung has altered his policy, which we do not believe. The telegrams sent to us from Galle are becoming very troublesome, owing to their being sent on by persons unacquainted with China and Japan affairs.

TIEN-TSIN.

H.M.S. *Barossa*, one of the vessels which accompanied Sir R. Alcock from Shanghai, has returned to the latter port. We are happy to state that the whole of the treasure sunk from the *Barossa* has been recovered. At first it was tried to get hold of it by means of grapnels. This, however, was found to be impracticable, as the weight in the box caused the gunwale, thwarts, or anything the grapnel got hold of, to give way. A new expedient was then proposed, viz., the employment of Chinese divers. These men went under the water to a depth of about twenty-five to thirty feet, and fastened a rope's end on to the handles of three boxes one day, and 5 boxes the next, which were then hauled by the *Barossa's* men into a boat lying alongside. The divers were under water on an average about forty odd seconds; one man performed the extraordinary feat of keeping under water fifty-eight seconds. The total value of the money thus recovered was sixteen thousand dollars. The

Digitized by Google

ship's men, with grapnels, saved one box containing two thousand dollars, and the Chinamen, having fixed a line round the sole remaining thwart in the sunk boat, and a grapnel having been fixed forward, the boat itself, containing one thousand dollars, was raised, thus completing the recovery of the whole $19,000.

The following is from the report of Messrs. Platt and Co. :—

In cotton piece goods the market until the 12th instant was firm but quiet, and prices gained rather than lost on our former quotations, owing to the scarcity of stock. Since then, however, a decided improvement has taken place in prices, with an increased demand. We quote 7 lb. grey shirtings at 3 tls. to tls. 3.20 per piece, and 8 lb. at from tls. 3.50 to tls. 3.70. The importation this month has been small. Raw Cotton: The last few days purchasers have submitted to staples which have been formerly condemned as dirty; and whilst on the 11th instant prices were weak at 12 tls. per picul, there is now none on the spot procurable under tls. 14.50 per picul. The most recent sales were made at 14 tls. per picul, and for delivery in the winter at tls. 12.40 per picul.

Woollen goods are only inquired for in small parcels, but Spanish stripes, long ells, and good camlets are scarce, and could be placed in small quantities to advantage.

CHEKIANG.

Amongst the recent appointments to posts of dignity and emolument in the capital, we notice that of one Ping Pu-tsing, a doctor from Shang-yin-hsien, in the province of Chekiang, to the preceptorship of the young prince Chung Chun, a cousin of the reigning Emperor. In spite of the ravages of the rebels and the destruction of all the principal libraries, Chekiang still sustains its reputation as the cradle of genius. No higher distinction can be conferred on a scholar than an appointment to act as a tutor in the Imperial family.

CHINKIANG.

From this port we learn that the troops have left the neighbourhood. The Sung-tzu camp (Kwo Sung-ling's men), now commanded by Yi Ying-kang, has been removed to Ch'u-chou fu, and the Hsun-tzu camp, which is still under Yang Ting-hsun, to So-chieu hsien. These places are situated not far from the boundary of Shantung and Honan.

NANKING.

Li Futai has lately received what may be considered a most decided snub from the Peking Government. Since his elevation to the office of Acting Tsung-tiu of the two Kiang he has constantly forwarded reports to the Throne relative to his temporary jurisdiction. The Pekingese authorities seem to have thought that he was presuming on his dignity, and displaying too great a readiness to write in a dictatorial manner. They have in consequence decreed that no reports are to be forwarded by Li Hung-chang except in concer with Tseng Kwo-fan, and this restriction is said to extend even to reports regarding the affairs of Kiangsu, upon which Li, as Governor, has hitherto had an unquestioned right to communicate with the Throne directly. We presume there was some little spite to be gratified on the part of one of the high officials at the capital, and through his influence Li Futai was favoured with the jeremiad to which we have just alluded.

SHANGHAI.

The English mail of 10th Oct. and the French mail of 17th were both overdue; dates are to the morning of the 9th Dec.

Rowdyism appears to be still rampant. Three Frenchmen named LaValette, Fournier and Benedetti were brought to Shanghai from Amoy under arrest, on the charge of murder and robbery, preferred against them by the Chinese authorities. At their trial, however, no evidence of these crimes was forthcoming, and they were necessarily discharged; but with unblushing effrontery they openly avowed to the French Consul General their intention of forthwith repairing to Formosa to aid in a projected rebellion, and even described the resources and objects of the insurgents, whom they intended to assist in driving the Chinese from the island. This the Consul General considered a sufficient reason for locking them up until the departure of a French man of war, when they will be deported.

With reference to the rebellion, the following is from the *North China Herald* :—

Native couriers report the collection of enormous masses of Nienfei in Shantung and Honan. In the former province trade is completely paralysed, and Tseng Kwo-fan is said to be retreating rapidly towards the Yellow River. This he finds no easy task, as the Nienfei take every opportunity of harassing his troops as they pass through the narrow mountain defiles, which afford the only egress from the valleys in which they were encamped. To judge by the statements made by our informant, Tseng Kwo-fan is almost surrounded, but this is probably an exaggeration. It is, however, beyond doubt that his situation is at the present moment most critical. From the same source we also learn that the Kuantung rebels have made an irruption into Kiangsi, and are devastating the country, burning villages, and otherwise spreading the new gospel of peace. The Lieh-tai of Kiangsu has despatched a Wei-yuan to Hanchow to make inquiries into the matter.

Richard Stephens, who was committed for trial before the Supreme Court on a charge of murder, and subsequently escaped from the Consular Gaol at Hankow, was recaptured by the Consular Constable, on a raft about forty miles from Hankow. He has now, in company with his accomplices, William Garde and John Watt, arrived at the Shanghai Consular Gaol, where they await their trial.

John Clements and Thomas Goldsmith, who were convicted by W. H. Payne Esq., H. M. Acting Vice-Consul at Taku, of being drunk and disorderly, disobeying orders, striking the master, altering the course of the vessel and endangering the safety of their ship, the *Make*, and sentenced, the former to two and the latter to six months' imprisonment with hard labour, have arrived per Steamer *Ying-tsze-fei*, in order to undergo their sentences in H. M. Consular Gaol at this port there being but very defective aol accommodation at Taku and, Tientsin.

The collision case of the *'Fire* [*Dart v.* the *Emperor* was heard before Sir Harry Parkes, and the Consular decision being in favour of the *Emperor*, the owners of the other steamer appealed to the Chief Superintendent of Trade at Peking, and his confirmation of the judgment of the Consular Court was notified to the parties concerned by Consul Winchester.

On the 30th Nov. the festival of St. Andrew, the Patron Saint of Scotland, was celebrated by the Scotch members of the community with much eclat, two large banquets being given.

At a meeting of the North China branch of the Asiatic Society, a paper was read on the "Hieroglyphic Character of the Chinese written Language," by Mr. Jamieson.

At a meeting at Ningpo, the proposed branch Post-office of the Municipal Council at Shanghai was condemned.

The following articles have been agreed on between Mr. Wade, our acting Minister, and Prince Kung :—

Article I.—Whenever a ship or goods belonging to a British subject may be seized in a port of China by the Customs, the seizure is to be reported without delay to the Superintendent. If he consider the seizure justified, he will direct the Foreign Commissioner of Customs to give notice to the party to whom the ship or goods are declared to belong, that the ship or goods have been seized because such or such an irregularity has been committed, and that the said ship or goods will be confiscated, unless, before noon on a certain day, being the sixth day from the date of the delivery of the notice, the Superintendent receive from the British Consul an official application to have the case fully investigated.

The British subject to whom the ship or goods belong, if prepared to maintain that the alleged irregularity has not been committed, is free to appeal, within the term of six days, direct to the Commissioner. If satisfied with his explanations, the Superintendent will direct the release of the ship or goods; otherwise, if he elect not so to appeal to the Customs, or, if after receiving his explanations, the Superintendent still decline to release the ship or goods, he may appeal to his Consul who will write to inform the Superintendent of the particulars of his appeal, and to request him (the Superintendent) to name a day for the public investigation of the evidence on which the action of the Customs is founded.

Art. II.—The Superintendent, on receipt of the Consul's communication, will name a day for meeting him at the Custom House, and the Consul will desire the merchant to appear with his witnesses at the Custom House on the day named, and will, himself, on that day, proceed to the Custom House. The Superintendent will invite the Consul to take his seat with him. The Commissioner of Customs will also be seated to assist the Superintendent. Proceedings will be opened by the Superintendent, who will call on the Customs' employés who have seized the ship or goods to state the circumstances which occasioned the seizure and will question them according to their evidence. Whatever the merchant interested may have to state in contradiction of their evidence, he will state to the Consul, who will cross-examine them for him. Such will be the proceedings in the interest of truth and fairness. The Consul and Superintendent may, if they see fit, appoint deputies to meet at the Custom House in their stead; in which case the order of proceeding will be the same as if they were present in person.

Article III.—Notes will be taken of the statements of all parties examined, and the paper containing these will be signed and sealed by the Consul and the Superintendent. The room will then be cleared, and the Superintendent will then inform the Consul of the course he proposes to pursue. If he propose to confiscate the vessel or goods, and the Consul dissent, the merchant interested may appeal, and the Consul having given notice of the appeal to the Superintendent, they will forward copies of the above notes, the Consul to his Minister, and the Superintendent to the Yamen of Foreign Affairs at Peking. If the Consul agree with the Superintendent that the ship or goods ought to be confiscated, the merchant will not be entitled to appeal. In no case will the release of ship or goods entitle the merchant to indemnification for the seizure, whether these be released after the investigation at the Custom House or after appeal to the high authorities of both nations at Peking.

Article IV.—The case being referred to superior authority, the merchant interested shall be at liberty to give a bond binding himself to pay

Digitized by Google

the full value of the ship or goods attached, should the ultimate decision be against him; which bond, being sealed with the Consular seal and deposited with the Superintendent, the Superintendent will restore to the merchant the ship or goods attached, and when the superior authority shall have decided whether so much money is to be paid, or the whole of the property seized and confiscated, the merchant will be called on to pay accordingly.

If the merchant decline to give the necessary security, the ship or merchandize attached will be detained. But whether the decision of the superior authority be favourable to the appellant or not, the appellant wil not be entitled to claim indemnity.

HONG KONG.

The English mail of the 10th of October, which broke down at Penang in the *Behar*, arrived in part per French mail of the 17th on the 4th of December. The passengers and cargo had, however, to wait for the following mail of the 26th of October, which arrived out on the 12th of December. Dates are now down to the 15th.

The weather during the fortnight had been, though somewhat wet, neither unseasonably cold nor too warm for November. The health of the colony appears to have improved with the cooling down of the summer months.

The Criminal Sessions closed on the 25th, after the disposal of some twenty-two cases. A Chinaman who was caught running off with some property belonging to Mr. Dalziel, and who broke his head on the curb-stone in the race, received eighteen months' hard labour.—The trial of the great piracy case resulted in the discharge of thirteen of the pirates and conviction of two only, who were sentenced (after some discussion as to their eligibility to the gallows) to five years' penal servitude, and to be flogged three times, receiving in all one hundred and fifty lashes each.—In one case before the Court the prisoner was reported dead; his bail sureties, on the plea being rejected as unsatisfactory, at once paid in the amount of the bail, which fact speaks for itself clearly enough.—A Parsee gentleman had died during the week from the effects of injuries received in an attack made on his bungalow some time ago, in which, it was said, the police rendered no assistance until after the departure of the ruffians.

The pirates have received another check near Amoy by the gunboat *Grasshopper*, the details of which are as follows:—Several Fuhchau junks, laden with timber, put into Port Matheson for shelter from a gale; here they found themselves in company with four Ningpo junks, and a large, heavily-armed lorcha—the latter doubtless, a professional pirate. Seeing the timber boats at anchor, the pirates boarded and took possession, demanded eight hundred taels for the release of each, and took with them hostages from the captured crews. The *Grasshopper*, chancing to enter Port Matheson, received information of the illegal transaction then pending. On this she at once proceeded to capture the pirates, who, however, made a most determined resistance, one shot from an 18-pounder on board the lorcha piercing her quarter. While the fight was going on, the steamer *Pootung*—which has been converted into a Chinese gunboat—appeared, to which the *Grasshopper* signalled for assistance. After a hard fight, the lorcha blew up, a few of its crew gaining the shore, while three or four were picked up by our men. Either two or three of the junks were afterwards destroyed, and another smaller one, with seventeen prisoners, was captured and taken into Amoy. These worthies had been delivered over to the mandarins, who ordered their speedy execution on an appointed day. Several Europeans had expressed a wish to witness the ceremony of decapitation, but the interesting event had been put off.

H.M.S. *Rattler*, with the gun-boat *Bouncer* in tow, left Nagasaki on the 5th of December. They encountered very heavy winds; and on the 8th, during the night, the tow-rope broke; and at 2·50 A.M. on the day following, the vessels came in collision, the *Rattler* striking the *Bouncer* upon her port bow, carrying away the vessel's fore and mizen masts, the cook's galley, bulwarks, boats, and guns, and causing much further damage. The gun-boat beginning to make a good deal of water, she would very soon have sunk, had not the *Rattler's* boats come to her assistance. It being very rough weather at the time, and the vessel being in much danger, it was thought advisable to ask for volunteers from either of the vessels to go on board of her and endeavour, with the assistance of *Rattler*, to get her into port. The whole of the gallant crew of the *Bouncer* immediately responded to the call, and by their arduous exertions managed to keep the vessel from sinking. From her general appearance, she seems totally unfit for further service.

A somewhat interesting ceremony took place in the harbour on the 5th December, the launch of a pretty little gunboat. She is intended to be the first of a number of gunboats for the Portuguese Government to be built by the same firm—Messrs. John Riach and Co.; and was christened the *Camoes* as she slipped gracefully into the water. Her length is 100 feet, her beam is 18 feet, and the depth of her hold is 8 feet; her engines are 40 nominal, working up to double that power.

The *Opossum*, gunboat, tender to Her Majesty's ship *Princess Charlotte*, at Hong Kong, has been despatched to Kulan, in which neighbourhood some daring piracies have been committed; one, it was reported, on a European vessel.

The *Josefita and Almira*, which conveyed coolies from Macao to Havanna, arrived back on the 11th Dec., *via* New York, with a general cargo. She reports having landed at Havanna 568 coolies out of 571.

The following records another case of piracy:—

The *Bentinck*, James Thomas, master, put back having been surprised by pirates, in Chimo Bay on 9th December, with loss of two men, portion of the cargo, master's and crew's effects, ships stores furniture, &c.:—On the 4th, sailed from Hong Kong bound to Ningpo, with a general cargo, and crew consisting of 14 men, all went well, and on the 8th instant, being in with Chimo Bay, and blowing a fresh increasing gale from E. to N., I considered it would be advantageous to the progress to the passage to anchor in the said Chimo Bay till 3 or 4 o'clock the following morning, accordingly came to in six fathoms. At 5.15 P.M., set the regular watch, with orders to call all hands if any suspicious craft were approaching the ship. At 2.15 A.M., the second mate called all hands saying there was a junk apparently coming alongside. We all got on deck almost immediately, but in a moment the junk sheered up on the port quarter, heaving stinkpots and firing pistols shots on board as she ranged alongside. I saw some of the men run to the firearms a few of which were on deck, but as some of the pirates were by that time on board, I ordered them (my crew) not to fire a shot, but to get down below immediately as I considered it then the only chance for their lives. We then all made below, the deck being by that time covered with pirates. On their getting hold of me, the apparent leader ordered me to showed him where the opium and 2,000 dollars were stowed; as we had neither, I could not tell him; he persisted that we had, as he had information from Canton that it was put on board. In the meantime they were rifling every place on board the ship, breaking the hatches open, &c., and dragging me with them, with continually threats of being shot, &c. As day was breaking they all at once at a signal left the ship, leaving me in the main hold. I extinguished all the lights they had been using, and watched the junk leave the ship. I then got on deck and with the second mate began to muster the men. When we found two missing, viz., James Collier (A.B.) and William Tally (A.B.), and consider they must have been chased over the bows and shot in the water. All the remainder of the crew were unhurt, myself being the only one with either marks or bruises. The pirates had robbed the vessel of a portion of the cargo, ship stores, and furniture, and crew's and master's effects, and breaking the cabin lockers and doors, and rifling the cabin of everything of value.—JAMES THOMAS, Master.

The following is from the Government *Gazette*:—"His Excellency the Acting Governor has sanctioned a properly qualified surveyor being temporarily attached to the Surveyor General's Department for the special purpose of making a new survey of Victoria. A sum of 2,000 dols. is offered by way of remuneration."

A cricket match, "Military *v.* Civilians," occupied three days, and resulted in a victory for the civilians with five wickets to spare, The Garrison Glee and Madrigal Society's concert had also taken place, and proved a decided success.

SIAM.

BANGKOK.

We have the *Siam Times* of the 16th November. Mr. Knox, the Consul, had been subpœnaed by the Court at Rangoon, on a trial in which he had, it is stated, favoured one of the parties in an unjust manner. The result will, of course, reach us from Rangoon.

MALACCA STRAITS.

SINGAPORE.

From this port we have dates to 23rd December.

The London mail of the 10th November arrived on the 14th December, by the P. and O. Company's steamer *Jeddo*. The French steamer, with the mails of the 17th November, had not made her appearance. The present homeward mail was brought down from China by the steamer *Singapore*, but was sent on from Singapore by the *Behar*, which vessel had completed her repairs.

There was some talk of Government purchasing a new Government House, at the distance of about three miles from town. The present Government residence is about a mile and a-half from town, and the inconvenience to those who have business to transact at the Governor's office is, on account of even this distance, already very great; unless, therefore, the Governor has an office in town, it is feared that this evil will be still further increased.

The screw steamer *Far East*, Captain Jones, arrived on the 12th December from Calcutta, and left on the 13th for Hong Kong.

The progress of the Dutch on the north-east coast of Sumatra continues to afford an ample source of discussion. The *Straits Times* is of opinion that the terms of the treaty with Holland of 1824 are far too clear and precise to afford us any pretext for exclaiming against such acquisitions of territory or influence the Dutch may choose to make in Sumatra; but at the same time, it is highly important that the exact nature and extent of these acquisitions should be ascertained, and that our local Government should be in a position to secure that they do not in any way interfere with that free trade and those equal commercial privileges which are guaranteed by this same treaty of 1824, and which, if preserved to us, will make our neighbours' progress in Sumatra as beneficial to English commerce as to their own.

The American steamer *Fusi-yama* anchored in the harbour on the 12th December, *en route* to Yokohama. She is reported to be for the Japanese Government.

H.M.'s steamer *Serpent*, Captain Bullock, from England (*via* Batavia), arrived on the 16th December, on her way to China.

The *Straits Times* states that H.M.'s Straits gunboat *Tonze* has been sold to the superintendent of the Labuan Coal Company (Limited) for the sum of 4,500 dols.

Digitized by Google

H.M.'s steamer *Banterer* was expected to leave shortly for Malacca, and would be replaced by H.M.'s steamer *Coquette*, from Batavia, about the beginning of the year.

H.M.'s steamer *Orontes*, Captain Hire, with 974 European troops on board from Mauritius, with dates to the 26th November, arrived on the 14th December *en route* for Hong Kong.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

AINSLIE—On the 25th Nov., the wife of T. A. Ainslie, M.D., of Tientsin, of a daughter.
BOOTH—On the 10th Dec., at Hong Kong, the wife of Arthur Booth, of a son.
COHEN—On the 13th Jan., at Allendale, Edgbaston, Birmingham, the wife of Edward Cohen, Esq., of a daughter.
COBBOLD—On the 15th Jan., at Ufford, Suffolk, the wife of Ernest St. G. Cobbold, Esq., of a son.
DANTON—On the 12th Dec., at East Point, Hong Kong, the wife of Edward Danton, of a daughter.
DUMONT—On the 28th Nov., at Shanghai, the wife of A. Dumont, of a daughter.
EDWARDS—On the 18th Jan., at Surbiton, Kingston-on-Thames, the wife of Henry Ferne Edwards, Esq., of San Francisco and Hong Kong, of a daughter.
HEWETT—On the 14th Jan., at Eastern-parade, Southsea, the wife of Capt. W. N. W. Hewett, R.N., V.C., H.M.S. Basilisk, of a daughter.
JORGENSON—On the 24th Nov., at the General Hospital, Shanghai, Captain A. T. Jorgensen, late Master of the Danish brig Insulaneren.
MURRAY—On the 2nd Dec., at Hong Kong, the wife of Assistant Commissary-General James William Murray, of a daughter.
SCOTT—On the 19th Dec., at Abbotsford, Singapore, the wife of W. R. Scott, Esq., of a daughter.
WAGNER—On the 11th Dec., at 22, Hollywood-road, Hong Kong, the wife of Herr C. Wagner, of a daughter.

MARRIAGES.

BROAD—ROPER.—On the 20th Jan., at St. George's Church, Hanover-square, by the Rev. T. W. Bray, Charles Henry Broad, Esq., late of the War-office, widower, to Frances Mary, widow of the late W. H. Roper, Esq., of China, and Tenby Lodge, Kingston, Surrey.
GAVIN—SCOTT.—On the 11th inst., at 4, Bonnington Place, Edinburgh, by the Rev. James Grant, D.D., D.C.L., Oxon, of St. Mary's, John Gavin, Esq., Civil Engineer and Architect, of Hankow, China, to Mary Scott, only daughter of George Walker, Esq., M.D. No cards.
LOW—HOARE.—On the 11th Dec., at Christ Church, Forest-hill, by the Rev. W. Taylor Jones, M.A., Principal of Sydenham College, assisted by the Rev. J. M. Clarke, M.A., incumbent, S. P. Low, of Round Hill Villa, Sydenham, and 55, Parliament street, to Emma S., elder daughter of Joseph Hoare, of Carisbrooke House, Forest-hill.
SCHAALJE—ANGEBEEK.—On the 12th Dec., at Rhio, M. Schaalje, Esq., to Henrietta Elizabeth, eldest daughter of J. E. Van Angebeek, Esq., of Rhio.
STOREY—DOUGLAS.—On the 24th Oct., by special licence, at St. Phillip's Church, Sydney, by the Ven. Rev. the Dean of Sydney, Charles, only son of C. H. Storey, of Hong Kong, to Elizabeth Forsyth H., only daughter of Alexander Douglas, of Sydney N.S. Wales.

DEATHS.

BANNERMAN—On the 21st Jan., at his residence, 25, Connaught-square, Hyde-park, Jas. Bannerman, Esq., late of the H.E.I.C.C.S. in China, in his 71st year.
BLAMIRE—On the 24th Nov., at Solferino, Natal, from protracted disease contracted on service in China, and borne with great fortitude, Lieut.-Colonel Blamire, 99th Regt.
HAMILTON—On the 11th Dec., at sea, William Hamilton, second officer of the P. and O. Co.'s steamship Ottawa.
MARTIN—On the 6th Dec., at Somerset Hospital, Green Point, Capetown, Thomas Martin, Esq., per passenger ship Norwood, from Shanghai.
MCSORLEY—On the 26th Nov., drowned, at Nagasaki, Edward McSorley, late surgeon, H.M.S. Rattler, deeply regretted by all his shipmates.
MELLISS—On the 30th Nov., at Yokohama, Alexander M. Melliss, late of Shanghai.
ROZARIO—On the 10th Dec., at Hong Kong, Miguel Benjamim do Rozario, for many years a compositor in the *China Mail* office, aged 42 years.
RUTTER—On the 24th Jan., at Glebelands, Mitcham, Surrey, Alice Edith, the infant daughter of Isaac Campbell Rutter, aged seven months.
WHEELOCK—On the 25th Nov., suddenly, at Shanghai, John Andrews Wheelock.

EXCHANGES ON LONDON.

Mexican dollars at Shanghai, taels 72 per 100, and Exchange on Hong Kong, 27 discount. Hong Kong and Shanghai Bank shares, 9½ prem.; Gas Company, 30 prem; Hong Kong and Whampoa Docks, 45 prem.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—Canton: The transactions in this market were very limited until yesterday, when some large settlements of Common Scented Orange Pekoe were reported at prices establishing an advance of about one tael on last quotations. Country Congous: Two more chops have arrived, which increases our stock to four (common Oonahms), for which the teamen are firm, asking fully 3 tls. over last home rates. Canton-Greens: 4,000 boxes have been settled, principally for England, consisting of common at 11 to 13 tls., and fine to finest 23 to 25 taels. Canton made Teas: Holders are still very firm for all scented teas, especially for those of finer descriptions, but buyers since receipt of last mail's news, show less eagerness to purchase. Some 2,000 half-chests Powchong have found buyers for America at full prices.

AMOY.—A few days after our last report an active competition arose for Oolongs, and an average rise of about $2 was observable on common to fair cargo teas, while some of the finer grades were taken at $3 to $4 above their previous values. The advance was not long sustained, and latterly settlements have been made on about at par with last month's quotations. Oolongs: Arrivals have come to hand more freely than was anticipated, and during the month 27,148 packages have found buyers. We quote Ankoi mixed and common cargo grades $16.50 to $20; fair cargo, $21 to $25; good, $26 to $29; fine to finest, $29 to $35. Ankois: 333 packages good clean tea have been settled at $15 to $16. Congous: Have shown no noticeable change. Settlements comprising 2,954 packages, at $12 for low ordinary, and $16 to $20 for common to rather flowery kinds.

FOOCHOW.—The following is a report of the transactions for the fortnight. Congoes: 18,362 chests, 18,360 half-chests, and 972 boxes, at 7½ to 14¾ taels for dust and broken leaf, 14 to 18½ for common to good common, and 18½ to 27½ taels for flavoury to good flavoury. Souchongs: 585 chests, fair at 24½ taels. Oolongs: 10,500 half-chests, at 14½ to 15½ taels for inferior, 17½ to 21 for common to fair cargo, and 25 to 26 taels for good cargo. Scented: 636 boxes dusty leaf, at 15 taels.

SHANGHAI.—Settlements amount to 11,400 chests at 19 to 29 tls. for common to good Oonahms, and 26 to 29 tls. for fair to good Oopack and Ningchow kinds. Reshipments have been 2,500 chests, and the stock comprises about 23 chops or 6,500 chests. Green Teas: Settlements of Moyunes and Fychows have been to a fair extent at previous rates, while an advance of one tael may be quoted for Pingsueys. There is but little doubt that the supply of all descriptions will fall short of last season, and we anticipate a good business after the arrival of the mail. Settlements have been 22 chops, or 13,800 half-chests Fychow and Moyune at tls. 27½ to 46, and 4 chops, or 2,300 half-chests Pingsuey at 34 to 36 tls. proportion. Re-shipments have been 10,600 half-chests, and the stock is estimated at 16,000 half-chests Fychows and Moyunes, 3,300 half-chests Pingsueys and 3,530 half-chests local packed Fychows.

HANKOW.—The present season is now rapidly drawing to a close, and many of the teamen and brokers have already returned to Canton, the former, we doubt not, being perfectly satisfied with the result of their operations, which must have exceeded their most sanguine expectations. The business of the month has been chiefly confined to purchases for the Shanghai market. Settlements amounting to 3 chops Oonahm, at prices varying from taels 14.25 to 19 per picul, and 2 chops Oopacks at 20 to 25 taels, the more recent purchases showing an advance of 1 to 1.50 taels on former quotations.

KIUKIANG.—Green Teas: Operations had been continued by buyers for the American market, and as much as 43 tls. proportion (equal 51 tls. in Shanghai) had been paid for one chop. Total settlements reached 18,000 half-chests, leaving about 10,000 half-chests on the market. Teamen were unanimous in stating that no more than 30,000 packages remained to come forward, which would make the season's supply at Kiukiang aggregate about 125,000 against a total of 230,000 packages last season. The growers had already made large profits, and were accordingly very firm, having no need to press sales.

YOKOHAMA.—Our last market report was dated the 14th inst., since then our tea market as not been quite so active; transactions have taken place to a fair extent in good medium and fine teas at about our quotations of last fortnight; a few small parcels have been settled at high rates. In prices we make no make no material alteration. Settlements for the fortnight amount to about 5,000 piculs, leaving a stock at present on the market of about 1,000 piculs.

RAW SILK.—This mail brings 960 bales and 175 cases to Southampton, 117 bales to Marseilles, and 194 cases to Bombay.

CANTON.—The inquiry mentioned in our last has still continued, and a considerable business again been done, the sales of the fortnight amounting to no less than 750 piculs. The better kinds, getting more scarce, have advanced $5 to 10, and this has been pretty generally established in all kinds. The seventh crop is expected in a fortnight, and, on account of present high rates, some of it is expected to be offered on this market instead of being used for native consumption.

SHANGHAI.—The business done has been little more than nominal, comprising only 150 bales at even slightly higher rates than those last given. Only 200 bales have come to hand, and dealers show no disposition to press forward what little remains unsold. There is no change in stock. The quotations must be considered nominal. The current quotations are:—Tsatlees, chops No. 1; tls. 620 to 630 per picul; Taysaams, chops No. 1; tls. 530 to 540; do. No. 2, do. 500 to 510.

YOKOHAMA.—The downward tendency of prices which we noticed at the departure of the last mail steamer having further developed itself, several buyers seized the occasion to purchase, when a fair quantity of Silk was settled at a reduction of $20 to 40 on the previous rates. But this did not last long; the value of the dollar in the native market, receded again, and the prices soon returned to the former point, with this difference, however, that the foreign exchanges have also risen in the meantime, and that consequently the prime cost of the article is higher. The total settlements of this season amount now to 6,000 bales, against 7,000 at the same time last year, showing a deficiency which, in all probability, will become more and more marked as we go on. The unsold stock on the market is about 500 piculs, composed almost exclusively of hank silk, of medium and inferior description with an extremely proportion of really good and fine. A few parcels of Sodai, Oshio and Coshio Silk have down and found buyers at our quotations:—Ida: Medium, 830 to 850 tls.; do. inferior, 750 to 800 tls. Mybash and Sinchu: Best parcels offering, 860 to 885; do. medium, 830 to 850 tls.; do. inferior, 750 to 810 tls. Oshio: Best, 850 tls.; do. medium, 780 to 800 tls. Sodai: Best, 840 tls.

CAMPHOR.—Hong Kong: The sales during the fortnight comprise 150 piculs Formosa, at $24 unpacked, and 150 piculs Japan, at $21 unpacked. The market is now bare of stocks, and the above sales must be considered as to-day's quotations.

CHINA IMPORTS.

HONG KONG.

COTTON YARN.—The quotations for this article do not show any change during the fortnight, and the extreme smallness of stocks alone accounts for the trifling sales which have been effected. 91 bales only have found buyers in this colony during the fortnight; while from Amoy we hear of settlements of 55 bales at $55.50 to $69.50 per picul. Grey Shirtings: The dealers continue to act very cautiously, and do not show any inclination to increase their present stocks, and prices are rather weak, although no actual change can be made in quotations. The sales reported amount to 4,500 pieces sold to Chinese buyers, about 10,000 pieces purchased by foreigners "to arrive," and 4,700

Digitized by Google

pieces of "sea damaged goods," which have been placed by public auction. In Amoy settlements are put at 600 pieces 8⅓ lbs. at $5.15 per piece, while in Foochow some 700 pieces of 7 lbs. goods have found buyers at $4.45 per piece. White Shirtings: The sales of these goods reported in this colony consist almost entirely of goods from second hands, and are estimated to amount to 4,800 pieces at about previous rates. T-Cloths: In the entire absence of any stocks an advance of about 10 cents per piece has been established in the value of these goods, and the sales reported during the fortnight do not exceed 1,000 pieces. American Drills: Quotations are merely nominal, there being no supplies on the market. White Spotted Shirtings, Dyed ditto, Brocades, White and Coloured: Dyed Shirtings have been bought to arrive to the extent of 1,000 pieces, and a similar quantity of Coloured Brocades has been purchased on the same terms. Damasks and Chintzes: 200 pieces of the former have found buyers. Raw Cotton: The value of all descriptions of this staple shows a decline, as compared with last advices, equal to 50 cents per picul, and there exists but a moderate amount of demand for the article. The sales to Chinese of all descriptions amount to 5,650 bales; while 2,350 bales are reported purchased on European account. In the Canton market, where a decline of 1 to 2 taels per picul has been submitted to, the sales of the fortnight are put at 1,800 bales.

WOOLLENS.—Spanish Stripes, Medium Cloths, Ladies' and Habit Cloths: There has not been the slightest demand shown for these manufactures during the past fortnight, and transactions are confined to the settlements of about 100 pieces of the first-named. Long Ells: Again show a trifling decline in value, but in absence of any settlements the annexed quotations must be deemed nearly nominal. Camlets: 220 pieces of English manufacture have found buyers. Lastings: Sales of 600 pieces are reported. Blankets: Remain as before quoted, without sales to notice.

METALS.—Iron Nail Rod, &c.: The settlements of the past fortnight consist of 1,680 piculs of Nail Rod and 126 of Hoop Iron, while from Canton we hear of the purchase of 800 piculs of the first-named description. Lead: Has not shown any tendency to advance in value in this market, while in Canton quotations are slightly easier; sales 350 and 1,500 piculs respectively. Tin: 1,180 slabs have found buyers. Tin Plates: Nothing doing. Steel: There are not any sales to report.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—None.

At SHANGHAI.—From London: Nov. 28, Spirit of the Deep; 30, Laurel, Dilkhoosh. From Liverpool: 30, Aerolite; Dec. 7, Petchelee. From New York: Nov. 30, Horatio.

At HONG KONG.—From Liverpool, Dec. 9, Admiral Lyons. From Cardiff: 2, Madeira. From New York: 11, Josefita and Almira. From Boston: 6, Santee.

At MANILA.—None.

At SINGAPORE.—From New York: Dec. 11, Fusiyama (str.).

At PENANG.—From Glasgow: Dec. 22, Foam.

DEPARTURES.

From YOKOHAMA.—None.

From SHANGHAI.—For London: Dec. 3, Glencoe; 7, City of Quebec. For New York: 4, Oscar.

From FOOCHOW.—For London: Portland, Juanpore. For Falmouth: Aldebaran. For New York: Nabob.

From HONG KONG and CANTON.—For New York: Dec. 13, Tanjore; Nov. 28, Midnight; 7, Bothwell Castle.

From MANILA for LONDON.—Dec. 1, Lottie Warren. For Liverpool: Nov. 25, Maria Vicenta.

From SINGAPORE.—For London: Dec. 11, Winterthur; 16, Rozella. For Liverpool: 22, Excelsior.

From PENANG.—For London: Dec. 16, Mariquita. For Boston: 5, Monitor.

VESSELS LOADING.

At YOKOHAMA.—For London: Cleveland.

At NAGASAKI.—For London, Chanticleer.

At SHANGHAI.—For London: Indus, Patrician, Rajah of Cochin, Earl Dalhousie, Helen Finlayson. For New York: Capiolani, J. N. Cushing.

At FOOCHOW.—For London: Lammermuir (full), Bacchante, Eurydice. For New York: Archer, Glenclune.

At HONG KONG AND CANTON.—For London: James Russell, Gitana, Layard.

At MANILA.—For London: Monsoon, Moulin. For Liverpool: Labrador.

At PENANG.—None.

FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London: Cotton and tea, £2 to £2 10s.; silk, £4 to £4 10s. per ton of 50 cubic feet.

At SHANGHAI.—For large vessels for the coast a good demand exists, but for home there is no improvement; the rate to London is £1 10s. per ton of 50 cubic feet, and to New York £2 per ton of 40 feet.

At FOOCHOW.—To London: £2 5s. To New York: £2.

At AMOY.—To New York: £1 16s. 7d.

At HONG KONG.—There is some demand for tonnage to Bangkok; to other ports and for home there is no improvement. The circular of George Holmes gives the following quotations:—To load at the rice ports to Continent, £2 10s. to £2 15s. per ton; to Great Britain, ditto; to New York, $9 to $10; to Bangkok and back, 45 cents per picul. The estimated number and tonnage of disengaged vessels in Hong Kong is 98, and 47,902 tons.

At MANILA.—To United Kingdom: Unclayed sugar, £2; hemp, £2 per ton.

At PENANG.—To London: £1 2s. 6d. dead weight, and £1 10s. light freight.

At BATAVIA.—To United Kingdom: £2 5s. per ton.

VESSELS PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA, &c.—Dec. 4, W. and Clara, Amsterdam to Batavia: 5, Hugo Grotius, Rotterdam to Batavia.

From CHINA, &c., to ENGLAND and CONTINENT.—Nov. 19, Canaan, Foochow to London; Dartmouth, Shanghai to London; 22, Copernicus, Batavia to Rotterdam; 23, L. J. Enthoven, Batavia to Schiedam; 24, Selina Jane, Canton to Hamburg; 25, Patna, Shanghai to Liverpool; Vesta, Batavia to Rotterdan; 26, Annie Archibald, Macao to London; Christina, Batavia to Amsterdam; 29, Alexandrina, Foochow to London; 30, Sirocco, Manila to Liverpool; Simon Hobley, Yokohama to London; G. H. Wappans, Singapore to Channel; Dec. 5, Forerunner, Singapore to Falmouth; Beemah, Foochow to London; Santon, Macao to London; Betsie Stanton, Yokohama to London; 8, Hercules, Batavia to Amsterdam; 9, New Ed, Hong Kong to Falmouth; Invincible, Shanghai to London; L. E. Ashley, Shanghai to London; 11, Corea, Foochow to London; Robin Hood, Shanghai to London; Horsa, Shanghai to London.

From CHINA, &c., TO UNITED STATES.—Nov. 25, Samuel Russell, Japan to New York; 29, Golden Fleece, Zebu to New York; 30 Mandarin, Amoy to New York, Wild Gazelle, Amoy to New York; Dec. 3, Edith, Japan to New York; 5, Queen of the Forth, Shanghai to New York, Henry Hambrek, Foochow to New York; 9, Benefactress, Amoy to New York; 10, George Becker, Shanghai to New York; 11, Esmeralda, Amoy to New York.

COMMERCIAL POSTSCRIPT.

The following is from Mr. Page's Circular:—The settlements of Bar Silver during the fortnight probably exceed £1,000,000, including large contracts in advance for the steamers from Marseilles on 28th inst. to Calcutta, and on 5th February to Bombay, with some transactions for the Bombay steamer from Southampton on 12th February. The price has ranged from 61½ to 61 13-16, chiefly at 61¾ via Marseilles, and 61⅞ via Southampton; considerable sales of five-franc pieces were made via Marseilles at 59 15-16, and 60d. The aggregate shipments recorded since 9th January amount to £943,126, in addition to which about £300,000 is engaged for the Bombay steamer from Southampton to-morrow, and £315,000 in gold. The market has been rather quiet since yesterday, and the nearest closing quotation is 61⅝d. to 61¾d.

The prospectus is issued of the London, Asiatic, and American Company (Limited), with a proposed capital of £1,000,000 (subject to increase), in 50,000 shares of £20 each, of which "it is not anticipated that more than £10 per share will be called up." It appears that this company has been formed for the purpose of taking over and carrying on the united businesses of the firms of Messrs. Timothy Wiggin and Co., Messrs. Grey and Coles, and Messrs. Thomas Cardwell and Co., of London; Messrs. Russell, Coles, and Co., and Messrs. Thomas Cardwell and Co., of Liverpool; and Messrs. Grey and Co., and Messrs. Cardwell, Parsons, and Co., of Bombay; and the board is exclusively composed of members of these firms.

ARRIVALS NOT INCLUDED IN THE TABLES.—January 23, at Texel, from Batavia, Princes Amalia; 24, from Pasaroeang, Lodore; from Wynkooper's Bay, Fagel; 23, off the Start, from Foo-Chow-Foo, Florence Nightingale; 27, off Falmouth, from Pasaroeang, Dorothea; at, London, from Colombo, &c., Royal George; 28, at Deal, from Ceylon Percy; Jan. 23, off Dungeness, from Batavia, India Packet; 13, at Bushire, from Batavia, Richard Cobden.

DEPARTURES.—Jan. —, from Shields, for Hong Kong, Vicksburg; 24, from Newport, for Galle, Elizabeth Cushing; from Sunderland, for Jan Peter; 24, From Liverpool for Shanghai, Chalgrove, Persia; for Hong Hong Kong, Challenge; Jan. —, from Hamburg for Singapore, Jan Valer, Kong, Everest; 24, from Cardiff for Yokohama, John Norman; for Shanghai, Blencathra; 25, for Hong Kong, Royal Minstrel; 25, from Liverpool for Singapore, Falcon.

SPOKEN.—Douglas, Foo-chow-Foo to New York, Jan. 3, 4 N., 34 W. Kortenaar, Batavia to Holland, Dec. 2, 33 S., 15 E. Sailor Prince, Cardiff to Manila, Dec. 19, on the line, 28 W.

LAID-ON.—At Liverpool: For Hong Kong, Veronica; for Galle: Simoon. At London: For Hong Kong, Hotspur.

THE OAK-LEAF SILKWORM.

The following letter has been published in *The Times*, showing that there is some prospect of successfully introducing into our own country this valuable description of the silkworm. The writer has, however, sadly mis-spelt the name of Dr. Pompe van Meerdervoort, the Dutch medical officer at Nagasaki, through whose exertions the *Bombyx Yama-mai* was introduced into Europe. Dr. van Meerdervoort's high attainments and services in the cause of science certainly render him well worthy of "honourable mention":—

Sir,—At the present time, when the cultivation of the mulberry silkworm is attended with great risk in consequence of the disease which has now prevailed for several years, and which has had the effect of greatly increasing the price of silk all over Europe, I venture to call your attention to a report upon the silkworm of the oak *Bombyx Yama-mai*, lately introduced into France from Japan, and which the reporter considers as perfectly adapted to the climate of Normandy, and I think I may add, after a residence of two years at Caen, that if this be correct it may also be introduced with success into the south and west of England, which differ very little, if at all, from this climate. The oakworm, or yama-mai, of Japan is a monopoly of the Royal family, and to sell or export the eggs is punishable with death. Hence the complete ignorance which exists respecting this valuable insect. In 1861 M. Duchesne de Bellecourt, the French Consul-General in Japan, sent some of the eggs to the Société d'Acclimatation, but as nothing was known of the habits of the insect only one worm survived to make its cocoon.

This single specimen, however, was enough to establish its value, and in 1862 a scientific commission was directed to search for and send a quantity to France, which the commission was enabled to effect by the aid of

Digitized by Google

M. Ponyse von Meerdeworth, a Dutch marine officer, director of the Imperial Medical School at Nagasaki.

M. Personnat, of Laval, received a few of the eggs, and after three generations he had in May, 1865, 20,000 worms on his oaks at Laval. The following is an abridgment of his report:—

The eggs are easily preserved through the winter if kept dry, and in the Spring, when the oaks come into leaf, to hatch the eggs it only requires that they should be placed in a room with a southern aspect. The worms feed upon any kind of oak, grow rapidly, cast their skins four times, and in 60 or 65 days begin their cocoons. After the first change or even from the egg they may be exposed to the open air, as they are unaffected by the weather (as, however, in England we often have sharp frosts in May and June, I should advise a little nursing under cover until the oakleaves are strong enough to protect them). The weight of the cocoons is much greater than those of the mulberry worm. An empty one weighs 70 centigrammes (11 grains), while one of the mulberry worm only weighs 33 centigrammes (5½ grains). It takes 450 to 500 full or fresh mulberry cocoons to weigh a kilogramme, while 200 of the oak worm will make the same weight. One square metre, nearly 40 inches square, of oak underwood will support 15 or 20 cocoons; but taking it at only ten, then a single hectare (2½ acres) will produce 100,000 cocoons, or 500 kilogrammes.—I am, Sir, yours, &c., T. O. WARD, M. D.

Another correspondent, Mr. E. P. Robertson, of the Bombay Civil Service, states that he has discovered the same species of worm in Matheran, where it feeds on the tree called by the natives áloo.

THE SUEZ CANAL.—Mr. Lange, the Company's Agent in London, furnishes some interesting particulars regarding the progress of this important work. The western jetty at Port Said has advanced considerably, and now forms part of the isolated island, thus forming an uninterrupted pier of 4,800 feet long, with a depth of from 9 to 16 feet, the result of dredging operations. The number of vessels which have discharged their cargoes at this new town of Port Said, five years ago a blank and dismal waste, is no less than 2,037, including all the vessels registered up to the 1st of July, 1865, and their cargoes being chiefly materials and provisions for carrying out this great work, it will be readily seen with what unabated vigour it is being pushed forward. All along the maritime canal the greatest activity prevails. Nor are the accessory fresh-water canals, meanwhile, neglected. At the end of December 80,000 Egyptian workmen were busy excavating the line of fresh-water canal between Bulbeis and Abassie. This portion of the work is being completed by the Viceroy of Egypt, under the superintendence of the company's engineers. It is generally known that a passage between the two seas has been effected, and that it is the intention of the Canal Company to throw it open to the commerce of all nations. Of course, for the present, and until they have obtained a depth of 26 feet, and a width proportionate to that depth, only the smaller class of vessels will be able to take advantage of the opening, and the Mediterranean ports may find their commercial geographical positions suddenly changed and brought almost face to face with countries now the most remote from them. M. de Lesseps is now in Egypt, directing everything with his usual energy.

THE AUSTRALIAN TEA TRADE.—An argument, heard against the last reduction of the tea duty in this country, was that such reduction would go only to enhance the profits of the importer, or the demands of the producer, instead of benefiting the consumer. That such is not the case we have abundant evidence, and further illustration is afforded in Victoria, where the Ministry, on its own responsibility,—the Legislative Council having proved contumacious—reduced the customs duty on tea to 2d. per lb. The effect of the reduction has been the importation of a finer class of teas and increased consumption. The shipments from Foochow for Melbourne up to the latest dates far exceeded those of any previous season. The late Ministerial Act, whether constitutional or not, by which the importer is henceforth relieved from the obligation of making, in view of possible liabilities through the refusal of the Legislative Council to pass the Tariff Bill, to make a deposit of 3d. per lb., a sum representing the difference between the old and new tariff duties, is a further boon to the trade. So long as it was demanded, the prices to the consumer were increased on its account. At last Melbourne advices, common congou in chests and half-chests was quoted at 1s. 3d.; medium congou, 2s. 2d. to 2s. 4½d. per lb.

Continental Intelligence.

HOLLAND.

(FROM OUR CORRESPONDENT.)

ROTTERDAM, JAN. 15.

We have had a very dull week, nothing of political interest having transpired. We wait for the royal decree, by which the new Minister of the Financial Department will be appointed. I need not say that many rumours are current, but it seems to be more than probable that Mr. Geertsema, member of the Second Chamber of the States General and notary at Groningen, will be the successor of Mr. Betz. As to our Minister of Marine, Mr. Huysen van Kattendyke, is still very dangerously ill.

On the 15th February the Second Chamber will meet again, and without doubt a Parliamentary war will be opened directly about the East Indian affairs and our Financial State.

The Japanese ambassadors, the head officer, Hida Hamagora, and naval officers Eda and the Foesce, who arrived here last year, departed on the 12th for Paris, and from thence they will return to their mother country. They ordered here several steam engines for agriculture, &c., of which I will give you a specified list when they are shipped.

COMMERCIAL.

COFFEE.—With important transactions during the last week, which amount to about 9,000 b. Java, 1,600 b. Macassar, and 1,000 b. Ceylon. The market is very firm; fair quality with much demand, because all the parcels which arrive are green.

SUGAR.—Raw Java: There is much inquiry, and principally for floating cargoes. About 5,000 kranjangs were sold at prices somewhat above those paid in auction in November last.

TEA.—The market is unaltered; firm, but without transactions, by want of supply.

SPICES.—The market is dull, but holders decline to operate under last quotations.

TOBACCO.—Java leaves: There are no parcels brought into the market, and, in consequence, there are no transactions to report. The stock only amounts to 3,007 bales Java.

COTTON.—The market was animated; about 300 b. Java were sold a firm prices.

HIDES.—Several parcels changed hands, viz., 1,611 E. I., ex Boni; 767 do., ex Luconia; 606, ex Prinz Carl; 1,169, ex Maria Magdalena; 1,910 do., ex Noord-Brabant; 469 do., ex Paul Johan. In the following week 4,025 per Rinder, and 686 per Buffalo, will be offered by inscription.

JAVA INDIGO.—The market remains in a favourable condition; the 35 chests offered were sold at very firm prices.

RATTANS.—For first quality there is a good inquiry. The following parcels were sold:—1,226 bund. 170 piculs ex Arrow, 234 bund. 45 piculs ex Herrog Ernst, 1,400 bund. and 110 piculs ex Agra.

BANCA TIN.—The market is rather dull. 1,000 slabs were sold at 57¼f., 1,700 slabs at 56½f., and 2,500 slabs at 56¼f. Holders now, however, decline to operate under 56¾f.

ROTTERDAM, JAN. 24.

Early in May last year Messrs. A. van Hoboken and Sons, Reynst and Ninju, and Anemaet and Co., requested that a concession should be granted to them for ten years, to establish a regular monthly steam communication between Java (Batavia), *via* Timor Koepang and Cape York, to Brisbane and Sydney, they receiving a yearly subsidy from the East Indian Government of 100,000f.; on the condition, however, of the Governments of Queensland and New South Wales giving their consent also. They calculated that the time required for the distance between Batavia and Sydney—viz., 960 miles, would be 16 days. The steamers, which were to be of the best construction, should be able, it was calculated, to carry from 600 to 800 tons merchandise, and to accommodate forty to fifty first-class and sixty to one hundred second-class passengers. The petitioners showed the great importance of this line, as the Australian Steam Navigation Company (English) were inclined to open a mail service between Sydney and Singapore, without calling at Batavia; and they urged that the subsidy they asked was very small, because the English company wanted a subsidy of 56 shillings, or f.33.60 per geographical mile. The petitioners further stated that they proposed to open negotiations with the Governments of New South Wales and Queensland for obtaining a subsidy of £15,000. The capital required to establish this company and to build the three fine paddle-wheel steamers would amount to two and a-half millions of guilders, while the expenses were estimated at f.975,000 a-year, against a revenue of f.1,310,000; viz.:—Subsidies, f.414,000; passengers, f.434,640; freights, f.459,000. The expenses were set down at:—Administration, f.230,150; coals, f.272,000; reparation of ships, f.317,250; insurance, f.100,000; sundry expenses, f.56,000. Leaving a net profit of f.335,000, or a dividend of 13 per cent.

The Indian Board of Trade at once supported the proposal, from motives of both a political and commercial character. Little, however, has since been heard of this affair, as regards our Government. The Governors of New South Wales and Queensland, on the contrary, expressed their warm approbation of the project, as is proved by a letter written by Mr. John Young to the Consul-General of the Netherlands at Sydney, which was inserted in the *Bataviaasch Handelsblad* of the 14th September last. The Consul himself also warmly supported the project, as did the Australian press; and the general opinion was that when the Dutch Government granted the subsidy the line would be immediately established. Our Government, however, kept silent; but as the matter was of very great importance to Queensland, a parliamentary inquiry was instituted there, by a special committee, which sat from the 22nd May to the 17th August. They reported that it was necessary to give up the idea of calling at Timor Koepang, but that a regular steam communication between the East Coast of Australia and Java through Torres Straits would be highly beneficial, and that it was necessary to begin the work at once instead of losing time in conference. The committee recommended that the experiment should be tried for a full year, and that a line should be established between Somerset and Timor. (Vide *Bataviaasch Handelsblad* of the 15th Nov.)

Digitized by Google

The Board of Trade at Batavia at once communicated on the subject with the Indian Government, and pressed them for a speedy decision. The Home Government, however, remained deaf. The *Java Bode* of the 29th Nov. expressed its deep regret that no decision had been come to upon the proposal of the petitioners. That paper complained of the "apathy shown upon a question of such importance." Hoping that our Government would by this time have settled on their course, I myself made inquiries of those interested and of the Minister of the Colonial Department; but all that has transpired shows that the Government is still undecided, and that it is more than probable the subsidy will not be granted.

While writing I have received the report of the sections in the Second Chamber of the States General on the Culture Bill. The volume contains not less than 69 folio pages, so that it is impossible to give you to-day the quintessence of the mass. Fifty-nine members of the Second Chamber took part in the discussions in the sections, so that not less than 16 members were absent. Thus it is impossible to conjecture the fate of the Bill from this report, which in general is not so favourable as the Liberal party would wish. Both the Radicals and Conservatives made very sharp criticisms, and disapproved some of the stipulations of the Bill.

We are still waiting for the appointment of a Minister of Finance. In my last letter I told you that Mr. I. H. Geertsema would be appointed; but that gentleman seems to have so many and such important difficulties in the way, that it is generally regarded as doubtful whether he will accept the proposal.

P.S.—The news has just reached me that M. Thorbecke, the Minister of the Interior, and M. Olivier, the Minister of Justice, have resigned. The other Ministers, also, have offered to place their resignations in the hands of the King.

As the export of refined sugars during the six last months has augmented to 42 millions of pounds, against 32 millions in the first six months of 1865, the Government will levy, from the 25th of February next, 1 per cent. more upon the "rendements" of raw sugar of the first and second class, according to the law of June 2, 1865. I need not say that this decree has created much opposition in our sugar-trade.

The Council of State has given its report to his Majesty about the question to abolish the capital punishment and had advised to abrogate that penalty. It is also more than probable that the Government will soon lay before the members of Parliament a Bill in that sense.

The rinderpest spreads more and more. For the week ending the 13th, 2,921 were attacked, of which 559 died; 319 were slaughtered, and 367 recovered. Since the outbreak of the typhus, 28,737 were attacked, of which 8,775 died, 6,964 were slaughtered, and 9,486 recovered.

Dr. K. W. Gratama, medical officer, 2nd class, will start by this mail for Japan to fulfil a Government mission.

Mulhatuli, the author so well known in the East Indies, has been condemned to 15 days' imprisonment and to pay a fine of 8f. for boxing in a public place. He declined to defend his cause before the court.

The war steamer *Kai-yoo*, which was built here for account of the Government of Japan, will sail in a few days for her destination under the command of the naval officer (1st class) Dinaux.

According to the Government returns, the income of the Treasury amounted during 1864 to f.62,718,955·53½, and was valued for 1865 at f.61,549,027·50. In that year, however, the revenue surpassed the valuation by f.2,907,625·91½.

Mr. H. van Ryckevorsel, the well-known East Indian and West Coast trader, died some days ago in a lunatic asylum at St. Blaize, near Neufchatel.

COMMERCIAL.

COFFEE.—The market remains unaltered, but a trifling business doing. The parcels sold consisted of 4,500 b. Java, ex Kosmopoliet, and 2,100 b., ex Edouard Marie, at different prices. Nothing was transacted in Trading Company's sorts in waiting for the announcement of the auction of February.

SUGAR.—The market is firm but dull. Nothing was sold ssnce the last mail.

TEA.—Scarcely any demand.

RICE.—Business is confined to the execution of a few small orders for consumption. The trade would be animated, but there is no disposable stock.

SPICES.—Firm. There is much inquiry; but holders decline to operate without an advance. The actual quotations are—Nutmegs: No. 1, 84c. to 85c.; No. 2, 73c. to 75c.; No. 3, 54c. to 56c.; No. 4, 33c. to 35c. Mace: D, 90c.; E, 85c. to 86c. Cloves: No. 2, 27c.; No. 3, 26c. Cinnamon: No. 3, 1865, is offered at 131c. Vanilla: Very dull, and largely offered, so that it can be bought now at prices never known before.

TOBACCO.—The market has continued inactive.

COTTON.—A good demand for export. Several parcels E. I. were sold. Japan sorts in more request at firmer rates.

HIDES.—The market was animated. The following parcels were sold:—369 E. I., ex Laconia; 394 do., ex Prinz Carl; 1,500 do., ex Bengaal; 617 E. I., ex Suzanna; 257 ex Maria Elizabeth. The prices did not transpire, but they are supposed to be very firm.

INDIGO.—There was a lively demand, and all that was brought into the market (170 ch., private import) was sold at full prices. There was also a good demand for Bengal, and some parcels were sold with an advance.

TIN.—The market remains unaltered; the prices rule from 56½f. to 56¾f.; at this quotation 2,000 slabs were sold.

COCOA-NUT OIL.—There is want of stock, and nothing can be bough under 33f.

RATTANS.—1,600 bdls. ex Agra were sold. Within a few days important quantities will be brought into the market.

DRUGS.—Cassia Vera: The parcels arrived ex Caduceus were partly sold at firm prices. Gum Elastic: Without transactions, because holders decline to operate without an advance. Gutta Percha: With a good demand, and a considerable business was done. Mother-'o-Pearl Shells: The 20,500 kilo arrived per Mainlust, from Macassar, will be offered by inscription within a few days.

MONEY.—The stock market remains unaltered and dull, and there has only been a speculative inquiry for American and Spanish stock. Dutch Two-and-a-Half per Cents., 61¼; Three per Cents., 71 15-16ths; Four per Cents., 95 7-16ths; Netherlands Bank, 250; Trading Company, 146½; Rotterdam Bank, 100¼.. There is no change in the money market. The rate of discount of the Netherlands Bank is still fixed at 7 per cent. for acceptances, and 6½ per cent. for bills. Open market, 6½ and 7 per cent.

'CHANGE—London: 3 months, f.11.65; 2 months, f.11.72; short, f.11.86. Paris, 3 months, f.46.50; 2 months, f.46.70; short, f.47.20. Hamburg, 3 months, f.34.95; 2 months, f.35.15; short, f.35.45. Bremen, 3 months, 189.40. St. Petersburg, 3 months, 148.

SHIPPING.—ARRIVALS.—Jan. 17, at Texel, from Batavia, Maria Adriana; 18, Henriette; 21, at Brouwershaven, from Batavia, Onrust; from Passaroeang, Ida Maria; from Samarang, Noach; 22, at Brouwershaven, from Batavia, Isis; from Foo-chow-Foo, Yeavering Bell (with 8,222 chests of tea); 22, at Texel, from Batavia, Henderika; at Zierikzee, from Batavia, Twee Gezusters.

PASSENGERS INWARD.

From Java, per Maria Adriana: Mr. Dezlaas; per Whampoa, Mr. Stort; per Noach, Mr. Wynen and family, Mr. van der Mark and family; per Jason, Messrs. P. H. van der Wedden and E. Haitsma Mulier.

RUSSIA, GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, JAN. 14.

In consequence of a healthful competition that has sprung up of late between the Austrian Lloyd's and the Italian line of steamers plying between Trieste and Alexandria, and the consequent reduction of freight on goods between those two ports, the merchants of the former city are beginning to open their eyes to the fact that they are now enabled to import India and China produce direct at a much cheaper rate and at less cost of time than by supplying their wants from the London and Liverpool markets, as they have hitherto been accustomed to do. It certainly does seem paradoxical that the Trieste merchants have not long since emancipated themselves from their dependance on the English markets, not only for East India and China silks, drugs, and spices, but for such a comparatively low-priced article as cotton, worth at the present rates about 100 florins per centner. Let us take this commodity as an example and examine how the case stands. Assuming that Trieste houses are able to buy cotton at Bombay at as cheap a rate as English merchants, they would be subject to the following charges, were the article shipped to them direct:—Steam freight to Suez and railway transit to Alexandria, £6 per ton, is 3 florins per centner; freight per steamer from Alexandria to Trieste, 75 kreuzers; insurance, 1½ per cent., 1 fl. 50 kr.; interest for one month, say ½ per cent., or 50 kr., and, with 25 kr. for petty charges, the whole expense from Bombay to Trieste would be 6 fl. per centner, or 6 per cent. on the value. On the other hand, let us analyse in the same way what a Trieste house has to pay by purchasing its cotton at Liverpool, and we shall find that the same article is saddled with the following charges:—Freight from Bombay to England by sailing vessel, say only £2 per ton, is 1 fl. per centner; freight from Liverpool to Trieste, per steamer, £3 per ton, is 1 fl. 50 kr.; interest for 8½ months at 6 per cent. is 4 fl. 25 kr.; landing charges in England, reshipping, commission on sale, do. on purchase, del credere on the sale in England, &c., say, 9 per cent., or 9 fl.; insurance from Bombay to Liverpool and from England to Trieste, 4 per cent., or 4 fl., and, with 25 kr. for minor charges, the total cost will come to 20 fl., or 20 per cent. on the value—as compared to only 6 per cent. if sent direct, and with the saving of 7½ months' time. If the difference is so great with such an article as cotton, it stands to reason that it must be very considerably more so in proportion on silk, spices, indigo, tea, and drugs, the value of which may range from 500 to 1,500 florins per centner, or from five to fifteen times the value of cotton. And it may here be observed that, on the completion of the Suez Canal the facilities for opening the direct trade between Trieste and the Far East will be greatly increased. The Trieste merchants appear to recognise the importance of the traffic, and there is reason to believe that they are willing to take steps to obtain these advantages, and emancipate themselves from the trammels of the indirect trade, which under no circumstances can ever be so lucrative as direct

Digitized by Google

commercial communication, requiring much less time, and consequently far less capital to carry on the trade.

In conformity with the stipulations contained in the International Telegraph Treaty that came into operation on the 1st inst. (January), the Russian Government have published in the St. Petersburg journals the new tariff for telegrams to foreign countries from the 165 telegraph stations in Russia. According to this new tariff a telegram to and from England costs 12½ francs, and from St. Petersburg to Eastern Siberia (that is to say between the stations of Tomsk and Werkche-Udinsk) 16 francs, making together 28½ francs. It is allowed to telegraph in cipher.

The directors of the Oldenburg East India Shipping Company give official notice that the resolution passed at the last special general meeting of the shareholders held on the 13th of July to dissolve the Company and wind up its affairs (as mentioned in one of my former letters) has now received the confirmation of the Oldenburg Government. Creditors are therefore invited to send in their accounts of outstanding debts for examination and payment without delay.

COMMERCIAL.

COFFEE.—Considerable purchases have been made in execution of orders, and full prices paid. The business would have been no doubt much more extensive had not the scarcity of money been so keenly felt. Sales, 19,000 bags.

SUGAR.—Market calm, both for raw and refined, but prices tolerably firm.

RICE.—But little has been done in any description, and there is no alteration to report in values.

SPICES.—Transactions were of limited extent, at previous quotations.

SPELTER.—This article is in a very favourable position, with a decided tendency to a further improvement. At the beginning of the week 10,000 centners were sold at 15 Marks, 4 Sch. Bco., since then 4,000 centners at 15.5, 2,000 centners at 15,5½, and 8,500 centners for spring delivery at 15.6. The market closes firm, and nothing to be had under 15.8. It is generally expected that in a short time prices will be much higher. Discount, 7 to 7½ per cent.

SHIPPING.—Loading at Hamburg: For Singapore, Carlota; for Hong Kong, Peiho; for Singapore and Hong Kong, Albis; for Shanghai, Manila II.; for Nicolayefsky (Amoor), Jessen. Weather mild and navigation still open.

HAMBURG, JAN. 23.

The St. Petersburg official journal, the *Gazette of the Academy*, published in the Russian language, contains the following observations on the new postal arrangements between Kiachta and Peking, the details of which were given in your paper:—"By the Treaty of Peking the Chinese Government has bound itself to forward a mail once a month between the capital and Kiachta for the conveyance of letters and despatches, and every two months a mail coach for passengers and parcels. The *Siberian Messenger* now announces that a more frequent and regular postal service between Peking and Kiachta has just been started by the enterprise of Mr. Nemtchinow, under the auspices of the Russian and Chinese Governments. The new mail coaches are to leave each of the two ends of the line once a week, and the postage charged for letters is extremely moderate, being only 15 copeks from Kiachta to Ourga and 30 copeks to Peking, whilst parcels and small packages of goods pay 40 copeks per lb. from Kiachta to Peking, and 15 copeks to Ourga, and *vice versâ*. It is evident that if this spirited undertaking succeeds—and there is every probability of its soon becoming such a perfect success as to induce the contractor to increase the departures from each end to twice or three times a week—it cannot fail to offer immense advantages to the correspondence and goods traffic between the two countries, and greatly increase the number of passengers travelling over that route, by freeing them from the delays and annoyances to which they have hitherto been unavoidably exposed."

By recent letters received from Irkutzk we learn that the American workmen while digging holes for the posts to support the wires of the Americo-Siberian telegraph in the island of Sitka discovered there some valuable gold mines. The above-named island is part of the territory of the Russian-American Company. The above intelligence has, however, hitherto had no favourable effect on the value of the shares of that company, which, originally issued at 150 roubles, are stationary at 120 rubles.

The Austrian Minister for Commerce has received supplementary despatches from the Imperial Consul at Singapore containing additional particulars about Japanese silkworms' eggs, which he has published for general information. The Minister then goes on to say that he has received despatches from the Austrian Consul at Liverpool who reports himself authorised by the firm of Messrs. Charles Saunders and Co., of that port, to make known that they have received from their house at Yokahama a considerable supply of genuine Japan green and white eggs, which may be purchased at Marseilles of their correspondents, Messrs. Salevy, Son, and Co., packed in original boxes, each containing 200 cartoons, at 15 francs per cartoon.

Referring to the statement in the *China Overland Trade Report*, "that a Prussian frigate is cruising in the Chinese waters with orders to occupy the Island of Formosa," I would mention that your own leading article, as far back as the 26th of July last (superscribed "Prussian Colonisation in the Far East") contains full particulars of the Prussian intentions at that time, since which, as no enthusiasm was awakened in favour of the plan, either in Prussia or any other part of Germany, the subject appears to have been dropped, or perhaps died a natural death, for nothing further has been done towards its execution. By a reference to the last Prussian navy list, I find that there is no frigate at present on the China station. They have but three altogether—the *Gefion*, 48, an old unseaworthy wooden sailing ship, taken from the Danes in the war of 1850 and captured by the land batteries at Eckernfiorde; the *Thetis*, 36, also an old wooden ship, English built, and exchanged for two iron gunboats during the Crimean war, now H.M. ships *Weser* and *Recruit*; and the *Niobe*, a "jackass" frigate of 26 guns, also a sailing vessel, built in the Baltic—and these three are on the home station, and not in a condition to "cruise in the Chinese waters" without risking to sink with all hands, and thus follow the melancholy fate of their late consort the sailing corvette *Amazone*. It is only a few months ago that the iron-built screw corvette *Vineta*, of 28 guns and 400-horse power, sailed from Kiel for the Brazils *en route* for China and Japan, as duly reported in my correspondence at the time; but since then counter-orders have been sent out by the mail in consequence of the Spanish blockade of the ports of Chili, and she has been directed to proceed to Valparaiso to protect the Germans and watch the proceedings of the Spaniards.

That the Prussians have entertained the idea of taking possession of Formosa cannot be doubted, and last year a series of articles (believed to have been written by Count Eulenberg, who was at the head of the Prussian diplomatic expedition to China and Japan) appeared in the Ministerial official organ at Berlin, evidently intended to prepare the public for such a *coup d'etat*, and advocating the expediency of such a step on the part of Prussia. But since then Count Bismarck has had other more important affairs on his hand nearer home, and appears to have given up the idea of colonising Formosa, or at least postponed it to a more convenient opportunity. Besides the noble Count has nearly run his race of Court favour, and it is a great question whether his successor will be inclined to carry out his ideas Experience teaches us that a change in the Prussian Cabinet always involves a change of principles, and not only the King but the people of Prussia are getting tired of the Count's uncontrolled sway, and are unmistakably looking forward to the day when the ambitious Prime Minister shall be obliged to descend from the pinnacle of power he has so long occupied.

COMMERCIAL.

COFFEE.—Fine qualities are in demand at full prices for the execution of orders. Inferior neglected, though to be had comparatively cheaper. Sales 9,000 bags.

SUGAR.—Sales of raw confined to the execution of the most pressing orders. The refined market is decidedly flat, with no alteration in the price of either.

RICE.—Cleaned firm, though the transactions reported are only of trifling extent. Of rough Bengal 8,000 bags were sold by importers at full values.

SPICES.—2,000 bags of Singapore pepper have been sold at 3½ Sch. Bco. Ginger is firmer. Cassia Lignea calm.

TEA.—Market steady. Among the sales of the week were 100 packages Congou, 230 Souchong, 20 Pecco, 60 Hyson, and 400 Imperial—all at full prices.

SPELTER.—This article is not so firm as it was, and there are but few orders on hand. The only sale reported this week was 3,000 centners for spring delivery at 15 Mks. 6 Sch. Bco.

SHIPPING.—Sailed, Jan. 16, Manila II. to Shanghai. Weather still open, with no signs of frost.

Literature.

Bhotan and the Story of the Dooar War, including Sketches of a Three Months' Residence in the Himalayas, and a Narrative of a Visit to Bhotan in May 1865. By Surgeon RENNIE, M.D., 20th Hussars. Digitized by Google

sions coming from his hand. Nor has the result disappointed us. We have now a complete book on the subject, telling us all the past, and bringing our information down even to last December, by a note appended to the original text. Dr. Rennie, indeed, furnishes perhaps no more than was actually necessary for a proper comprehension of the matter he took in hand, seeing that we actually seem to have known very little more of Bhotan (to be pronounced "Boat-awn," we are instructed) up to the time of the Hon. Ashley Eden's mission, than was told us nearly three centuries ago, by Ralph Fitch, a London merchant who roamed over most parts of the East, and appears to have been a keen observer and an acute collector of facts. Mr. Eden's diplomatic journey is of so recent a date that there is no occasion to make further reference to it beyond notifying that Dr. Rennie presents us with a terse and connected history of the whole proceedings, from which no other conclusion can be arrived at than that whatever might have been the former's antecedent exhibition of "remarkable tact and judgment," his management on the occasion we are now dealing with is only saved from utter condemnation by the fact that the barbarians opposed to the English Envoy behaved so much worse, that the latter gains a redeeming light by the comparison. One of the last scenes of this mission's adventures was characterised by a little piece of *finesse* on the side of Mr. Eden, which might have befitted an agent of the East India Company, but was certainly derogatory to a representative of the Queen of Great Britain and Empress of India. The Bhotan Council—or rather the Tongso Penlow, who wielded their authority—were unwilling that the mission should leave till the presents it had brought were presented. Mr. Eden accordingly distributed them, "keeping back some small articles of jewellery, and the guns, which latter he did not think it expedient to give them." The act was as dangerous as it was mean. Fears were entertained that the mission would not be suffered to depart. If the apprehension had been realised, and the jewels found on a search being made, this silly parsimony might have so enraged the petty potentate abovenamed as to have caused the death of the whole suite.

That the Indian Government has taken the only possible course in annexing the Dooars is beyond a doubt; but it is questionable whether the best information is always supplied to Calcutta by its distant officers. Annexation is at best an ugly thing, and requires discretion all the more; and care should be taken to appropriate no more than is necessary for the security of a frontier, where that is the motive for annexation, and above all, not to stop short in a belt of country that can only prove a burying-place for the troops or officials condemned to reside in it. As to peace with the Bhotanese for near neighbours, unless held in tight restraint, the thing was evidently an impossibility. According to the Buddhist fashion—for strange to say the custom seems to prevail wherever that religion is dominant—the country is under the nominal rule of two Powers, the Dhurma and the Deb Rajas, the former the spiritual and the latter the temporal governor. But the rank of neither is hereditary, the dignity being vacant until, as with the Grand Lama-ship of Thibet, the body is discovered in which the soul of the last possessor has again become incarnate. Some child is always selected as the supposed recipient; thence of course repeated and long minorities; and thence naturally the real power of the sceptre passes into the hands of some one powerful chief, or of a knot of tyrannical and jealous oligarchs. Laws there are none; there is a tradition of their existence in by-gone days, but no copy is known to be now extant. Every petty chief doeth that which is good in his own eyes. This, indeed, was formally laid down as the true principle of government, in a letter purporting to be written by the Deb Raja in answer to complaints from the British authorities with regard to the frontier raids committed by his people, for which the following simple mode of adjustment was suggested:—"With regard to the quarrels of the frontier authorities they are not important enough to be heard by the Dhurma Rajah, and if your sahibs do the same, the East India Company also should not listen to them either"—a recommendation sufficiently explanatory of the amount of latitude the supreme Powers in Bhotan are either inclined or obliged to accord to their subordinates. Dr. Rennie's summing up of the political part of the subject, in his concluding note, will be readily concurred in by the major part of his readers:—

In conclusion, I may state that the Deb and Dhurma Rajahs having about as much control over what is passing in the country—the nominal Government of which they represent—as the figure-head over the steering of a vessel, it is not improbable that the simplest way of bringing existing difficulties to a speedy and satisfactory issue will be reducing the question to a matter of fact, by disregarding the idea of dealing with a central or practically responsible Government, and confining negotiations to the local chiefs who virtually rule Bhotan—namely, the Penlows of Paro and Tongso; paying a portion of the annual allowance of 50,000 rupees to the former for the Bengal Dooars, and a portion of it to the latter for those of Assam: the tribute formerly drawn from these sources having formed important items in their respective revenues—leaving it to them to settle accounts as they like with the nominal Government for the time being.

With regard to the agricultural and productive value of the Dooars, Dr. Rennie says:—

Next to rice, tobacco is their chief product, and is procurable in large quantities. The villagers, however, will not sell any of their produce except at the fairs, which are held at fixed periods during the week. This I observed on the journey from Dhalimkote, our servants meeting with refusal on every occasion that they endeavoured to purchase provisions, such as eggs and fowls. A good deal of cotton also is grown in different parts, especially near the foot of the hills. It has a large pod, and is of good quality; but little care, however, is expended in the cultivation. In regard to this product, I am told that a lucrative trade has—until lately arrested by our military operations—been carried on by Bengalese with the Bhotanese, the former taking up rice and bartering it weight for weight of cotton, thereby realising enormous profits on these transactions; the commercial ignorance displayed by the latter in this matter being nearly equal to that displayed by the Japanese at the commencement of our treaty intercourse in 1858, when gold could be purchased from them for but a few times its equivalent weight in silver.

The most interesting portion of Dr. Rennie's book is, however, the account of his own route with the 80th Foot from Calcutta to Darjeeling, from whence he makes a trip into the Dooars, as far as Dhalimcote, returning to his starting place by a different route, so as to see as much as possible of the country and the people. The Doctor's habits of close obvervation, and the wider extent of the subjects he takes an interest in, from his professional education and experience, will at once recur to the readers of his preceding works. There is an excellent sketch map of Bhotan and the Dooars accompanying the volume, so that the march of the regiment and the author's further excursion can be readily followed, and the reader is always satisfied as to his whereabouts, and not left bewildered among a jumble of names of places he never before heard of. We shall conclude our notice with an account of a visit to a tea-plantation, exhibiting the same clear style of description that we have before had occasion to note as possessed by the Doctor:—

At this period (8th April), through the kindness of Mr. Crossman, manager of the Darjeeling property belonging to the well-known Mr. David Wilson, of Calcutta, I had an opportunity of visiting the tea plantation belonging to the latter, which is situated on the slopes under the collection of houses at the northern end of Darjeeling station, known as "Wilson's Bustee." ["Bustee" is the Hindoostane name for village, or collection of houses.] The plantation ranges over an altitude varying from two to four thousand feet, and we descended to it through a distance of about four miles below Darjeeling, as far as a ravine with a mountain stream flowing through it, near which red-coloured monkeys were seen sporting about in the trees. The plantation was not at the time productive, an interval of three years being required in British Sikim from the period of sowing the seed until the bushes are fit for plucking. The soil of this plantation was light and stony, very similar to that in which the vine grows with great luxuriance in Western Australia. At Darjeeling and vicinity the tea-seed is sown about the beginning of the year, each seed being placed in the ground about two inches apart. The young plant is not interfered with for about eighteen months. It is then transplanted at the commencement of the rainy season in June; being placed in a hole two feet deep, having a clear space of four feet on each side. This hole, in the first instance, is only half filled with earth, the remainder being filled in as the plant gradually becomes rooted. While moisture is indispensable for the growth of the tea plant, it is also necessary for its well-doing that water should not remain for any length of time in contact with it. Hill-land, as being antagonistic to this occurring, is thus so far favourable to tea planting, but elevation appears to be a matter of much importance, and the candid opinion of a considerable portion of the tea-growing community in British Sikim is, that the attempt has hitherto been made at so great an elevation as to render the ultimate success of the existing plantations very doubtful. Large sums of money have unquestionably been made in connection with tea speculation in the Darjeeling district, but not as the produce of tea-growing, but of land-jobbing and the formation of tea-growing companies, promising handsome dividends, the realisation of which, however, has not, as far as I have been able to learn, yet commenced.

Two kinds of tea are grown in the Darjeeling plantations, the one from China seed, the other from the seed of the tea plant that is indigenous to Assam. The former is more bushy in shape, and throws its branches out nearer to the ground. It attains a height of from six to eight feet. The latter is longer on the stem, and grows to much greater height; being in shape not unlike a small poplar tree. The operation of picking the leaves commences in the third year, and is carried on from April to October. The labourers, who for the most part are Nepaulese, pick from six to sixteen pounds of leaves daily, according to the size and productiveness of the ground. Four pounds of the soft young leaves usually yield one pound of manufactured tea. The amount yielded per acre of course varies according to the age of the plantation, but it may be stated as averaging from one to four maunds—in other words, from 80 to 320 pounds.

It will be observed that the above completely bears out the remarks made in a former number of our journal as to the feat that will probably attend attempts at tea cultivation in the

Digitized by Google

Neilgherries. Plants may grow where they can never be said to thrive—particularly when the object in view is produce for profit.

Ten Years in Sarawak; by CHARLES BROOKE, Tuan Muda of Sarawak. London: Tinsley Brothers.—All who feel an interest in the history of the advances made by civilisation in our own day will turn eagerly to anything that purports to be a record of the arduous attempt made by Rajah Sir James Brooke to convert a whole coast of pirates and a vast interior of murderers and assassins into a community of peaceful traders and quiet agriculturists. The diplomatic and moral means brought into play for this end have been told in other works. The Rajah's nephew lays before us in the two volumes under notice a ten years' story of struggle and conflict—a tale of adventurous expeditions up the rivers of the interior, to overawe marauders and malcontents, and to inflict a dire punishment on chiefs and tribes who fancied themselves strong enough to become assailants, or misjudged their position so grossly as to turn rebels. The narrative is much of it evidently nothing more than a copy of the younger Brooke's diary, and is thence occasionally unconnected; as the reader is often supposed to be acquainted with facts which no doubt were so fresh in the writer's mind at the moment as to seem not to need recapitulation, but which required to be briefly sketched for the benefit of those who may have no previous knowledge of the circumstances. However, the Tuan Muda's life has been one of action, and some defects in the plan of composition may well be excused in a young man who, entering life as a midshipman on board a man-of-war at twelve years of age, leaves the service at the age of two or three-and-twenty to pass ten years of nearly total seclusion from European society in command of solitary forts and stations in Borneo. The volumes are plainly and pleasingly written, and the style and general tone of thought are such as to make us follow the fortunes of the author with sympathy and hearty good wishes, pardoning a touch of sentimentality every now and then as a result of the reveries and day-dreams incident to his way of life, and recognising the sense of self-importance continually peeping out as not unbecoming in a man who really had thousands of his fellows at his despotic beck and call. In some Introductory Remarks Sir James Brooke acquaints us that the writer is "looked up to in the country as the chief of all the Sea Dyaks, and his intimate knowledge of their language, their customs, their feelings, and their habits far exceeds that of any other person. His task has been successfully accomplished, of trampling out the last efforts of the piratical Malayan chiefs and their supporters among the Dyaks of Saribus and of the other countries he has described." But this is not the whole nor even the most important of the services rendered by the Tuan Muda to the cause of humanity. The Malay pirate was no doubt a curse to commerce; but the "head-hunting" of the Dyaks or aboriginal Borneans was one series of treacherous slaughter that could have ended in nothing else but the most degrading barbarism, and finally, in the utter depopulation of the district. Was there a feast to be celebrated, disease or evil of any kind to be averted, funeral obsequies to be duly solemnised, a wedding to be rejoiced over, or a bride to be wooed, one thing was indispensable—the head of a human being—man, woman, or child—and the more the better the omen, and the more frantic the yells of the assembled. This practice was put down by the strong hand. The Tuan Muda says:—

> Our Dyaks were eternally requesting to be allowed to go for heads, and their urgent entreaties often bore resemblance to children crying after sugarplums. My head Malay chief, a most trusty man—Abang Aing—had generally to bear the brunt of these incomers, and for more than a year they were a continual pest. Often parties of four and five would get away to the countries of Bugau and Kantu, in the vicinity of the Kapuas River, whose inhabitants are not so warlike as the Sakarang and Saribus Dyaks. As soon as ever one of these parties started, or even listened to birds of omen, preparatory to moving, a party was immediately despatched by Government to endeavour to cut them off, and to fine them heavily on their return; or in the event of their bringing heads, to demand the delivery up of them, and the payment of a fine into the bargain. This was the steady and unflinching work of years, but before many months were over my stock of heads became numerous and the fines considerable. Some refused to pay or follow the directions of Government. These were declared enemies, and had their houses burnt down forthwith, and the people who followed me to do the work would be Dyaks of some other branch tribe in the same river.

Some anxiety is felt in the Far East to know what is to be the future of this considerable territory, and we are sorry to see that in the Introductory Remarks Sir James Brooke speaks uncertainly and regretfully on this point. It must be recollected that the country comprises 220 miles of sea-coast, in a straight line facing the north-west, and that its depth inland extends from 80 to 100 miles. The tribes and branch tribes are very numerous, and the Tuan Muda roughly estimates the population at from 200,000 to 300,000 souls. Taking the eleven years from 1854 to 1864 inclusive, the lowest amount of imports into Sarawak was $252,333, in 1857, which year also returns the lowest amount of exports, $282,572. The highest amount of both belongs to 1864, which exhibits imports to the value of $1,224,435, and exports to the value of $1,155,201. To foster this increasing commerce, states Sir James, and "to secure permanency, Sarawak needs the protection of an enlightened nation to sustain her effort of self-government," and he leaves us with the conviction that Britain has refused this honourable post. He writes:—

> I once had a day dream of advancing the Malayan race by enforcing order and establishing self-government amongst them, and I dreamed, too, that my native country would derive the benefit of position, influence, and commerce, without the responsibilities from which she shrinks. But the dream ended with the first waking reality, and I found how true it was that nations were like men—that the young hope more than they fear, and that the old fear more than they hope; that England had ceased to be enterprising, and could not look forward to obtaining great ends by small means perseveringly applied; and that the dependencies are not now regarded as an outlay to yield abundant national returns, but as a wasteful expenditure to be wholly retrenched. The cost ultimately may verify an old adage, and some day England may wake from her dream of disastrous economy as I have awakened from my dream of extended usefulness. I trust the consequences may not be more hurtful to her than they have been to me.

The Kayan peace of October, 1863, was the great event of that year, and left Sarawak without an enemy in her dominions, and without an inter-tribal petty war of any description. A meeting was held at Kanowit, up the Rejang River, at which—

> There were representatives of 25,000 souls, who were all strangers to us, although living in the limits of Sarawak territory. Their trade evidently will be valuable in the extreme—camphor, gutta percha, and rattans abounding in their countries—besides the immense advantage of holding communication with tribes occupying the interior and centre of the island, extending over a line of communication by the Kotei River, completely through to the south-eastern side of Borneo. When peaceful relations among the intermediate tribes are a little better cemented, this line of route will be most advantageous to scientific explorers.

Some spot on the Rejang River, says the author, which is the largest and most navigable in the country, will be found the most central site for governing, and the best adapted for the eventual capital of the Sarawak territory. A sketch map of the province accompanies the work, as well as a few illustrations which are very effective specimens of wood-engraving Altogether the two volumes form a handsome addition to the library table, and are full of adventures of travel and war in a country where even the everyday life of the natives abounds in strange and novel details.

Messrs. Dean and Son have published a very useful record for the lovers of aquatic sports under the title of *The Rowing Almanac and Oarsman's Companion for* 1866. It contains a calendar of all the matches of the past year, both abroad and at home; the acknowledged rules and laws that govern aquatic matters; a list of winners of the great events in past years, going back to 1791 in the case of Doggett's Coat and Badge; and maps of the Rivers Thames and Isis, and of the Oxford and Cambridge racing courses; and lastly a list of the Rowing Clubs in all parts of the world, to perfect which the publishers solicit information from residents. The roll for Africa and India—"Africa and the East" would be better—stands at present as follows:—

> CAPE OF GOOD HOPE.—Alfred R.C.; Capetown Regatta Club; Civil Service R.C.; South African R. C.; Union R.C.
> CALCUTTA.—Calcutta R.C.; colours, blue and white stripe.
> CEYLON.—Ceylon R.C.; colours, red and white stripe.
> HONG KONG.—Hong Kong Rowing Club: J. Maidment, secretary.
> SHANGHAI.—Shanghai Rowing Club.

The idea of the Almanac is good, and the compiler has carried it out in a way that eminently entitles him to the patronage of the entire class for whose convenience he has laboured so successfully.

The Rev. Mr. Summers sent out by last mail the first number of his *Flying Dragon Reporter*, a lithographed paper intended exclusively for Chinese circulation. It endeavours to convey in their own language some idea of what is going on here, with explanations of the arts and sciences useful to China. Advertisements of our manufactures are also inserted, with diagrams, &c. As a newspaper its contents are certainly abridged to the utmost, and very little enough is left on the bone to satisfy the appetite of the people for whom it is intended may be a matter of doubt.

NOTICES TO CORRESPONDENTS.

No notice can be taken of anonymous correspondence. Whatever is intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication, but as a guarantee of good faith.

A REGISTER is kept of the addresses of all persons connected with the FAR EAST and reference can be made to the same by personal application at the office or by letter.

Any information required by Subscribers, in reference to Commercial or General matters in CHINA, JAPAN, SINGAPORE, *and other parts of the* FAR EAST, *will be supplied on application at the Office, where files may be seen of the Journals published in those countries.*

THE LONDON AND CHINA EXPRESS.

PUBLISHED on the departure of the Mails *via* Marseilles on the 10th, 17th, and 26th, contains a Summary of European, American, and General News; Commercial and Shipping Reports, and Special notices of Trade with the FAR EAST.

Subscription 5*l*s. per annum. including Postage. Export Supplement 12s. extra.

The London & China Telegraph.

LONDON, MONDAY, JAN. 29, 1866.

JAPAN.

THE complete success of the bold stroke of Sir HARRY PARKES and his colleagues at Osaka, so far as concerns the ratification of the treaties, is fully confirmed by the present, mail. With regard, however, to the opening of Hiogo on the 1st of the present month we are still in doubt, and although the brief telegraphic announcements we have received on this point are unusually intelligible and consistent, we are at present hardly justified in regarding it as *un fait accompli*.

This, however, is a point of minor importance which the arrival of another mail will doubtless elucidate, and in the meantime we have ample cause for congratulation in the achievement by our Minister of so signal a victory over Japanese exclusiveness in obtaining the MIKADO's ratification to our treaty. No doubt ever existed in our minds that this was the one thing needful to inaugurate a brighter phase in our relations with Japan; but we hardly ventured to hope that even the energy of Sir HARRY PARKES would have accomplished this desirable object in so short a time. On the one hand, it seemed almost hopeless to attempt to approach a monarch so hedged in with exclusiveness and superstition through the ordinary channels of diplomacy; and on the other, there appeared to be no slight danger of a violent termination to all peaceful intercourse being the result of any ill-advised attempt at coercion. By what cogent arguments Sir HARRY PARKES has prevailed we know not, but however obtained, such a triumph at the very outset of his career in Japan gives substantial promise of future success.

We shall watch with great interest the development and progress of this new port of Hiogo. Situated as it is in the immediate vicinity of the chief commercial and manufacturing emporium of the empire, it must necessarily become important as a trading settlement; while its proximity to Kioto, and its command of the Inland Sea, will doubtless cause it to be jealously regarded by those hostile factions whose rivalry so often threatens to plunge the country into war. It is greatly to be feared, too, that many difficulties may arise from the conduct of the first settlers at the new port. Apart from the mercantile community which quickly collects for purposes of legitimate trade at any newly opened port in the Far East, there is usually a large influx of that dangerous class of people termed in Chinese newspaper phraseology "rowdies." It is these "rowdies" who, flocking to every newly opened port, gain for us by their rapacity, violence, and drunkenness, the hatred and ill-will of the native populace. Of late years Shanghai has swarmed with them, and for some time hardly a local paper appeared without a record of some disgraceful outrage of which they were the authors. Consular Courts had no terrors for them, and it yet remains to be proved whether the Supreme Court, under Sir EDMUND HORNBY, will prove effectual in keeping them in subjection. It will be a great misfortune if the peace and goodwill which we hope soon to see established between our merchants and the natives at Hiogo are to be endangered by the like unworthy cause; and we trust the Consuls who are first placed there will suppress with a strong hand all irregularities among their respective subjects. Another evil which attended the opening of the original ports in Japan, and continued to exist long afterwards, arose out of the exchange allowed by the local government to all foreign residents. For a term originally intended to be limited to one year from the opening of each port, but which in reality was extended to a much longer period, every new comer was permitted to exchange at the Custom-house, for native coin, $3 per diem for himself, and $1 per diem for each servant in his employ, at the rate of three ichibous per dollar. The market value of the ichibou being then as now, much lower, this daily transaction gave a profit increasing with the number of servants employed; so that a person, for instance, who retained six servants was entitled to exchange $9 per day, or $270 per month; the profit on which, at the rate of about 70 ichibous per $100, would amount to 189 ichibous, or upwards of $80 per month. Servants' wages being about $4 per month, food cheap, and small houses in the native town obtainable at low rents, a number of useless drones—men either incapable of earning an honest living, or too indolent to attempt to do so, were enabled to live at their ease on the proceeds of their exchange. Of course, numbers of such persons flocked to the newly opened ports, and eagerly availed themselves of these advantages; and it need hardly be added, that they formed no very desirable addition to the community. Such an abuse as this should not be tolerated at Hiogo, or any other new ports that may in future be opened. It is surely enough that this questionable privilege of exchange should have such disastrous effects on the *morale* of our naval and military forces on the China station, without being suffered to imperil the prosperity of every new settlement we may obtain in Japan.

THE P. AND O. COMPANY'S STEAMERS.

SEVERAL letters have reached us complaining of the condition of the company's steamers *Rangoon* and *Salsette*. The *Rangoon* took on the passage from Suez to Bombay nearly 17 days, that is from Sept. 27 to Oct. 13. Our correspondent describes the engines and boilers of this vessel as thoroughly inefficient, and incapable of performing a speed averaging 7 miles. This was not exceptional but the normal condition of things. The *Rangoon* is a new vessel, and went through the usual trials to obtain her certificate of efficiency previous to leaving England; and it would appear that her present condition could not have been anticipated. It is, however, imperative that this vessel should be recalled from the service and fitted with new engines. It is manifestly unjust that passengers and mails should be sent by steamers taking 17 days instead of 11. With regard to the *Salsette*, which took 12 days from Singapore to Hong Kong, it seems the fault was owing to the leakage of the boilers. It appears that the engines and boilers were passed by competent engineers at Bombay as capable of performing the voyage to China, and we hear it alleged that the engineer on board was to blame for inattention or want of judgment in handling the boilers on the passage, and that the company had discharged him. On advice from the Superintendent at Bombay, the company have ordered a new set of boilers, which are now in course of shipment to Hong Kong, and the vessel will be laid up in the interim. It is not unreasonable on the part of the public to demand that the P. and O. Company should, for the handsome subsidy and high rates of freight and passage money, give vessels of undoubtedly first-class character, equal to an average speed of 10 miles. Of course, allowances must be made for exceptional cases, which will occur to this as well as all other companies; but the P. and O. of late have been most vexatiously irregular in their services. The mails of the 26th July and 10th Oct. both broke down before reaching Hong Kong, and did not arrive until the following mail, a fortnight after. In all large companies it happens, however, that the *bona fide* grievances are lost sight of in the host of absurd complaints which are constantly urged against them. For instance, the following letter imputes indirectly some responsibility, if not culpability, to the company for the inefficient arrangements by the authorities at Galle for the reception of passengers landed with infectious diseases. This is a matter that purely belongs to the local authorities at the various places. It is clearly the duty of the Company's officers to land such passengers *nolens volens* for the safety of all on board. Sir HERCULES ROBINSON should, however, see to this very important omission on the part of his Government at Galle:—

"Sir,—In the month of March last, on board the Peninsular and Oriental steamer *Benares*, two days after leaving Bombay for China, I was unfortunately attacked with the smallpox. Some days later I was put on shore at Point de Galle, with my disease at that time at its height. No house or hotel could, naturally enough, be found to take me in. The surgeon of the ship communicated with the authorities, and they ordered

Digitized by Google

me up to what was called the Smallpox Hospital, about four miles from the fort.

"Accompanied by the surgeon of the *Benares*, whose kindness I was indeed grateful for, I arrived in a garry at the foot of a nearly perpendicular hill on which the 'hospital' stood. It was one of the hot months in Ceylon. At 2 o'clock in the afternoon, under a burning sun, I had to climb this hill for well-nigh half a mile, and but for the assistance of my friend Dr. Gill, who literally dragged me along, I should assuredly have stuck fast on the road. The 'hospital' I found a wretched shed of a place, but certainly with walls and a stone floor. On the latter I was glad to throw myself, but I longed, as you may suppose, for a bed.

"I found here a gentleman, a fellow-countryman, taken with the disease on board of another Peninsular and Oriental steamer. He told me that he was, he believed, the first European who had ever been in the place, and that the hospital was evidently provided for natives only. He added that every necessary I wanted must be ordered through a contractor in the native bazaar, three miles off, and that there was only one old native to wait upon all the patients. To this latter I applied, and was told I must get an order from the hospital surgeon before the contractor would supply a bed, or anything else. To be brief, the result was I had to pass the night in sleepless agony—for it was literally that—on the hard floor, my bed arriving the following forenoon. The next day another passenger, a young Englishman, was brought up from another Peninsular and Oriental ship. Happily, he was but slightly attacked.

"I can assure you, Sir, it was a relief to me to find myself with my two companions, otherwise our 'ward,' as they called it, might not have been left to only one of us. The adjoining compartment, divided by a half wall, was occupied by two poor Africans, stokers from some steamer."

THE PROPOSED BREAKWATER AT GALLE.

THE Ceylon Government having communicated with the Colonial Office relative to Mr. GRINLINGTON'S scheme for a breakwater at Galle—a scheme which if carried fully out would enlarge the anchorage ground to 240 acres and render the harbour absolutely safe—the matter was referred to the Board of Admiralty, and by this Board to a Committee for an opinion on its practical merits. That Committee, in its report, admits, in a qualified form, the feasibility of the project, and without entering on the consideration of the supplementary portions of the project, such as the possession of a graving dock, landing stages and tramway, is inclined to consider that the cost of an efficient and permanent breakwater with central portion and eastern and western wing, would most probably exceed Mr. GRINLINGTON'S estimate; indeed, as much as £1,500,000 is named by the Committee, who place an emphasis on the gigantic character of the scheme. The Admiralty fails to discover in its own department any special advantages from the erection of a breakwater, Trincomalee answering existing naval requirements. It seems quite evident, that in setting down their estimate the Admiralty had in view the miserable failure of the lighthouse on Basses Rocks; and have been further influenced by the hope that they will get a scheme that will bring the mail steamers to Trincomalee. It is impossible to exclude the conviction that Government has no present intention and no desire of improving Galle. The advantages that would arise to trade from the erection of the breakwater did not come within the scope of the Admiralty inquiry, but there was an evident disposition on the part of the Board to treat the question of improvement as one that merely concerned the convenience of the Peninsular and Oriental Steamship Company; such an estimate is calculated to excite surprise both here and in Ceylon. Not to speak of the reputation Mr. GRINLINGTON has achieved by the execution of colonial works, he was aided by the engineering officers of the Portland Breakwater, the most competent authorities in the kingdom, and both his plans and estimates had their sanction. The plans have also the approval of Captain TWYNAM and other naval gentlemen long and practically acquainted with the harbour. The greater weight is to be attached to these, inasmuch as the Portland Breakwater is laid in eleven fathoms, whilst the Galle Breakwater at the most would have been seven fathoms; and, again, whilst the former must encounter tempestuous seas at all the different periods of the year, the latter would have only to meet the periodic monsoon. For fifteen years have the Government obstructed all the propositions made for the improvement of the harbour of Galle, without bringing forward any one of their own, and all for the purpose of adventitiously benefiting Trincomalee, which is remote from the route of steamers and sailing vessels; and if resorted to must involve loss of time. The British Government, however, is well aware that the question cannot be for ever shelved; commercial interests will assert themselves, and Galle, the natural emporium of Ceylon, be improved to the extent of which it is susceptible. Thus the Government would only have its opinion on Mr. GRINLINGTON'S plan regarded as tentative; and as to a guarantee for any works required to carry out the object in view, without denying that this may be accorded under certain circumstances, defers any decision until such time as the Colonial Government of Ceylon shall take the initiative for executing a project to be jointly approved. The Home Government so far, however, has not admitted that the case of the Indian railways is analagous as respects guarantee. The anticipation is expressed that when the trunk railway of Ceylon, and various contemplated lateral branches are completed, the Colonial Government will find itself in a better position to commence an undertaking the importance of which is admitted, but not its immediate urgency. In fact, it is evident that Mr. CARDWELL'S advice to the Colonial Government is not to have too many irons in the fire.

MUNICIPALITY OF COLOMBO.

WE congratulate the people of Colombo on achieving that great and indispensable requisite to good local government, a municipal council. An efficient organization cannot fail to act advantageously on the public interests and exercise a certain influence on the colony in general. In fact it reflects creditably on Sir HERCULES ROBINSON and the community. This body politic will give force as well as expression to public opinion. We trust, too, that from the outset its deliberations and decisions will assume a practical character. Manifestly there is abundant work on hand; indeed, it is a matter of unfeigned surprise that its existence should so long have been delayed; that whilst other British colonies are dotted over with municipalities, the commercial emporium of a colony so long in British possession should have foregone, by virtual abnegation, those civic rights of which a municipality rightly constituted is the most efficient as well as the most appropriate exponent. One of the first subjects that must engage the attention of the Council will be the supply of Gas and Water, necessities as well as luxuries; a remarkable want in a town with 10,000 houses and 50,000 inhabitants, possessing abundant means, intelligence and refinement. But the oil lamp must shortly be one of the things of the past, and Colombo shine as brightly as Hong Kong and Singapore. We understand that the Hong Kong Gas Company have tendered for the supply of gas and water, and that terms are likely to be concluded with them without delay.

THE DUTCH AGGRESSIONS IN SUMATRA.

THE memorial from Penang on the subject of the Dutch aggressions in Sumatra has duly reached the Foreign-office, and is now the subject of a negotiation between the Government of the Netherlands and our own. It is expected, however, that some action will be taken by gentlemen in this country interested in Penang, through Members of Parliament, as soon as the next session assembles. We understand that one of these gentlemen is Mr. John Crawfurd, the venerable octogenarian, who is ever ready to come to the rescue of the Straits trade. In the meantime the memorialists will have, no doubt, an acknowledgment of the memorial, which will be published in the local papers.

THE CEYLON COFFEE CROP.

A MORE than ordinary discrepancy is observable in the mercantile estimates formed at Colombo as to the proportion which the coffee crop of 1865-66 will bear to that of the past season. The latter, we know, was very generally underestimated. A continuance of the same favouring circumstances was not to be reckoned on, but allowing for the extensive acreage of coffee-bearing plants arriving at maturity this season, and guided in our judgment by private advices, we are disposed to consider that the falling off will not exceed 12 per cent. The earlier shipments, owing to certain retarding causes operating to prevent the forwarding of produce, are scarcely to be accepted as indices in the computation. The total shipments for the new coffee season up to Dec. 12th reached 71,782 cwt. (of which on the 15th. ult. nearly one half was afloat), against 105,457cwt. in the corresponding period of 1864. Of this season's shipments 23,579 cwt. were plantation and 8,170cwt. native; the early shipments to the same date of the preceding season comprised 74,098 cwt. plantation and 31,359 cwt. native. All experience goes to show that one effect of improved agricultural skill is to render unseasonable rains and storms less and less disastrous; and it is satisfactory to note the earnestness

Digitized by Google

with which Ceylon planters and their superintendents are seeking additional information on this and other points of culture. Whatever the temporary fluctuations in supply, it cannot be questioned that the Ceylon coffee yield will continue to be progressively augmented. We are being repeatedly reminded that the forest land, like everything else, is limited, but there are hundreds of thousands of acres yet to be reclaimed, and the eagerness with which new land is sought in a colony by no means replete with capital, shows the abiding conviction of those best calculated to judge in the rumunerative character of those investments. The *Colombo Observer* of the 15th ult. reports 8,000 acres as having been "lately sold" in the Moorowa Corle district, whilst in the Dickoya district 16,000 acres had just passed into the hands of private purchasers, chiefly for coffee growing, and it was estimated that there were there available upwards of 50,000 acres for the same purpose. As to decline in home consumption, which has been regarded in some quarters as a discouragement, we are very confident that that consumption reached a minimum point in 1865. The demand for Ceylon plantation, and the finer kinds of native Ceylon, has actually increased, and so it will continue. The export demand for the finer kinds likewise continues rapidly to improve. The following quotations for the past three years will show how well Ceylon coffee has held its position in the London market,—even native Ceylon, notwithstanding the heavy arrivals of native grown Mysore and other common East India kinds, together with enlarged supplies, consequent on extended cultivation, of plantation qualities from the same quarter. The prices held so firmly now must shortly advance with that relief to the money market which the returning gold will soon afford; indeed, during the past year it has been observable that coffee has been least sensitive of all articles of colonial produce to a high rate of discount, and even the decline of 1s. per cwt. on the lower descriptions as compared with the prices ruling previous to Christmas, will, in the opinion of the trade, speedily be recovered. The United States' demand must be allowed its influence in this result; the proportions that demand will assume are as yet problematical. Our stock at the end of last year was larger than at the close of 1864, but owing to the active export demand we may anticipate, as then, an upward tendency for several months to come. There is at present a good demand for the finer kinds of plantation Ceylon. The supply of Mocha for the present year will probably be even more limited than in 1865.

THE ISLAND OF FORMOSA.

The alleged intention of the Prussian Government to "annex" the Island of Formosa is the topic of interest adverted to in the letter of our Hamburg correspondent. The rumour is not worthy of any credence whatever. It is simply absurd to suppose that Prussia could see her way to occupy Formosa, especially when she has friendly relations with the Government of China and the English, French, and Russian Ministers to look after her. The following letter has appeared in *The Times*:—

Sir,—It seems that the Prussian Government is about to take possession of Formosa. Now, Formosa, under the name of Tai-wan-foo, or "the District of the Great Day," with a capital of that name, residence of a Chinese chi-foo, or prefect, belongs to the Government of Fo-kien, the Vice-royalty of Ming-che (Fo-kien and Che-kiang), and to the empire of China.

The island was taken from the Moslems in 1624 by the Dutch, who erected at Tai-wan the fort Zelandia.

About that time 25,000 Chinese, followed in this century by millions, took refuge in the island, escaping from the rule of the Manchoo conquerors.

Zelandia and the island were taken in 1662 from the Dutch by the Chinese pirate Ching-chi-koong, also known by the name of Coshinga. It was then opened to English traders. The pirate's son surrendered Formosa in 1683 to Kang-hi, Emperor of China. The island afterwards revolted two or three times, as other parts of the empire did, the last rebellion being crushed in 1834.

The Chinese quarterly Red-book gives Formosa as a district of the empire, and every Englishman who has been engaged in the civil service in China may be aware that it is really a part of it.

Have all strong nations a right to take hold of any possessions of other nations they think of some use to themselves,—such as Denmark, Montevideo, Chili, the guano islands, or Formosa? If not, what is to be done? The most striking fact is that the Prussian Government seems to have a treaty with China and a Minister at Peking.—I remain, Sir, your obedient servant,

A CHINESE SCHOLAR.

Jan. 16.

MR. T. W. SMITH has arrived from Shanghai, bringing home a Chinese dwarf, aged about 35, said to be the son of the pilot who conducted the English fleet into Chusan, and who was dwarfed by the Chinese authorities as a punishment for the sins of his father.

WE understand that the P. and O. Company will not carry out the intended arrangement of making the Suez and China steamers form the main line until they despatch a couple of large boats from this side for the service. It is intended shortly to run intermediate boats on the Suez and Bombay line, making four times a month. This increase will not be subject to a postal contract at present.

A TELEGRAM has been received announcing the opening of the service of the Netherlands India Steam Company in Java on the 1st of January, the time specified in the contract.

THE steamer *Eagle*, Capt. Lobnitz, noticed in our last as having put into Lisbon, has coaled, made good defects, and proceeded on the 25th to Nagasaki, calling at Labuan for coals *en route*. The *Eagle* has proved herself to be a first-rate seaboat and to have splendid engines. She was in one of the late terrific gales which culminated in the destruction of the *London* and *Amalia*.

AMONG the official appointments lately notified in the *Gazette* we observe that of Mr. Farquhar, Second Secretary of Legation at Athens, to be Second Secretary of Legation at Peking; and Mr. Callendar, Her Majesty's Consul at the Dardanelles, to be Her Majesty's Consul at Manila. On reference to the Foreign-office list we find the antecedents of Mr. Farquhar to be as follows:—nominated Attaché, 1856; appointed to Berne, 1857; transferred to Vienna in March, and to Paris in April, 1858; appointed Paid Attaché at Rio, 1859; transferred to Parana, 1861; appointed Second Secretary in the Diplomatic Service, 1862; and transferred to Athens, 1863.

Mr. Callendar was appointed Consul at St. Catharine's, Brazil, in 1852; transferred to Rhodes the same year; to Erzeroum in April, 1863; and to the Dardanelles in August, 1863. Mr. Brackenbury, his predecessor at Manila, only left this country to take charge of the Consulate there by the mail of the 26th of September last, and is now appointed to be Her Majesty's Consul at Lisbon.

THE MORTALITY OF TROOPS AT HONG KONG.

The article which appeared in our last on this subject has given dissatisfaction to those concerned who are now in England. At this we are of course not surprised, and we are glad, for their sakes, that *The Times*, in a leading article—which we give below—excuses them from any selfish or sordid intention in remaining in Japan for the sake of the itziboo exchange. We hope that such a view of the case may be satisfactorily borne out, but we very much doubt it. The *Army and Navy Gazette* on the subject says:—

The *Overland China Mail* of November 15, in alluding to the inspection of Her Majesty's 11th Regiment, at Hong Kong, on the 1st, states that the Principal Medical Officer was absent in Japan, and makes some sharp comments on General Guy's enjoying himself at Yokohama instead of looking after the health of the troops. There were but 102 men in the ranks on the occasion, some so weak as to be unable to carry arms. We need not allude to the trafficking in exchanges which is attributed to officers in Her Majesty's service by the *China Mail*, but it appears too true that Japan in its attractions of all kinds produces bad results on the Chinese stations.

(THE TIMES.)

The destruction of the 11th Regiment at Hong Kong recalls the scarcely greater calamity of the 44th at Cabul. In that case it was the work of Asiatic treachery, of frost and snow, of old English carelessness and incompetence, bad military command, bad material arrangements, and, as we were forced to confess, a bad political position. In this case there is nobody to blame but ourselves. The regiment has been sacrificed by bad quarters, a bad season, and a locality always more or less insalubrious, by injudicious or conflicting orders, by the neglect and absence of the local officials, and by the want of a comprehensive policy for supplying the numerous and distant outposts of this empire in a way to economise British blood by utilising the many millions under our sway or our influence. As a perfectly gratuitous and wanton immolation this surpasses that at Cabul, while the loss exceeds the carnage of the 24th at Chillianwallah, which still casts a shadow of its own over the glories of the Punjab. The present story has now been often told, but it will be often told again. The 2nd Battalion of the 11th Regiment arrived at

Digitized by Google

Hong Kong in June from the Cape, at least two months before it was expected, and before there was barrack accommodation for it. There was no resource but tents; the rainy season was impending, and tents in rain are fatal to the English constitution, there at least. The spot selected —we are not told whether there was a choice in this matter—was near a native burial ground. The certain doom of the battalion was immediately predicted by the residents. We have seen a letter written the very day after its arrival, and it was noticed as unfortunate, though not likely to make much difference in the result, that the Governor and chief medical officers were enjoying the more pleasant air, the more cheerful society, and certain pecuniary advantages at Yokohama, in Japan. It so happened that just then there was a hope that Hong Kong was not so unhealthy a place as it had been found hitherto, and that its character was undeserved. It so happens, too, that some who felt this hope as late as last June have found themselves sadly deceived. Nevertheless, the worst was expected for the devoted battalion, and the worst came to pass. The men immediately began to droop, to sicken, and to die. Everything was done for them that could be done, and three naval surgeons offered their services to supply the place of the absentees. The lists of death and disease have been already given in these columns; but as the tale is not yet told, and we have yet to learn who died at Hong Kong, who at Yokohama, to which the 11th was removed, and who in the further wanderings of the plague-smitten battalion, we will only quote at present a very brief announcement in our yesterday's columns. In our Naval and Military Intelligence we read what must be almost the last act in this strange and miserable history:—"The transport *Gresham*, from Hong Kong, arrived in Simon's Bay, December 7, bound to England. On departure she had on board 280 invalids, principally military from the 2nd, 9th, and 11th Regiments. Forty-two are reported to have died on the passage to the Cape, where Commodore Cockburn paid prompt attention to them. Twelve of the worst cases were transferred to the Naval Hospital, 50 of the sick were sent to the Seringapatam, and 68 others were placed under canvas at Simon's Town."

If we have any bias in this matter, it is one which, as far as it goes, tends to excuse the authorities—viz., our belief that Hong Kong is a very unhealthy place. But it has long had a bad name for health, and that was a circumstance to be taken into consideration by the authorities concerned in the moving of troops. Either conflicting orders were sent to Hong Kong or to the battalion at its previous station; or orders were disobeyed; or the authorities at Hong Kong had undertaken to have barracks ready but had not done so, or were not allowed time for it, or had not barrack room because the soldiers already there had not been moved on to Yokohama. So far as regards the arrangements, there has been a want of head somewhere, and it is only due to the people at Hong Kong, to the absent Governor and surgeons, and to the persons charged with preparing barracks, to repeat that all on the spot were surprised at the appearance of the battalion. The question of official blundering or personal blame may be left to the inevitable inquiry. But there are two questions which may be asked at once, and which will prejudge nobody in particular. The first of these concerns the selection of Hong Kong as the seat of our Anglo-Chinese Government and the head-quarters of our army in that part of the world; the second is a question we have often asked before, and it is whether more cannot be done to save our costly British soldiers by the substitution of natives from India or China. Hong Kong stands condemned as a place of residence by the deeds rather than the words of everybody who has a chance of getting away from it. We decline to follow certain Chinese authorities in an account of this matter, which would put officers holding high places of trust in Her Majesty's service on a level with sharpers. We cannot believe that all the civil, military, and naval authorities of Hong Kong were flocking to Japan in order to enjoy a paltry profit by a certain fixed rate of exchange between our money and the Japanese, enforced upon Japan by the terms of our Treaty, though in effect a gross wrong to that country. We will assume that the officials at Hong Kong find what has been said from the first, that the island is most unhealthy. No doubt, we were deceived by a national prejudice. English women and English men have a fixed belief, which nothing can shake, that a seashore, particularly one with a mountain behind, and most of all a mountainous island, must be healthy, nay, so superabundantly healthy as to supply a stock of health that will last many months afterwards. Even in England this is often found a mistake, or only true in a conditional and modified sense. But at Hong Kong there is an utter want of area for building, space for exercise, and even air for ventilation. We have gathered a population there, and there is not room for it, so it is poisoning us. The most fatal objection is one that we might perhaps be better prepared for, if we gave a little more attention at home to comparative salubrity of spots very near one another. The mountain there is said to be composed of a very friable granite, through which water is always oozing, more or less, from some unknown source—geologists even say, from the mainland of China. It is even said there is something deleterious in this water, or, rather, in the constant disintegration of the granite. It is not, however, necessary to suppose any positive malaria, such as would require a chymical explanation. Wherever, as on the slopes of our own sand-hills and gravel-hills, there is, at a certain level, a perpetual exudation of the water filtering through the mass above, there is sure to be a liability to fever. There will always be spots, even where no water shows, where the soil will be overcharged with moisture, and whence a vapour will ascend. Persons exposed to this vapour throughout all the diurnal changes of the temperature will be liable to chill, and to fever; of course all the more, if they are neglecting the usual conditions of health as to diet, exercise, clothing, artificial warmth, and the like. From all accounts, it is not easy to escape spots of this malarious character at Hong Kong; and if it ever is to be a healthy station, our soldiers must not be housed as they have been hitherto.

But that other question now pressed upon us is more important, and, we do not deny, more difficult. The difficulty, however, consists in the natural reluctance to give up a national tradition, and accept an actual necessity. There is no mincing the matter, we cannot find British soldiers for all the duty to be done. If we choose to have colonies and dependencies all over the world, and to assert a political influence over more than half the population of Asia, as well as half Africa, half North America, not to speak of Europe,—we must accommodate ourselves, not to our position, but to our own magnificent pretensions. We must do as other Empires have done, and use one nation to assist us in controlling another. Whatever may be alleged about the superstitious prejudices of Hindoos, there is no doubt that we can obtain any number of soldiers from India who would be quite equal to the defence of our positions and free cities on the coasts of China and Japan. Even if their employment is attended with difficulties, or positive disadvantages, this is a comparative question; we have to choose between evils, or rather to do one thing because it is no longer possible to do the other. Can anybody venture to say what will be the total money cost of carrying the 2nd Battalion of the 11th from England to Yokohama, and bringing its remains back again? It will be something enormous, and, after all, a small matter compared with the loss of life and, we must add, character. Even if there had been great cost, some mortality, and a few hitches, we might have done better from our Indian army. The British soldier was precious many years ago, when the great Sikh chieftain said that had he such soldiers he would have every one carried by natives, and only placed on the ground to do the fighting work. He is far more precious now, far more costly, and more scarce; that is, more difficult to be obtained on any terms. So we must save him if we can, and we must even be prepared to run risks in doing so.

The following letter on this subject has appeared in the *Standard*:—

SIR,—I hope that you will do me the favour of inserting the following extracts from a letter I have received from Hong Kong by this mail (date Dec. 1):—

"One of the worst summers that the settlement has known since Hong Kong became a British colony has just ended. Though by the almanac we should be well into the winter, yet the punkah, the white suit, and the solar topee have been in full use within the last fortnight. Cool days, however, have at last come to us, and people's spirits have begun to revive, and the sound of merrymaking is again heard, but it is merrymaking subdued by sad recollections, for who can forget the faces that last winter were amongst us, and now are not? Some of our best and brightest sleep in the 'Happy Valley'; others, broken in health, have gone back to Europe to try to restore constitutions undermined by this pestilent air. It has been a sad year enough for the civilians, but their loss has been trifling compared with that of the soldiers. The poor privates have suffered terribly, as they were certain to do, from night work, which entails loss of rest and exposure to the deadly night air, and also from want of space and air in their sleeping rooms. These are the chief among many evils that they have suffered from, and these, in conjunction with a bad season, have filled the hospitals of Hong Kong to overflowing with patients, the cemetery in the 'Happy Valley' with new-made graves, and invalid ships with melancholy freights of pale, emaciated creatures, many of whom will never breathe the native air they pine for so. I send you an accurate return of losses to the garrison from death and sickness between the 1st of June and the 31st of October, 1865. On the 1st of June the strength of the garrison was 93 officers and 1,871 men, and these are their losses:—

	Officers.	Men.	Women.	Children.	Total.
Died	4 ..	87 ..	9 ..	52 ..	152
Invalided ..	8 ..	223 ..	47 ..	57 ..	335
Total ..	12 ..	310 ..	56 ..	109 ..	487

"Since the end of October things have been improving a little, but many deaths have occurred, and even now 100 patients are waiting for another invalid ship to be chartered that they may proceed homewards. It is no sudden and violent epidemic that has devastated the ranks; for though cholera and fever have been the chief destroyers, here they are endemic, and many other disorders have done their part.

"Sleepless nights, and exposure to impure air, have undermined the men's constitutions and done most of the mischief. Was it necessary that this should have happened? Why should men, who in England ought to have six nights a week in bed (as any medical man will tell you), have had in Hong Kong often only two nights? Why should men, who in England ought to have good and airy quarters, at Hong Kong be crammed into damp, ill-ventilated storehouses, in such a summer, too, as the last? Why, the truth is, that our Whig-Radical Government wished to reduce army expenses on the China station, and this is the way they went to work. They withdrew from Hong Kong the native Indian troops (who could stand the climate and the night air), and they sent two British regiments to occupy a place where there is only proper barrack accommodation for a wing of one regiment, unless those huts at Kowloon, where whole companies sickened at once, are to be called quarters. The Indian troops were withdrawn in order that the Indian allowances might be taken away from the British troops, and so 'a great reduction' be announced when army estimates were talked of. This reduction has taken place, and officers, many of whom are of long service, find that, in return for a banishment to such a distant and unhealthy station, they have the miserable addition to the English pay of 13s. per diem for field officers, and 10s. for those of lower grade; and this in the most expensive of all British stations. This wise piece of economy will save the country a few hundreds per annum. Now look at the other side of the question. The outlay caused by the substitution of white for black troops is enormous. There is one item of £15,000 per annum for extra barrack and hospital quarters. There is the cost of invalid ships; of the sending patients home overland in urgent cases. There is the increase in the charges for medical comforts; and when it is found that the present year's estimate for military purposes in China exceeds that of last year by about £35,000 we shall not be surprised here, but perhaps you will at home, and the authors of the notable reduction scheme may begin to doubt whether they have been eminently successful. The past cannot be undone; the dead cannot be restored to life nor the sick to health; but the fatal mistake need not be persisted in. Let the Government restore the Indian troops, and with them the Indian allowances, or else take the community of Hong Kong at their word, and remove the troops altogether, which would be wisest. Singapore is a very healthy station, though a hot one, and there are magnificent barracks there never yet occupied. Or there is Japan, where we have already a sort of footing, which must ere long be extended. Either of these places would be a good position for troops in the East, as far as all

Digitized by Google

Imperial purposes are concerned. But, at all events, the men who have passed the last summer in Hong Kong should not be exposed to the next. One regiment has had for some time the advantage of Japanese air; it will be only fair that the other should have its turn."

I have but little to add, sir, to my correspondent's statement, except my earnest request that you will print it. Numerous letters on the same subject have already appeared, but I think the story of the great Hong Kong fiasco cannot be told too often. I have lately lost a valued friend at Hong Kong. I have many friends and some relations there. I think no one knows more than I do of the ceaseless anxiety which is felt in English homes for sons and brothers in that fatal place, and so I feel that I am justified in again bringing the subject forward.—I am, Sir, yours, &c.,

Jan. 15. CONFUCIUS.

THE ITZIBOO QUESTION.—PROFITS OF OFFICIALS.

(To the Editor of the *London and China Telegraph.*)

SIR,—As one who has lately visited Japan, I read with interest your remarks in your journal of the 13th instant on the advantage enjoyed by foreign officials in the itziboo exchange; and its bearing upon the movements and inclinations of our own officials in the Far East is assuredly a matter for grave consideration. But, whilst in Yokohama, the question struck me in a still more objectionable point of view. No one who has read anything of our short history in Japan, much less any one who has visited the country, but is aware what is the jealous distinction preserved by the ruling classes in Japan between the official and the trader, which in their sense is a very inclusive term.

Japan is a feudal country, and to a Japanese noble or gentleman, just awakening to a knowledge of the outer world, the recognition of commerce as a great civiliser of nations has, it may be supposed, never occurred. It is only a few of the interpreting class who have ever probably tudied the history of England. For this we cannot quarrel with them. If our ancestors of the days of King John were to rise from their graves they would be wholly unable to understand the present position of commerce, and of those who pursue it in its various ramifications.

The Jew, whose teeth the cruel ruler some centuries back would coolly draw, may fitly be classed with the trader of Japan now who, at the Tycoon's nod, pours forth his wealth for State requirements.

We would naturally expect, however, that those who represent our Sovereign in the East should know well what is due to the representatives of the great commercial power of England, for the extension of which alone we go to those countries. Surely they should be the last to pander to this antique prejudice of class on the part of an Eastern nation! Yet, Sir, what is the fact? Human nature, especially when elevated from its origin, has often found it impossible to resist the sensuous feeling that it has become moulded of another and holier clay.

As a casual traveller in Japan it was a source of no little surprise to me to find that under the administration of affairs by Sir R. Alcock British merchants at Yokohama—indeed all but those who were literally civil military, or naval servants of our Government—were subject to a certain indignity. The English Legation officials had closed with the manners and customs of Japan as far as embracing the opportunity of claiming privileges unknown to them at home; and the English merchant was called "a kindo" in the Custom house of Yokohama.

I do not suppose the English merchant would care for a moment to what extent his Ambassador or Consul overshadowed him with the assertion of his own importance they would always receive proper respect at his hands. But he may fairly be expected to complain if these functionaries allowed him to be classed with the *oi polloi* of a half civilised nation of Asiatics. It would be curious, if not amusing, to inquire into the relative social positions at home of the representatives of foreign Powers generally, in Japan. But though I have some little reliable data by me upon this head, I think it would be scarcely proper to occupy your columns with such details, though it ought at the same time to be a subject of some anxiety to know that the Japanese have the opportunity of forming a correct opinion of a European gentleman.

I hope, Sir, you will persevere to agitate this question of the itziboo exchange, which is an outward and visible sign of this exclusiveness of Japanese officials, dictating, as I think I have shown it does, a distinction among Europeans in the eyes of a half-enlightened nation which is in every way offensive, and there are few indeed who know anything of the history of Europe in Asia but who will, I believe, add that it is a distinction most pernicious to the extension of our influence in that country. —I am, Sir, &c., NOT A MERCHANT.

London, Jan. 17, 1866.

[This letter, with further information we have received, will be noticed in our next.]

FRENCH SILK MARKET.

During the first week of the year there passed through the hands of the officials of Lyons 45,846 kilogrammes of raw silk, against 44,407 kilogrammes in the same week of last year, but 12,000 less than in the preceding week, when the quantity reached 57,760 kilogrammes. The business of the first week of January was restrained only by the short supply. The quantity cleared last week amounted to 788 bales, weighing in all 56,181 kilogrammes, being an excess of 10,300 kilogrammes over the previous week. The greatest anxiety is evinced concerning the supply of Japanese eggs; of two millions of cards ordered only 1,400,000 have arrived to the present time. The sale of manufactured silks, especially plain goods, was large at the end of the year, and the looms are now hard at work to replace the drain. All branches of business seem to be in a healthy condition.

THE VALUE OF BHOOTAN.

(TO THE EDITOR OF "THE TIMES.")

Sir,—In all the articles relating to the war in Bhootan which I have seen that country is represented as being contemptible, and the question of its occupancy is regarded as matter of no moment to England, provided its occupants give us no trouble.

To any one who reflects on the natural features of Asia, on the products of its northern and southern halves, and on the rapid march of European civilisation on both sides of the Himalaya, the question of the occupation of this range (of which Bhootan is perhaps the richest section) must appear a very momentous one; for it separates regions of comparative sterility, though abounding in rich animal and mineral products, from those that teem with vegetable products of all kinds.

Hitherto this 1,200 miles of mountains has been so fully believed to present an insuperable barrier to commerce that we, the most enterprising commercial nation that India ever saw, have been content to leave the trade through its rich valleys in the hands of its barbarous inhabitants. Yet so great is the demand by the natives to the north of them for their products and those of the countries south of them, that these very barbarians find it profitable to transport annually many thousands of loads of timber, rice, sugar, tobacco, cotton cloths, silks, &c., across innumerable, almost pathless, passes from 12,000 to 18,500 feet elevations, and at all seasons of the year, from June to December, receiving in exchange tea, salt, gold-dust, jewels, borax, musk, shawl-wool, ponies, sheep, crockery, &c.; and, what is more extraordinary, the currency on the Bhootan frontier, as over a great part of Central Asia, is tea of the worst description, brought from China several thousand miles off; while we are producing tea of infinitely better quality, and at a fraction of the cost, only sixty miles south of the said frontier?

If these rude mountaineers, living in a state of incessant warfare, can sell with profit these products, taxed as they are to many-fold their value by the petty chiefs whose territories they must pass through, what may not English energy effect, with capital, roads, and free-trade? And these remarks apply especially to Bhootan, for the further eastward we go in the Himalaya the richer are the plains and valleys south of it, and the more populous the country north of it.

Many look with apprehension to Russia occupying Thibet; in my judgment the sooner she does so the better for us, provided we are prepared for the change; for then we ought to be in a position to feed Central and Northern Asia from India. But let it be remembered that Russia must be fed as she occupies, and at first by the occupants of the Himalayan valleys, just as the troops of the present masters of Thibet, the Chinese, are now fed by Sikkim and Bhootan. Russia, then, once on the frontier will have to depend on Nepaul, Sikkim, and Bhootan for a scanty supply of the worst and dearest food, or occupy those valleys herself, when she can raise the same food in any quantity and at a nominal price. Who can doubt the alternative she will choose, or blame her for the choice? And who then will displace her? If Nepaul is now aptly called "a drawn dagger pointed at the heart of Bengal," what shall we call the Himalaya when held by Russian guns and bayonets?

It is asserted that the Bhootanese would starve but for the dooars we propose to occupy, and for which we are to pay them rent. This is a mistake. They cling to the dooars because they there hold a timid race in slavery to grow crops which go partly to support themselves in idleness, while the rest is sold on the frontier to feed the Chinese troops at L'Hassa. Bhootan consists of a series of magnificent valleys as long as England is broad, where between 1,000 and 7,000 feet of rice, maize, millet, &c., are grown without tillage or irrigation, and above that elevation all European grains and vegetables flourish; its forests are immense and its timber excellent, while cattle, ponies, sheep, and poultry, are abundant and of most excellent quality. Sikkim, a far less productive province, was equally regarded as an unproductive wilderness, but has been redeemed from barbarism, and under every discouragement made to yield a revenue through the exertions of its late political agent and superintendent, Dr. Campbell; and half-a-dozen such men in Bhootan, with the frontier open on the north, and Assam to supply tea, rice, sugar, tobacco, &c., in the south, would raise a splendid revenue in a few years, and civilise a vast tract of country now held by a nation of as treacherous, indolent, debauched, and priest-ridden barbarians as the world ever saw. J. D. HOOKER.

Royal Gardens, Kew, Dec. 27.

THE "NEW YORK HERALD" ON ENGLISH POLICY IN CHINA.

The following article from the *New York Herald* is written in the usual self-glorious style. It would have been only fair to point out that American merchants joined in the good things derivable from the English forcing the opium trade, and that America is quite willing to enjoy the advantages conferred by the prestige of Russia in the way of telegraphy.

The latest advices from China reveal the fact that most of the European Powers are making very slow progress in establishing amicable relations with that country. The policy of alternately drugging with opium, bullying, and fighting, does not seem to convince the Celestials that those nations which adopt those styles of argument are entitled to their confidence and respect. A nation which has existed till late years for centuries without internal revolution of any moment, and has been free from wars for generations, very naturally looks with suspicion upon the Government which resorts to the means that England has been in the habit of using in Asia to advance her commerce. Almost the first step taken by England in her efforts to establish commercial intercourse with the Chinese was to demoralise the people by feeding them with opium. Then came the clandestine trade in that article in violation of the laws of the empire, which in turn led to wars and insurrections. A Government whose traditions have been that of non-intercourse with other nations must have had that policy strengthened in their own estimation when they saw that the first fruits of international intercourse were demoralisation of the people, war, murder and insurrection. Yet all of these were brought upon the Chinese by the Powers of Europe in their efforts to open that country to their commerce. This mode of procedure is so averse to that in vogue among the Chinese, that we are not surprised that but little progress is made in establishing full friendly relations.

Our Government has very wisely thrown the weight of its influence against this policy. The intercessions of our representatives at Peking succeeded for a time in breaking up the policy of demanding cession of territories by the Powers of Europe, and thus opened the doors of China,

Digitized by Google

by peaceful means, wider and more effectually than all the threats, bullying, and warlike operations of other nations combined could possibly do. But we now learn that the Governments of Europe are again resorting to their old dodge, and that efforts are being made to involve this country with them. We trust that our representatives in that quarter will be instructed to keep aloof from all such alliances. While we do not intend to pocket an insult from any foreign Government, yet it should not be our policy to plunge ourselves into a war, especially when the reverse of that policy will the best serve our interest, as it clearly will, with the Chinese. We want no cession of territory in Asia; we have sufficient on this continent for our purposes; nor should we assist England, France, or any other Government in securing grants of that kind from the Emperor of China. If England or any other country desires to engage in war for that purpose let them do it on their own responsibility, and accept the consequences. Our true policy is that of a masterly and energetic peace. We are so situated that we have everything to gain and nothing to lose by that course. The correctness of this view has already been shown by the large orders which our shipbuilders have received from the Chinese, and that, too, at the very time when England and other nations were trying to force their trade upon them. The moral effect of peaceful diplomacy has accomplished for us what the threats of war and bullying demands of other countries have failed to bring about. Such will unquestionably lead to this result hereafter.

It is but a short time since the efforts of Russia to construct a telegraph across the Chinese empire were interrupted by the Chinese Government. Serious complications were threatened; but we presume that Russia will finally carry her point, although it may arouse such animosity on the part of the authorities in China that it will embarrass for a long time its operations. As one end of this line is to terminate in this country, we can, if we are wise, be the first to receive the advantage and reap the fruits. It will make this country one of the great centres of the world, and by the time that the European Governments have overcome the prejudice among the Chinese which their belligerent demonstrations and threats have aroused, the current of trade of China will have so strongly set in towards our shores on the Pacific that it will be impossible to change it. That trade will soon become one of the most important of that of any nation. It will be specially valuable to us from the fact that the articles raised and manufactured there which we desire the most are not produced in this country. It is then clearly our policy to maintain friendly relations with the Chinese. The folly of the course of the European nations is too apparent for us to be misled in this respect. A nation that was constantly trying to stir up insurrection in our midst, and endeavouring to demoralise our people in every possible way, should be the last which we would desire to reward with our commerce. However, human nature is the same the world over, not excepting the Chinese. Those powers which are friendly to that country during the hours of trial will gain the respect and gratitude of both people and Government when the troubles disappear, and be rewarded with preference in all commercial intercourse. Let peace, then, be our policy with China.

Naval and Military.

By the mail from the Cape we find that the Gresham troopship, which left Hong Kong with 280 invalids, &c., of the 9th and 11th Regiments, lost by deaths on the way no less than 42 men. The kindness of the Commodore of the Station is thus described in a local paper:—

If there be any act of Commodore Cockburn's more worthy than another to be held up to public applause and general admiration it is his great kindness to the military invalids who arrived in Simon's bay on the 6th Dec. by the ship Gresham. This ship sailed from Hong Kong about two months ago, with 280 invalids (principally military) from the 2-9th and 11th Regiments. This transport was properly fitted and well ventilated, but, before the embarkation of the invalids, the deadly climate of China had done its work. Ere the arrival of the Gresham forty-two of the invalids were numbered among the dead, and many more are in a dying state. The Commodore, understanding the necessity of having the ship well cleaned, and anxious to provide for the comforts of the sick, set to work like a naval officer. On the 7th he had twelve of the worst cases sent to the naval hospital, fifty-two next worst removed to H.M.S. Seringapatam, and about sixty-eight of the convalescent placed under canvas south-east of Simonstown. Owing to the energy of the Commodore, and of the gallant Captain Forsyth, and to the despatch of Mr. Angell, military storekeeper, all this was effected in a few hours. Regarding the women and children, the Commodore had them comfortably located in the dockyard stores, where every attention is being paid them. The invalids in the naval hospital feel comfortable under the care of Dr. Stirling and Dr. Gross, and those on board the Seringapatam under the charge of Dr. Olive. There is no stint of good provisions, no want of good wine, good ale, good milk, &c.

A calculation has been made by a contemporary of the cost to the country in the policy which insisted on withdrawing the native troops from Hong Kong and the consequent mortality in the 9th and 11th Regiments. The items are thus given:—

Hire of buildings, including one for a hospital, over £11,000; two invalid ships, £10,000; invalids sent home by the Peninsular and Oriental steamer, £3,060; loss of 150 men, at £100 each, £15,000.—These figures include the casualities in the 2nd battalion of the 9th Regiment, but they do not include the transport of the 2nd battalion of the 11th from the Cape to Hong Kong, nor of the Indian regiment sent to Bombay to make room for them; nor the expense of sending out men to supply those who have died or been invalided, or served their time and will not re-engage in China: nor the wines and medicines used in hospital, nor the surplus cost of a European regiment over an Indian regiment. If these and other items were added to the figures given above, the total could scarcely be less than £50,000.

The object for which the movement of troops was made by the War Office was to reduce the allowances hitherto given to troops serving in China. This could not be done while the Indian troops in the same garrison were receiving these allowances; and the War Office has not at present the power of cutting down the allowances of Indian troops.—The estimated saving by this arrangement was £9,000. Its actual cost, as we have seen, will not be much less than £50,000.

The screw transport Conqueror, with marines, also arrived from Japan at the Cape on the 2nd December, all well, and sailed again on the 6th. The U. S. ships of war Hartford and Wachussetts also arrived outward, bound to the China station.

An order from the Horse Guards has been received at Chatham garrison, directing Captain Allen N. Adams, Ensign John Hugh Ford, and 51 non-commissioned officers and men of the 2nd Battalion of the 20th Regiment to be held in readiness to embark for China, there to join the service companies of that regiment.

Mr. O. A. Pease, Military Store Staff, Woolwich, is under orders to proceed to Hong Kong to carry out the duties of Mr. H. Payne Moors, invalided home.

Captain William M. Dowell, C.B., has been appointed to the Topaze, 39, screw frigate, at Devonport, and will take her on to Valparaiso, and bring back the Leander. This officer, who was made a C.B. for his gallant services when in command of the Barrosa, 21, in the operations in the Straits of Simonoseki, and who has also two medals and a clasp, and is an officer of the Legion of Honour, and has received the order of the Medjidie of the 5th class, entered the navy in 1839, and became lieutenant in 1847. He served in the Albion, 90, in the Black Sea fleet, during the Russian war, and was made commander in 1854, and was posted in 1858. He commanded the Barrosa at China and Japan, when he joined the Euryalus, and brought her home, and was paid off September 23, 1865.

MILDEW IN COTTON GOODS.—*The Times* has a leading article on the inquiry instituted by the Manchester Chamber of Commerce on this subject. It is admitted (says *The Times*) that the goods must be "sized," and if this is done with good soap and good starch,—we suppose we may add the substance called China clay,—the process not only improves their look, but preserves and strengthens them. It is common, indeed, to hear ladies affirm that starch destroys linen, but no chymical reasons can be given for that opinion, and everybody with a large, well-washed, and well-starched stock knows the contrary to be fact. "The best white curd soap," observes the committee, "is a definite compound, not a mere mechanical blending of tallow, water, and alkali. It contains 33 per cent. of water, 60 per cent. of tallow, and 7 per cent. of alkali. If such a soap be added to well-fermented flour, from which the acids, bran, sugar, gums, &c., have been removed by decantation and washing, the soap will remain in the size mixture as soap, and not be broken up into its constituents." No mildew can arise from the use of such articles, and if China clay be added to give bulk, it seems to be considered quite harmless. But there are countless substitutes, and spurious articles more or less injurious. The cupidity of the manufacturer, or his ignorance, or rather that compound which consists in a determination to know nothing contrary to one's interest, leads him to employ cheap soaps or soap substitutes, in which an excessive proportion of water is balanced or maintained by certain saline additions. A substance called "softening," extensively used to help the weaver, does its work by the alkali in it, and, meeting with the free acids of the size, produces deliquescent salts. The committee observe that pure tallow is as important as pure soap; that imperfectly refined tallow makes the cloth yellow; that the use of oils in large amount is liable to heat the cloth; that combinations of resin with alkali are unfit for the size box; that glue, animal size, linseed emulsions, Irish moss, and all such articles decompose rapidly; that chymical salts, the chlorides of magnesium, zinc, and sodium—the last common salt—are deliquescent and dangerous; and that artificial drying is only a temporary expedient. The goods soon recover the water from the air, and when in the hold of a ship may be held to be permanently damp. They severely reprehend the use of various drugs, and conclude that a return to undrugged size is of immediate necessity, and the most specific remedy for the evils that have gradually crept into the cloth trade. A *sound size*, they say, is found to protect the fibre. As long as the starch lasts there is no mildew. It is only when the starch has disappeared by dampness, or by the action of chymicals, or by fermentation after packing, that mildew comes on. The mildew shows itself before the goods leave this country. It is satisfactory to know, on the authority of the committee, that there is good reason to hope the different kinds of mildew may be respectively traced to the different kinds of substances employed,—an investigation not less curious than useful.

Monetary and Commercial.

A statement of the cargo sent overland for the *Shaftesbury* will be found in our Export Supplement.

The biddings for £350,000 in bills on India took place at the Bank of England. The proportions allotted were—to Calcutta, £190,200; to Madras, £59,800; and to Bombay, £102,500. The minimum price was as before—1s. 11¼d. on Calcutta and Madras, and 1s. 11⅜d. on Bombay. Tenders on Calcutta and Madras at 1s. 11⅞d. will receive about 19 per cent., and on Bombay at 2s. ⅛d., 50 per cent.; above these prices in full. The terms thus paid show an adverse movement of about ⅛ per cent.

The silver market is steady, and the higher rates obtained for the Councilb ills on Bombay indicate an increased demand for the means of remittance. The silver brought by the West India packet was sold for India at 61½d., a rise of ¼d., and there now remains little on the market. There is no demand at present for Mexican dollars for China.

Telegrams from Hamburg state that the Nord-Deutsche Bank has declared a dividend of 9 per cent. for the year 1865.

The death of Mr. R. B. Minturn, of Grinnell, Minturn, and Co., New York, has been announced.

A meeting was held at Manchester, on the 24th inst., for the purpose of condemning the policy of levying duties on cotton goods imported into India; of export duties like that of saltpetre; the advantages of a sale of waste lands in India in fee simple; the perpetual settlement of the land tax; the registration and enforcement of contracts; and the more active prosecution of public works, especially as regards roads and irrigation. Mr. M. Ross, the president, took the chair, and there were present Lord W. Hay, General Sir A. Cotton, Messrs. H. D. Seymour, M.P., T. Barnes, M.P., Mr. Cheetham, M.P., J. T. Hibbert, M.P., G. Watkin, M.P., J. B. Smith, M.P., T. Bazley, M.P., G. Hadfield, M.P., John Pender, M.P., John Peel, M.P., Mr. John Dickinson (London), and Mr. Knight, proprietor of the *Times of India*.

The Company noticed in the Indian papers as about to be established in London for running a line of steamers *via* Falmouth and *via* Brindisi to India and China has not yet been announced, but we believe has not been abandoned.

The screw steamer *Agamemnon*, of 1,600 tons, is announced from Liverpool for Singapore and China, to be followed by the *Ajax* and *Achilles*. The vessels are owned by Messrs. Holt, of Liverpool.

Another instance of the schemes which are resorted to in order to launch new companies under limited liability has been brought to light. It appears that a few months since a Mr. Ramsay, formerly in Peek Bros., the well-known wholesale grocers, conceived the idea on leaving that firm that a Tea Company (Limited) would be a good undertaking; and, after getting the promise of some gentlemen to become directors, the plan was adopted of heading the names of our first-class China houses with—"Merchants who wish the Tea Company formed and who will subscribe for shares." Amongst these names was that of Matheson and Co., and for some time they were in ignorance of the matter. As soon as they were acquainted with it they informed the City Editor of *The Times* that it was placed on the list entirely without their authority. Mr. Ramsay, having entered on other engagements, gave the matter over to a Mr. Barwise, who it would appear assumes the responsibility of the above by publishing the following rejoinder, which certainly makes the matter worse. That the name of any firm should be assumed because a clerk may have expressed his own opinion that he "thought it a good thing," is most unpardonable, to say the least of it:—

"London, Jan. 22.

"Sir,—I have not circulated a written document of the nature stated in *The Times* of to-day. In a single note I mentioned the merchants favourable to the proposed Tea Company, and among them Messrs. Matheson and Co., as Mr. Williams in that house had approved the undertaking, and stated he would take shares. On no other occasion have I written the names of any merchants connected with the China trade.—Your obedient servant, "C. A. BARWISE."

The following reports of banks and companies have been issued since our last:—

The London and Westminster Bank shows the available total, including a previous balance of £22,605, to be £204,954, and a dividen was declared at the rate of 6 per cent. per annum, together with a bonus of 14 per cent. The sum of £8,456 was added to reserve, now amounting to £346,706, and £10,000 was appropriated toward building alterations, leaving £16,497 to be carried forward. The liabilities of the bank on current accounts are £19 224,571, and on acceptances, £1,554,730.

The Bank of London report shows an available total of £42,087, and a dividend was declared at the rate of 10 per cent. per annum and a bonus of £2. 10s. per share, equal together to the rate of 20 per cent. per annum. The sum of £2 087 was carried to reserve, which is thus raised to £304,411. The liabilities of the bank on current, deposit, and "other" accounts are £4,335,877. A resolution was passed for converting the £100 shares into five of £20.

The English, Scottish, and Australian Chartered Bank report, to be presented on the 29th inst., shows an available total of £22,938, which would have been larger but for the necessity of providing for additional estimated loss arising out of transactions under the late management at Melbourne. A dividend is recommended at the rate of 7 per cent. per annum on the paid-up capital of £600,000, which will absorb £21,000, and £1,000 is to be applied to premises and furniture accounts, leaving £938 to be carried forward.

The Bank of Egypt shows an available total of £26,850, including a previous balance of £4,446, and recommends a dividend at the rate of 10 per cent. per annum, and a bonus of 10s. per share, together equal to 14 per cent. per annum, for the half-year, and the appropriation of £4.400 to reserve, which will then amount to £25,000, leaving £4,950 to be carried forward.

The Report of the North-Western Bank (formerly Moss and Co.), to be presented at Liverpool on the 29th, shows an available total of £26,095, and recommends a dividend of 7s.6d. per share, or at the rate of 10 per cent. per annum, which will absorb £20,250. The sum of £5,000 is to be appropriated to reserve, and £845 will remain to be carried forward. The business of the bank has considerably increased, and the rebuilding and extension of its premises have been decided upon.

The Midland Banking Company shows the available total to be £9,056 and recommends a dividend at the rate of 6 per cent. per annum, and the appropriation of £2,000 to reserve, which will then amount to £5,000; and £365 in reduction of preliminary expenses, leaving £2,158 to be carried forward. The liabilities of the bank are £619,537 on current accounts, and £23,000 on acceptances.

The East London Bank (established about two years ago) shows an available total of £6,318, and recommends a dividend for the half-year at the rate of 5 per cent. per annum on the paid-up capital of £100,000, which will leave £3,818 to be carried forward.

The National Bank of Liverpool shows a disposable balance for the half-year of £23,425, of which £15,000 was applied in payment of a dividend at the rate of 10 per cent. per annum, the balance, £8,425, being carried to next account.

The English and Foreign Credit Company state the available total to be £10.567, including a previous balance of £1,686, and recommends a dividend of 7s. 6d. per share (being at the rate of 10 per cent. per annum), and the appropriation of £4,000 to reserve, which will then amount to £9,000, leaving £1,636 to be carried forward.

The Royal Bank of Liverpool report showed an available total of £19,433, and recommended a dividend at the rate of 10 per cent., and the appropriation of £6,933 to the reserve fund, which now amounts to £106,933.

The amount of bullion by the P. and O. Company's steamer *Ripon*, from Southampton on the 20th inst, was—in gold, to Alexandria, £2,000; to Madras, £5,667; to Singapore, £1,000. In silver, to Madras, £902; to Hong Kong, £9,490; to Shanghai, £1,505; to Calcutta, £20,000. Total—in gold, £8,667; in silver, £31,897.

MANCHESTER MARKETS.

The Circular of Sam Mendel states:—The demand for cotton goods is rather more active, and prices in many cases against buyers without being quotably higher. Grey Shirtings, 7 lbs., 14s. 9d. to 15s. 3d.; 8 lbs. 4 oz., 18s. Water twist, Nos. 16-24, 2s. 2d. to 2s. 3d.; Nos. 28-32. 2s. 4d. to 2s. 5d.

ARTICLES OF IMPORT.

TEA.—During the past fortnight our market has been very quiet, business being on an unusually limited scale for the period of the year, and prices have again ruled in favour of the buyers, to the extent of 2d. to 3d. on good Kaisows and Oopacks. The very high rate of money and the heavy prompts maturing about this time have been partially the cause of this dulness. The large arrivals of the last few days are as yet only partly on offer, but it will require great firmness on the part of importers to maintain present rates, the trade appearing to be unwilling buyers. Low and dusty kinds of Congou have sold at rather easier prices. Fair to good common have sold ½d. per lb. lower. Fair to good flavoury kinds, of old import, have sold at public sale, without reserve, at a decline of ½d. to 1d. per lb.; those of new season show a further reduction of 1d. to 2d. per lb., and even at this decline only go off slowly. Fine to finest show no material change, the quantity in first hands being small. Common to fair black-leaf kinds, of old import, have sold at a reduction of ½d. to 1d. per lb. In new season's the sales made show a further fall of 1d. per lb. for all kinds under 2s. per lb. Finer kinds much as before, but business limited. Canton-make, of good quality, have been fairly supported. Souchongs show no material alteration. Oolongs continue in fair request, at about

Digitized by Google

former prices. Flowery Pekoes remain much as before. Scented teas have been sold to a fair extent, but prices have ruled in favour of buyers, especially in good qualities of Foochow Orange Pekoe, of which large supplies have arrived, the decline being equal to about 2d. per lb. Common to fair Capers are in request up to 1s. 4d. per lb. Uncoloured Japans were sold in public sale, without reserve at from 1s. 2¾d. to 1s. 5d. per lb. for common to fair, being a decline of 4d. to 5d. per lb. from the highest point attained at the close of the year. The lowest quotation so far of this season's growth of red leaf, the cargo of the Fiwan, is the cheapest yet sold, which consisted of the grades under common Congou, and good flavoury to Kaisow kinds; in medium to finest Kaisow there have been a few purchases of the latter for Russia. Green teas have met with only a partial inquiry; the fresh supplies have been moderate, and prices show little if any alteration in the better qualities. Common kinds are difficult of sale. Canton Gunpowders of common quality sold at 11d. per lb. in public sale, showing a reduction of about 2d. per lb. Young Hysons remain without change. The stock on 1st January was computed at 80,000,000 against 95,000,000 in 1864. The public sales of the 16th instant comprised 19,000 packages, of which 18,200 packages were sold, 18,135 packages being printed without reserve. The quantity afloat is estimated at about 50,000,000.

SILK.—We have had an exceedingly quiet market since last mail, the transactions in both China and Japan silk being very limited. Prices on the whole have been well maintained, and importers, looking at the extent of the deliveries and the strengthening nature of the recent advices from China and Japan, show no disposition to press sales at the moment.

Deliveries from 1st to 24th inclusive:—

China	3,403 bales.
Japan	878 ,,
Total	4,281 bales

COTTON.—The business week closing on the 19th was dull throughout in the London market, and at the finish a decline of ¼d. per lb. was established from the prices of the 12th. This flatness has lasted throughout the present week, and the quotation is fully ¼d. per lb. lower. There are no sales of China and Japan to record. The closing quotations on the 24th were—Middling fair: Dhollerah, 16d.; Tinnivelly, 15¾d. Fair: Dhollerah, 17¼d.; Tinnivelly, 16d. Good fair: Dhollerah, 17½d.; Tinnivelly, 16¾d. The Liverpool market has evinced a similar flatness, producing an exactly equivalent decline.

SUGAR.—At the close of the week's business on the 19th the quotation was 6d. to 1s. per cwt. lower than on the 12th; but by the middle of the present week a better tone prevailed, and the tone is firmer.

COFFEE.—There is a good demand at auction, and the value is freely supported. On the 24th 120 casks 50 bags plantation Ceylon sold at 82s. 6d. to 90s. for middling to fine coloury; 150 bags Native sold at 25s. for black; of 2,351 bags Manila, about 200 bags sold at 70s. 6d. to 72s., two lots 65s. 6d. to 67s., rest bought in at 70s. 6d. to 82s. per cwt.

RICE.—Large supplies were brought on the market on the 23rd but were all bought in. Low middling to fine pearly white Bengal at 13s. 9d. to 15s. 6d., and soft grain at 11s. 3d. to 12s. 3d. per cwt. There were buyers 3d. under buying-in prices.

CARDAMONS.—Quiet; only 4 cases Malabar and 8 bags Madras at auction retired, and very little doing privately.

CAMPHOR.—Fair business accomplished since our last within our quotation, on the spot and for arrival; but the market has become rather quiet. Quotations—China, £5 10s. to £5 15s.; Japan, £5 15s. to £6.

CASSIA LIGNEA.—Steady, with moderate business at slightly improved prices. 235 cases at auction retired. Buds: Nothing of any moment doing.

CINNAMOM (CEYLON).—We quote first sort 2s. 2d. to 3s. per lb.; 2nd sort, 1s. 11d. to 2s. 10d.; 3rd sort, 1s. 10d. to 2s. 6d.; and 4th and Jungle 1s. 5d. to 1s. 10d. Quiet; and of 133 bales at auction two-thirds sold at 1d. to 2d. per lb. decline.

COCOANUT-OIL.—This market has been rather quiet, with very moderate trade, and without any alteration of consequence in terms. 346 casks Cochin, 50 casks Ceylon, and 187 casks Sydney at auction.

DRUGS.—Cubebs: Rather dearer; 52 bags sold at auction at 87s. to 87s. 6d. per cwt. Dragon's Blood: Recent importations, 15 cases middling quality in reed sold at auction at £11 to £14 per cwt. Galangal Root: Flat; and of 248 bags at auction a few only sold at 14s. per cwt. Rhubard: Nothing of any importance d,oing.

GUMS.—Benjamin: Flat, 101 cases Sumatra at auction, all retired. Damar: Steady, but quiet; 42 cases at auction retired. Gamboge: Scarce, and firm, but without transactions of importance.

GUTTA PERCHA.—Flat, of 33 tons at auction one-fourth sold at 5½d. o 8d. per lb.

HEMP (MANILA).—Markets very firm at the quotation of £43 to £46, and rather higher prices realised on the small sales made.

INDIA RUBBER.—Very scarce, and much dearer, limited business privately, and at auction 31 baskets Penang retired.

JAPAN WAX.—Firm; of 164 boxes at auction a few only sold at 72s. 6d. per cwt. for middling yellow block.

OILS.—Annised: Speculation has gone on, and a large business has been done on the spot and for arrival up to 9s. 3d. per lb., but the market is now quiet at 9s. though firm. Cassia: Is a little better; 20 cases at auction retired at 7s. 9d. per lb., and subsequently sold at 7s. 8d. at which price the oil is firm. Cinnamon: Only one case at auction, and that retired. Citronelle: Has brought previous value; and 31 cases at auction sold at 3¾d. to 4d. per oz.; of 50 cases of Winter's, 10 sold at 5½d. Lemon-Grass: Two cases at auction retired at 1s. 4d. per oz.; of 15 cases Winter's, one-fourth sold at 1s. 7d.

PEPPER.—Black: Sumatra, steady; Penang, 1-16d. lower; of 7,130 bags of the former at auction, a few sold at 3¾d. to 3¼d. per lb.; and of 8,001 bags of the latter, more than half sold at 3⅛d. to 3¼d. White: Firm; and of 1,580 bags Singapore at auction, half sold at 5⅝d. to 6d. per lb. for fair.

SPICES.—Cloves: Penang not in present demand; Zanzibar, ⅛d. dearer, and 4,752 bags at auction mostly sold at 3¼d. to 3¾d. per lb. for ordinary to very good. Mace: Steady; of 9 cases Penang and 4 cases Singapore at auction, half sold at 2s. to 2s. 4d. per lb., good reddish to middling pale. Nutmegs: Are rather cheaper for the small kinds; and of 118 cases Penang and 16 cases Singapore at auction, half sold at 3s. 8d. per lb. for good bold, and 1s. 2d. to 2s. 1d. for middling small to fine medium.

SAGO.—1s. 6d. to 1s. per cwt. cheaper; and of 4,127 packages at auction, nearly half sold at 19s. 6d. to 22s. per cwt. for middling to good small; and 20s. to 22s. large. Flour: Rather lower; 2,359 bags at auction mostly sold at 14s. to 15s. per cwt. for middling to good, but old import. At public sale 524 bags Borneo were bought in.

TAPIOCA.—403 bags good Penang were taken at 4d. per lb.; 70 boxes Pearl were withdrawn.

TERRA JAPONICA.—Cutch (Pegue): Firm, especially good and fine quality; 400 packages at auction retired. Gambier: 1s rather cheaper, but fair business has been done on the spot and for arrival. Of 2,487 bales at auction half sold at 20s. 6d. to 20s. 9d. per cwt. for middling heated, and 26s. to 28s. 3d. cubes.

TIN.—This market has been much depressed; since the beginning of the year prices fell rapidly to £90 for Straits and £92 for Banca, cash, and have since fluctuated between £90 and £92 for the former, and £92 and £94 for the latter. The nearest value of good Straits now is £90 10s. cash, and £92 to £92 10s. three months; a considerable quantity has changed hands in the month.

MISCELLANEOUS.—Blacklead: Cheaper, and of 968 barrels at auction only one-third sold at 18s. 6d. to 19s. per cwt. for fine lump; 12s. 6d. to 13s. chips; and 9s. to 10s. dust. Gails: Of China 310 bales brought to auction and retired; moderate business privately at 64s. to 65s. per cwt. for good; good Japan firm at the same prices, with buyers (being scarce). Ebony Wood: Steady; of 98 tons Ceylon at auction one-fourth sold at £7 10s. to £9 per ton. Musk: Steady; 35 caddies Tonquin at auction sold at 21s. 6d. to 25s. per oz. for ordinary to middling, and 15s. 6d. pickings. Rattans: Flat, and again cheaper; 26,312 bundles Singapore, and 7,310 bundles Penang at auction mostly sold at 3s. to 6s. 1d. per 100. Sapanwood: Only 9 tons Siam at auction, sold at £18 5s. per ton for good; being firm. Soy: Quiet; 9 casks at auction retired; small sales made privately. Star Anniseeds: Remain very scarce; nothing doing. Slicklac (Siam): Firm, but quiet; 123 cases at auction retired. Tortoiseshell: Of 4 cases Singapore and 3 cases Sidney at auction, all (but one Singapore) sold at 11s. to 11s. 6d. per lb. for the former, and 15s. 6d. for the latter. Vermilion: Very scarce, and dear; 5 boxes at auction retired at 3s. 10d. per lb.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £7 to £7. 5s. nail rod, £8. 10s. to £9; hoops, £9. 15s. to £10; sheets, single, £10. 10s. to £10. 15s.; Staffordshire bars, £8. 10s. to £9. 10s.; rails, £7.

STEEL.—Swedish keg, £15. 10s.

COPPER.—Sheet and Sheathing, £101 to £103 per ton; yellow metal, 8½d. to 9d. per lb.

TIN.—£102 for block; £103 for common bars. Tin plates, best charcoal, I.C. 33s. 6d. to 35s.

LEAD, &c.—English pig, W.B., £22s. 10s.; shot, patent, £24. 5s.; sheet, £22. 5s. to £22. 10s.; spelter, £23. 10s.; zinc, English sheet, £30; quicksilver, £8.

The following is from the Circular of Messrs. French and Smit:—Mainly in consequence of the high rate of money, the Metal Market has been very dull indeed since the commencing of the year. Iron: The makers generally are fairly employed. The speculative operations in Scotch Pig continue, and the price still advances. Copper: The smelters have reduced their price £5 per ton, as the last fortnight business in this article has been quite at a stand. Tin: In Straits several sales were made at £90 to £91 per ton, and in one instance it was reported even a lower rate was accepted. The last few days it has gone better and appears firm at £92. English is quiet. Tin Plates are very firm, and prices continue to advance. Lead is firm, but without important transactions. Spelter: Holders are asking higher prices.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton from the 1st January by the P. and O. Company's mail steamers.

FREIGHTS AND CHARTERS.

No perceptible change is noticeable in outward freights. Rates are firm at our last advices, and a fair amount of goods for shipment is still offering. Coal freights continue to improve.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Shanghai: 40s. weight, 30s. to 35s. meast. To Hong Kong: 40s. weight, 30s. meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Ceylon: 40s. weight, 20s. measurement.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per Keel. For Batavia: £26. 10s. For Hong Kong: £50 to £53. For Galle: £40 to £41. For Singapore: £33 to £35. For Shanghai: £63 to £64. From Newport, Cardiff or Swansea, per ton. For Batavia: £1. 7s. For Hong Kong: £2. 10s. For Manila: £1. 15s. For Galle: £1. 15s. For Singapore: £1. 10s. For Shanghai: £2. 17s. 6d. to £3.

The Admiralty have invited tenders for the conveyance of 245 tons naval provisions to Hong Kong, and 143 tons naval stores to Trincomalee, both from the River Thames.

The P. and O. Company have chartered the Agincourt to convey machinery, boilers, &c., to Hong Kong.

CASUALTIES.

The Prudhoe, of Liverpool, which sailed from thence for Shanghai on the 6th Jan., has been lost with all on board, as wreckage identified as belonging to her has been thrown on shore at Fleetwood.

The County of Argyle, Edington, from the Clyde to Batavia, has put back to Greenock in a sinking state, having been in collision off Tuskow, 17th Jan., with the Helen Baird, also from the Clyde to Batavia, which sank. The County of Argyle lost bowsprit and had two holes knocked in her fore compartment, and was subsequently beached in Cartsdyke Bay. She has since been temporarily repaired, and taken into dock to discharge.

The Malabar, Outre, from Java for the Channel for orders, put into Havre through stress of weather, Jan. 18, with part of cabin stove, one man lost overboard, and others injured. Her cargo was also heated, and required to be quickly discharged.

The Whampoa, Metz, from Batavia to Amsterdam with sugar and coffee, lost anchors and ran on shore on the Southwall, Jan. 17. She has since got off, by discharging part of her cargo, and is now lying in Nieuwe Diep.

The Dunmore, from Sunderland for Singapore with coals, drove on shore on a sandbank in Cairston Roads, Jan. 21, and was assisted off by a steamer and towed into harbour. She is not expected to have received much damage, but will, however, be surveyed.

Telegraphic advices, under date Galle, Jan. 21, state that the Eurydice, Gibb, from Foo-chow to London, had struck on Pagoon Rock, and was discharging.

MISCELLANEOUS.

At ST. HELENA.—Dec. 17, from Batavia, Matheran, Henry; 18, Maria Veronica, Schol, and sailed 19 for Amsterdam; Schwinge, Junge, and sailed 21 for Rotterdam; 19, from Sourabaya, Lady Alice, Shanack, and sailed 21 for Amsterdam; 20, from Singapore, Preciosa, Hallengren.

Off ASCENSION.—Dec. 19, from Java for Amsterdam, Fagel; from Batavia for Amsterdam, Anna and Sophia.

At ASCENSION.—Dec. 12, from Singapore, Panic, Bell, and sailed 15 for Liverpool.

At MAURITIUS.—Dec. 8, from Singapore, Hooghly, Veillet.

At TABLE BAY.—Dec. 12, from Singapore, Caldbeck, Garside, and sailed 13 for London; 13, from Macao for Havana, Tamatave, Bernard.

THE BANGKOK DOCK COMPANY'S NEW DOCK.

This magnificent Dock is now ready to receive Vessels of any burthen, and the attention of Shipowners, Agents, and Masters is respectfully solicited to the advantages for REPAIRING and SPARRING VESSELS, which no other Dock in the East can offer.

The following description of the Premises is submitted for the information of the public. The dimensions and depth of water being:—

Length ... ... 300 feet.
(To be extended.)
Breadth ... ... 100 „
Depth of water ... ... 15 „

The Dock is fitted with a Caisson, has a splendid entrance of 120 feet from the River, with a spacious Jetty on each side, where vessels of any size may lay at any state of the tides, to lift Masts, Boilers, &c., with powerful Lifting Shears, which are now in the course of construction.

The Dock is fitted with Steam Pumps of great power, insuring despatch in all states of the tides.

WORKSHOPS.

The Workshops comprise the different departments of Shipwrights, Mast and Block Makers, Blacksmiths, Engineers, Foundry, &c.

The whole being superintended by Europeans, who have had many years' experience in the different branches.

The workmen are the best picked men from Hong Kong and Whampoa.

The Company draws particular attention to the great advantages this Dock offers, being in a Port where the best Teak and other Timber can be had at the cheapest cost.

A Steam Saw Mill is also in connection with the Dock, to insure despatch in work.

The Keel Blocks are four feet in height, and can be taken out or shifted without cutting or causing any expense to ships having to get them removed.

The Company is also prepared to give estimates or enter into Contracts for the Repairs of Wooden or Iron Ships, the Building of New Ships, Steamboats, &c., or any kind of work connected with shipping.

All Material supplied at Market price. Vessels for Docking may lay at the Company's Buoys or Wharf free of charge, until ordered to remove by the Superintendent.

Captains of vessels before leaving the Dock must approve and sign their Dockage Bills.

All communications respecting the docking to be addressed, until further notice, to the undersigned, by whom all Bills will be signed and collected.

JOHN BUSH, Managing Director.

Bangkok, 18th Sept., 1865.
Hong Kong, 20th Oct., 1865.

JOHN OUSELEY, General Manager.

CAUTION.

WHEREAS Persons are shipping Wines to India marked with a Crown in imitation of CHILLINGWORTH and SON'S WINES, which are branded with a Crown, they having the appointment of WINE MERCHANTS to HER MAJESTY QUEEN VICTORIA, it is deemed expedient for the protection of dealers and consumers of their superior Wines selected from their extensive and valuable stock expressly for the Indian market, which have been so well known and approved by connoisseurs for the last thirty years for their extreme quality and purity, combining flavour and softness, together with great age, body, delicacy, and bouquet, being more free from acidity or alcohol that any other Wines, to caution all purchasers to ask for

CHILLINGWORTH & SON'S

CROWN SHERRIES AND OTHER WINE

And to be particular in observing that the Cases and Cask-heads are branded with their names at full length; also, on the side of the Corks, inside the bottles, as well as the Crown; and also on the seals, in accordance with the heading of this notice, as a necessary precaution, to ascertain that they are CHILLINGWORTH and SON'S CROWN WINES, in order to prevent a common low class of Wines being improperly foisted on the public, and which are in no way to be compared with those of CHILLINGWORTH and SON'S.

Wholesale Agents:—Bombay, Messrs. Hormarjee Bomanjee and Co.; Madras, Messrs. Parry and Co.; Calcutta, Messrs. Gordon, Stuart, and Co.; Kurrachee, Messrs. Hormarjee Bomanjee and Co.; Colombo, Messrs. Darley, Butler and Co.; Rangoon, Messrs. Gladstone, Wyllie and Co.; Hong Kong, Messrs. Robert S. Walker and Co.

HUBBUCK'S PATENT WHITE ZINC PAINT.

THE most durable and beautiful paint known, is cheaper than White Lead, and is proved to be superior for all purposes than the pernicious Lead Paint, and equally adapted for all climates.

Its whiteness is unaffected by bilge water, boiling sugar, or noxious gases.

It is free from any poisonous ingredient, and suited in all respects to the use of the painter.

Each Cask of Pure White Zinc is Stamped "HUBBUCK, LONDON PATENT."

Inferior Zinc Paint, so marked, having been sold in Foreign Markets, the Patentees offer a Reward of FIFTY POUNDS for information which will lead to the conviction, in an English or Colonial Court, of those who have pirated their Mark. Both Exporters and Retailers are liable for its sale.

THOMAS HUBBUCK AND SON,

WHITE LEAD, OIL, PAINT, AND VARNISH WORKS,
24, LIME-STREET, LONDON.

HUBBUCK'S ANTI-CORROSIVE PAINTS

Are very durable, and the most valuable protection to Iron Roofs, Bridges, Piers, Ships and Buildings, exposed to stormy weather and scorching sun; they soon become extremely hard, and do not blister.

They are made of Stone, Slate, Copper, White, Blue, Green, or any other Colour that is desired.

HUBBUCK'S ANTI-OXIDATION COMPOSITION,

For Coating Iron and Wood Ships' Bottoms; a preservative against fouling and corrosion This Composition is ready for immediate use, and obviates the waste of carrying unmixed Paints, Oils, Driers, &c. It is also applicable to all the purposes of other Paints.

HUBBUCK'S PALE BOILED OIL

Has less colour than Raw Linseed Oil, is a quick, hard and certain drier for White and Light Coloured Paints.

PAINTS AND OILS PROPERLY PACKED FOR EXPORTATION.

LONDON, MONDAY, JAN. 29, 1866.

—o—

JAPAN.

THE complete success of the bold stroke of Sir HARRY PARKES and his colleagues at Osaka, so far as concerns the ratification of the treaties, is fully confirmed by the present, mail. With regard, however, to the opening of Hiogo on the 1st of the present month we are still in doubt, and although the brief telegraphic announcements we have received on this point are unusually intelligible and consistent, we are at present hardly justified in regarding it as *un fait accompli*.

This, however, is a point of minor importance which the arrival of another mail will doubtless elucidate, and in the meantime we have ample cause for congratulation in the achievement by our Minister of so signal a victory over Japanese exclusiveness in obtaining the MIKADO's ratification to our treaty. No doubt ever existed in our minds that this was the one thing needful to inaugurate a brighter phase in our relations with Japan; but we hardly ventured to hope that even the energy of Sir HARRY PARKES would have accomplished this desirable object in so short a time. On the one hand, it seemed almost hopeless to attempt to approach a monarch so hedged in with exclusiveness and superstition through the ordinary channels of diplomacy; and on the other, there appeared to be no slight danger of a violent termination to all peaceful intercourse being the result of any ill-advised attempt at coercion. By what cogent arguments Sir HARRY PARKES has prevailed we know not, but however obtained, such a triumph at the very outset of his career in Japan gives substantial promise of future success.

We shall watch with great interest the development and progress of this new port of Hiogo. Situated as it is in the immediate vicinity of the chief commercial and manufacturing emporium of the empire, it must necessarily become important as a trading settlement; while its proximity to Kioto, and its command of the Inland Sea, will doubtless cause it to be jealously regarded by those hostile factions whose rivalry so often threatens to plunge the country into war. It is greatly to be feared, too, that many difficulties may arise from the conduct of the first settlers at the new port. Apart from the mercantile community which quickly collects for purposes of legitimate trade at any newly opened port in the Far East, there is usually a large influx of that dangerous class of people termed in Chinese newspaper phraseology "rowdies." It is these "rowdies" who, flocking to every newly opened port, gain for us by their rapacity, violence, and drunkenness, the hatred and ill-will of the native populace. Of late years Shanghai has swarmed with them, and for some time hardly a local paper appeared without a record of some disgraceful outrage of which they were the authors. Consular Courts had no terrors for them, and it yet remains to be proved whether the Supreme Court, under Sir EDMUND HORNBY, will prove effectual in keeping them in subjection. It will be a great misfortune if the peace and goodwill which we hope soon to see established between our merchants and the natives at Hiogo are to be endangered by the like unworthy cause; and we trust the Consuls who are first placed there will suppress with a strong hand all irregularities among their respective subjects. Another evil which attended the opening of the original ports in Japan, and continued to exist long afterwards, arose out of the exchange allowed by the local government to all foreign residents. For a term originally intended to be limited to one year from the opening of each port, but which in reality was extended to a much longer period, every new comer was permitted to exchange at the Custom-house, for native coin, $3 per diem for himself, and $1 per diem for each servant in his employ, at the rate of three ichibous per dollar. The market value of the ichibou being then as now, much lower, this daily transaction gave a profit increasing with the number of servants employed; so that a person, for instance, who retained six servants was entitled to exchange $9 per day, or $270 per month; the profit on which, at the rate of about 70 ichibous per $100, would amount to 189 ichibous, or upwards of $80 per month. Servants' wages being about $4 per month, food cheap, and small houses in the native town obtainable at low rents, a number of useless drones—men either incapable of earning an honest living, or too indolent to attempt to do so, were enabled to live at their ease on the proceeds of their exchange. Of course, numbers of such persons flocked to the newly opened ports, and eagerly availed themselves of these advantages; and it need hardly be added, that they formed no very desirable addition to the community. Such an abuse as this should not be tolerated at Hiogo, or any other new ports that may in future be opened. It is surely enough that this questionable privilege of exchange should have such disastrous effects on the *morale* of our naval and military forces on the China station, without being suffered to imperil the prosperity of every new settlement we may obtain in Japan.

THE P. AND O. COMPANY'S STEAMERS.

SEVERAL letters have reached us complaining of the condition of the company's steamers *Rangoon* and *Salsette*. The *Rangoon* took on the passage from Suez to Bombay nearly 17 days, that is from Sept. 27 to Oct. 13. Our correspondent describes the engines and boilers of this vessel as thoroughly inefficient, and incapable of performing a speed averaging 7 miles. This was not exceptional but the normal condition of things. The *Rangoon* is a new vessel, and went through the usual trials to obtain her certificate of efficiency previous to leaving England; and it would appear that her present condition could not have been anticipated. It is, however, imperative that this vessel should be recalled from the service and fitted with new engines. It is manifestly unjust that passengers and mails should be sent by steamers taking 17 days instead of 11. With regard to the *Salsette*, which took 12 days from Singapore to Hong Kong, it seems the fault was owing to the leakage of the boilers. It appears that the engines and boilers were passed by competent engineers at Bombay as capable of performing the voyage to China, and we hear it alleged that the engineer on board was to blame for inattention or want of judgment in handling the boilers on the passage, and that the company had discharged him. On advice from the Superintendent at Bombay, the company have ordered a new set of boilers, which are now in course of shipment to Hong Kong, and the vessel will be laid up in the interim. It is not unreasonable on the part of the public to demand that the P. and O. Company should, for the handsome subsidy and high rates of freight and passage money, give vessels of undoubtedly first-class character, equal to an average speed of 10 miles. Of course, allowances must be made for exceptional cases, which will occur to this as well as all other companies; but the P. and O. of late have been most vexatiously irregular in their services. The mails of the 26th July and 10th Oct. both broke down before reaching Hong Kong, and did not arrive until the following mail, a fortnight after. In all large companies it happens, however, that the *bona fide* grievances are lost sight of in the host of absurd complaints which are constantly urged against them. For instance, the following letter imputes indirectly some responsibility, if not culpability, to the company for the inefficient arrangements by the authorities at Galle for the reception of passengers landed with infectious diseases. This is a matter that purely belongs to the local authorities at the various places. It is clearly the duty of the Company's officers to land such passengers *nolens volens* for the safety of all on board. Sir HERCULES ROBINSON should, however, see to this very important omission on the part of his Government at Galle:—

"Sir,—In the month of March last, on board the Peninsular and Oriental steamer *Benares*, two days after leaving Bombay for China, I was unfortunately attacked with the smallpox. Some days later I was put on shore at Point de Galle, with my disease at that time at its height. No house or hotel could, naturally enough, be found to take me in. The surgeon of the ship communicated with the authorities, and they ordered

Digitized by Google

me up to what was called the Smallpox Hospital, about four miles from the fort.

"Accompanied by the surgeon of the *Benares*, whose kindness I was indeed grateful for, I arrived in a garry at the foot of a nearly perpendicular hill on which the 'hospital' stood. It was one of the hot months in Ceylon. At 2 o'clock in the afternoon, under a burning sun, I had to climb this hill for well-nigh half a mile, and but for the assistance of my friend Dr. Gill, who literally dragged me along, I should assuredly have stuck fast on the road. The 'hospital' I found a wretched shed of a place, but certainly with walls and a stone floor. On the latter I was glad to throw myself, but I longed, as you may suppose, for a bed.

"I found here a gentleman, a fellow-countryman, taken with the disease on board of another Peninsular and Oriental steamer. He told me that he was, he believed, the first European who had ever been in the place, and that the hospital was evidently provided for natives only. He added that every necessary I wanted must be ordered through a contractor in the native bazaar, three miles off, and that there was only one old native to wait upon all the patients. To this latter I applied, and was told I must get an order from the hospital surgeon before the contractor would supply a bed, or anything else. To be brief, the result was I had to pass the night in sleepless agony—for it was literally that—on the hard floor, my bed arriving the following forenoon. The next day another passenger, a young Englishman, was brought up from another Peninsular and Oriental ship. Happily, he was but slightly attacked.

"I can assure you, Sir, it was a relief to me to find myself with my two companions, otherwise our 'ward,' as they called it, might not have been left to only one of us. The adjoining compartment, divided by a half wall, was occupied by two poor Africans, stokers from some steamer."

THE PROPOSED BREAKWATER AT GALLE.

THE Ceylon Government having communicated with the Colonial Office relative to Mr. GRINLINGTON'S scheme for a breakwater at Galle—a scheme which if carried fully out would enlarge the anchorage ground to 240 acres and render the harbour absolutely safe—the matter was referred to the Board of Admiralty, and by this Board to a Committee for an opinion on its practical merits. That Committee, in its report, admits, in a qualified form, the feasibility of the project, and without entering on the consideration of the supplementary portions of the project, such as the possession of a graving dock, landing stages and tramway, is inclined to consider that the cost of an efficient and permanent breakwater with central portion and eastern and western wing, would most probably exceed Mr. GRINLINGTON'S estimate; indeed, as much as £1,500,000 is named by the Committee, who place an emphasis on the gigantic character of the scheme. The Admiralty fails to discover in its own department any special advantages from the erection of a breakwater, Trincomalee answering existing naval requirements. It seems quite evident, that in setting down their estimate the Admiralty had in view the miserable failure of the lighthouse on Basses Rocks; and have been further influenced by the hope that they will get a scheme that will bring the mail steamers to Trincomalee. It is impossible to exclude the conviction that Government has no present intention and no desire of improving Galle. The advantages that would arise to trade from the erection of the breakwater did not come within the scope of the Admiralty inquiry, but there was an evident disposition on the part of the Board to treat the question of improvement as one that merely concerned the convenience of the Peninsular and Oriental Steamship Company; such an estimate is calculated to excite surprise both here and in Ceylon. Not to speak of the reputation Mr. GRINLINGTON has achieved by the execution of colonial works, he was aided by the engineering officers of the Portland Breakwater, the most competent authorities in the kingdom, and both his plans and estimates had their sanction. The plans have also the approval of Captain TWYNAM and other naval gentlemen long and practically acquainted with the harbour. The greater weight is to be attached to these, inasmuch as the Portland Breakwater is laid in eleven fathoms, whilst the Galle Breakwater at the most would have been seven fathoms; and, again, whilst the former must encounter tempestuous seas at all the different periods of the year, the latter would have only to meet the periodic monsoon. For fifteen years have the Government obstructed all the propositions made for the improvement of the harbour of Galle, without bringing forward any one of their own, and all for the purpose of adventitiously benefiting Trincomalee, which is remote from the route of steamers and sailing vessels; and if resorted to must involve loss of time. The British Government, however, is well aware that the question cannot be for ever shelved; commercial interests will assert themselves, and Galle, the natural emporium of Ceylon, be improved to the extent of which it is susceptible. Thus the Government would only have its opinion on Mr. GRINLINGTON'S plan regarded as tentative; and as to a guarantee for any works required to carry out the object in view, without denying that this may be accorded under certain circumstances, defers any decision until such time as the Colonial Government of Ceylon shall take the initiative for executing a project to be jointly approved. The Home Government so far, however, has not admitted that the case of the Indian railways is analagous as respects guarantee. The anticipation is expressed that when the trunk railway of Ceylon, and various contemplated lateral branches are completed, the Colonial Government will find itself in a better position to commence an undertaking the importance of which is admitted, but not its immediate urgency. In fact, it is evident that Mr. CARDWELL'S advice to the Colonial Government is not to have too many irons in the fire.

MUNICIPALITY OF COLOMBO.

WE congratulate the people of Colombo on achieving that great and indispensable requisite to good local government, a municipal council. An efficient organization cannot fail to act advantageously on the public interests and exercise a certain influence on the colony in general. In fact it reflects creditably on Sir HERCULES ROBINSON and the community. This body politic will give force as well as expression to public opinion. We trust, too, that from the outset its deliberations and decisions will assume a practical character. Manifestly there is abundant work on hand; indeed, it is a matter of unfeigned surprise that its existence should so long have been delayed; that whilst other British colonies are dotted over with municipalities, the commercial emporium of a colony so long in British possession should have foregone, by virtual abnegation, those civic rights of which a municipality rightly constituted is the most efficient as well as the most appropriate exponent. One of the first subjects that must engage the attention of the Council will be the supply of Gas and Water, necessities as well as luxuries; a remarkable want in a town with 10,000 houses and 50,000 inhabitants, possessing abundant means, intelligence and refinement. But the oil lamp must shortly be one of the things of the past, and Colombo shine as brightly as Hong Kong and Singapore. We understand that the Hong Kong Gas Company have tendered for the supply of gas and water, and that terms are likely to be concluded with them without delay.

THE DUTCH AGGRESSIONS IN SUMATRA.

THE memorial from Penang on the subject of the Dutch aggressions in Sumatra has duly reached the Foreign-office, and is now the subject of a negotiation between the Government of the Netherlands and our own. It is expected, however, that some action will be taken by gentlemen in this country interested in Penang, through Members of Parliament, as soon as the next session assembles. We understand that one of these gentlemen is Mr. John Crawfurd, the venerable octogenarian, who is ever ready to come to the rescue of the Straits trade. In the meantime the memorialists will have, no doubt, an acknowledgment of the memorial, which will be published in the local papers.

THE CEYLON COFFEE CROP.

A MORE than ordinary discrepancy is observable in the mercantile estimates formed at Colombo as to the proportion which the coffee crop of 1865-66 will bear to that of the past season. The latter, we know, was very generally underestimated. A continuance of the same favouring circumstances was not to be reckoned on, but allowing for the extensive acreage of coffee-bearing plants arriving at maturity this season, and guided in our judgment by private advices, we are disposed to consider that the falling off will not exceed 12 per cent. The earlier shipments, owing to certain retarding causes operating to prevent the forwarding of produce, are scarcely to be accepted as indices in the computation. The total shipments for the new coffee season up to Dec. 12th reached 71,782 cwt. (of which on the 15th. ult. nearly one half was afloat), against 105,457cwt. in the corresponding period of 1864. Of this season's shipments 23,579 cwt. were plantation and 8,170cwt. native; the early shipments to the same date of the preceding season comprised 74,098 cwt. plantation and 31,359 cwt. native. All experience goes to show that one effect of improved agricultural skill is to render unseasonable rains and storms less and less disastrous; and it is satisfactory to note the earnestness

Digitized by Google

with which Ceylon planters and their superintendents are seeking additional information on this and other points of culture. Whatever the temporary fluctuations in supply, it cannot be questioned that the Ceylon coffee yield will continue to be progressively augmented. We are being repeatedly reminded that the forest land, like everything else, is limited, but there are hundreds of thousands of acres yet to be reclaimed, and the eagerness with which new land is sought in a colony by no means replete with capital, shows the abiding conviction of those best calculated to judge in the rumunerative character of those investments. The *Colombo Observer* of the 15th ult. reports 8,000 acres as having been "lately sold" in the Moorowa Corle district, whilst in the Dickoya district 16,000 acres had just passed into the hands of private purchasers, chiefly for coffee growing, and it was estimated that there were there available upwards of 50,000 acres for the same purpose. As to decline in home consumption, which has been regarded in some quarters as a discouragement, we are very confident that that consumption reached a minimum point in 1865. The demand for Ceylon plantation, and the finer kinds of native Ceylon, has actually increased, and so it will continue. The export demand for the finer kinds likewise continues rapidly to improve. The following quotations for the past three years will show how well Ceylon coffee has held its position in the London market,—even native Ceylon, notwithstanding the heavy arrivals of native grown Mysore and other common East India kinds, together with enlarged supplies, consequent on extended cultivation, of plantation qualities from the same quarter. The prices held so firmly now must shortly advance with that relief to the money market which the returning gold will soon afford; indeed, during the past year it has been observable that coffee has been least sensitive of all articles of colonial produce to a high rate of discount, and even the decline of 1s. per cwt. on the lower descriptions as compared with the prices ruling previous to Christmas, will, in the opinion of the trade, speedily be recovered. The United States' demand must be allowed its influence in this result; the proportions that demand will assume are as yet problematical. Our stock at the end of last year was larger than at the close of 1864, but owing to the active export demand we may anticipate, as then, an upward tendency for several months to come. There is at present a good demand for the finer kinds of plantation Ceylon. The supply of Mocha for the present year will probably be even more limited than in 1865.

THE ISLAND OF FORMOSA.

The alleged intention of the Prussian Government to "annex" the Island of Formosa is the topic of interest adverted to in the letter of our Hamburg correspondent. The rumour is not worthy of any credence whatever. It is simply absurd to suppose that Prussia could see her way to occupy Formosa, especially when she has friendly relations with the Government of China and the English, French, and Russian Ministers to look after her. The following letter has appeared in *The Times*:—

Sir,—It seems that the Prussian Government is about to take possession of Formosa. Now, Formosa, under the name of Tai-wan-foo, or "the District of the Great Day," with a capital of that name, residence of a Chinese chi-foo, or prefect, belongs to the Government of Fo-kien, the Vice-royalty of Ming-che (Fo-kien and Che-kiang), and to the empire of China.

The island was taken from the Moslems in 1624 by the Dutch, who erected at Tai-wan the fort Zelandia.

About that time 25,000 Chinese, followed in this century by millions, took refuge in the island, escaping from the rule of the Manchoo conquerors.

Zelandia and the island were taken in 1662 from the Dutch by the Chinese pirate Ching-chi-koong, also known by the name of Coshinga. It was then opened to English traders. The pirate's son surrendered Formosa in 1683 to Kang-hi, Emperor of China. The island afterwards revolted two or three times, as other parts of the empire did, the last rebellion being crushed in 1834.

The Chinese quarterly Red-book gives Formosa as a district of the empire, and every Englishman who has been engaged in the civil service in China may be aware that it is really a part of it.

Have all strong nations a right to take hold of any possessions of other nations they think of some use to themselves,—such as Denmark, Montevideo, Chili, the guano islands, or Formosa? If not, what is to be done? The most striking fact is that the Prussian Government seems to have a treaty with China and a Minister at Peking.—I remain, Sir, your obedient servant,

A CHINESE SCHOLAR.

Jan. 16.

MR. T. W. SMITH has arrived from Shanghai, bringing home a Chinese dwarf, aged about 35, said to be the son of the pilot who conducted the English fleet into Chusan, and who was dwarfed by the Chinese authorities as a punishment for the sins of his father.

WE understand that the P. and O. Company will not carry out the intended arrangement of making the Suez and China steamers form the main line until they despatch a couple of large boats from this side for the service. It is intended shortly to run intermediate boats on the Suez and Bombay line, making four times a month. This increase will not be subject to a postal contract at present.

A TELEGRAM has been received announcing the opening of the service of the Netherlands India Steam Company in Java on the 1st of January, the time specified in the contract.

THE steamer *Eagle*, Capt. Lobnitz, noticed in our last as having put into Lisbon, has coaled, made good defects, and proceeded on the 25th to Nagasaki, calling at Labuan for coals *en route*. The *Eagle* has proved herself to be a first-rate seaboat and to have splendid engines. She was in one of the late terrific gales which culminated in the destruction of the *London* and *Amalia*.

AMONG the official appointments lately notified in the *Gazette* we observe that of Mr. Farquhar, Second Secretary of Legation at Athens, to be Second Secretary of Legation at Peking; and Mr. Callendar, Her Majesty's Consul at the Dardanelles, to be Her Majesty's Consul at Manila. On reference to the Foreign-office list we find the antecedents of Mr. Farquhar to be as follows:—nominated Attaché, 1856; appointed to Berne, 1857; transferred to Vienna in March, and to Paris in April, 1858; appointed Paid Attaché at Rio, 1859; transferred to Parana, 1861; appointed Second Secretary in the Diplomatic Service, 1862; and transferred to Athens, 1863.

Mr. Callendar was appointed Consul at St. Catharine's, Brazil, in 1852; transferred to Rhodes the same year; to Erzeroum in April, 1863; and to the Dardanelles in August, 1863. Mr. Brackenbury, his predecessor at Manila, only left this country to take charge of the Consulate there by the mail of the 26th of September last, and is now appointed to be Her Majesty's Consul at Lisbon.

THE MORTALITY OF TROOPS AT HONG KONG.

The article which appeared in our last on this subject has given dissatisfaction to those concerned who are now in England. At this we are of course not surprised, and we are glad, for their sakes, that *The Times*, in a leading article—which we give below—excuses them from any selfish or sordid intention in remaining in Japan for the sake of the itziboo exchange. We hope that such a view of the case may be satisfactorily borne out, but we very much doubt it. The *Army and Navy Gazette* on the subject says:—

The *Overland China Mail* of November 15, in alluding to the inspection of Her Majesty's 11th Regiment, at Hong Kong, on the 1st, states that the Principal Medical Officer was absent in Japan, and makes some sharp comments on General Guy's enjoying himself at Yokohama instead of looking after the health of the troops. There were but 102 men in the ranks on the occasion, some so weak as to be unable to carry arms. We need not allude to the trafficking in exchanges which is attributed to officers in Her Majesty's service by the *China Mail*, but it appears too true that Japan in its attractions of all kinds produces bad results on the Chinese stations.

(THE TIMES.)

The destruction of the 11th Regiment at Hong Kong recalls the scarcely greater calamity of the 44th at Cabul. In that case it was the work of Asiatic treachery, of frost and snow, of old English carelessness and incompetence, bad military command, bad material arrangements, and, as we were forced to confess, a bad political position. In this case there is nobody to blame but ourselves. The regiment has been sacrificed by bad quarters, a bad season, and a locality always more or less insalubrious, by injudicious or conflicting orders, by the neglect and absence of the local officials, and by the want of a comprehensive policy for supplying the numerous and distant outposts of this empire in a way to economise British blood by utilising the many millions under our sway or our influence. As a perfectly gratuitous and wanton immolation this surpasses that at Cabul, while the loss exceeds the carnage of the 24th at Chillianwallah, which still casts a shadow of its own over the glories of the Punjab. The present story has now been often told, but it will be often told again. The 2nd Battalion of the 11th Regiment arrived at

Digitized by Google

Hong Kong in June from the Cape, at least two months before it was expected, and before there was barrack accommodation for it. There was no resource but tents; the rainy season was impending, and tents in rain are fatal to the English constitution, there at least. The spot selected —we are not told whether there was a choice in this matter—was near a native burial ground. The certain doom of the battalion was immediately predicted by the residents. We have seen a letter written the very day after its arrival, and it was noticed as unfortunate, though not likely to make much difference in the result, that the Governor and chief medical officers were enjoying the more pleasant air, the more cheerful society, and certain pecuniary advantages at Yokohama, in Japan. It so happened that just then there was a hope that Hong Kong was not so unhealthy a place as it had been found hitherto, and that its character was undeserved. It so happens, too, that some who felt this hope as late as last June have found themselves sadly deceived. Nevertheless, the worst was expected for the devoted battalion, and the worst came to pass. The men immediately began to droop, to sicken, and to die. Everything was done for them that could be done, and three naval surgeons offered their services to supply the place of the absentees. The lists of death and disease have been already given in these columns; but as the tale is not yet told, and we have yet to learn who died at Hong Kong, who at Yokohama, to which the 11th was removed, and who in the further wanderings of the plague-smitten battalion, we will only quote at present a very brief announcement in our yesterday's columns. In our Naval and Military Intelligence we read what must be almost the last act in this strange and miserable history:—"The transport *Gresham*, from Hong Kong, arrived in Simon's Bay, December 7, bound to England. On departure she had on board 280 invalids, principally military from the 2nd, 9th, and 11th Regiments. Forty-two are reported to have died on the passage to the Cape, where Commodore Cockburn paid prompt attention to them. Twelve of the worst cases were transferred to the Naval Hospital, 50 of the sick were sent to the Seringapatam, and 68 others were placed under canvas at Simon's Town."

If we have any bias in this matter, it is one which, as far as it goes, tends to excuse the authorities—viz., our belief that Hong Kong is a very unhealthy place. But it has long had a bad name for health, and that was a circumstance to be taken into consideration by the authorities concerned in the moving of troops. Either conflicting orders were sent to Hong Kong or to the battalion at its previous station; or orders were disobeyed; or the authorities at Hong Kong had undertaken to have barracks ready but had not done so, or were not allowed time for it, or had not barrack room because the soldiers already there had not been moved on to Yokohama. So far as regards the arrangements, there has been a want of head somewhere, and it is only due to the people at Hong Kong, to the absent Governor and surgeons, and to the persons charged with preparing barracks, to repeat that all on the spot were surprised at the appearance of the battalion. The question of official blundering or personal blame may be left to the inevitable inquiry. But there are two questions which may be asked at once, and which will prejudge nobody in particular. The first of these concerns the selection of Hong Kong as the seat of our Anglo-Chinese Government and the head-quarters of our army in that part of the world; the second is a question we have often asked before, and it is whether more cannot be done to save our costly British soldiers by the substitution of natives from India or China. Hong Kong stands condemned as a place of residence by the deeds rather than the words of everybody who has a chance of getting away from it. We decline to follow certain Chinese authorities in an account of this matter, which would put officers holding high places of trust in Her Majesty's service on a level with sharpers. We cannot believe that all the civil, military, and naval authorities of Hong Kong were flocking to Japan in order to enjoy a paltry profit by a certain fixed rate of exchange between our money and the Japanese, enforced upon Japan by the terms of our Treaty, though in effect a gross wrong to that country. We will assume that the officials at Hong Kong find what has been said from the first, that the island is most unhealthy. No doubt, we were deceived by a national prejudice. English women and English men have a fixed belief, which nothing can shake, that a seashore, particularly one with a mountain behind, and most of all a mountainous island, must be healthy, nay, so superabundantly healthy as to supply a stock of health that will last many months afterwards. Even in England this is often found a mistake, or only true in a conditional and modified sense. But at Hong Kong there is an utter want of area for building, space for exercise, and even air for ventilation. We have gathered a population there, and there is not room for it, so it is poisoning us. The most fatal objection is one that we might perhaps be better prepared for, if we gave a little more attention at home to comparative salubrity of spots very near one another. The mountain there is said to be composed of a very friable granite, through which water is always oozing, more or less, from some unknown source—geologists even say, from the mainland of China. It is even said there is something deleterious in this water, or, rather, in the constant disintegration of the granite. It is not, however, necessary to suppose any positive malaria, such as would require a chymical explanation. Wherever, as on the slopes of our own sand-hills and gravel-hills, there is, at a certain level, a perpetual exudation of the water filtering through the mass above, there is sure to be a liability to fever. There will always be spots, even where no water shows, where the soil will be overcharged with moisture, and whence a vapour will ascend. Persons exposed to this vapour throughout all the diurnal changes of the temperature will be liable to chill, and to fever; of course all the more, if they are neglecting the usual conditions of health as to diet, exercise, clothing, artificial warmth, and the like. From all accounts, it is not easy to escape spots of this malarious character at Hong Kong; and if it ever is to be a healthy station, our soldiers must not be housed as they have been hitherto.

But that other question now pressed upon us is more important, and, we do not deny, more difficult. The difficulty, however, consists in the natural reluctance to give up a national tradition, and accept an actual necessity. There is no mincing the matter, we cannot find British soldiers for all the duty to be done. If we choose to have colonies and dependencies all over the world, and to assert a political influence over more than half the population of Asia, as well as half Africa, half North America, not to speak of Europe,—we must accommodate ourselves, not to our position, but to our own magnificent pretensions. We must do as other Empires have done, and use one nation to assist us in controlling another. Whatever may be alleged about the superstitious prejudices of Hindoos, there is no doubt that we can obtain any number of soldiers from India who would be quite equal to the defence of our positions and free cities on the coasts of China and Japan. Even if their employment is attended with difficulties, or positive disadvantages, this is a comparative question; we have to choose between evils, or rather to do one thing because it is no longer possible to do the other. Can anybody venture to say what will be the total money cost of carrying the 2nd Battalion of the 11th from England to Yokohama, and bringing its remains back again? It will be something enormous, and, after all, a small matter compared with the loss of life and, we must add, character. Even if there had been great cost, some mortality, and a few hitches, we might have done better from our Indian army. The British soldier was precious many years ago, when the great Sikh chieftain said that had he such soldiers he would have every one carried by natives, and only placed on the ground to do the fighting work. He is far more precious now, far more costly, and more scarce; that is, more difficult to be obtained on any terms. So we must save him if we can, and we must even be prepared to run risks in doing so.

The following letter on this subject has appeared in the *Standard*:—

SIR,—I hope that you will do me the favour of inserting the following extracts from a letter I have received from Hong Kong by this mail (date Dec. 1):—

"One of the worst summers that the settlement has known since Hong Kong became a British colony has just ended. Though by the almanac we should be well into the winter, yet the punkah, the white suit, and the solar topee have been in full use within the last fortnight. Cool days, however, have at last come to us, and people's spirits have begun to revive, and the sound of merrymaking is again heard, but it is merrymaking subdued by sad recollections, for who can forget the faces that last winter were amongst us, and now are not? Some of our best and brightest sleep in the 'Happy Valley'; others, broken in health, have gone back to Europe to try to restore constitutions undermined by this pestilent air. It has been a sad year enough for the civilians, but their loss has been trifling compared with that of the soldiers. The poor privates have suffered terribly, as they were certain to do, from night work, which entails loss of rest and exposure to the deadly night air, and also from want of space and air in their sleeping rooms. These are the chief among many evils that they have suffered from, and these, in conjunction with a bad season, have filled the hospitals of Hong Kong to overflowing with patients, the cemetery in the 'Happy Valley' with new-made graves, and invalid ships with melancholy freights of pale, emaciated creatures, many of whom will never breathe the native air they pine for so. I send you an accurate return of losses to the garrison from death and sickness between the 1st of June and the 31st of October, 1865. On the 1st of June the strength of the garrison was 93 officers and 1,871 men, and these are their losses:—

	Officers.	Men.	Women.	Children.	Total.
Died	4 ..	87 ..	9 ..	52 ..	152
Invalided ..	8 ..	223 ..	47 ..	57 ..	335
Total ..	12 ..	310 ..	56 ..	109 ..	487

"Since the end of October things have been improving a little, but many deaths have occurred, and even now 100 patients are waiting for another invalid ship to be chartered that they may proceed homewards. It is no sudden and violent epidemic that has devastated the ranks; for though cholera and fever have been the chief destroyers, here they are endemic, and many other disorders have done their part.

"Sleepless nights, and exposure to impure air, have undermined the men's constitutions and done most of the mischief. Was it necessary that this should have happened? Why should men, who in England ought to have six nights a week in bed (as any medical man will tell you), have had in Hong Kong often only two nights? Why should men, who in England ought to have good and airy quarters, at Hong Kong be crammed into damp, ill-ventilated storehouses, in such a summer, too, as the last? Why, the truth is, that our Whig-Radical Government wished to reduce army expenses on the China station, and this is the way they went to work. They withdrew from Hong Kong the native Indian troops (who could stand the climate and the night air), and they sent two British regiments to occupy a place where there is only proper barrack accommodation for a wing of one regiment, unless those huts at Kowloon, where whole companies sickened at once, are to be called quarters. The Indian troops were withdrawn in order that the Indian allowances might be taken away from the British troops, and so 'a great reduction' be announced when army estimates were talked of. This reduction has taken place, and officers, many of whom are of long service, find that, in return for a banishment to such a distant and unhealthy station, they have the miserable addition to the English pay of 13s. per diem for field officers, and 10s. for those of lower grade; and this in the most expensive of all British stations. This wise piece of economy will save the country a few hundreds per annum. Now look at the other side of the question. The outlay caused by the substitution of white for black troops is enormous. There is one item of £15,000 per annum for extra barrack and hospital quarters. There is the cost of invalid ships; of the sending patients home overland in urgent cases. There is the increase in the charges for medical comforts; and when it is found that the present year's estimate for military purposes in China exceeds that of last year by about £35,000 we shall not be surprised here, but perhaps you will at home, and the authors of the notable reduction scheme may begin to doubt whether they have been eminently successful. The past cannot be undone; the dead cannot be restored to life nor the sick to health; but the fatal mistake need not be persisted in. Let the Government restore the Indian troops, and with them the Indian allowances, or else take the community of Hong Kong at their word, and remove the troops altogether, which would be wisest. Singapore is a very healthy station, though a hot one, and there are magnificent barracks there never yet occupied. Or there is Japan, where we have already a sort of footing, which must ere long be extended. Either of these places would be a good position for troops in the East, as far as all

Digitized by Google

Imperial purposes are concerned. But, at all events, the men who have passed the last summer in Hong Kong should not be exposed to the next. One regiment has had for some time the advantage of Japanese air; it will be only fair that the other should have its turn."

I have but little to add, sir, to my correspondent's statement, except my earnest request that you will print it. Numerous letters on the same subject have already appeared, but I think the story of the great Hong Kong fiasco cannot be told too often. I have lately lost a valued friend at Hong Kong. I have many friends and some relations there. I think no one knows more than I do of the ceaseless anxiety which is felt in English homes for sons and brothers in that fatal place, and so I feel that I am justified in again bringing the subject forward.—I am, Sir, yours, &c.,

Jan. 15. CONFUCIUS.

THE ITZIBOO QUESTION.—PROFITS OF OFFICIALS.

(To the Editor of the *London and China Telegraph.*)

SIR,—As one who has lately visited Japan, I read with interest your remarks in your journal of the 13th instant on the advantage enjoyed by foreign officials in the itziboo exchange; and its bearing upon the movements and inclinations of our own officials in the Far East is assuredly a matter for grave consideration. But, whilst in Yokohama, the question struck me in a still more objectionable point of view. No one who has read anything of our short history in Japan, much less any one who has visited the country, but is aware what is the jealous distinction preserved by the ruling classes in Japan between the official and the trader, which in their sense is a very inclusive term.

Japan is a feudal country, and to a Japanese noble or gentleman, just awakening to a knowledge of the outer world, the recognition of commerce as a great civiliser of nations has, it may be supposed, never occurred. It is only a few of the interpreting class who have ever probably tudied the history of England. For this we cannot quarrel with them. If our ancestors of the days of King John were to rise from their graves they would be wholly unable to understand the present position of commerce, and of those who pursue it in its various ramifications.

The Jew, whose teeth the cruel ruler some centuries back would coolly draw, may fitly be classed with the trader of Japan now who, at the Tycoon's nod, pours forth his wealth for State requirements.

We would naturally expect, however, that those who represent our Sovereign in the East should know well what is due to the representatives of the great commercial power of England, for the extension of which alone we go to those countries. Surely they should be the last to pander to this antique prejudice of class on the part of an Eastern nation! Yet, Sir, what is the fact? Human nature, especially when elevated from its origin, has often found it impossible to resist the sensuous feeling that it has become moulded of another and holier clay.

As a casual traveller in Japan it was a source of no little surprise to me to find that under the administration of affairs by Sir R. Alcock British merchants at Yokohama—indeed all but those who were literally civil military, or naval servants of our Government—were subject to a certain indignity. The English Legation officials had closed with the manners and customs of Japan as far as embracing the opportunity of claiming privileges unknown to them at home; and the English merchant was called "a kindo" in the Custom house of Yokohama.

I do not suppose the English merchant would care for a moment to what extent his Ambassador or Consul overshadowed him with the assertion of his own importance they would always receive proper respect at his hands. But he may fairly be expected to complain if these functionaries allowed him to be classed with the *oi polloi* of a half civilised nation of Asiatics. It would be curious, if not amusing, to inquire into the relative social positions at home of the representatives of foreign Powers generally, in Japan. But though I have some little reliable data by me upon this head, I think it would be scarcely proper to occupy your columns with such details, though it ought at the same time to be a subject of some anxiety to know that the Japanese have the opportunity of forming a correct opinion of a European gentleman.

I hope, Sir, you will persevere to agitate this question of the itziboo exchange, which is an outward and visible sign of this exclusiveness of Japanese officials, dictating, as I think I have shown it does, a distinction among Europeans in the eyes of a half-enlightened nation which is in every way offensive, and there are few indeed who know anything of the history of Europe in Asia but who will, I believe, add that it is a distinction most pernicious to the extension of our influence in that country.

—I am, Sir, &c., NOT A MERCHANT.

London, Jan. 17, 1866.

[This letter, with further information we have received, will be noticed in our next.]

FRENCH SILK MARKET.

During the first week of the year there passed through the hands of the officials of Lyons 45,846 kilogrammes of raw silk, against 44,407 kilogrammes in the same week of last year, but 12,000 less than in the preceding week, when the quantity reached 57,760 kilogrammes. The business of the first week of January was restrained only by the short supply. The quantity cleared last week amounted to 788 bales, weighing in all 56,181 kilogrammes, being an excess of 10,300 kilogrammes over the previous week. The greatest anxiety is evinced concerning the supply of Japanese eggs; of two millions of cards ordered only 1,400,000 have arrived to the present time. The sale of manufactured silks, especially plain goods, was large at the end of the year, and the looms are now hard at work to replace the drain. All branches of business seem to be in a healthy condition.

THE VALUE OF BHOOTAN.

(TO THE EDITOR OF "THE TIMES.")

Sir,—In all the articles relating to the war in Bhootan which I have seen that country is represented as being contemptible, and the question of its occupancy is regarded as matter of no moment to England, provided its occupants give us no trouble.

To any one who reflects on the natural features of Asia, on the products of its northern and southern halves, and on the rapid march of European civilisation on both sides of the Himalaya, the question of the occupation of this range (of which Bhootan is perhaps the richest section) must appear a very momentous one; for it separates regions of comparative sterility, though abounding in rich animal and mineral products, from those that teem with vegetable products of all kinds.

Hitherto this 1,200 miles of mountains has been so fully believed to present an insuperable barrier to commerce that we, the most enterprising commercial nation that India ever saw, have been content to leave the trade through its rich valleys in the hands of its barbarous inhabitants. Yet so great is the demand by the natives to the north of them for their products and those of the countries south of them, that these very barbarians find it profitable to transport annually many thousands of loads of timber, rice, sugar, tobacco, cotton cloths, silks, &c., across innumerable, almost pathless, passes from 12,000 to 18,500 feet elevations, and at all seasons of the year, from June to December, receiving in exchange tea, salt, gold-dust, jewels, borax, musk, shawl-wool, ponies, sheep, crockery, &c.; and, what is more extraordinary, the currency on the Bhootan frontier, as over a great part of Central Asia, is tea of the worst description, brought from China several thousand miles off; while we are producing tea of infinitely better quality, and at a fraction of the cost, only sixty miles south of the said frontier?

If these rude mountaineers, living in a state of incessant warfare, can sell with profit these products, taxed as they are to many-fold their value by the petty chiefs whose territories they must pass through, what may not English energy effect, with capital, roads, and free-trade? And these remarks apply especially to Bhootan, for the further eastward we go in the Himalaya the richer are the plains and valleys south of it, and the more populous the country north of it.

Many look with apprehension to Russia occupying Thibet; in my judgment the sooner she does so the better for us, provided we are prepared for the change; for then we ought to be in a position to feed Central and Northern Asia from India. But let it be remembered that Russia must be fed as she occupies, and at first by the occupants of the Himalayan valleys, just as the troops of the present masters of Thibet, the Chinese, are now fed by Sikkim and Bhootan. Russia, then, once on the frontier will have to depend on Nepaul, Sikkim, and Bhootan for a scanty supply of the worst and dearest food, or occupy those valleys herself, when she can raise the same food in any quantity and at a nominal price. Who can doubt the alternative she will choose, or blame her for the choice? And who then will displace her? If Nepaul is now aptly called "a drawn dagger pointed at the heart of Bengal," what shall we call the Himalaya when held by Russian guns and bayonets?

It is asserted that the Bhootanese would starve but for the dooars we propose to occupy, and for which we are to pay them rent. This is a mistake. They cling to the dooars because they there hold a timid race in slavery to grow crops which go partly to support themselves in idleness, while the rest is sold on the frontier to feed the Chinese troops at L'Hassa. Bhootan consists of a series of magnificent valleys as long as England is broad, where between 1,000 and 7,000 feet of rice, maize, millet, &c., are grown without tillage or irrigation, and above that elevation all European grains and vegetables flourish; its forests are immense and its timber excellent, while cattle, ponies, sheep, and poultry, are abundant and of most excellent quality. Sikkim, a far less productive province, was equally regarded as an unproductive wilderness, but has been redeemed from barbarism, and under every discouragement made to yield a revenue through the exertions of its late political agent and superintendent, Dr. Campbell; and half-a-dozen such men in Bhootan, with the frontier open on the north, and Assam to supply tea, rice, sugar, tobacco, &c., in the south, would raise a splendid revenue in a few years, and civilise a vast tract of country now held by a nation of as treacherous, indolent, debauched, and priest-ridden barbarians as the world ever saw. J. D. HOOKER.

Royal Gardens, Kew, Dec. 27.

THE "NEW YORK HERALD" ON ENGLISH POLICY IN CHINA.

The following article from the *New York Herald* is written in the usual self-glorious style. It would have been only fair to point out that American merchants joined in the good things derivable from the English forcing the opium trade, and that America is quite willing to enjoy the advantages conferred by the prestige of Russia in the way of telegraphy.

The latest advices from China reveal the fact that most of the European Powers are making very slow progress in establishing amicable relations with that country. The policy of alternately drugging with opium, bullying, and fighting, does not seem to convince the Celestials that those nations which adopt those styles of argument are entitled to their confidence and respect. A nation which has existed till late years for centuries without internal revolution of any moment, and has been free from wars for generations, very naturally looks with suspicion upon the Government which resorts to the means that England has been in the habit of using in Asia to advance her commerce. Almost the first step taken by England in her efforts to establish commercial intercourse with the Chinese was to demoralise the people by feeding them with opium. Then came the clandestine trade in that article in violation of the laws of the empire, which in turn led to wars and insurrections. A Government whose traditions have been that of non-intercourse with other nations must have had that policy strengthened in their own estimation when they saw that the first fruits of international intercourse were demoralisation of the people, war, murder and insurrection. Yet all of these were brought upon the Chinese by the Powers of Europe in their efforts to open that country to their commerce. This mode of procedure is so averse to that in vogue among the Chinese, that we are not surprised that but little progress is made in establishing full friendly relations.

Our Government has very wisely thrown the weight of its influence against this policy. The intercessions of our representatives at Peking succeeded for a time in breaking up the policy of demanding cession of territories by the Powers of Europe, and thus opened the doors of China,

Digitized by Google

by peaceful means, wider and more effectually than all the threats, bullying, and warlike operations of other nations combined could possibly do. But we now learn that the Governments of Europe are again resorting to their old dodge, and that efforts are being made to involve this country with them. We trust that our representatives in that quarter will be instructed to keep aloof from all such alliances. While we do not intend to pocket an insult from any foreign Government, yet it should not be our policy to plunge ourselves into a war, especially when the reverse of that policy will the best serve our interest, as it clearly will, with the Chinese. We want no cession of territory in Asia; we have sufficient on this continent for our purposes; nor should we assist England, France, or any other Government in securing grants of that kind from the Emperor of China. If England or any other country desires to engage in war for that purpose let them do it on their own responsibility, and accept the consequences. Our true policy is that of a masterly and energetic peace. We are so situated that we have everything to gain and nothing to lose by that course. The correctness of this view has already been shown by the large orders which our shipbuilders have received from the Chinese, and that, too, at the very time when England and other nations were trying to force their trade upon them. The moral effect of peaceful diplomacy has accomplished for us what the threats of war and bullying demands of other countries have failed to bring about. Such will unquestionably lead to this result hereafter.

It is but a short time since the efforts of Russia to construct a telegraph across the Chinese empire were interrupted by the Chinese Government. Serious complications were threatened; but we presume that Russia will finally carry her point, although it may arouse such animosity on the part of the authorities in China that it will embarrass for a long time its operations. As one end of this line is to terminate in this country, we can, if we are wise, be the first to receive the advantage and reap the fruits. It will make this country one of the great centres of the world, and by the time that the European Governments have overcome the prejudice among the Chinese which their belligerent demonstrations and threats have aroused, the current of trade of China will have so strongly set in towards our shores on the Pacific that it will be impossible to change it. That trade will soon become one of the most important of that of any nation. It will be specially valuable to us from the fact that the articles raised and manufactured there which we desire the most are not produced in this country. It is then clearly our policy to maintain friendly relations with the Chinese. The folly of the course of the European nations is too apparent for us to be misled in this respect. A nation that was constantly trying to stir up insurrection in our midst, and endeavouring to demoralise our people in every possible way, should be the last which we would desire to reward with our commerce. However, human nature is the same the world over, not excepting the Chinese. Those powers which are friendly to that country during the hours of trial will gain the respect and gratitude of both people and Government when the troubles disappear, and be rewarded with preference in all commercial intercourse. Let peace, then, be our policy with China.

Naval and Military.

By the mail from the Cape we find that the Gresham troopship, which left Hong Kong with 280 invalids, &c., of the 9th and 11th Regiments, lost by deaths on the way no less than 42 men. The kindness of the Commodore of the Station is thus described in a local paper:—

If there be any act of Commodore Cockburn's more worthy than another to be held up to public applause and general admiration it is his great *kindness* to the military invalids who arrived in Simon's bay on the 6th Dec. by the ship Gresham. This ship sailed from Hong Kong about two months ago, with 280 invalids (principally military) from the 2-9th and 11th Regiments. This transport was properly fitted and well ventilated, but, before the embarkation of the invalids, the deadly climate of China had done its work. Ere the arrival of the Gresham forty-two of the invalids were numbered among the dead, and many more are in a dying state. The Commodore, understanding the necessity of having the ship well cleaned, and anxious to provide for the comforts of the sick, set to work like a naval officer. On the 7th he had twelve of the worst cases sent to the naval hospital, fifty-two next worst removed to H.M.S. Seringapatam, and about sixty-eight of the convalescent placed under canvas south-east of Simonstown. Owing to the energy of the Commodore, and of the gallant Captain Forsyth, and to the despatch of Mr. Angell, military storekeeper, all this was effected in a few hours. Regarding the women and children, the Commodore had them comfortably located in the dockyard stores, where every attention is being paid them. The invalids in the naval hospital feel comfortable under the care of Dr. Stirling and Dr. Gross, and those on board the Seringapatam under the charge of Dr. Olive. There is no stint of good provisions, no want of good wine, good ale, good milk, &c.

A calculation has been made by a contemporary of the cost to the country in the policy which insisted on withdrawing the native troops from Hong Kong and the consequent mortality in the 9th and 11th Regiments. The items are thus given:—

Hire of buildings, including one for a hospital, over £11,000; two invalid ships, £10,000; invalids sent home by the Peninsular and Oriental steamer, £3,060; loss of 150 men, at £100 each, £15,000.—These figures include the casualities in the 2nd battalion of the 9th Regiment, but they do not include the transport of the 2nd battalion of the 11th from the Cape to Hong Kong, nor of the Indian regiment sent to Bombay to make room for them; nor the expense of sending out men to supply those who have died or been invalided, or served their time and will not re-engage in China: nor the wines and medicines used in hospital, nor the surplus cost of a European regiment over an Indian regiment. If these and other items were added to the figures given above, the total could scarcely be less than £50,000.

The object for which the movement of troops was made by the War Office was to reduce the allowances hitherto given to troops serving in China. This could not be done while the Indian troops in the same garrison were receiving these allowances; and the War Office has not at present the power of cutting down the allowances of Indian troops.—The estimated saving by this arrangement was £9.000. Its actual cost, as we have seen, will not be much less than £50,000.

The screw transport Conqueror, with marines, also arrived from Japan at the Cape on the 2nd December, all well, and sailed again on the 6th. The U. S. ships of war Hartford and Wachussetts also arrived outward, bound to the China station.

An order from the Horse Guards has been received at Chatham garrison, directing Captain Allen N. Adams, Ensign John Hugh Ford, and 51 non-commissioned officers and men of the 2nd Battalion of the 20th Regiment to be held in readiness to embark for China, there to join the service companies of that regiment.

Mr. O. A. Pease, Military Store Staff, Woolwich, is under orders to proceed to Hong Kong to carry out the duties of Mr. H. Payne Moors, invalided home.

Captain William M. Dowell, C.B., has been appointed to the Topaze, 39, screw frigate, at Devonport, and will take her on to Valparaiso, and bring back the Leander. This officer, who was made a C.B. for his gallant services when in command of the Barrosa, 21, in the operations in the Straits of Simonoseki, and who has also two medals and a clasp, and is an officer of the Legion of Honour, and has received the order of the Medjidie of the 5th class, entered the navy in 1839, and became lieutenant in 1847. He served in the Albion, 90, in the Black Sea fleet, during the Russian war, and was made commander in 1854, and was posted in 1858. He commanded the Barrosa at China and Japan, when he joined the Euryalus, and brought her home, and was paid off September 23, 1865.

MILDEW IN COTTON GOODS.—*The Times* has a leading article on the inquiry instituted by the Manchester Chamber of Commerce on this subject. It is admitted (says *The Times*) that the goods must be "sized," and if this is done with good soap and good starch,—we suppose we may add the substance called China clay,—the process not only improves their look, but preserves and strengthens them. It is common, indeed, to hear ladies affirm that starch destroys linen, but no chymical reasons can be given for that opinion, and everybody with a large, well-washed, and well-starched stock knows the contrary to be fact. "The best white curd soap," observes the committee, "is a definite compound, not a mere mechanical blending of tallow, water, and alkali. It contains 33 per cent. of water, 60 per cent. of tallow, and 7 per cent. of alkali. If such a soap be added to well-fermented flour, from which the acids, bran, sugar, gums, &c., have been removed by decantation and washing, the soap will remain in the size mixture as soap, and not be broken up into its constituents." No mildew can arise from the use of such articles, and if China clay be added to give bulk, it seems to be considered quite harmless. But there are countless substitutes, and spurious articles more or less injurious. The cupidity of the manufacturer, or his ignorance, or rather that compound which consists in a determination to know nothing contrary to one's interest, leads him to employ cheap soaps or soap substitutes, in which an excessive proportion of water is balanced or maintained by certain saline additions. A substance called "softening," extensively used to help the weaver, does its work by the alkali in it, and, meeting with the free acids of the size, produces deliquescent salts. The committee observe that pure tallow is as important as pure soap; that imperfectly refined tallow makes the cloth yellow; that the use of oils in large amount is liable to heat the cloth; that combinations of resin with alkali are unfit for the size box; that glue, animal size, linseed emulsions, Irish moss, and all such articles decompose rapidly; that chymical salts, the chlorides of magnesium, zinc, and sodium—the last common salt—are deliquescent and dangerous; and that artificial drying is only a temporary expedient. The goods soon recover the water from the air, and when in the hold of a ship may be held to be permanently damp. They severely reprehend the use of various drugs, and conclude that a return to undrugged size is of immediate necessity, and the most specific remedy for the evils that have gradually crept into the cloth trade. A *sound size*, they say, is found to protect the fibre. As long as the starch lasts there is no mildew. It is only when the starch has disappeared by dampness, or by the action of chymicals, or by fermentation after packing, that mildew comes on. The mildew shows itself before the goods leave this country. It is satisfactory to know, on the authority of the committee, that there is good reason to hope the different kinds of mildew may be respectively traced to the different kinds of substances employed,—an investigation not less curious than useful.

Monetary and Commercial.

A statement of the cargo sent overland for the *Shaftesbury* will be found in our Export Supplement.

The biddings for £350,000 in bills on India took place at the Bank of England. The proportions allotted were—to Calcutta, £190,200; to Madras, £59,800; and to Bombay, £102,500. The minimum price was as before—1s. 11½d. on Calcutta and Madras, and 1s. 11⅝d. on Bombay. Tenders on Calcutta and Madras at 1s. 11⅞d. will receive about 19 per cent., and on Bombay at 2s. ½d., 50 per cent.; above these prices in full. The terms thus paid show an adverse movement of about ½ per cent.

The silver market is steady, and the higher rates obtained for the Councilb ills on Bombay indicate an increased demand for the means of remittance. The silver brought by the West India packet was sold for India at 61½d., a rise of ½d., and there now remains little on the market. There is no demand at present for Mexican dollars for China.

Telegrams from Hamburg state that the Nord-Deutsche Bank has declared a dividend of 9 per cent. for the year 1865.

The death of Mr. R. B. Minturn, of Grinnell, Minturn, and Co., New York, has been announced.

A meeting was held at Manchester, on the 24th inst., for the purpose of condemning the policy of levying duties on cotton goods imported into India; of export duties like that of saltpetre; the advantages of a sale of waste lands in India in fee simple; the perpetual settlement of the land tax; the registration and enforcement of contracts; and the more active prosecution of public works, especially as regards roads and irrigation. Mr. M. Ross, the president, took the chair, and there were present Lord W. Hay, General Sir A. Cotton, Messrs. H. D. Seymour, M.P., T. Barnes, M.P., Mr. Cheetham, M.P., J. T. Hibbert, M.P., G. Watkin, M.P., J. B. Smith, M.P., T. Bazley, M.P., G. Hadfield, M.P., John Pender, M.P., John Peel, M.P., Mr. John Dickinson (London), and Mr. Knight, proprietor of the *Times of India*.

The Company noticed in the Indian papers as about to be established in London for running a line of steamers *via* Falmouth and *via* Brindisi to India and China has not yet been announced, but we believe has not been abandoned.

The screw steamer *Agamemnon*, of 1,600 tons, is announced from Liverpool for Singapore and China, to be followed by the *Ajax* and *Achilles*. The vessels are owned by Messrs. Holt, of Liverpool.

Another instance of the schemes which are resorted to in order to launch new companies under limited liability has been brought to light. It appears that a few months since a Mr. Ramsay, formerly in Peek Bros., the well-known wholesale grocers, conceived the idea on leaving that firm that a Tea Company (Limited) would be a good undertaking; and, after getting the promise of some gentlemen to become directors, the plan was adopted of heading the names of our first-class China houses with—"Merchants who wish the Tea Company formed and who will subscribe for shares." Amongst these names was that of Matheson and Co., and for some time they were in ignorance of the matter. As soon as they were acquainted with it they informed the City Editor of *The Times* that it was placed on the list entirely without their authority. Mr. Ramsay, having entered on other engagements, gave the matter over to a Mr. Barwise, who it would appear assumes the responsibility of the above by publishing the following rejoinder, which certainly makes the matter worse. That the name of any firm should be assumed because a clerk may have expressed his own opinion that he "thought it a good thing," is most unpardonable, to say the least of it:—

"London, Jan. 22.

"Sir,—I have not circulated a written document of the nature stated in *The Times* of to-day. In a single note I mentioned the merchants favourable to the proposed Tea Company, and among them Messrs. Matheson and Co., as Mr. Williams in that house had approved the undertaking, and stated he would take shares. On no other occasion have I written the names of any merchants connected with the China trade.—Your obedient servant, "C. A. BARWISE."

The following reports of banks and companies have been issued since our last:—

The London and Westminster Bank shows the available total, including a previous balance of £22,605, to be £204,954, and a dividen was declared at the rate of 6 per cent. per annum, together with a bonus of 14 per cent. The sum of £8,456 was added to reserve, now amounting to £346,706, and £10,000 was appropriated toward building alterations, leaving £16,497 to be carried forward. The liabilities of the bank on current accounts are £19 224,571, and on acceptances, £1,554,730.

The Bank of London report shows an available total of £42,087, and a dividend was declared at the rate of 10 per cent. per annum and a bonus of £2. 10s. per share, equal together to the rate of 20 per cent. per annum. The sum of £2,087 was carried to reserve, which is thus raised to £304,411. The liabilities of the bank on current, deposit, and "other" accounts are £4,335,877. A resolution was passed for converting the £100 shares into five of £20.

The English, Scottish, and Australian Chartered Bank report, to be presented on the 29th inst., shows an available total of £22,938, which would have been larger but for the necessity of providing for additional estimated loss arising out of transactions under the late management at Melbourne. A dividend is recommended at the rate of 7 per cent. per annum on the paid-up capital of £600,000, which will absorb £21,000, and £1,000 is to be applied to premises and furniture accounts, leaving £938 to be carried forward.

The Bank of Egypt shows an available total of £26,850, including a previous balance of £4,446, and recommends a dividend at the rate of 10 per cent. per annum, and a bonus of 10s. per share, together equal to 14 per cent. per annum, for the half-year, and the appropriation of £4,400 to reserve, which will then amount to £25,000, leaving £4,950 to be carried forward.

The Report of the North-Western Bank (formerly Moss and Co.), to be presented at Liverpool on the 29th, shows an available total of £26,095, and recommends a dividend of 7s. 6d. per share, or at the rate of 10 per cent. per annum, which will absorb £20,250. The sum of £5,000 is to be appropriated to reserve, and £845 will remain to be carried forward. The business of the bank has considerably increased, and the rebuilding and extension of its premises have been decided upon.

The Midland Banking Company shows the available total to be £9,056 and recommends a dividend at the rate of 6 per cent. per annum, and the appropriation of £2,000 to reserve, which will then amount to £5,000, and £365 in reduction of preliminary expenses, leaving £2,158 to be carried forward. The liabilities of the bank are £619,537 on current accounts, and £23,000 on acceptances.

The East London Bank (established about two years ago) shows an available total of £6,318, and recommends a dividend for the half-year at the rate of 5 per cent. per annum on the paid-up capital of £100,000, which will leave £3,818 to be carried forward.

The National Bank of Liverpool shows a disposable balance for the half-year of £23,425, of which £15,000 was applied in payment of a dividend at the rate of 10 per cent. per annum, the balance, £8,425, being carried to next account.

The English and Foreign Credit Company state the available total to be £10,567, including a previous balance of £1,686, and recommends a dividend of 7s. 6d. per share (being at the rate of 10 per cent. per annum), and the appropriation of £4,000 to reserve, which will then amount to £9,000, leaving £1,636 to be carried forward.

The Royal Bank of Liverpool report showed an available total of £19,433, and recommended a dividend at the rate of 10 per cent., and the appropriation of £6,933 to the reserve fund, which now amounts to £106,933.

The amount of bullion by the P. and O. Company's steamer *Ripon*, from Southampton on the 20th inst, was—in gold, to Alexandria, £2,000; to Madras, £5,667; to Singapore, £1,000. In silver, to Madras, £902; to Hong Kong, £9,490; to Shanghai, £1,505; to Calcutta, £20,000. Total—in gold, £8,667; in silver, £31,897.

MANCHESTER MARKETS.

The Circular of Sam Mendel states:—The demand for cotton goods is rather more active, and prices in many cases against buyers without being quotably higher. Grey Shirtings, 7 lbs., 14s. 9d. to 15s. 3d.; 8 lbs. 4 oz., 18s. Water twist, Nos. 16-24, 2s. 2d. to 2s. 3d.; Nos. 28-32. 2s. 4d. to 2s. 5d.

ARTICLES OF IMPORT.

TEA.—During the past fortnight our market has been very quiet, business being on an unusually limited scale for the period of the year, and prices have again ruled in favour of the buyers, to the extent of 2d. to 3d. on good Kaisows and Oopacks. The very high rate of money and the heavy prompts maturing about this time have been partially the cause of this dulness. The large arrivals of the last few days are as yet only partly on offer, but it will require great firmness on the part of importers to maintain present rates, the trade appearing to be unwilling buyers. Low and dusty kinds of Congou have sold at rather easier prices. Fair to good common have sold ½d. per lb. lower. Fair to good flavoury kinds, of old import, have sold at public sale, without reserve, at a decline of ½d. to 1d. per lb.; those of new season show a further reduction of 1d. to 2d. per lb., and even at this decline only go off slowly. Fine to finest show no material change, the quantity in first hands being small. Common to fair black-leaf kinds, of old import, have sold at a reduction of ½d. to 1d. per lb. In new season's the sales made show a further fall of 1d. per lb. for all kinds under 2s. per lb. Finer kinds much as before, but business limited. Canton-make, of good quality, have been fairly supported. Souchongs show no material alteration. Oolongs continue in fair request, at about

Digitized by Google

former prices. Flowery Pekoes remain much as before. Scented teas have been sold to a fair extent, but prices have ruled in favour of buyers, especially in good qualities of Foochow Orange Pekoe, of which large supplies have arrived, the decline being equal to about 2d. per lb. Common to fair Capers are in request up to 1s. 4d. per lb. Uncoloured Japans were sold in public sale, without reserve at from 1s. 2½d. to 1s. 5d. per lb. for common to fair, being a decline of 4d. to 5d. per lb. from the highest point attained at the close of the year. The lowest quotation so far of this season's growth of red leaf, the cargo of the Fiwan, is the cheapest yet sold, which consisted of the grades under common Congou, and good flavoury to Kaisow kinds; in medium to finest Kaisow there have been a few purchases of the latter for Russia. Green teas have met with only a partial inquiry; the fresh supplies have been moderate, and prices show little if any alteration in the better qualities. Common kinds are difficult of sale. Canton Gunpowders of common quality sold at 11d. per lb. in public sale, showing a reduction of about 2d. per lb. Young Hysons remain without change. The stock on 1st January was computed at 80,000,000 against 95,000,000 in 1864. The public sales of the 16th instant comprised 19,000 packages, of which 18,200 packages were sold, 18,135 packages being printed without reserve. The quantity afloat is estimated at about 50,000,000.

SILK.—We have had an exceedingly quiet market since last mail, the transactions in both China and Japan silk being very limited. Prices on the whole have been well maintained, and importers, looking at the extent of the deliveries and the strengthening nature of the recent advices from China and Japan, show no disposition to press sales at the moment.

Deliveries from 1st to 24th inclusive:—

China	3.403 bales.
Japan	878 ,,
Total	4.281 bales

COTTON.—The business week closing on the 19th was dull throughout in the London market, and at the finish a decline of ¼d. per lb. was established from the prices of the 12th. This flatness has lasted throughout the present week, and the quotation is fully ¼d. per lb. lower. There are no sales of China and Japan to record. The closing quotations on the 24th were—Middling fair: Dhollerah, 16d.; Tinnivelly, 15½d. Fair: Dhollerah, 17¼d.; Tinnivelly, 16d. Good fair: Dhollerah, 17½d.; Tinnivelly, 16¾d. The Liverpool market has evinced a similar flatness, producing an exactly equivalent decline.

SUGAR.—At the close of the week's business on the 19th the quotation was 6d. to 1s. per cwt. lower than on the 12th; but by the middle of the present week a better tone prevailed, and the tone is firmer.

COFFEE.—There is a good demand at auction, and the value is freely supported. On the 24th 120 casks 50 bags plantation Ceylon sold at 82s. 6d. to 90s. for middling to fine colour; 150 bags Native sold at 25s. for black; of 2,351 bags Manila, about 200 bags sold at 70s. 6d. to 72s., two lots 65s. 6d. to 67s., rest bought in at 70s. 6d. to 82s. per cwt.

RICE.—Large supplies were brought on the market on the 23rd but were all bought in. Low middling to fine pearly white Bengal at 13s. 9d. to 15s. 6d., and soft grain at 11s. 3d. to 12s. 3d. per cwt. There were buyers 3d. under buying-in prices.

CARDAMONS.—Quiet; only 4 cases Malabar and 8 bags Madras at auction retired, and very little doing privately.

CAMPHOR.—Fair business accomplished since our last within our quotation, on the spot and for arrival; but the market has become rather quiet. Quotations—China, £5 10s. to £5 15s.; Japan, £5 15s. to £6.

CASSIA LIGNEA.—Steady, with moderate business at slightly improved prices. 235 cases at auction retired. Buds: Nothing of any moment doing.

CINNAMOM (CEYLON).—We quote first sort 2s. 2d. to 3s. per lb.; 2nd sort, 1s. 11d. to 2s. 10d.; 3rd sort, 1s. 10d. to 2s. 6d.; and 4th and Jungle 1s. 5d. to 1s. 10d. Quiet; and of 133 bales at auction two-thirds sold at 1d. to 2d. per lb. decline.

COCOANUT-OIL.—This market has been rather quiet, with very moderate trade, and without any alteration of consequence in terms. 346 casks Cochin, 50 casks Ceylon, and 187 casks Sydney at auction.

DRUGS.—Cubebs: Rather dearer; 52 bags sold at auction at 87s. to 87s. 6d. per cwt. Dragon's Blood: Recent importations, 15 cases middling quality in reed sold at auction at £11 to £14 per cwt. Galangal Root: Flat; and of 248 bags at auction a few only sold at 14s. per cwt. Rhubard: Nothing of any importance doing.

GUMS.—Benjamin: Flat, 101 cases Sumatra at auction, all retired. Damar: Steady, but quiet; 42 cases at auction retired. Gamboge: Scarce, and firm, but without transactions of importance.

GUTTA PERCHA.—Flat, of 33 tons at auction one-fourth sold at 5½d. to 8d. per lb.

HEMP (MANILA).—Markets very firm at the quotation of £43 to £46, and rather higher prices realised on the small sales made.

INDIA RUBBER.—Very scarce, and much dearer, limited business privately, and at auction 31 baskets Penang retired.

JAPAN WAX.—Firm; of 164 boxes at auction a few only sold at 72s. 6d. per cwt. for middling yellow block.

OILS.—Anniseed: Speculation has gone on, and a large business has been done on the spot and for arrival up to 9s. 3d. per lb., but the market is now quiet at 9s. though firm. Cassia: Is a little better; 20 cases at auction retired at 7s. 9d. per lb., and subsequently sold at 7s. 8d. at which price the oil is firm. Cinnamon: Only one case at auction, and that retired. Citronelle: Has brought previous value; and 31 cases at auction sold at 3¾d. to 4d. per oz.; of 50 cases of Winter's, 10 sold at 5½d. Lemon-Grass: Two cases at auction retired at 1s. 4d. per oz.; of 15 cases Winter's, one-fourth sold at 1s. 7d.

PEPPER.—Black: Sumatra, steady; Penang, 1-16d. lower; of 7,130 bags of the former at auction, a few sold at 3¾d. to 3½d. per lb.; and of 8,001 bags of the latter, more than half sold at 3¾d. to 3½d. White: Firm; and of 1,580 bags Singapore at auction, half sold at 5⅞d. to 6d. per lb. for fair.

SPICES.—Cloves: Penang not in present demand; Zanzibar, ⅛d. dearer, and 4,752 bags at auction mostly sold at 3½d. to 3¾d. per lb. for ordinary to very good. Mace: Steady; of 9 cases Penang and 4 cases Singapore at auction, half sold at 2s. to 2s. 4d. per lb., good reddish to middling pale. Nutmegs: Are rather cheaper for the small kinds; and of 118 cases Penang and 16 cases Singapore at auction, half sold at 3s. 8d. per lb. for good bold, and 1s. 2d. to 2s. 1d. for middling small to fine medium.

SAGO.—1s. 6d. to 1s. per cwt. cheaper; and of 4,127 packages at auction, nearly half sold at 19s. 6d. to 22s. per cwt. for middling to good small; and 20s. to 22s. large. Flour: Rather lower; 2,359 bags at auction mostly sold at 14s. to 15s. per cwt. for middling to good, but old import. At public sale 524 bags Borneo were bought in.

TAPIOCA.—403 bags good Penang were taken at 4d. per lb.; 70 boxes Pearl were withdrawn.

TERRA JAPONICA.—Cutch (Pegue): Firm, especially good and fine quality; 400 packages at auction retired. Gambier: Is rather cheaper, but fair business has been done on the spot and for arrival. Of 2,487 bales at auction half sold at 20s. 6d. to 20s. 9d. per cwt. for middling heated, and 26s. to 28s. 3d. cubes.

TIN.—This market has been much depressed; since the beginning of the year prices fell rapidly to £90 for Straits and £92 for Banca, cash, and have since fluctuated between £90 and £92 for the former, and £92 and £94 for the latter. The nearest value of good Straits now is £90 10s. cash, and £92 to £92 10s. three months; a considerable quantity has changed hands in the month.

MISCELLANEOUS.—Blacklead: Cheaper, and of 968 barrels at auction only one-third sold at 18s. 6d. to 19s. per cwt. for fine lump; 12s. 6d. to 13s. chips; and 9s. to 10s. dust. Galls: Of China 310 bales brought to auction and retired; moderate business privately at 64s. to 65s. per cwt. for good; good Japan firm at the same prices, with buyers (being scarce). Ebony Wood: Steady; of 98 tons Ceylon at auction one-fourth sold at £7 10s. to £9 per ton. Musk: Steady; 35 caddies Tonquin at auction sold at 21s. 6d. to 25s. per oz. for ordinary to middling, and 15s. 6d. pickings. Rattans: Flat, and again cheaper; 26,312 bundles Singapore, and 7,310 bundles Penang at auction mostly sold at 3s. to 6s. 1d. per 100. Sapanwood: Only 9 tons Siam at auction, sold at £18 5s. per ton for good; being firm. Soy: Quiet; 9 casks at auction retired; small sales made privately. Star Anniseeds: Remain very scarce; nothing doing. Slicklac (Siam): Firm, but quiet; 123 cases at auction retired. Tortoiseshell: Of 4 cases Singapore and 3 cases Sidney at auction, all (but one Singapore) sold at 11s. to 11s. 6d. per lb. for the former, and 15s. 6d. for the latter. Vermilion: Very scarce, and dear; 5 boxes at auction retired at 3s. 10d. per lb.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £7 to £7. 5s. nail rod, £8. 10s. to £9; hoops, £9. 15s. to £10; sheets, single, £10. 10s. to £10. 15s.; Staffordshire bars, £8. 10s. to £9. 10s.; rails, £7.

STEEL.—Swedish keg, £15. 10s.

COPPER.—Sheet and Sheathing, £101 to £103 per ton; yellow metal, 8½d. to 9d. per lb.

TIN.—£102 for block; £103 for common bars. Tin plates, best charcoal, I.C. 33s. 6d. to 35s.

LEAD, &c.—English pig, W.B., £22s. 10s.; shot, patent, £24. 5s.; sheet, £22. 5s. to £22. 10s.; spelter, £23. 10s.; zinc, English sheet, £30; quicksilver, £8.

The following is from the Circular of Messrs. French and Smit:—Mainly in consequence of the high rate of money, the Metal Market has been very dull indeed since the commencing of the year. Iron: The makers generally are fairly employed. The speculative operations in Scotch Pig continue, and the price still advances. Copper: The smelters have reduced their price £5 per ton, as the last fortnight business in this article has been quite at a stand. Tin: In Straits several sales were made at £90 to £91 per ton, and in one instance it was reported even a lower rate was accepted. The last few days it has gone better and appears firm at £92. English is quiet. Tin Plates are very firm, and prices continue to advance. Lead is firm, but without important transactions. Spelter: Holders are asking higher prices.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton from the 1st January by the P. and O. Company's mail steamers.

FREIGHTS AND CHARTERS.

No perceptible change is noticeable in outward freights. Rates are firm at our last advices, and a fair amount of goods for shipment is still offering. Coal freights continue to improve.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Shanghai: 40s. weight, 30s. to 35s. meast. To Hong Kong: 40s. weight, 30s. meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Ceylon: 40s. weight, 20s. measurement.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per Keel. For Batavia: £26. 10s. For Hong Kong: £50 to £53. For Galle: £40 to £41. For Singapore: £33 to £35. For Shanghai: £63 to £64. From Newport, Cardiff or Swansea, per ton. For Batavia: £1. 7s. For Hong Kong: £2. 10s. For Manila: £1. 15s. For Galle: £1. 15s. For Singapore: £1. 10s. For Shanghai: £2. 17s. 6d. to £3.

The Admiralty have invited tenders for the conveyance of 245 tons naval provisions to Hong Kong, and 143 tons naval stores to Trincomalee, both from the River Thames.

The P. and O. Company have chartered the Agincourt to convey machinery, boilers, &c., to Hong Kong.

CASUALTIES.

The Prudhoe, of Liverpool, which sailed from thence for Shanghai on the 6th Jan., has been lost with all on board, as wreckage identified as belonging to her has been thrown on shore at Fleetwood.

The County of Argyle, Edington, from the Clyde to Batavia, has put back to Greenock in a sinking state, having been in collision off Tuskow, 17th Jan., with the Helen Baird, also from the Clyde to Batavia, which sank. The County of Argyle lost bowsprit and had two holes knocked in her fore compartment, and was subsequently beached in Cartsdyke Bay. She has since been temporarily repaired, and taken into dock to discharge.

The Malabar, Outre, from Java for the Channel for orders, put into Havre through stress of weather, Jan. 18, with part of cabin stove, one man lost overboard, and others injured. Her cargo was also heated, and required to be quickly discharged.

The Whampoa, Metz, from Batavia to Amsterdam with sugar and coffee, lost anchors and ran on shore on the Southwall, Jan. 17. She has since got off, by discharging part of her cargo, and is now lying in Nieuwe Diep.

The Dunmore, from Sunderland for Singapore with coals, drove on shore on a sandbank in Cairston Roads, Jan. 21, and was assisted off by a steamer and towed into harbour. She is not expected to have received much damage, but will, however, be surveyed.

Telegraphic advices, under date Galle, Jan. 21, state that the Eurydice, Gibb, from Foo-chow to London, had struck on Pagoon Rock, and was discharging.

MISCELLANEOUS.

At ST. HELENA.—Dec. 17, from Batavia, Matheran, Henry; 18, Maria Veronica, Schol, and sailed 19 for Amsterdam; Schwinge, Junge, and sailed 21 for Rotterdam; 19, from Sourabaya, Lady Alice, Shanack, and sailed 21 for Amsterdam; 20, from Singapore, Preciosa, Hallengren.

Off ASCENSION.—Dec. 19, from Java for Amsterdam, Fagel; from Batavia for Amsterdam, Anna and Sophia.

At ASCENSION.—Dec. 12, from Singapore, Panic, Bell, and sailed 15 for Liverpool.

At MAURITIUS.—Dec. 8, from Singapore, Hooghly, Veillet.

At TABLE BAY.—Dec. 12, from Singapore, Caldbeck, Garside, and sailed 13 for London; 13, from Macao for Havana, Tamatave, Bernard.

THE BANGKOK DOCK COMPANY'S NEW DOCK.

This magnificent Dock is now ready to receive Vessels of any burthen, and the attention of Shipowners, Agents, and Masters is respectfully solicited to the advantages for REPAIRING and SPARRING VESSELS, which no other Dock in the East can offer.

The following description of the Premises is submitted for the information of the public. The dimensions and depth of water being:—

Length ... ... 300 feet.
(To be extended.)
Breadth ... ... 100 „
Depth of water ... ... 15 „

The Dock is fitted with a Caisson, has a splendid entrance of 120 feet from the River, with a spacious Jetty on each side, where vessels of any size may lay at any state of the tides, to lift Masts, Boilers, &c., with powerful Lifting Shears, which are now in the course of construction.

The Dock is fitted with Steam Pumps of great power, insuring despatch in all states of the tides.

WORKSHOPS.

The Workshops comprise the different departments of Shipwrights, Mast and Block Makers, Blacksmiths, Engineers, Foundry, &c.

The whole being superintended by Europeans, who have had many years' experience in the different branches.

The workmen are the best picked men from Hong Kong and Whampoa.

The Company draws particular attention to the great advantages this Dock offers, being in a Port where the best Teak and other Timber can be had at the cheapest cost.

A Steam Saw Mill is also in connection with the Dock, to insure despatch in work.

The Keel Blocks are four feet in height, and can be taken out or shifted without cutting or causing any expense to ships having to get them removed.

The Company is also prepared to give estimates or enter into Contracts for the Repairs of Wooden or Iron Ships, the Building of New Ships, Steamboats, &c., or any kind of work connected with shipping.

All Material supplied at Market price. Vessels for Docking may lay at the Company's Buoys or Wharf free of charge, until ordered to remove by the Superintendent.

Captains of vessels before leaving the Dock must approve and sign their Dockage Bills.

All communications respecting the docking to be addressed, until further notice, to the undersigned, by whom all Bills will be signed and collected.

JOHN BUSH, Managing Director.

Bangkok, 18th Sept., 1865.
Hong Kong, 20th Oct., 1865.

FORM OF APPLICATION FOR SHARES.

To the General Agents of the China Traders' Marine Insurance Society of Hong Kong (Limited).

Gentlemen,—I hereby request that the Committee will allot to me shares in the above Company, and I agree to accept such shares, or any less number which may be allotted to me, and to pay the first call of One thousand Dollars per Share, and further calls to such amount and at such times and in such manner as may be authorised by the Articles of Association of the said Company, and to subscribe the Articles of Association when called on to do so.

I am, Gentlemen,
Your obdient Servant.

Hong Kong, Sept. 7, 1865.

PORT OF AMOY.

SHIPOWNERS, AGENTS and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer, and a Blacksmith. Dry Godowns for the reception of vessel's stores, &c., when requiring to discharge them.

Amoy, March, 1865.

By Special Appointment
TO HER MAJESTY QUEEN VICTORIA.
BRANDS ON CASES AND CASKS.
FROM CHILLINGWORTH & SON WINE MERCHANTS TO HER MAJESTY, LONDON.
Seal on Corks.
Brand on side of Corks.
CHILLINGWORTH & SON LONDON.
Brand on end of Corks.

CAUTION.

WHEREAS Persons are shipping Wines to India marked with a Crown in imitation of CHILLINGWORTH and SON'S WINES, which are branded with a Crown, they having the appointment of WINE MERCHANTS to HER MAJESTY QUEEN VICTORIA, it is deemed expedient for the protection of dealers and consumers of their superior Wines selected from their extensive and valuable stock expressly for the Indian market, which have been so well known and approved by connoisseurs for the last thirty years for their extreme quality and purity, combining flavour and softness, together with great age, body, delicacy, and bouquet, being more free from acidity or alcohol that any other Wines, to caution all purchasers to ask for

CHILLINGWORTH & SON'S
CROWN SHERRIES AND OTHER WINE

And to be particular in observing that the Cases and Cask-heads are branded with their names at full length; also, on the side of the Corks, inside the bottles, as well as the Crown; and also on the seals, in accordance with the heading of this notice, as a necessary precaution, to ascertain that they are CHILLINGWORTH and SON'S CROWN WINES, in order to prevent a common low class of Wines being improperly foisted on the public, and which are in no way to be compared with those of CHILLINGWORTH and SON'S.

Wholesale Agents:—Bombay, Messrs. Hormarjee Bomanjee and Co.; Madras, Messrs. Parry and Co.; Calcutta, Messrs. Gordon, Stuart, and Co.; Kurrachee, Messrs. Hormarjee Bomanjee and Co.; Colombo, Messrs. Darley, Butler and Co.; Rangoon, Messrs. Gladstone, Wyllie and Co.; Hong Kong, Messrs. Robert S. Walker and Co.

HUBBUCK'S PATENT WHITE ZINC PAINT.

THE most durable and beautiful paint known, is cheaper than White Lead, and is proved to be superior for all purposes than the pernicious Lead Paint, and equally adapted for all climates.

Its whiteness is unaffected by bilge water, boiling sugar, or noxious gases.

It is free from any poisonous ingredient, and suited in all respects to the use of the painter.

Each Cask of Pure White Zinc is Stamped "HUBBUCK, LONDON PATENT."

Inferior Zinc Paint, so marked, having been sold in Foreign Markets, the Patentees offer a Reward of FIFTY POUNDS for information which will lead to the conviction, in an English or Colonial Court, of those who have pirated their Mark. Both Exporters and Retailers are liable for its sale.

THOMAS HUBBUCK AND SON,

WHITE LEAD, OIL, PAINT, AND VARNISH WORKS,
24, LIME-STREET, LONDON.

HUBBUCK'S ANTI-CORROSIVE PAINTS

Are very durable, and the most valuable protection to Iron Roofs, Bridges, Piers, Ships and Buildings, exposed to stormy weather and scorching sun; they soon become extremely hard, and do not blister.

They are made of Stone, Slate, Copper, White, Blue, Green, or any other Colour that is desired.

HUBBUCK'S ANTI-OXIDATION COMPOSITION,

For Coating Iron and Wood Ships' Bottoms; a preservative against fouling and corrosion. This Composition is ready for immediate use, and obviates the waste of carrying unmixed Paints, Oils, Driers, &c. It is also applicable to all the purposes of other Paints.

HUBBUCK'S PALE BOILED OIL

Has less colour than Raw Linseed Oil, is a quick, hard and certain drier for White and Light Coloured Paints.

PAINTS AND OILS PROPERLY PACKED FOR EXPORTATION.

Bottled Ales and Wines, &c.

"NO BUYERS for the BEST BRANDS, unless RE-PACKED," in consequence of repeated BREAKAGE.—Melbourne Journal of Commerce, Nov. 16. Heating and Breakage entirely prevented and 15 per cent. saved in Freight of Cases by using SYMER'S BOTTLE PACKINGS AND COOLERS. Price 4d. per doz. Bottlers contracting for large quantities effect so great a saving in labour, &c., that they can supply them at one-fourth less in price to Shippers, who will find it most profitable to order their goods to be so packed in future. In use by all the leading London houses.—T. WHITEHEAD, 37, EASTCHEAP, E.C Sole Manufacturer.

HOLLOWAY'S OINTMENT and PILLS.—COLD WEATHER.—The sudden severity of the weather has sadly disturbed the general health. Affections of the throat and chest are found in every household, and the quickest means of cure are Holloway's renowned remedies. They prevent congestion, inflammation, bronchitis, ulceration, hoarseness, and cough. This soothing Ointment only requires to be well rubbed twice a day on the afflicted parts to effect an immediate and marked improvement in all the symptoms of disease. Both Ointment and Pills are devoid of danger. Both medicaments are compounds of the finest balsams, intimately allied by nature and accurately combined by art. They conduct to restoration and cure with unfailing certainty.

JOHN GOSNELL and Co.'s Stereodesmic or Dentists Tooth Brushes and Trichosaron Hair Brushes, warranted to purchasers.
JOHN GOSNELL and Co.'s Instantaneous Hair Dye.
JOHN GOSNELL and Co.'s Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, an imparts a pleasing fragrance to the breath.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s 6d.
JOHN GOSNELL and Co., Perfumers to Her Majesty and by Special Appointment to H.R.H. the Princess of Wales, London.

Keating's Cough Lozenges.

JUDGED BY THE IMMENSE DEMAND this Universal Remedy now stands the first in public favour and confidence: this result has been acquired by the test of fifty years' experience. These Lozenges may be found on sale in every British colony, and throughout India and China. They have been esteemed wherever introduced. For COUGHS, ASTHMA, and all affections of the Throat and Chest, they are the most agreeable and efficacious remedy.
Prepared and sold in boxes and tins of various sizes, by THOMAS KEATING, Chemist, &c., 79, St. Paul's Churchyard, London. Sold retail by all druggists and patent medicine vendors in the world.
N.B.—To prevent spurious imitations, please to observe that the words "KEATING'S COUGH LOZENGES," are engraven on the Government Stamp of each Box without which none are genuine.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Our latest date from this port is 17th December. A correspondent sends us the following interesting narrative of the Inland Sea expedition, written by a gentleman who accompanied the allied squadrons.

On the morning of Wednesday, Nov. 1, this expedition, comprising the following ships, left Yokohama:—English Ships.—Princess Royal (Vice-Admiral King, C.B.), having on board Sir H. Parkes and suite; Pelorus (Capt. Haswell), and Leopard (Capt. Leckie), with the U.S. Chargé d'Affaires, Mr. Portman; Argus (Commander Round), with gunboat Bouncer (Lieut.-Commandeng Lewis) in tow. French Ships.—Guerrière (Commodore Olivier), with French Minister, Monsieur Roche, and suite on board, and towing French paddle gunboat Kien Chan, sloop Dupleix (Commandant Conrad). Dutch Corvette, Zoutman (Capt. Van der Meersch), with H.N.M.'s Consul General, Monsieur van Polsbrook and secretary on board. We proceeded under steam (and when practicable sail as well) for the Kii Channel into the inland sea. The passage, so far as weather was concerned, left nothing to be desired; but owing to the strong current which, running out of the Bounga and Kii Channels, meets the black stream, and sweeps up the coast in the direction of N.E., the squadron only reached the entrance of the Isumi Strait on the morning of the 4th, and entered it at about 8 A.M. without the slightest hindrance—indeed, no very formidable force as yet exists here to offer any; two batteries (only one on either hand) being seen, that on the Island of Tomengai, a mere platform, uncovered in any way, and mounting only seven guns, with apparently room for three more; whilst on the "port" hand was a long low sand battery, faced with granite, well built, and mounting thirteen guns, with embrasures for four more. The squadron was, however, in readiness for immediate action in the vent of their meeting with any opposition.

Proceeding up the "Isumi Nada" (Gulf of Osaca), in the direction of Osaca, the squadron (at the instigation of the French by signal) formed into one line, English leading, Dutch next, and French bringing up the rear, and steamed slowly round the gulf in open order, passing within three or four miles of the Osaca coast, and obtaining a very fair view of the river's mouth, where, under some very formidable looking batteries, lay two steamers at anchor, one a screw, the other a paddle, and both apparently of American build.

At one P.M. the ships anchored off Hiogo, in the order decided on before leaving Yokohama, and arrangements were, without much difficulty, made for the landing of officers, during the daytime. The people for the most part were (apart from a very pardonable curiosity) universally civil and friendly. Four or five steamers were lying off Hiogo, very close in shore; none of them, however, were at all formidable in appearance, and the only further means of defence at present existing there are two inefficient square mud redoubts (mounting each two heavy guns *en barbette*), which might be easily disposed of by ships' boats alone. There are, however, two apparently well-built martello towers, each capable of mounting eight guns in casemates, and two *en barbette*; none are however in them at present, and from the position of their port holes, no more than two could command any position at the same time in addition to those *en barbette*, excepting perhaps at long distances. It is evidently, however, intended to construct further defences here, as a profusion of stone cut for building, lays in readiness on Hiogo Point. Beef at 17 cents per lb., and vegetables, were obtained for the squadron, through the Custom-house without much difficulty and in fact, the authorities generally appeared willing to oblige.

On Sunday (5th) the French gunboat Kien Chan went over to Osaca with the secretaries and interpreters of the various legations, whose object was to communicate with the Gorogio, and arrange preliminaries for future interviews between them and the representatives of the four Powers. On the Kien Chan entering the river leading to Osaca, she grounded on the bar, and was immediately and very civilly offered assistance from the two steamers (one of them Satsuma's) lying inside; this was, however, as civilly declined, and the little craft succeeded in getting clear without it, and landing her passengers, who were taken charge of by a guard of Yaconins, as in Yedo. They were permitted to walk as far as the entrance of the city, but were not allowed to enter it, and returned to their interview with the Tycoon's Ministers in a building near where they had landed. The Tycoon was said to be absent on a visit to the Mikado, in Miaco; but the interview was on the whole satisfactory, and albeit no definite arrangements were made as to the appointment of some suitable place inside the city for future interviews, as desired by the deputation, it was agreed that a proper Governor should be at once appointed to Hiogo and charged with the safety of foreigners landing; which was at least a good step in the right direction. The river appeared to be very strongly defended both at its mouth and on its banks, by forts well and strongly built, and mounting very heavy guns; whilst the difficulty of approaching them in large ships within a distance of two miles would make them all the more formidable in the event of our being ever forced into more warlike measures than those at present in contemplation.

During the next week several messages passed between the Ministers and

Digitized by Google

the Gorogio (the Kien Chan and Bouncer being kept in a constant state of activity) and these resulted in communications with the Tycoon on the part of his Council, and the subsequent visit of one of them (Abé Bungo-no-Kami) to the Ministers, on board the Princess Royal. This took place on Saturday (11th), when he came over from Osaca by steamer, and was met by the four Ministers; the principal propositions made being, it is generally believed, that the existing treaties should be at once ratified by the Mikado, and the port of Hiogo opened to trade at the sacrifice by us of that portion of the Simonoseki indemnity yet remaining unpaid. No definite arrangement on any subject was, however, arrived at; the only answer being that Abé Bungo-no-Kami would further consult his brother counsellors, and communicate with his master the Tycoon again on the propositions made to him. On leaving the English flag-ship he was saluted with seventeen guns by her and the Guerrière, and immediately returned to Osaca.

On Sunday, 12th, at 4.30 P.M., H.M.S. Perseus (Commander Stevens) arrived from Yokohama with the English mail, having waited there until the afternoon of the 10th for the French one—thus making an excellent passage of forty-eight hours, the better that she towed the gunboat Bustard (Lieut.-Commander Adams) as far as well into the Kii Channel. The Bustard joined the squadron the same evening. Subsequent to this date several messages passed and interviews took place between the ministers and members of the Gorogio (the interviews being invariably held on board the English flag-ship). The members of the Gorogio who usually came over from Osaca were the one already named, and Tatsi Bana Idsumi-no-Kami. At length, on Friday, 24th November, the existing treaties were declared ratified by the Mikado, and certain modifications in the customs tariff (the nature of which is not yet known), agreed upon; the opening of the port of Hiogo to trade being, it is generally believed, still postponed till 1868. On the whole, the expedition may be said to have been decidedly successful, and reflective of great credit on the active perseverance of Sir H. Parkes and his colleagues. On the 25th the Dupleix and Zutman sailed for Yokohama at 2 P.M., and the Perseus left the same night (at 11) for Shanghai, with Sir H. Parkes on board. At daylight on the 26th the Princess Royal and Pelorus left for Yokohama, at which port the former anchored at 6 P.M. on the following day, having been favoured with strong north-west winds during the trip. The Pelorus having been ordered back to assist, if necessary, the Bustard was thus thrown several hours behind, and did not consequently, reach the Narrows until too late to render her proceeding into port that night advisable; she arrived, however, the following morning. The Leopard and Bouncer were left off Hiogo, with orders to sail, when the weather moderated, for Nagasaki. The Bustard put back, but may be daily expected in Yokohama. I forgot to mention that the Guerrière sailed on 15th for Saigon, and the Argus on the 19th, with the mails for Shanghai, from whence she is expected to return shortly, bringing stores and provisions for the squadron in Japan.

Hiogo appears to be in every way admirably adapted to European requisitions as a settlement; the anchorage is good, with deep water very close in shore, and is well protected from north winds, whilst it can be but indifferently assailed by those from any other quarter. Vegetables and poultry procured by the squadron were decidedly superior to those usually purchasable in Yokohama, and about the same price; this, however, varied according to the will of the sellers, buyers being only too willing to get what they could at anything like a reasonable sum; on one occasion, indeed, the noble "sirloin," being unprocurable in itself, one officers' mess invested in an entire bullock, which was immediately run after by everyone in the squadron, various expedients being resorted to for the extortion of certain portions of the animal. The cotton growing about Hiogo appeared superior to that in the vicinity of Yokohama.

CHINA.

TIEN-TSIN.

The following is from the Circular of Messrs. Platt and Co., dated 28th Nov.:—

"Grey Shirtings: Sales of 8 2-4 lb. 'common chop.' at taels 3·65 to taels 3·70. Just previous to the closing of the navigation, best 84 lb. 'eagle chop' were quoted and in demand at taels 4·10 per ps., owing to the news just to hand, under date of September 16, from England. Taels, 4·10, at 6s. 2½d. per tael exchange, equal to 26s. 8d. per ps."

HANKOW.

From this port we have dates to 18th December. The principal item of news is of a *fracas* in which a French commercial man (Dupuis) and a doctor of a French gun-boat (Tardiff) were rather roughly handled by some Chinese soldiers in the suburbs. The facts are as follow. The commercial man, on being abused by the soldiers for an offence committed by the dog, retaliated by accusing the officer in charge of a post with the crime of having been a rebel. This seems to have aroused the ire of the soldiers, and when the doctor and Mr. Dupuis took their next walk abroad (the same day) they were followed, pelted with stones and beaten. Dupuis managed to escape—the medico was captured, and when recaptured was in a fainting condition. For this atrocity the French authorities demanded satisfaction, and have had it; *i.e.*, if the ordered decapitation of two, and the hearty bambooing of three will satisfy. It is said that a pecuniary compensation has also been demanded from the provincial treasury.

A newspaper to be called the *Hankow Times* was announced, to be commenced with the beginning of present year.

SHANGHAI.

The London mails of 26th October were received on the 20th December per *Aden*. The French steamer left with the present homeward mail on the 25th December. The *North China Daily News* has the following items:—

Native reports from Fukien announce the death of Kwo Sungling in an engagement between the Imperial troops and a body of insurgents. No particulars have reached us. Kwo Sungling will be remembered by many as the commander of the *Sung tze* camp, and as one of the officers who reviewed the volunteers in Messrs. Lindsey and Co.'s compound on the occasion of the tiffin given to the Chinese officials by Mr. Antrobus.

Progress is being made in lighting the settlement with gas. Kiang-soo-road was the first in Shanghai to exhibit to wondering natives the glory of a street lamp lit with gas from the settlement's new works. Nanking-road has just followed suit, ten jets being produced between the model pier on the Bund and the Maloo Gate. The company announce a reduction in their rate to Mex· $4.50 per 1,000 cubic feet.

Visions of intruding Nienfei have again disturbed the repose of the provincial authorities in Kiangsu. A strong force of insurgents is reported to have passed the Shantung boundary, and reached the district of Tang-shang, in the department of Chu-chow. The Yellow River and the Yang-tsze still flow between Shanghai and the marauding bands now devastating the northern portion of the province, so that there is no apprehension for personal safety. Three camps at present at Soochow have received orders from the Acting-Governor Liu to advance to the disturbed districts, and as it is thought that even these will prove insufficient, a muster of local militia will take place.

Ying Taotai has issued a notification setting forth that certain houses are now set apart for the shelter of the beggars who lie about the streets of the city at night. In these asylums they will be provided with straw and a small ration of rice. Those who do not avail of this provision will be regarded as persons of bad character, and will be arrested and severely dealt with.

A tempest in a tea cup has just been quelled in the little city of Chin shan on the Putung side. Chin shan is a city of the third order, and is distant about sixty-five miles from Shanghai, under the rule of the prefect of Sungkong. Some days ago rumours reached the authorities to the effect that a regularly organised insurrection had broken out, and that at least three thousand men had obtained arms of one description or another, which they were ready at a moment's notice to turn against the local officials. So far as the latter were concerned, perhaps the most alarming symptom of the movement was the scrupulous good conduct of the rebels. Life and property were respected, and although the daily pursuits of the inhabitants of the city and suburbs were of course suspended, no violence of any kind was manifested. The leader of the discontented faction was a literary graduate, whose name has not been allowed to transpire. Any connection with the Taipings, the Nienfei or the members of secret societies was disclaimed, and the object stated to be in view was the restoration of the people to a state of something like independence. This involved the overthrow of the existing official class, and accordingly the official class it was which was denounced. A relative of the Shanghai Hien, Wang by name, holds a military command in Chin shan or the neighbourhood, and it is said that he has made himself deservedly most unpopular. A band of the insurgents penetrated into his official residence, but being unable to find him, caught his son, a mere youth, and killed him. Couriers were despatched to Sungkong and Shanghai, and troops were sent down with the utmost speed. In the meantime the leader of the movement, hearing of the approach of a formidable force, fled, and his followers immediately dispersed. Eight of the head men were seized and executed, and the remainder shared in the misery entailed by the presence of Imperial troops. The insurrection has thus been nipped in the bud, and a few days will efface every vestige of the intended rebellion. But there are two features in this contemptible disturbance which merit notice. The first is the sanction given by the literary class, and the inauguration of the entire affair by a graduate. The second is the respect shown by the insurgents for the life and property of the people. We need hardly inform any of our readers that the literary men form the dominant class in China, and that without their concurrence no insurrection can attain alarming dimensions. Still less is it necessary for us to remind those who have lived for the last few years in Shanghai that to the cruelty and rapacity of the Taiping rebels was due the intense hatred and horror wherewith the rebellion was regarded by peaceful villagers. The streets of the settlement crowded with the dead and the dying, whose miserable plight was caused

Digitized by Google

by the merciless ravages of the Taiping soldiery, proved conclusively that without some radical change in the usual conduct of insurrection a movement directed to such an end as the overthrow of the Government could never hope for success. The Chin shan insurgents have now set the example of initiating a purely political disturbance, without in any way infringing the personal rights of the populace. It is by acting in this manner only that success can be attained. We have little doubt that the example thus set will be followed in many other places, and for this reason we are disposed to regard the little *emeute* at Chin shan as more significant and more worthy of notice than such disturbances usually are.

H.M.S. *Swallow* had arrived at Shanghai, after a six months' surveying cruise off Shantung, where she has been engaged in a comprehensive survey of the line between Kienchan Bay and Stanton Island. The exertions of Mr. Wilds, the commander of the surveying expedition, will, we trust, meet with the recognition which they deserve at the hands both of the Admiralty and of the Mercantile Marine. The *Swallow* has now been for more than four years in commission, and it is probable that she will be ordered home during the ensuing twelve months. During this period both she and her tender, the *Dove*, have surveyed the entrance to the Yang-tze and a portion of Wusung River. Charts of the harbour of Amoy, Swatow, and Kienchan have been constructed, and the south coast of the Corea has also been carefully surveyed. In the early part of this year Mr. Wilds and the officers of the *Swallow* and *Dove* surveyed the Formosa banks, together with the entire south-west coast, and a considerable portion of the west coast of the island. Much has been added to the knowledge already in our possession with regard to that coast, and as soon as the results of the survey are published, vessels of all sizes will be enabled to approach the various harbours in safety. It is satisfactory to learn that wherever parties were landed they were most hospitably received by the natives, and were well supplied with provisions at most reasonable rates. During the course of the survey several very heavy gales were experienced, in one of which the boats were overtaken, and found considerable difficulty in reaching the ship, the crews having to be slung and hoisted on board. The violence of the storm may be judged from the fact that the pinnace and second gig were swamped and sunk. They were, however, recovered with some difficulty after the wind abated. The value of these arduous labours cannot be lightly estimated, and those whose interests lie in the China seas will look anxiously for the publication of the results at which Mr. Wilds has arrived.

Piracy in the neighbourhood of Ningpo appears to be steadily increasing, in spite of the presence of a gunboat in the Yung river, and the frequent cruises undertaken by the *Confucius* and *Pluto*. The former vessel has just returned from Chusan, after a brush with pirates, in which Captain McCaslin, although unable to carry out his original intention, contrived to do a considerable amount of damage to these dangerous pests. Having left Shanghai on the 4th Dec., he cruised for a day round the Saddles, without, however, seeing any suspicious craft. On the 6th he arrived at Kou ding, an island on the edge of the Chusan archipelago, where he anchored. Here he found a junk and house, which he was informed were resorted to by pirates whenever they visited the island. There was no trace of any very recent occupation, but both were burned, as a matter of precaution. The *Confucius* then left Kou ding, and on the 7th, when off Chen-Kong, an island to the west of Chusan, saw a large junk crowded with men and well armed. A blank shot was fired to bring the junk to, but the request thus conveyed was answered by a ball from one of the enemy's cannon. The *Confucius* immediately gave chase, but soon found the water failing so rapidly that she was obliged to anchor, while the junk was able to run two miles nearer shore. Here she, too, was obliged to stop, and at this range the *Confucius* commenced a vigorous cannonade of shot and shell. The only visible effects were that the junk's rudder and a portion of her stern were shot away, but it was afterwards found that the fire had been more destructive by far than was at first imagined. Ammunition beginning to fail, the boats were lowered, but as soon as the men on board the junk saw the movement they escaped to the land, from which they were but a short distance. By the time the boats of the *Confucius* reached the junk, the latter was perfectly deserted, but the crew had taken up a strong position between two hills near the beach. It was at first intended to drive them from this post, but the men of the *Confucius* were so short of ammunition, and night was so rapidly approaching, that the design was eventually abandoned. Three straggiers were taken prisoners, and from them it was ascertained that the majority of the pirates were Cantonese. On the way back to the steamer an attempt was made to carry off the junk, but she was found so much injured as to be in a sinking state. Her foremast was therefore towed out and taken as a trophy. As soon as this was done she sank with all her guns, but in such shallow water that the pirates will no doubt recover the greater portion of her armament. On the way back to Ningpo, and thence to Shanghai, the *Confucius* saw nothing of a suspicious character.

The *Shanghai News* says the steamer *Promise* has been sold to the Japanese; the *Lancefield* was to proceed immediately to Hong Kong to be fitted with new boilers; and the *Martin White*, *Hercules*, and *Wusung* have been chartered by the Chinese to collect the salt tax and repress piracy on the coast. The latter step is said to have been suggested by a recent engagement near Chinhai between a body of soldiers, taken down by the *Pluto*, and a strong band of pirates, in which the latter were victorious.

The *Friend of China* states that Judge Hornby, having recently visited the Consular gaol, made a point of asking if they had Divine service within the walls on Sundays. The answer running that they had prayers occasionally only, the following Sunday his Honour went and read the Church service to the prisoners himself. The circumstance speaks volumes for Sir Edmund's moral worth.

A Fancy Bazaar has been held at the Club, in aid of a fund the object of which is to add a free ward to the Shanghai General Hospital. The number of unemployed and destitute foreigners at present in Shanghai rendered this step most desirable, and it certainly received the hearty support of the community, for a sum of nearly eight thousand taels was realised by the sale.

The Municipal Council held their monthly meeting on the 13th December, when the usual routine business was transacted, and an interesting correspondence between H.B.M. Consul and the Taoutai relative to the abolition of the punishment of the chain gang for Chinese prisoners was laid on the table. It is satisfactory to know that this punishment, which has proved most effectual in diminishing crime in the settlement, will still be continued under certain restrictions to be agreed upon by the Chinese and foreign magistrates of the Mixed Court.

The *Yuen-tse-fei*, from Taku, 16th December, reports hard frosts there, with fine weather. The *Corea* was loading cotton for Shanghai inside the bar.

FOOCHOW.

The following report is from Messrs. Fussell and Co.'s Circular, dated December 21:—

Since the date of our last Circular we have received dates from London to 10th, 17th, and 26th October, by the English and French mail steamers respectively.

IMPORTS.—The following sales have been made: 500 pieces 7lb. Grey Shirting, at $4.30 per piece; 250 pieces 56 reed White Shirting, at $4 per piece; 146 pieces assorted Spanish Stripes, at $0.85 per yard; 1,670 piculs Lead against Tea, at $6.50 to $7 per picul. Opium: Sales have been, 7 chests Malwa, 32 chests Patna, and 48 chests Benares. We quote—Malwa, $1,060; Patna, $735; Benares, $715.

EXPORTS.—Tea: Our last report was dated the 9th inst., and on the 11th inst. the English and French mails, with dates to 10th and 17th October, were delivered. Immediately on receipt of the exciting intelligence regarding the London market considerable anxiety to purchase Congou was manifested, and in two days the whole stock of desirable kinds was bought up, the latest settlements shewing an advance of 1 to 2 taels per picul; since then, owing to the poor assortment on offer, business has been much restricted, but the few chops placed on the market have found eager buyers at full rates. The arrivals from the country have been about 8,000 chests, and the quantity still to come to hand is variously estimated at 5,000 to 10,000 chests. Souchongs: The few chops on offer have found ready sale. Oolongs: During the past day or two American buyers have again made large purchases. Scented Teas have been in moderate request.

HONG KONG.

The dates by this mail (French) are down to the 29th Dec., or three days later than the usual date, owing to the non-arrival of the corresponding steamer from the north. Since the company have placed the Japan work on the Shanghai steamer she has been late, but the lost time has been regained *en route*. The present mail is only 37 days from Hong Kong and 41 from Shanghai. The mail of Nov. 10 arrived out on Dec. 23.

The following items are from the *Evening Mail*:—

As Christmas is approaching, we would draw attention to the large numbers of destitute seamen still moving about the town, who are obliged to apply to foreigners for aid. Many call at foreign houses in the evening; others in broad daylight. It

Digitized by Google

may be that many have squandered their money in a foolish manner, regardless of what next day may bring them; and a strong probability may likewise exist that foolish thoughtlessness was the sole cause of their leaving their vessels at all, and throwing themselves out of employment. Such folly ought probably to be still more strongly looked upon now since the establishment of the Sailors' Home, with its many advantages calculated to husband the resources of the profusely-inclined seaman. Still we cannot help giving expression to our conviction that this most useful institution will fall very much short of its intended usefulness without a minister who may preach to the sailors on Sundays, visit them in and out of employment, advise them under all circumstances, and take a general interest in their welfare.

We had the pleasure of witnessing the distribution of prizes to those volunteers who had won them at the recent competition. Punctual to the time appointed (4.30 P.M.), the band, accompanied by about twenty rank and file, and nearly an equal number of officers, commissioned and non-commissioned, marched into the gardens, the musicians playing a lively air. Upon their falling into line upon the steps leading to t terrace, the Hon. Mrs. Mercer, with the Acting Governor, approached, the band playing the National Anthem, and the corps presenting arms. Mrs. Mercer then took her station at a table, upon which were placed the elegant trophies which were to be awarded to the successful competitors. Captain H. J. H. Tripp (the Adjutant) was the first called to receive a prize, which was gracefully presented to him with a neat and appropriate speech from the lady distributing them. After the band played "See the Conquering Hero Comes," the rest of the prizes were distributed to the various winners, each presentation being accompanied by words of congratulation from the lady president. His Excellency the Acting Governor in a short but energetic speech, in which he complimented the winners upon their proficiency in shooting, and dilated upon the usefulness of the system of volunteer corps, closed the proceedings.

H.M. troop ship *Orontes* arrived out on the 27th Dec. with troops from England, Mauritus, &c. The *Mail* on this says:—Amongst the officers brought here by H.M.S. *Orontes* is Dr. Newton, Royal Navy, appointed by the Admiralty to the Hospital ship *Acorn* at Shanghai. We are glad that the navy is so often fortunate in selecting popular officers to fill vacancies on foreign stations. Dr. Newton is well known to the old residents in China as Assistant Surgeon of the *Bittern* during her eventful commission, and he was presented by the Ningpo and Shanghai guild of bankers and junk owners with valuable tokens of their esteem and regard on his departure from the north for Canton in November, 1855. He will doubtless again make himself a favourite with both the native and foreign community.

A match between the Garrison and the Hong Kong Cricket Club resulted as follows:—The Garrison team of nine officers and two privates first took the wickets at 11.10 A.M., and retired at 1.20 P.M for ten wickets and 124 runs; of which number 24 was obtained off one bat. The Club sent in two men to the wickets at 1.30, and on tiffin being called at 2 P.M. the score stood one wicket for 14 runs. Play was resumed after refreshment, and at 4.40 P.M. a splendid catch by point finished the innings for a score of 127, but three ahead of the Garrison. The Garrison second innings began without loss of time, and at gun fire the bails were housed, or rather tented, 17 runs having been obtained for one wicket. The next morning, play was resumed shortly after 10 A.M., the Club being in the field. The Garrison scored 206 runs for ten wickets. The Club now knew exactly what they had got to make and obtain the game, but at twenty minutes to five lost the ten wickets for 92 runs. Consequently the military won by 111 runs.

Messrs. Gibb, Livingston and Co. announce that depots for Labuan coal have been established at Swatow and Amoy.

The steamers *Ta pang nyo*, *Undine*, *Azoff*, and *Yesso*, have arrived from the coasting ports, but they bring no items of news. The *Aden* had also arrived from Shanghai with the usual P. and O. mail of Dec. 25, which will come forward by the mail due on the 13th.

It seems that the soldiers in the garrison are still dying, three being reported by this mail, belonging to the 9th and 11th Regiment. The following article is from the *Daily Press*:—

The heavy losses of the 11th have attracted attention at home, and to judge from an article in the *Army and Navy Gazette* the reputation of our climate is liable to suffer seriously for the neglect of proper precautions on behalf of that unfortunate regiment. "It has been stated," we read, "that this year Hong Kong is unusually unhealthy, but there can be no doubt as to the main cause of all this disaster. The climate during the hot season is too severe for European troops; assisted by an Indian regiment they may get through tolerably well, but unaided they cannot and never will." Unaided by ordinarily good accommodation or left to perform in this latitude a routine of duty designed for a European climate, it is not to be expected that they will remain in health, but before the authorities at home find the sun of Hong Kong guilty of compassing the destruction of the troops, it may be well to consider how far the dreadful mortality of the 11th may have been owing to needless exposure and avoidable hardship. The health of prisoners in the gaol last summer was remarkably good all the while the soldiers were dying as if they had been stricken by a pestilence. It is odd if we cannot make our barracks as healthy as our prisons, and take as much care of the troops as of the convicts. The *Army and Navy Gazette*, not fully realising the extent to which the bad health of the 11th was due to avoidable causes, urges the employment of Indian regiments in China, and sharply attacks the shortsighted economy which led the Home Government to upset an arrangement considered desirable on its own merits for the sake of saving the difference between Indian and English allowances, due to British troops serving with Indian forces. Most assuredly such petty savings, accomplished at a sacrifice of policy and justice to individuals, lead in almost all cases to some disastrous result. It is not with the view of maintaining that Indian troops should be kept away from China that we would insist on the possibility of keeping British troops here in health. The allowance question should be dealt with on other grounds. If the conditions of service here give English soldiers a fair claim to extra pay, it can scarcely be creditable to the Government to seize on an excuse for evading the fulfilment of their honourable obligations, whether at any given moment Indian troops may or may not be in China.

The following return of a land sale has been published at Hong Kong:—

W. WILSON, Acting Surveyor General.

Regarding the Mint, the *Gazette* supplies the information given below:—

GOVERNMENT NOTIFICATION.

It is expected that the Hong Kong Royal Mint will be opened for work on or about the 31st March, 1866.

It is, therefore, hereby notified that at a meeting of the Executive Council held on the 11th inst. in accordance with the provisions of Section 2 of Ordinance 2 of 1864, the following regulations as to the receipt of bullion, &c., were agreed to:—

1. For the first two calendar months after the opening of the Mint, dollars of all kinds will be received for coinage into British dollars, free of Seignorage.

2. For the two months next following they will be received and returned in British dollars at a Seignorage charge of 1 per cent.

3. At the close of this latter period the fixed Seignorage charge of 2 per cent. will be made.

4. In the case of dollars requiring melting previous to assay there will be an additional charge of ½ per cent.

5. Where the dollars brought for recoinage prove on remelting to be below the Hong Kong standard, a charge of ½ per cent. will be made and the metal returned.

6. These two last charges will be made from the time of the Mint opening.

7. Sycee, bar silver, and bullion will be liable from the first to the full charges.

8. No quantity under 5,000 oz. will be received.

9. Delivery must be made at the Mint, Causeway Bay, East-point, and priority of application will be the rule followed.

For forms of application and further particulars apply to T. W. Kinder, Esq., Master of the Mint.—By order,

W. H. ALEXANDER, Acting Colonial Secretary.

Colonial Secretary's Office,
Hong Kong, 20th December, 1865.

The plant, stock in trade, and goodwill of the *China Mail*, weekly newspaper, together with its daily and overland editions, are offered for sale by the executors of Mr. Kemp, the late proprietor.

Digitized by Google

The prospectus of the "Hong Kong Hotel Company, Limited," is advertised, with a capital of $300,000, to purchase the "Oriental," and carry it on as a first-class family hotel. Arrangements are also said to have been made for the purchase of the "Keying" and "Marine" houses. The *China Mail* complains that although the public are asked to invest a large sum of money in this undertaking, no information of a *bona fide* character is vouchsafed them. The names of the provisional directors and promoters are not even published; the proceedings of their meetings are kept secret; nothing is said as to the terms upon which the various properties named have been, or are to be acquired, nor of the outlay necessary to make them available, which will certainly be very heavy. Apart from these objections, the scheme appears a feasible and promising one; and, with a greater measure of candour and publicity, will probably gain the confidence of the public. One feature included in it—the establishment of an Exchange room, on the principle of the "Jerusalem" in London, will, if well carried out, certainly be a great boon.

We are informed that Govenor Mercer is about to resign the Grand Mastership of British Freemasonry in China, which position he has now held for the last thirteen years. Increased pressure of public duty is the assigned reason. Henry Murray, Esq., is said to be the probable successor.

The Peruvian ship *Onstina* reports having experienced good weather during the passage. Chili blockaded by the Spaniards. One of the Pacific mail boats was on her way to Valparaiso before the news reached Callao; when she arrived at Valparaiso was refused an entrance; returned to Callao, and then the British war vessel *Leander* went off with the company's steamer to Valparaiso to enforce an entrance, and the U. . steamer *Wateree* also went there. No news of their operations reached Callao before leaving.

The British ship *Queen of the Age* reports that on the 12th December came through Gillolo Passage in company with the *James Shepherd*, of London, from London to Shanghai. Had experienced very strong squally weather after passing Pellew Islands with high confused seas, and thick, rainy, foggy weather in passing through Ballentang Passage.

JAVA.

BATAVIA.

H.N.M.'s steamers *Amsterdam*, *Djambi*, and *Ardjoeno* returned to Batavia on the 1st November, having on board of them the the troops which had been sent to the north-east coast of Sumatra last August, for the purpose of reducing to the rule of Siak the small kingdoms on that coast which had refused to acknowledge its authority.

After subduing the Kingdom of Assahan, the greater portion of the land and sea forces proceeded to Serdang in order to bring the King of that country to reason. When the troops arrived there they found that the subjugation of Assahan had already produced a favourable impression. On the 28th September, previous to the arrival of the troops, the Sultan of Serdang had addressed a letter to the Comptroller in which he entreated for pardon for his error against the Government; and on the 3rd of October he came on board one of the steamers, accompanied by his brother Toengkoe Pangerang, and his nephew, Raja Moesa, and requested an audience of the Resident.

After the Resident had represented to the Sultan the perverseness of his conduct and the injurious consequences which had nearly resulted therefrom, he granted him pardon in the name of the Government, and renewed the former treaty with him.

COCHIN CHINA.

SAIGON.

The monument erected in honour of Lieutenant Lamaille *Charge des Affaires Civiles*, at Saigon in 1862, who died on his way to France, is nearly finished. It is an elegant pyramid of granite, placed on the Quay opposite Catinat-street. It is in view of the shipping and the greater part of the city. The position is befitting the memory of an officer who was so universally loved and regretted.

On the 27th December, the *Tigre* anchored, having on board the Governor and his family. Admiral Roze at once called on him. On the next day at seven o'clock Admiral De la Grandière landed, and his flag was hoisted on board the *Duperre* under a salute of 17 guns. At eight o'clock the heads of departments were received by the two admirals. For some days following numerous visitors repaired on board the *Guerriere* to pay their *adieux* to Admiral Roze.

From Bein-hoa we learn that tigers have much disturbed the village of Long Thanh. On the night of the 1st November two tigers entered the fort by different directions, whence they carried off a dog. At Vinh-Loi one of these animals has been killed under very curious circumstances. This tiger had been the terror of the village for three months, and on the 26th of August, at nightfall, he carried off an old woman. On the next day an Anamite marriage was being celebrated. At eight o'clock in the evening, the bridegroom, escorted by his parents and friends, set out on a visit to the house of his future wife, carrying with them the usual complimentary gifts; among them figured a whole pig roasted and varnished, and decorated with flowers and paintings. This animal, reserved for the guests, was carried off by the tiger just at the hour of the feast. The bridegroom, who was forced to offer up another victim to the appetites of the guests, resolved to go out and revenge himself. He prepared a trap for the ferocious beast, which the latter avoided for some time, but at length was caught.

MALACCA STRAITS.

SINGAPORE.

Dates are down to the 6th January. The French mail of Nov. 17 arrived out on the 24th Dec., and the P. and O. mail of Nov. 26 had not arrived out.

The steamer *Japan*, from Glasgow, arrived out on the 23rd December. The *Singapore Free Press* of 28th December and 4th January contain no items of importance beyond the New Year's festivities.

Beyond the following telegram we have received no details of the mutiny on board the *Pride of the Ganges*, from Hong Kong to the West Indies with coolies.

The J. D. Visser (Dutch barque), arrived at Singapore 22nd Dec. from Hong Kong, reports that in lat. 17 N. she passed the *Pride of the Ganges*, standing in towards the China coast, with signal flying, "Mutiny on board." The J. D. Visser signalled "Heave to and I will come to your assistance," the reply to which was not allowed. The Dutch vessel followed, and the *Pride of the Ganges* outsailed her, and when last seen the signal "Master overboard" was flying.

PENANG.

We take the following items from the *Penang Gazette*:—The examination of the young ladies of St. Maur's Institution took place on the 16th Dec. The room, as usual, was decorated in a very pleasing style, reflecting much credit on the taste of those under whose direction it was done. The examination of the scholars consisted of various displays in music and singing, together with dialogues on various subjects. Ecclesiastical history, general history and geography, reading &c., formed the programme. The great amount of real good done by the disinterested efforts of the sisters belonging to the Convent invests these yearly examinations with considerable interest to all of us, and we wish the St. Maur's Institution every success in their good efforts.

The examination of candidates for the "Gottlieb Scholarship," attached to the P. W. I. Free School, was held on the 21st December last, under the superintendence of Messrs Bain, Gottlieb, Scott, and the Rev. Mr. Mackay. The successful competitor last year—a Chinese boy named Oh Cheng Chan—headed the poll, and fairly outstripped his rivals, gaining 252 more marks than his successor this year, who is also a Chinese lad, named Ong Eng Tin. Oh Cheng Chan was allowed to compete merely for distinction, as the prize is not awarded to the same boy twice.

During the last two weeks there have been two vessels sold; one, the Hamburg brig *Greta*, carrying 4,800 piculs, sold for $4,400, her name being now changed to that of the *Spitfire*, was bought by natives of this place, and destined for the Pinang trade; the other, the British schooner *Delphin*, carrying 2,700 piculs, was sold for $4,100 to a native of Padang and is destined for the trade on the West Coast of Sumatra.

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Private
At Yokohama	6 months sight.		
At Shanghai (per Tael.)	6 ditto	6s. 3d.	6s. 3d. to 6s. 4d.
At Canton, At Hong Kong, At Macao	6 ditto	4s. 7¾d.	4s. 7¾d. to 4s. 8¼d.
At Singapore	6 ditto	4s. 7d.	4s. 7¼d. to 4s. [illegible]
At Manila	6 ditto

ARRIVALS.

At SHANGHAI: From London: Dec. 15, Anglo Saxon; 21, Jubilee. From Hamburg: Malvina Vidal.

At HONG KONG.—From London: Dec. 27, Ladye Love; 28, Crest of the Wave. From England: Dec. 27, H.M.S. Orontes. From Sunderland: 28, Queen of the Age. From Cardiff: 27, Louisa Kohn From Shields: 25, Ornate.

At HONG KONG.—From Liverpool: 14, Ariel (in 100 days), and would leave for Rangoon on the 30th.

DEPARTURES.

From SHANGHAI.—For London: Dec. 14, Henry Finlayson; 21, Patrician; Earl Dalhousie. For New York: 13, Capriolani; 15, Roderick Dhu; J. N. Cushing Grasmere.

From FOOCHOW.—For London: Lammermuir; Bacchante. For New York: Archer, Glenclune.

COMMERCIAL POSTSCRIPT

The Hindustan, China and Japan Bank has complied with the standing orders in respect to its Bill for the reduction of the nominal amount of shares to be brought forward this session. The Bill passed the Examiners on the 30th ult.

The following is from the Circular of Messrs. W. C. Sillar and Co.:—

SILVER.—The demand for India still continues, though on a more limited scale. The rumours of the unsatisfactory state of the Mint in Bombay, and a fall in the exchanges, have somewhat affected the market, and caused a decline in the rates. Our present quotations are 5s. 1½d. per oz. standard, and 5s. 1 11-16d. at Marseilles; a considerable amount was despatched to Calcutta from that port by the steamer of the 28th ult., a large portion of which was in five-franc pieces. The steamer of the 4th inst. from Southampton will also take a fair amount. The fine bars by the *Shannon* were sold yesterday for India at 5s. 1½d., showing no alteration as compared with the previous packet, though in the interval prices have ranged considerably higher. Last mail brings reports from Bombay of the mint being unable to coin sufficiently fast for the wants of the community, so that silver, itself the standard of currency, is comparatively inconvenient and uncertain as a remittance. We believe that this evil would be counteracted if the Government of India would permit bars of silver, stamped by the mint, to be a legal tender in payments of magnitude, or sanction the issue of notes against silver bullion.

EXCHANGE on India has shown some fluctuation, and the last two days the banks have been willing to draw on slightly easier terms than the rates lately ruling. We annex the quotations for Bank bills now current. The amount of Council bills to be tendered for on the 7th inst. is 35 lacs.

Mr. Page's Annual Bullion Circular states:—

Gentlemen,—The total shipments during 1865 fell short of those made during 1864, by rather more than 10¼ million sterling, viz:—To Alexandria, decrease in 1865, say 2¼ millions; to Bombay, 4¼ millions; to Madras, ¼ million; to Calcutta, 2 millions; to China, and Straits of Malacca, 1½ million; Net decrease during year 1865, compared with year 1864, 10¼ million. The progressive increase in the shipments from Marseilles, compared with the export from Southampton, is worthy of notice. In 1860 the Marseilles shipments amounted to about one-third of the amount sent from Southampton, while during last year the export from Marseilles was considerably more than double that from Southampton. This change is partly owing to the saving of time effected *via* Marseilles, admitting of operations by that route after the departure of the Southampton steamer, and also in some degree to the lower charges *via* Marseilles, especially on shipments to Calcutta and China.

ARRIVALS NOT INCLUDED IN THE TABLES.—Jan. 17, at New York, from Foo-chow-foo, Glenaros; from Singapore, Earl of Shafesbury; from Yokohama, Surprise; 31, at Texel, from Batavia, Ida Elizabeth; from Samarang, Verden; Dec. 18, at Monte Video, from Hong Kong, Kate Carnie; Feb. 4, at London, from China, Statesman, Wild Deer; at Deal, from Ceylon, Reform; from Penang, Napier; 5, from China, Dartmouth, Helen Nicholson, Polmaise.

DEPARTURES.—Feb. 3, from London, for Hong Kong and Canton, Dunmail.

Digitized by Google

SPOKEN.—Areata (?), Batavia to Amsterdam, 48 days out, Dec. 6, 28 S., 8 E.; Silver Craig, Batavia to Boston, Dec. 3; Catharina, Hamburg to Shanghai, Dec. 2, 25 N., 27 W.

LAID ON.—At London, for Simon's Bay and Trincomalee, Brothers.

CASUALTIES.—The Earl of Shaftesbury, Kromann, which arrived at New York, Jan. 17, from Singapore, had met with very heavy weather, during which she had her bulwarks stove, and damaged her rudder.

The Tiptree, Mason, from London for Japan, put into Rio Janeiro, Dec. 31, short of provisions.

Naval and Military.

The Tien-sien, which was purchased by the Government from the promoters of the China expedition under the command of Capt. Sherard Osborn, and which since the close of the China war has been lying, together with two of her sister ships, in Sheerness harbour, has been purchased by Mr. Laird, of Birkenhead. A captain and crew have been sent to Sheerness to fetch her away.

Captain Wake, R.N., of the Bulldog, is the brother of Mr. Wake, C.B., who was distinguished for his heroic defence of Arrah during the Indian mutiny. Both brothers are now on a visit to their mother, Lady Wake, sister to the Bishop of London, at Weston-super-Mare.

Captain de Casembroot (lately in Japan), naval aide-de-camp to the King of the Netherlands, and who lately commanded his Majesty's ship Cycloop when she conveyed the Queen of the Netherlands to England, visited Woolwich Dockyard on Wednesday last, and, after paying his respects to the Commodore Superintendent, inspected the Prince Albert, turret-ship, over which he was shown by her captain. He expressed himself highly gratified with the several arrangements on board.

The Indian reliefs of this year will be the 1st battalion 3rd Buffs, 2nd battalion 1st Royals, and 1st battalion 2nd Queen's from home, the 2nd battalion 11th, from Hong Kong, which goes to Bengal, and the 2nd battalion 25th, from Ceylon.

9TH REGIMENT.—The 2nd battalion will leave China for Japan, and be quartered at Yokohama.

11TH REGIMENT.—The 2nd battalion is ordered from Hong Kong to India. Out of the ten companies on foreign service—the regulation strength of each of which is 100 men—there were but 100 men doing duty when the last mail left China, the whole of the rest being in hospital, invalided, or dead. The draft for Hong Kong has been countermanded; it will not sail till about the 20th June, and then for India to meet the head-quarters.

20TH REGIMENT.—The 2nd battalion will not leave Japan for India, as originally intended, but will be sent to garrison Hong Kong.

31ST REGIMENT.—Hospital-Sergeant John Adair was discharged on the 16th January, on a pension of 2s. per diem, after twenty-five years' service. He was presented on leaving with a purse containing ten guineas and a handsome watch and chain from the non-commissioned officers and men of the regiment, who exhibited, in the strongest manner, the sense they entertained of his zeal and devotion in the Crimea, in India, and in China to the sick and wounded in all the vicissitudes of climate, service, and of danger.

WAR-OFFICE, JAN. 26.—9th Foot: Ensign William Smith Duthie to be lieutenant, by purchase, vice Robert Dillon Hare, who retires; Richard Andrews Mitchell, gent., to be ensign, by purchase, vice Duthie. 25th Foot: Gentleman Cadet Alfred William Turnbull, from the Royal Military College, to be ensign, by purchase, vice Augustus Owen, who retires.

BREVET.

The commission as colonel of Lieutenant-Colonel Arthur Willis, C.B., 88th Foot, to be altered 21st May, 1865.

Paymaster William Wastell, 6th Foot, to have the honorary rank o captain.

Captain Francis Gamble Blood, 69th Foot, to be major, in succession to General Sir Edward Whinyates, K.C.B., Royal Artillery, deceased.

The following promotions to take place in succession to General Peter Augustus Lautour, C.B., Colonel of the 3rd Hussars, who died January 11, and General Sir James Frederick Love, G.C.B., Colonel of the 43rd Foot, who died January 13:—

To have the rank of General.—Lieutenant-General John Henry Richardson, lieutenant colonel, unattached.

Lieutenant-General William Chamberlayne, lieutenant-colonel, unattached.

To be Generals.—Lieutenant-General the Hon. Sir Edward Cust, Colonel of the 16th Lancers. Lieutenant-General Francis John Davies, Colonel of the 67th Foot.

To be Lieutenant-Generals.—Major-General Frederic Johnston. Major-General Sir Edward Mortimer, K.C.B., Colonel of the 100th Foot.

To have the rank of Major-General.—Brevet Colonel Edward Charles Fletcher, captain, half-pay, 3rd Dragoon Guards. Brevet Colonel Edward Bagot, major, unattached. Brevet Colonel James Scargill, major, unattached. Brevet Colonel Samuel Tryon, major, unattached.

To be Major-Generals.—Brevet Colonel Robert Lewis, from major, unattached. Brevet Colonel, with local rank of Major-General in India, Thomas Williams, C.B., from lieutenant-colonel, 4th Foot.

To be Lieutenant-Colonels.—Captain and Brevet Major Charles Mingaye Green, 30th Foot. Major Nathaniel Steevens, unattached.

To be Majors.—Captain Francis Robert Glanville, Royal Artillery. Captain Frederick N. Dore, half-pay, 97th Foot, and staff officer of pensioners.

The Conqueror, screw line of battle ship, 2,845 tons, 500-horse power, Captain W. G. Luard, has arrived from China and Japan. The Conqueror has brought to England the battalion of Royal Marine Light Infantry that has recently been on special service in Japan, and a number of invalids, naval and military. The Royal Marine battalion embarked for service in Japan at Plymouth in December, 1863, under the command of Lieut.-Col. Suther, and arrived off Yokohama, Japan, in June, 1864, where it landed and encamped. In the following August the battalion re-embarked in the Conqueror, and proceeded with the allied fleets to the inland sea, where it was present at the bombardment of the enemy's batteries at Simonoseki on the 5th of September, 1864. The battalion has brought to England as its "lawful prize of war" two brass field-pieces captured in the attack on the stockade at Simonoseki. Having left behind in China and Japan about one hundred volunteers, the present strength of the battalion is 26 officers, three staff-sergeants, 25 sergeants, and 350 rank and file. The Legation guard of Royal Marines, who have been in Japan since March, 1863, for the protection of Her Majesty's Minister and the Legation, have also returned to England with the battalion in the Conqueror. The names of the officers attached to and accompanying the battalion are as follows:—Lieut.-Colonels P. C. Penrose, C. W. Adair, and J. A. Stewart; Capts. J. H. Parry, W. Taylor, J. Lean, J. B. Seymour, and J. B. Colwell; First-Lieuts. W. J. Barker, quartermaster, R. H. Dwyer, A. Hill, A. W. Johnstone, J. W. Inglis, W. H. Poyntz, adjutant, J. C. Hore, F. Hutchenson, W. W. Spalding, J. M. W. Silver, J. Inman, H. J. L. Norcock, J. C. Peters, T. Lakin, and C. A. Kennedy; Dr. Ord, surgeon; Dr. Robertson, assistant-surgeon. Mr. Egles, Mr. Charles, R.N., and Mr. Congreve, R.N., with 81 seamen and marines, have also arrived in the Conqueror as passengers, invalided and otherwise sent home from Her Majesty's ships on the China and Japan stations.

His Netherland Majesty's screw steamer the Watergeus (6 guns), Commander Escher, which put into Falmouth with partial damage and short of fuel on the 30th of December, resumed her voyage to Java from that port.

The hired sailing troopship Gresham, Capt. Brayley, has arrived at Spithead with military and naval invalids on board from Hong Kong and the Cape of Good Hope. She has brought to England from Hong Kong Capts. Burland and Gipps, 2nd battalion 9th Regiment; Lieut. Vaughan and Surg. Black, 2nd battalion 11th Regiment; Mr. Deegan, Military Store Department; Purveyor Thompson; Staff Assist. Surg. Adams; Mr. Boxer, Master R.N., late Her Majesty's naval agent at Hong Kong, and Mrs. Baylan; also 175 soldiers, invalids, 25 women and 28 children, and 8 naval invalids; 45 invalided soldiers, too ill to proceed any further on the voyage to England, were landed at the Cape for treatment in the military hospital there. Staff Assist. Surg. Ray and 35 men, women, and children were embarked at the Cape for conveyance to England; and at Ascension, where the ship called after leaving Simon's Bay, eight more invalids were taken on board. The ship sailed from Hong Kong on the 13th October, calling in at Anjer on the 5th November, and sailing again on the following day. The Cape was reached on the 6th of December, and the ship remained there at anchor in Simon's Bay until the 16th. Ascension was reached on the 28th, and left again on the 30th. Fine weather was experienced throughout the voyage until off the Azores, when a fresh gale was fallen in with, which soon passed over. The deaths during the voyage have been unusually numerous, 38 soldiers, two distressed seamen, three women, and eight children having died on board since the ship left Hong Kong. This excessive mortality, however, is ascribed to the dysentery and fever which prevailed at the time of embarkation, and not to any defect in the arrangements on board for the accommodation of the troops, or the sanitary condition of the ship.

The Salamis, 2 paddle-wheel despatch vessel, Commander Francis G. Suttie, under orders to proceed to China, will sail from Portsmouth about the 12th, and will call in at Devonport on her way down Channel. The Salamis was tried over the measured mile course in Stoke's Bay, near Portsmouth, in accordance with the Admiralty regulations for ascertaining the speed of all Her Majesty's ships prior to their departure from England on foreign service. The Salamis drew 10ft 1in. of water forward, and 10ft. 4in. aft, having six months' stores in her hold, and 166 tons of coals in her bunkers, and being in all respects complete and ready for sea. Six runs were made with full-boiler power, the respective speed of each run made being 12·721, 14·063. 13·091, 14·342, 13·091, and 14·402 knots; the mean speed of the ship at full-boiler power, 13·649 knots; steam pressure, 25lb. Vacuum—forward engine, 25in.; after engine, 26·5in. Revolutions of the engine—maximum, 32; minimum, 31. With half-boiler power four runs were made over the mile, with the following speeds—10·434, 12·203, 10·055 and 12·203 knots, the mean speed at half-power of the ship being fixed by these figures at 11·224 knots.

The contingent of the Royal Marine Light Infantry, which formed a portion of the Japan battalion, was inspected at head-quarters, Chatham, at which the officers and men had arrived the previous evening from Portsmouth, after disembarking from the Conqueror, 78, Capt. W. G. Luard. On marching into the barracks their comrades turned out on the parade-ground, and gave them three hearty cheers. An inspection of the officers and men of the detachment was made by Col. J. O. Travers, C.B., the commandant of the division, who expressed himself well pleased with the appearance of the non-commissioned officers and men after their lengthened absence. At the same time a letter from the Admiralty was read to the detachment, in which their Lordships expressed their sense of the exemplary manner in which the officers and men had carried out the duties in which they had been engaged since their absence from England. The non-commissioned officers and men will be paid their arrears of pay on the arrival of the lists from the Royal Marine-office, immediately after which they will be granted several weeks' leave of absence for the purpose of visiting their friends.

The following medals and gratuities awarded by the Board of Admiralty to the Woolwich division of Royal Marine Light Infantry for good conduct and long service were yesterday presented by Col. Maxwell, Commandant:—Colour-Sergt. Jonah Holder, a medal and £15; Armour-Sergt. Thomas Edwards, a medal and £15; and Drummer Charles Hines, a medal and £5. Capt. Allen, Lieut. Rutherford, one sergeant, one corporal, and five privates Royal Marines yesterday left Woolwich by rail to join the Doris at Plymouth for service. The Royal Marine detachment told off for the Island of Ascension yesterday went up to Deptford from Woolwich, in the steam-tug Monkey, and took up their berths on board the Megæra in readiness for departure, the order for their embarkation at Woolwich having been cancelled.

LONDON, MONDAY, FEB. 5, 1866.

THE NIENFEI REBELLION IN CHINA.

SINCE the suppression of the Taiping rebellion another formidable body of insurgents have threatened the Government at Peking. These are named Nienfei or Nie-en-fei by the Imperialists, signifying "Rebellious Banditti," having a perfectly distinct origin from the late religious movement that came from the South, or others of a political character in the West. This may be considered a social outbreak, the result of accidental circumstances; but, nevertheless, a sanguinary insurrection in that distracted empire. Not only are they arrayed against the constitutional authorities, but they rob and murder the peaceful, industrious inhabitants, and evince the greatest hatred to foreigners. As an instance of the latter, they literally roasted alive, some years ago, two missionaries at Chefoo, who risked their lives amongst one of their hordes whom they sought to pacify by religious exhortations. Yet these people were once the loyal inhabitants of that tract of country where the Grand Canal crosses the Yellow River, and the three adjacent provinces converge. At this point the river and canal have been subject to floods; and it was a matter of great importance for the Government to keep their banks in repair to prevent inundation, and have clear navigation for junks carrying rice from the central and southern provinces to the northern capital. As long as the traffic was open to bring them supplies of rice, and the country free from floods, they lived peaceably, t lled the land, and tended their cattle and horses. But the Government neg'ected the artificial banks of the river, and where they are raised annually in proportion as this very sedimentary stream rises above its bed; and one season, during a heavier flood than usual, the river burst its banks, and inundated the low lands for many hundred square miles. Thousands of the inhabitants were drowned, and tens of thousands ruined by the catastrophe. Those who could manage it emigrated to the higher lands of Shantung, Honan, and Petchelee, where they quietly settled down. Others, however, who were not inclined to peaceful occupations, banded together, and plundered the towns and villages that did not suffer by the flood. At first these marauding expeditions were of a temporary character, where they forcibly supplied themselves with rice only. This necessary article of food was shortly afterwards cut off, when the Taipings captured Nanking and Soochow, and Peking was supplied by sea. Moreover, these rebels made an inroad northward, by the route of the Grand Canal, which completely starved the wretched inhabitants, who had no alternative but robbery or death. Their labour upon the embankments, the cultivation of the fields, and the tracking of junks, were gone. Hence they united with their families into a roving band of marauders, robbing all and everybody whom they met of silver, gold, silk, cotton, rice, wheat, and clothing, besides stealing horses, mules, and young women. As the country they traverse is open, with numerous hillocks and clumps of trees, and tolerably good roads, the men are well mounted on strong fleet ponies, while the women and children ride in waggons. In this manner they can travel from forty to fifty miles a day when pursued, so that no infantry force can come up to them. The Government endeavoured to suppress the Nienfei by sending a brigade of wretchedly-armed troops after them; but they were of no use; and it was not until a body of Tartar horsemen were despatched under the command of SAN-KO-LIN-SIN, the renowned Mongol Prince and General, that this troublesome band of insurgents could be routed. On one occasion, also, a small contingent of British infantry stationed at Tientsin marched against them, but they never saw a Nienfei until the banditti concentrated their force and attacked them; and when they did get the worst of it they were out of range in ten or fifteen minutes. By the last accounts it would appear that they have been rising again in the Northern provinces, and defeated the Imperialists in an engagement. At present their number is probably not more than twenty thousand fighting men, but there are data to conclude that they will have considerable accession to their strength from the soldiers and village braves, who are disaffected in consequence of the bad conduct of the civil mandarins. Should this movement ever assume anything like the gigantic proportions of the Taiping rebellion, it is clearly the policy of the British Government to preserve a strict neutrality. In the case of the Taiping rebellion, our position was very different—where the hordes marched upon our valuable settlement at Shanghai, and the leader of that movement promulgated his blasphemous assumption of Divinity. Here the Imperial Government has been to blame from the first in neglecting to maintain the public works raised by their predecessors to prevent the calamity; and when that did happen they never attempted to succour the distressed people. No doubt they are a bloodthirsty band of miscreants, as all such are in a nation where the laws and punishments are so cruel. But they had wrongs to be redressed, to which the authorities turned a deaf ear, and they were forced by starvation to become rebellious. Fain would the Chinese Government enlist our services in suppressing the Nienfei as we did the Taipings; and they witnessed with apprehension the withdrawal of our military force from Tientsin and the Takoo forts, Enough of British life and treasure has been sacrificed in that pestilential country to maintain our policy, which, it is to be hoped, has taken root at the Court of Peking, so that it may grow in strength by diplomatic action alone.

Sir RUTHERFORD ALCOCK is now at his post as the Second Minister Plenipotentiary, since the barriers of Chinese exclusiveness were broken down by the force that backed his predecessor, Sir FREDERICK BRUCE. The line of policy pursued upon that occasion was doubtless the best, as it proved successful. Now, however, that the way has been cleared, a less warlike attitude is necessary, to avoid complications that may lead to further strife and expenditure. The English nation will not stand any more heavy rates for China wars, to uphold a *prestige* that is not appreciated by those Celestial diplomats. It is casting pearls before swine to place the flower of British chivalry before the ranks of Chinese soldiery and their pusillanimous mandarins. Sir R. ALCOCK'S mission will be entirely of a civil nature, and as such it should be thoroughly impressed upon the administration. Amity and friendship between the two Governments, and strict neutrality towards the internal affairs of the empire, should guide his diplomacy; while his duties as superintendent of British trade in China should lead him to see that the treaties are honestly carried out by the Chinese, while they are not infringed upon by our traders. The Court of Peking has not yet sent an ambassador or resident plenipotentiary to the Court of St. James's, consequently there is no necessity that the Legation at the capital should attempt to make a display in proportion to the apparent magnitude of the office. As the international questions to be discussed are likely to be confined to those affecting commerce, it will be judicious for the new Minister not to travel too much beyond that sphere, in case he might get into the depths of hostile controversy.

AMERICAN CONSULAR JUSTICE.

OUR American cousins seem to be generally unfortunate in the choice of their representatives in the Far East. The vagaries of United States Consuls in China have often been the theme of discussion, but probably no case has been recorded in which one of these officials exhibited such a degree of mingled incompetence and malignity as did Colonel FISHER, the United States Consul at Yokohama, in trying the case of RICKERBY *v.* GLACKMEYER. The circumstances of the case are briefly these: One GLACKMEYER, an American "rowdy," was prosecuted by his employers for a series of thefts, for which, although clearly proved, the United States Consul declined to punish him. Considering himself aggrieved by a report of the

Digitized by Google

case which was published in the *Japan Times*, this GLACKMEYER next distinguished himself by a brutal and cowardly assault on Mr. RICKERBY, the Editor of that paper, and Mr. RICKERBY, under the delusive hope of obtaining justice from the United States Consul, duly laid his plaint before that functionary. The defendant fully admitted the assault, and attempted in the most impudent manner to justify it, using, even in court, the most insulting language to Mr. RICKERBY and his witnesses. The Consul overruled Mr. RICKERBY'S protest against this indignity; joined the defendant in abusing him; summarily rejected all evidence which told in favor of the plaintiff; treated the case alternately as civil and criminal, according as it best suited his purpose of deliberate injustice; sanctioned the foulest imputations on Mr. RICKERBY'S character, for which there was not the shadow of a foundation; grossly insulted his witnesses, and even Her Britannic MAJESTY'S Consul, in open court; and finally fined the assailant a few cents, condemning the complainant in costs. Such a shameless abuse of power as this has, we are glad to see, drawn forth a unanimous remonstrance from the other Consuls, and a memorial from the residents of all nationalities, which will be forwarded to their respective Governments. As soon as these steps have had time to take effect, we doubt not that the presence of Colonel FISHER at Yokohama will cease to be a reproach, nay, a standing disgrace, to the country he so shamefully *mis*represents.

THE HONG KONG DOLLAR.

WE have much satisfaction in announcing that the necessary preparations for the issue of the silver dollar, the only coin now wanting to render the new Hong Kong currency perfect, are at length completed; a specimen of the coin having been submitted for the QUEEN'S approval, and received Her MAJESTY'S sanction. It was of the first importance that this coin, destined to circulate throughout the length and breadth of the Chinese Empire, should not only be creditable to British art, but present in its devices nothing calculated to offend Chinese prejudices; and this requirement appears to have been fully appreciated by the Mint and Treasury authorities. The chief difficulties to be overcome were the incongruity commonly attaching to the blending of English and Chinese characters, and the necessity of avoiding heraldic devices—the most usual form of ornamentation on the reverse of European coin. It was therefore decided that the ornamentation should be purely Chinese, and to insure correctness in its execution the task was entrusted to Mr. OWEN JONES, whose researches in Oriental art entitle him to the highest position as an authority on this point. To leave nothing undone which could add to the beauty and effectiveness of the coin, Her MAJESTY graciously consented to sit for a medallion to Mr. WILLIAM THEED, the eminent sculptor, and the result is that the obverse of the new coin presents an exquisitely moulded head of the QUEEN, free and graceful in treatment, and singularly faithful as a likeness, reduced from Mr. THEED'S medallion. The transfer to the steel die was effected by Mr. LEONARD C. WYON, the official engraver to the Royal Mint. The head is encircled by the legend VICTORIA, QUEEN, with a Chinese border, filling the intervening spaces between the words. The reverse bears the same appropriate ornamental border, but without lettering, and in an inner circle the inscription ONE DOLLAR, HONG KONG, 1865; while the centre piece, the most characteristic portion of the coin, is composed of a Chinese labyrinth, enclosing the Chinese rendering of these inscriptions. The general appearance of the coin is exceedingly beautiful, and certainly does infinite credit to all concerned in its production; we cannot, however, help expressing a regret that a profile of Her MAJESTY should have been deemed an essential part of the design. An obstinate aversion to changes of any description is one of the most deeply-rooted prejudices in the Chinese character; and if the Hong Kong dollar is always to bear the portrait of the reigning Sovereign, a change which may give rise to more currency difficulties will sooner or later be inevitable. It is much to be feared that when the necessity unhappily arises for replacing the portrait of our present QUEEN (whom GOD preserve!) by that of her successor, the dollars coined during the present reign may rise to an absurd premium, to the prejudice of future mintages. It is needless to enlarge on our reasons for this supposition, as the history of the Carolus dollar will immediately suggest itself to everyone conversant with the China trade. And we think this difficulty might well have been avoided, without any detriment to the beauty or usefulness of the coin, by substituting on the obverse a figure of Britannia as a national emblem, instead of a profile of the Sovereign. We understand that only a few specimen coins will be struck in this country, after which the die will be forwarded to Hong Kong without further delay.

THE ICHIBOU* QUESTION.—PROFITS OF OFFICIALS.

IN our late articles on the excessive mortality among the troops at Hong Kong, we had occasion to advert to the demoralising influence exercised on our naval and military services on the China station by the seductive advantages offered to officers visiting Japan. *The Times*, in a late article on the same subject, refuses credence to statements which it says, if true, "would put officers holding high places of trust "in Her MAJESTY'S service on a level with sharpers." However this may be, we are now in possession of evidence—of which the following letter forms but a portion—clearly establishing the truth of the allegations which have been made, so greatly to the disadvantage of a large number of officers of all grades. We content ourselves with exposing the evil, and producing evidence of its existence; leaving it to the proper authorities to decide on the exact measure of culpability attaching to those who have sanctioned and profited by it. As our correspondent says, they *may* think the name given to it by the leading journal a harsh one, but that is not our affair. Briefly, then, the main facts demanding our attention are—That officials of high rank in Her MAJESTY'S service have been benefited to an enormous extent by the exchange allowed them by the Japanese Government. That these officials have induced the Japanese to continue the benefit to themselves, by consenting to its being withdrawn from those whose interests it is their duty to protect. That the Japanese Government has been compelled to exchange one dollar per diem for each private soldier belonging to the regiments quartered in Yokohama. That the profit on this, amounting to some £1,100 per month, has been carried to a fund and divided among officers and men, *in proportion to their pay*; thus giving the officers, besides the profit on their own exchange, the lion's share of that rightfully belonging to the men. That officers not belonging to the garrison, who visited Yokohama for pleasure or on sick leave, were permitted to share in the spoil, in consequence of a threat that they would otherwise expose the abuse. That two officers who visited Yokohama last year—Colonels GRANT and LOVELL—had cheques sent them for a share, but returned them, declining to have anything to do with it. That the Prussian Minister, believing that the honour of his country was compromised by the acceptance of such a bribe, declined any participation in it either for himself, or the naval or diplomatic services of his Sovereign. And finally, that all these facts, and many others equally suggestive, were published in the *Japan Herald*, the leading Yokohama journal, in October last, and up to the present time no attempt has been made either to refute or justify them.

We have not space in the present article to deal with the motives which may have influenced the Gorogio in giving such ready assent to the claims of foreign officials for exchange. It may be that even at 300 ichibous per 100 dollars the transaction leaves the Ginza no inconsiderable profit. But a clever caricature which appeared some time ago in a humorous publication issued in Yokohama and called the *Japan Punch*, shadows forth another possible motive. It represents a long string of officers—naval, military, and diplomatic—on their

* It may be as well, perhaps, to give here our reasons for adopting a method of spelling this word so greatly at variance with that persisted in by the China press generally. Although Japan possesses a gold coinage, the silver coin now under discussion is always used as a standard, just as the franc is in France; and this coin, from some misapprehension on the part of the first settlers in Japan, obtained among them the name of "Itziboo," which has clung to it ever since, with occasional variations, such as "Itzibou" or "Itzeboo," to suit the fancy of different writers. None of these modes of spelling convey either the meaning or the sound required. The Japanese name for this integral part of their silver coinage is simply "Bou." One of these coins is *ichi-bou*—literally "one bou," two of them, *ni-bou* (two bous), and three of them, *san-bou* (three bous). Beyond this extent the term "bou" is no longer used; four bous make one *rio*, and are called therefore *ichi rio*; eight, *ni-rio* (two rios), and so on. Thus in Japanese parlance the sum of fifteen of these so-called "itziboos" would be *san rio, san bou—i.e.*, "three rios, three bous." This explanation will show how the error arose of first mis-spelling a phrase descriptive of a single coin, and, secondly, applying it to the entire currency. The error is now so deeply rooted that the Japanese themselves are compelled to adopt it to make themselves understood to such foreigners as do not understand the language; if, however, the word *must* be retained as a generic term for the whole currency, let us, at all events, spell it in such a way as will correctly render its proper pronunciation.

Digitized by Google

way to the Ginza with bags of dollars to be exchanged. The Tycoon looks on, with his forefinger in significant proximity to his nose, chuckling over the success of his scheme to secure the good will of foreign officials, and keep the forces quiet and snug at Yokohama. There may be something in this, too,—who knows? With these introductory remarks we leave "ICHIBOU" to speak for himself. Although somewhat lengthy, his letter deserves careful perusal, and we specially recommend the attention of those who take an interest in the subject to the calculations contained in it, which show in plain figures the actual results of the system.

(To the Editor of *The London and China Telegraph.*)

SIR,—Observing by your note appended to a letter signed "NOT A MERCHANT," in the last number of the *London and China Telegraph*, that you purpose further to notice the Ichibou question in your next, I will submit to you a few remarks which may be worthy your notice—and perhaps also that of others.

I would premise that I fully endorse the opinion expressed by your correspondent, that "British merchants in Japan—indeed all but those who are literally civil, military, or naval servants of our Government, are subject to certain indignity at the hands of the Japanese;" and that this is mainly attributable to the fact that "the English Legation officials have closed with the manners and customs of Japan as far as embracing the opportunity of claiming privileges unknown to them at home." This state of things, and the very natural consequence—the existence of deplorable bitter jealousies, and sometimes actual ill-feeling between officials and residents, is patent to the observation not only of old residents like myself, but, as we now have proof, also to casual travellers in Japan. It is a subject, however, but little understood at home, and it must therefore be matter of congratulation to all desiring a better condition of things in Japan, that you have taken up and drawn more general attention to the subject.

I observe that *The Times* declines to follow certain "Chinese authorities in an account of this matter, which would put officers holding high places of trust in Her Majesty's service on a level with sharpers;" and that it "cannot believe that all the civil, military and naval authorities of Hong Kong were flocking to Japan in order to enjoy a paltry profit by a certain fixed rate of exchange between our money and the Japanese, enforced upon Japan by the terms of our treaty, though in effect a gross wrong to that country." I scarcely know to what "account" and to what "Chinese authorities" *The Times* refers; and of course, if any one has said that *all* the Hong Kong officials were flocking to Japan, it was a manifest exaggeration; but this I do know, that most, if not all, of the Chinese newspapers—and the *Japan Herald*, a newspaper published in Yokohama since 1861—have been persistent not only in assertions, but in production of proofs that officers holding high places of trust (with two exceptions, which I shall hereafter allude to) in all the foreign services, diplomatic, consular, military and naval, have been benefited, and that to very heavy amounts, by this "gross wrong to Japan" (as *The Times* calls it); and, moreover, that they—these diplomatic and consular officials—have induced the Japanese to continue this benefit to themselves and their sister services, in consideration of their consenting to waive the same benefit for those whose interests it is their duty to regard. I say these allegations have been publicly made and reiterated again and again—they have never been attempted to be publicly gainsaid; and until this be done all those who participate in the benefit must bear with the imputation the facts convey, whatever that may be, though they may think it rather hard that the leading journal should give it a name.

To take even the most cursory review of the matter, we must commence with Article X. of our Treaty with Japan; it runs thus:—

"All foreign coin shall be current in Japan and shall pass for its corresponding weight in Japanese coin of the same description. British and Japanese subjects may freely use foreign or Japanese coin in making payments to each other."

"As some time will elapse before the Japanese Government will become acquainted with the value of foreign coin, the Japanese Government will, for the period of one year after the opening of each port, furnish British subjects with Japanese coin in exchange for theirs, equal weights being given, and no discount taken for recoinage."

Now it must be understood that the whole of the exchange business and money market of Japan is controlled and ordered by an office in Yedo, called the Ginza; this office is under the direction of a high Government authority called Gokanjio Boonjio, and it is said has acquired great influence for its masters, the Gorogio, by a *discreet use* of its enormous profits amongst the highest Government officials. By this office in a very early stage of our proceedings after the treaty, and despite its provisions above quoted, orders were issued throughout Japan that all dollars received from foreigners should be brought to the Ginza, and there, and there only, exchanged for ichibous. The Ginza, holding their merchants' dollars in hand for the purposes of the exchange, as long as it suited themselves—or the Gorogio, had but little difficulty in settling the exchanges as it suited them. (Let me mention here that the intrinsic relative value of the ichibou is 311, or say, after minting expenses, 300 to the Mexican dollar.) So for a short time matters stood; but very early the Government, alleging certain reasons more or less forcible, stopped this exchange, so far as the residents, *i.e.* the merchants, professional men, and others were concerned, but continued it to the Ministers and their legations, the Consuls and their assistants, indeed to all civil servants, and to all officers and men in the army and navy from time to time stationed in Japan (by-the-bye, it seems it has lately been claimed for and allowed to officers who have visited Japan on leave for their own pleasure). Now let us see the operation of this. Let us suppose a Government official—say an admiral—stationed in Japan (Admiral Kuper and his squadron were there from the 22nd March, 1863, to Feb. 13, 1865); suppose his pay from his home Government equal to £2,000 a year. For this he gets Mexican dollars at the Government rate (4s. 2d.), making $9,600. This amount he exchanges at the Ginza at 300 ichibous per 100 dols., giving him 28,800 ichibous. He then proceeds to call in the service of his broker, who disposes of this 28,800 ichibous at the market rate (averaging, say, 220 ichibous per 100 dols.), the result of which operation is to convert his 9,600 dols. into 13 091 dols., which, at the average rate of exchange, are worth 4s. 8d. each, =£3,054, showing a clear profit of £1,054; in other words, something over 50 per cent. on his actual salary. I have here given, I think, fair average rates of exchange over the year, but it may be remarked that as the ichibous can be drawn monthly, the officials are of course enabled to watch for and avail themselves of the exceptionally favourable rates which sometimes rule.

I have here shown how the admiral converts his £2,000 into 28,800 ichibous. Now the private individual, who disburses for the maintenance of his establishment a like sum of £2,000, finds that his dollars on the average cost him say 4s. 8d., and gets, not 9,600 dols. like the admiral, but 8,571 dols.; and as he can only get, say, 220 ichibous per 100 dols., he comes off with only 18,856 ichibous against the admiral's 28,800; in other words, on an expenditure of £2,000 a year he is in the shade to the extent of close upon 10,000 ichibous, or about £1,060—again more than one-half.

Or, to put it in a perhaps clearer light, take an exemplification instanced by the Japan paper I have before alluded to, in an article on this subject in Oct., 1862:—"We give a case that has occurred within our knowledge, and we presume may and does occur daily. A merchant goes into a shop and sees a piece of lacquer which he particularly admires; the shopman asks 120 dols. for it, the buyer offers 100 dols.; while the bargain is going on a Minister walks into the shop, sees the article on the floor, and at once offers 220 ichibous for it. Now these 220 ichibous cost the Minister 73 dols. buying them from the Ginza, and at his rate of exchange, 4s. 2d. to the dollar, he snaps up for his 60 dols. what the merchant was offering 100 dols. for!"

Of course, where the word "Minister" is used here, "Consul," "Admiral," "Commander-in-Chief," or any other official title may be substituted. Now, Sir, can we wonder, when they see these things before their eyes every day, that the Japanese should think the public officials of our countries to be, like their own, the powerful and dominant class, and the wealthiest and most honoured of our merchants to be but dirt beneath the feet of those who can receive such advantages which are denied to those they govern? Can we wonder that an intelligent casual traveller in Japan, like your correspondent "NOT A MERCHANT" should have observed it as a distinction most pernicious to the extension of our influence in that country? Or can we be surprised at the existence of unwholesome jealousies between those who have and those who ought to have, but have not, the same advantages?

Without committing myself to the opinion of *The Times*, that proof of what has been asserted on the subject of this trafficking in exchange by officers in various branches of Her Majesty's service would bear with it the hard designation upon these officers which it suggested, that enough has been said to call for the most searching inquiry into the whole matter. I trust, too, you will persevere in the agitation of the question until not only the evil be stayed, but the fullest light thrown upon what has been done and is now doing.

You will see by the enclosed article from the *Japan Herald*, Oct. 17, 1865, that this old evil is continuing to throw out buds of still more dangerous fruit. Here is a positive statement that whilst an exchange is effected for every private soldier and non-commissioned officer of 1 dol. per day, "it is decided by some one" (the writer knows not by whom originally), "that the soldier shall get his pay of one shilling a day with the exchange on that amount only!"—that the difference, amounting to 15 ichibous a man, or say a total of 11,250 ichibous a month for the regiment, is carried to a fund which is divided amongst the officers and men of the regiment in shares proportioned to their pay—the soldier getting one share, a captain about 30, a major about 53 shares, and so on; that almost every officer (with two honourable exceptions mentioned) who has gone to Japan on duty, *and actually even those who have come there on their own pleasure*, have been partakers of this fund. This statement appears so incredible that I would not make myself responsible for it. I quote the authority, which is one that I have, as you know, good means of judging has not often been found at fault in its statements of facts; and although I have received files of the same paper to nearly two months later date, I find no denial of the statements made. I hope you will have room for this article *in extenso*. I should like to see what your contemporaries, whose peculiar vocation is with naval and military subjects and the discipline and well-being of our army and justice to all grades, will say to it.

I observe that "English Legation," and "officers holding high places of trust in Her Majesty's service" have been the terms used by your correspondent and *The Times*. This would lead to the unjust inference that the British are exceptionally chargeable with the blame. This is not so, for (with the two exceptions I am about to name) the representatives and officers of all the other Powers having treaties with Japan have gone in for their share of the pickings. One of the exceptions I refer to above is this:—The French authorities receive the exchange, but they are not allowed to pocket it; all the benefits derived from it have to be carried into account against their pay. And the French Government has already, with the proceeds thereof, erected, on two of the best sites in Yokohama, the finest and most extensive buildings in the Far East, as navy hospital and depot; and I am informed the French are continuing the erection of further extensive accommodations.

The other exception is a yet more striking one. The Prussian Minister Plenipotentiary, whilst on a visit to Japan, believing the honour of foreign countries and the consistency of every foreign official in Japan involved by the acceptance of this exchange, on the 29th October caused the Ministers of Foreign Affairs at Yedo to be addressed thus:—"The undersigned, his Prussian Majesty's Consul in Japan, has the honour to inform your Excellencies that, under the present circumstances, his Prussian Majesty's Plenipotentiary, the Prussian Consulates in Japan, and his Prussian Majesty's men-of-war, shall not avail themselves any more of the opportunity offered by the Japanese Government to exchange dollars against ichibous at the Japanese custom-houses."

On the other hand, in the general rapacious greed after exchange profits the American Minister Resident and his Consul have, I think, even exceeded all others. I have some curious revelations about them on hand at your service hereafter, if you so incline. If they would answer

Digitized by Google

no further purpose they will at least show how far in the direction of absolute extortion the abuse complained of may be carried in the hands of rapacious officials.—I am, Sir, yours, &c., ICHIBOU.

MR. GLADSTONE AND THE TEA DUTY.

(To the Editor of the *Daily News.*)

SIR,—In a trade paper of last week prominence was given to a paragraph, which has since appeared in other journals, containing the following:—"The Customs authorities at Glasgow have been officially requested to canvass the tea trade as to the opinion held of the expediency of doing away with the present Custom-house routine, and collecting the tea duties at the ship's side. It is said that the saving thereby effected would permit of a further reduction in the duties on tea." The probability of this alteration being attempted has been entertained in some quarters, and may possibly be further discussed, thereby causing a proportionate unsettling of trade; it, may, therefore, not be profitless to look at the statistical side of the question. As to the saving to be effected:—For the year ending 31st March, 1865, the expense of collecting and managing the Customs revenue is officially stated at £754.225. 11s.; the gross return of superannuation payments to Customs, Inland Revenue and Post-office is £474,765. 8s. 4d.; the proportion of this to be charged to Customs, according to the ratio of the expenses of the three branches, is £88,139. 3s. 4d.; thus showing a total expense in connection with the Customs revenue of £842,364. 14s. 4d. The share of this to be placed to the account of tea, according to the proportion which the tea duty bears to the whole Customs revenue, is £168,472. 18s. 10d. Supposing that as a result of the alterations suggested one-half of this be saved (though the estimate is probably excessive), the saving would be £84,236. 9s. 5d. The revenue received from tea during the year in question was £4,469,208. 11s. 7d., showing for every farthing per pound of duty an income of £93,108. 10s.; so that after adding £10,000 to the estimated saving, Mr. Gladstone would be in a position to reduce the duty one farthing per pound. Convenience to trade is also a question to be considered when radical changes of system are proposed, and doubtless there are many inconveniences in connection with the present routine, but the change suggested would probably increase rather than diminish these inconveniences. At the commencement of the present year there were 59 cargoes of tea afloat, bound for England, containing 44,482,836lbs., thus showing 753,496lbs. to be an average cargo; the amount of duty on which, to be paid "at the ship's side," would be, at 6d. per lb., £18,848. 13s., or, at 3d. per lb., £9,424. 6s. 6d. It is no unusual occurrence for half a dozen or more ships to arrive within a week. In such case the amount of duty to be paid would be, at 6d. per lb., £113,091. 18s., or, at 3d. per lb., £56,545. 19s., the bulk of which would come from three or four houses. Of this, according to the return of exports for the last year, one-fourth would have to be refunded in the form of drawback, and the balance the importer would get repaid from the trade at intervals extending perhaps over two years. Indeed any alteration, either in the rate of duty or the system of collection, is at present eminently undesirable. Two reductions of duty, following each other in quick succession, have caused consumption rapidly to gain on supply. Prices have, of course, advanced (a temporary decline on the original advance has been caused by monetary pressure during the last few weeks, but the effect will disappear with the cause), and time is required to watch whether supply and demand will equalise themselves by an increase of supplies, or a further advance of price; if in the latter way, no reduction of duty will reduce the cost to the consumer.—I am, &c.,

Mincing-lane, Feb. 1. A TEA MERCHANT.

SHIP LAUNCHES.

Messrs. Barclay, Curle, and Co. launched on Tuesday an iron sailing ship of 1,200 tons register. She is owned by Messrs. George Smith and Sons, of Glasgow, and will form one of their East India packets. She was named the City of Seringapatam.

Last week the Messrs. Laird Brothers launched from their shipbuilding-yard, at Birkenhead, a large paddle-wheel steamer, named the Guara, intended for passenger service on the coast of Brazil. She is 200 feet long, 32 feet breadth of beam, and 16 feet depth of hold, her tonnage being 985. She will be fitted with oscillating engines of 250-horse power, her paddles will be on the feathering principle, and her boilers will have flues on Lamb's patent system. She has a deckhouse extending almost the whole length of the vessel, in the after end of which is the saloon and part of the sleeping accommodation, the remainder of the berths being aft, below the deck. The vessel will accommodate 60 or 70 passengers.

Last week there was launched by Messrs. Wm. Denny and Brothers, from their north building yard on the Clyde, a composite screw steamship of 647 tons builders' measure, and following dimensions:—Length of keel and forerake, 185 ft.; breadth over all, 26 ft. 10 in.; depth moulded, 15 ft. She will be fitted with a pair of direct-acting surface condensation engines of 130 H.P. nominal, by Messrs. Denny and Co.

Last week Messrs. Henderson, Coulborn, and Co., launched from their building yard at Renfrew a screw steamer named the Guadiana, of about 500 tons. She will be fitted by the builders with a pair of direct-acting engines of 90-horse power nominal, and will shortly be ready for her destination in the Mediterranean. She is for a Spanish company.

Messrs. Blackwood and Gordon have launched on the Clyde a screw steamer of 600 tons B.M., on their own account. Her dimensions are:—Length, keel and forerake, 197 ft.; breadth of beam, 25 ft.; depth of hold, 14 ft. 9 inches. The steamer was named the Octavia. Immediately after the launch the vessel was taken into the builders' dock alongside the works to receive her engines, which are on the inverted direct acting principle of 90-horse power.

The Panama, New Zealand, and Australian Royal Mail Company's steamer Rakaia was launched from Randolph, Elder, and Co.'s building-yard at Fairfield. This vessel is intended for the new mail service between Panama and New Zealand. Her dimensions are:—Length 265 feet, beam 34 feet, depth 26 feet, tonnage B.M. 1,504 tons. The engines are 350-horse power, and are on the builders' double cylinder principle.

There was launched from the yard of Mr. John Robinson, Sunderland, a barque named the Troas, of 700 tons burthen, intended principally for the China trade.

FREIGHTS AND CHARTERS.

In outward freights we have nothing to remark. Homewards there is no improvement. the last quotations from Hong Kong for London being 35s.. and from Shanghai 30s. tea, and 60s. silk.

The Admiralty having invited tenders for the conveyance of stores to Hong Kong and Trincomalee, have ordered the Melbreck and Brothers to be surveyed for that purpose.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Shanghai: 40s. weight, 30s. to 35s. meast. To Hong Kong: 40s. weight, 30s. meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Ceylon: 40s. weight, 20s. measurement.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per Keel. For Batavia: £26. For Hong Kong: £50. For Galle: £42. For Singapore: £42. For Shanghai: £60. From Newport, Cardiff or Swansea, per ton. For Hong Kong: £2. 8s. For Manila: £1. 15s. For Galle: £2. 2s. 6d. For Singapore: £2. For Shanghai: £2. 16s.

The Admiralty have invited tenders for the conveyance of 10 tons stores from the River Thames to Colombo, and of about three officers, three staff-sergeants, sixty-four men, five women, and four children to Hong Kong; and also of about four officers, one lady, one child, thirty-eight men, six women, and five children from Kingstown or Queenstown to Japan.

CASUALTIES.

The Maria Diederika, Van Marion, from Batavia, for Rotterdam, which put into Texel, Jan. 10, leaky, has also sustained severe damage in bulwarks, rigging, &c., and will require new copparing.

The Tiphee (ship), from London, for Japan, put into Rio Janeiro, Dec. 31, with her cargo (coals) on fire, and commenced discharging.

The Quinten Metsys, Claeus, from Shields to Galle, put into Table Bay, Dec. 15, leaky, and is discharging.

MISCELLANEOUS.

At TABLE BAY.—Dec. 15. from Hong Kong, Constance, Risden, for London; from Padang, Brouwershaven, Henyer, for Rotterdam; 18, from the Clyde, Baron Bentinck (s.), Harrisons, for Batavia; 19, Mariaban, Tickell, for Galle; 20, from Marseilles, Capitole, Champenois, for Singapore; 14, Minister v. Hall Rochasson, Kayser, sailed for Batavia.

IMPORTANT

TO PERSONS RESIDING IN HOT CLIMATES.

ASH'S PATENT "PISTON" FREEZING MACHINE AND WINE COOLER is the FIRST REALLY EFFECTIVE APPARATUS for TROPICAL CLIMATES.

It will produce PURE BLOCK ICE, FREEZE and MOULD DESSERT ICES, and ICE WINES in any temperature. It is remarkably simple, will not corode or get out of order, and can be worked (with or without Ice) by the most ignorant servant. The Freezing Salts employed are indigenous to most hot climates, easily and cheaply obtained. A *bona fide* Receipt for preparing them given with each Machine. It is not too much to say that the "Piston" Freezing Machine is rapidly becoming indispensable to all European residents in India and China.

PRICES:—For 1 Bottle, 1 Block of Ice, 1 Dessert Ice... ... ... £4 0 0
For 2 Bottles, 2 Blocks of Ice, 2 Dessert Ices 6 10 0
For 4 Bottles, 4 Blocks of Ice, 4 Dessert Ices 11 5 0

If without fittings (merely as Wine Coolers.)

For 1 Bottle £2 0 0
For 2 Bottles 3 0 0
For 4 Bottles 4 5 0

} When Dessert Ices are never required, these Wines Coolers can be fitted with BLOCK ICE MOULD at 30s. for each Mould so fitted.

SOLE MANUFACTURER:

GEORGE SIMPSON, 315, OXFORD-STREET, LONDON.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

CAUTION.—*Vice-Chancellor Wood affirmed in Court that Dr. J. COLLIS BROWNE was undoubtedly the Discoverer of Chlorodyne; that the statements of the Defendant Freeman were deliberately untrue, and he regretted to say they had been sworn to (see "The Times" of July 13, 1864); all others must be spurious.*

Earl Russell has graciously favoured J. T. Davenport with the following extract of a despatch from Mr. Webb, H.B.M.'s Consul at Manila, dated Sept. 17, 1864:—"The remedy most efficacious in its effects (in Epidemic Cholera) has been found to be CHLORODYNE, and with a small quantity given to me by Dr. Burke I have saved several lives." Earl Russell communicated to the College of Physicians that he had received a despatch from Her Majesty's Consul at Manila, to the effect that Cholera had been raging fearfully, and that the ONLY remedy of any service was CHLORODYNE.—See *Lancet*, December 31, 1864. No home should be without it.

Eminent Hospital Physicians of London stated on oath that they prescribe CHLORODYNE largely, and mean no other than Dr. Browne's.

The General Board of Health, London, state as to its efficacy in Cholera and Dysentery:—"So strongly are we convinced of the efficacy of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. Montgomery, Esq., late Inspector of Hospitals, Bombay:—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health, after eighteen months' severe suffering, and when all other medicine had failed."

From W. Vesalius Pettigrew, M.D.:—"I have no hesitation in stating that I have never met with any medicine so efficacious as an antispasmodic and sedative. I have used it in Consumption, Asthma, Diarrhœa, and other diseases, and am most perfectly satisfied with the results."

Dr. M'Grigor Croft, late Army Staff, says:—"It is a most valuable medicine."

Dr. Gibson, Army Medical Staff, Calcutta:—"Two doses completely cured me of Diarrhœa."

Government supply both the Army and Navy with it. A Sheet of Medical Testimonials accompanies each Bottle.

Sold in Bottles, 2s. 9d. and 4s. 6d., by all Chemists. None genuine without the words

"DR. J. COLLIS BROWNE'S CHLORODYNE" on the stamp.

SOLE MANUFACTURER:—

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor

THE BANGKOK DOCK COMPANY'S NEW DOCK.

This magnificent Dock is now ready to receive Vessels of any burthen, and the attention of Shipowners, Agents, and Masters is respectfully solicited to the advantages for REPAIRING and SPARRING VESSELS, which no other Dock in the East can offer.

The following description of the Premises is submitted for the information of the public. The dimensions and depth of water being:—

Length ... ... 300 feet.
(To be extended.)
Breadth ... ... 100 „
Depth of water ... ... 15 „

The Dock is fitted with a Caisson, has a splendid entrance of 120 feet from the River, with a spacious Jetty on each side, where vessels of any size may lay at any state of the tides, to lift Masts, Boilers, &c., with powerful Lifting Shears, which are now in the course of construction.

The Dock is fitted with Steam Pumps of great power, insuring despatch in all states of the tides.

WORKSHOPS.

The Workshops comprise the different departments of Shipwrights, Mast and Block Makers, Blacksmiths, Engineers, Foundry, &c.

The whole being superintended by Europeans, who have had many years' experience in the different branches.

The workmen are the best picked men from Hong Kong and Whampoa.

The Company draws particular attention to the great advantages this Dock offers, being in a Port where the best Teak and other Timber can be had at the cheapest cost.

A Steam Saw Mill is also in connection with the Dock, to insure despatch in work.

The Keel Blocks are four feet in height, and can be taken out or shifted without cutting or causing any expense to ships having to get them removed.

The Company is also prepared to give estimates or enter into Contracts for the Repairs of Wooden or Iron Ships, the Building of New Ships, Steamboats, &c., or any kind of work connected with shipping.

All Material supplied at Market price. Vessels for Docking may lay at the Company's Buoys or Wharf free of charge, until ordered to remove by the Superintendent.

Captains of vessels before leaving the Dock must approve and sign their Dockage Bills.

All communications respecting the docking to be addressed, until further notice, to the undersigned, by whom all Bills will be signed and collected.

JOHN BUSH, Managing Director.

Bangkok, 18th Sept., 1865.
Hong Kong, 20th Oct., 1865.

FORM OF APPLICATION FOR SHARES.

To the General Agents of the China Traders' Marine Insurance Society of Hong Kong (Limited).

Gentlemen,—I hereby request that the Committee will allot to me shares in the above Company, and I agree to accept such shares, or any less number which may be allotted to me, and to pay the first call of One thousand Dollars per Share, and further calls to such amount and at such times and in such manner as may be authorised by the Articles of Association of the said Company, and to subscribe the Articles of Association when called on to do so.

I am, Gentlemen,
Your obdient Servant.

Hong Kong, Sept. 7, 1865.

PORT OF AMOY.

SHIPOWNERS, AGENTS and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer, and a Blacksmith. Dry Godowns for the reception of vessel's stores, &c., when requiring to discharge them.

By Special Appointment
TO HER MAJESTY QUEEN VICTORIA.
BRANDS ON CASES AND CASKS.
FROM CHILLINGWORTH & SON WINE MERCHANTS TO HER MAJESTY, LONDON.
Seal on Corks.
Brand on side of Corks.
CHILLINGWORTH
Brand on end of Corks.

CAUTION.

WHEREAS Persons are shipping Wines to India marked with a Crown in imitation of CHILLINGWORTH and SON'S WINES, which are branded with a Crown, they having the appointment of WINE MERCHANTS to HER MAJESTY QUEEN VICTORIA, it is deemed expedient for the protection of dealers and consumers of their superior Wines selected from their extensive and valuable stock expressly for the Indian market, which have been so well known and approved by connoisseurs for the last thirty years for their extreme quality and purity, combining flavour and softness, together with great age, body, delicacy, and bouquet, being more free from acidity or alcohol that any other Wines, to caution all purchasers to ask for

CHILLINGWORTH & SON'S
CROWN SHERRIES AND OTHER WINE

And to be particular in observing that the Cases and Cask-heads are branded with their names at full length; also, on the side of the Corks, inside the bottles, as well as the Crown; and also on the seals, in accordance with the heading of this notice, as a necessary precaution, to ascertain that they are CHILLINGWORTH and SON'S CROWN WINES, in order to prevent a common low class of Wines being improperly foisted on the public, and which are in no way to be compared with those of CHILLINGWORTH and SON'S.

Wholesale Agents:—Bombay, Messrs. Hormarjee Bomanjee and Co.; Madras, Messrs. Parry and Co.; Calcutta, Messrs. Gordon, Stuart, and Co.; Kurrachee, Messrs. Hormarjee Bomanjee and Co.; Colombo, Messrs. Darley, Butler and Co.; Rangoon, Messrs. Gladstone, Wyllie and Co.; Hong Kong, Messrs. Robert S. Walker and Co.

HUBBUCK'S PATENT WHITE ZINC PAINT.

THE most durable and beautiful paint known, is cheaper than White Lead, and is proved to be superior for all purposes than the pernicious Lead Paint, and equally adapted for all climates.

Its whiteness is unaffected by bilge water, boiling sugar, or noxious gases.

It is free from any poisonous ingredient, and suited in all respects to the use of the painter.

Each Cask of Pure White Zinc is Stamped "HUBBUCK, LONDON PATENT."

Inferior Zinc Paint, so marked, having been sold in Foreign Markets, the Patentees offer a Reward of FIFTY POUNDS for information which will lead to the conviction, in an English or Colonial Court, of those who have pirated their Mark. Both Exporters and Retailers are liable for its sale.

THOMAS HUBBUCK AND SON,

WHITE LEAD, OIL, PAINT, AND VARNISH WORKS,
24, LIME-STREET, LONDON.

HUBBUCK'S ANTI-CORROSIVE PAINTS

Are very durable, and the most valuable protection to Iron Roofs, Bridges, Piers, Ships and Buildings, exposed to stormy weather and scorching sun; they soon become extremely hard, and do not blister.

They are made of Stone, Slate, Copper, White, Blue, Green, or any other Colour that is desired.

HUBBUCK'S ANTI-OXIDATION COMPOSITION,

For Coating Iron and Wood Ships' Bottoms; a preservative against fouling and corrosion. This Composition is ready for immediate use, and obviates the waste of carrying unmixed Paints, Oils, Driers, &c. It is also applicable to all the purposes of other Paints.

HUBBUCK'S PALE BOILED OIL

Has less colour than Raw Linseed Oil, is a quick, hard and certain drier for White and Light Coloured Paints

PAINTS AND OILS PROPERLY PACKED FOR EXPORTATION.

BOYVEAU LAFFECTEUR'S ROB.

The only one authorised and adopted in France, Belgium, Austria and Russia.

THIS Vegetable Syrup, prepared and guaranteed genuine by the signature of Dr. GIRAUDEAU DE ST. GERVAIS, is very superior to the purifying syrups. It effects a radical cure, without mercury, in all affections of the skin, scurf, scrofula, &c., and symptoms arising from the acrid state of the humours. The Rob is especially valuable in diseases which have resisted the effect of mercury or iodide of potash. The general entrepot of 12, RUE RICHER, PARIS.

Sold Retail.—London: Jozeau, Hannay. New York: Fougera, Gaudelet, Milhau. Gibraltar: Patron and Danilowich Malta: Dr. Pirotti, Bugeja, Magri, and Rolando, Esperanza. Alexandria: Bellamore, Galette, Perinie, Bombay: Framjee Nesserwanjee and Co. Singapore: Martin and Little Batavia: L. Platon and Co. Macao J. D. Freath.

Bottled Ales and Wines, &c.

"NO BUYERS for the BEST BRANDS, unless RE-PACKED," in consequence of repeated BREAKAGE.—Melbourne Journal of Commerce, Nov. 16. Heating and Breakage entirely prevented, and 15 per cent. saved in Freight of Cases by using SYMER'S BOTTLE PACKINGS AND COOLERS. Price ½d. per doz. Bottlers contracting for large quantities effect so great a saving in labour, &c., that they can supply them at one-fourth less in price to Shippers, who will find it most profitable to order their goods to be so packed in future. In use by all the leading London houses.—T. WHITEHEAD, 37, EASTCHEAP, E.C Sole Manufacturer.

HOLLOWAY'S PILLS.—ILL-CONDITIONED STOMACH.—Few persons, save those who have long endured the hydra-headed disease called Dyspepsia, can form any notion of the great expense chronic Indigestion entails on muscle, nerve, mind, and temper. In the early stages of this protean malady the purifying, regulating and aperient Pills invented by Professor Holloway exert the most wholesome power by accurately adjusting the functions of the stomach, liver, bowels, and the minor organs subserving the solution of man's daily food. In confirmed debility of digestion Holloway's Pills are likewise reliable remedies which may be confidently resorted to in all stomachic, hepatic, renal, and alvine derangements, without the slightest doubt of their ability to release the sufferer from almost insupportable misery.

Silk, Alpaca, Gingham Steel Frames, Canes, Fittings and all kinds of Materia for the Trade. Oiled and japanned silks and cambrics.

CAUTION.

THE GROSS FRAUDS which continue to be practised by obscure manufacturers, more particularly in Germany, by imitating the Labels attached to JOHN GOSNELL and Co.'s PERFUMERY, render it imperative upon the Proprietors to Caution the public against such nefarious proceedings, and to request their friends and patrons to purchase only of respectable dealers, who import direct from JOHN GOSNELL and Co., and invite special attention to the address, 12, THREE KING-COURT, LOMBARD-STREET, LONDON, E.C.

JOHN GOSNELL and Co.'s SELECT PERFUMES.—Ess Bouquet, Royal Yacht Club Bouquet, Jockey Club Perfume, Essence of Wood Violet, Victoria Bouquet Garibaldi Bouquet, Frangipanni, Military Bouquet, The Bride's Bouquet, Tea Rose, Russian Leather Perfume.

JOHN GOSNELL and Co.'s Stereodesmic or Dentists Tooth Brushes and Trichosaron Hair Brushes, warranted to purchasers.

JOHN GOSNELL and Co.'s Instantaneous Hair Dye.

JOHN GOSNELL and Co's Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty and by Special Appointment to H.R.H. the Princess of Wales, London.

Keating's Cough Lozenges.

JUDGED BY THE IMMENSE DEMAND this Universal Remedy now stands the first in public favour and confidence: this result has been acquired by the test of fifty years' experience. These Lozenges may be found on sale in every British colony, and throughout India and China. They have been esteemed wherever introduced. For COUGHS, ASTHMA, and all affections of the Throat and Chest, they are the most agreeable and efficacious remedy.

Prepared and sold in boxes and tins of various sizes, by THOMAS KEATING, Chemist, &c., 79, St. Paul's Churchyard, London. Sold retail by all druggists and patent medicine vendors in the world.

N.B.—To prevent spurious imitations, please to observe that the words "KEATING'S COUGH LOZENGES," are engraven on the Government Stamp of each Box without which none are genuine.

The following telegrams have been published under date Shanghai, Dec. 26, but they are not confirmed by the mail now delivered. Sir Rutherford Alcock had arrived in Peking, and the Court differences had been amicably settled. Prince Kung's administration was giving satisfaction, but the Cabinet was unfavourable to foreigners, and difficulties were consequently apprehended. The Nienfei rebels were appearing in large numbers in the North, but no active measures had yet been taken to oppose them. News from Japan states that local disturbances continue to occur. The Daimios were steadily filling the arsenals and improving their naval and military tactics.

List of Passengers.

PASSENGERS INWARD.

By this mail, per P. and O. Company's steamer Ripon, arrived at Marseilles Feb. 11.—From Shanghai: Mr. Skeggs. From Hong Kong: Mr. and Mrs. Anderson, Messrs. Pyke and Leavesly. From Singapore: Messrs. Lucardie and Strachella. From Penang: Captain Rouase.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Dates are down to the 18th Dec. There is nothing in the shape of news. The *Japan Herald* and *Japan Times* disagree as to the fact of the ratification of the Treaty; but there is nothing in our advices to justify the doubts indulged in by the *Japan Times* and telegraphed from Galle. The assumption appears to be pure jealousy at not being furnished with the information.

CHINA.

TIEN-TSIN

SHANGHAI.

The dates received by the present P. and O. Mail are to the 25th; the same date as received per French Mail, and published in our issue of the 5th. Advices, however, have come forward to the 27th by a private steamer to Hong Kong. The following summary of news is from the *Shanghai Recorder*:—

The monthly meeting of the Municipal Council took place on the 11th inst. A branch of the Shanghai local post-office has been opened at Ningpo, though the scheme at first met with some opposition. The Council propose opening a general savings bank in Shanghai.

Digitized by Google

The Committee of the Shanghai Chamber of Commerce had an interview on the 13th with Sir Harry Parkes respecting the new tariff to be introduced in Japan, which, we understand, is to be made as nearly as possible analogous to that embodied in the treaty of Tientsin, and a system of drawbacks will, if possible, be introduced.

The Chamber of Commerce has also recommended that the new dollar to be struck at the Hong Kong Mint should have a fixed device. The dies for a design of Victoria have already been made; and as it appears unlikely that this can now be altered, it is not improbable that this device will be made permanent and the Victoria dollar become as well known in China as the Carolus and Mexican. It is certainly desirable that the design be not changed, as by that course the value of the coin would be much lessened in the eyes of the Chinese.

At the monthly meeting of the North China Branch of the Royal Asiatic Society, on the 12th, Mr. Alabaster read a very interesting paper upon the Buddhist Ideas of Hell, illustrated by variour Chinese pictures. The ideas entertained upon this subject bear in some instances a curious analogy to many with which we have long been familiar. The principle of retribution is not the only one which is thought to be attained by punishment after death; but there are evident traces to be found of the ideas of purification and regeneration, though they appear to be vague, and to partake at once of the doctrines of purgatory and the Pythogorean doctrine of the transmigration of souls. Most of the notions entertained are, however, of an extremely materialistic nature. Mr. Kingsmill read some extracts from his resumé of the events during the year now drawing to a close; which, though it will doubtless be a valuable means of reference for events, was not, we think, sufficiently condensed to form a paper fit to be read before a society. Sir Harry Parkes, after complimenting Mr. Kingsmill upon his paper, expressed his pleasure at the able manner in which the society had been conducted during his absence, and also thanked them for the address which he had received when in Japan.

A notification has been issued calling attention to the fact that all British subjects must register themselves at the Consulate. Those who belong to the artisan class will have to pay $1 fee; but others will be charged $5. This sum is certainly rather high.

Though business during the past fortnight has not been so extensive as before the departure of the mail, prices have been fairly maintained in the leading markets. In imports the market has been slightly in favour of buyers, the advices from home of a decline having affected the tone. There is, however, a very sensitive feeling, and should the telegrams by next mail advise a rise they would no doubt produce a corresponding effect here. In Black Tea there has been very little doing, only 22 chops having been settled. In Greens an extensive trade has been done, chiefly for England, 24,450 half-chests having been settled. In Silk there has been some activity, and an advance of 20 to 30 tls. per picul upon last mail's quotations. In Cotton there has been a slight decline in prices. Supplies come forward more abundantly, but are damp and of inferior quality.

RUMOURED ABOLITION OF THE FOREIGN INSPECTORATE OF CUSTOMS.

A rumour has got about of an intention on the part of the Chinese Government to do away with the foreign element in the Custom-house. This report has gained some currency, but it would certainly appear to be without foundation, and we are not surprised that little credit is attached to it. It is not improbable that it had its origin in the negotiations between Mr. Wade and Prince Kung respecting rules as to cargo confiscated by the Customs, the true bearing of which may very likely have become misunderstood by the natives. The first question that naturally arises is, what interest the Chinese could have in doing away with the foreign element in the Customs? The immediate result would be a loss of revenue and a recurrence to the old state of affairs before the establishment of the Inspectorate. Tariffs and regulations would be a mere name, and smuggling become again the recognised order of the day. However ignorant the Chinese officials in Peking may be, they cannot fail to be aware of the fact that the foreign Inspectorate of Customs has been productive of handsome revenue, and any desire on the part of the inferior officials to do away with the present system in the hope of again being able to enrich themselves out of the duties, would be futile. It is not likely that the most ignorant of the Chinese officials can imagine, after the experience they have had, that such an establishment as the foreign Custom-house could be satisfactorily conducted by Chinese without the assistance of foreigners; and it would, therefore, appear in the highest degree improbable that the native authorities would wish to attempt such an experiment. It may, however, be that the Chinese set the rumour afloat with the object of gaining better terms from foreign Governments respecting Custom-house regulations. They may have hoped that, by hinting at overthrowing the present system, they would be able effectually to squash any objections to the establishment of such rules with regard to confiscations as would be in accordance with their interests. If such was their idea, they have certainly succeeded by obtaining the concessions from Mr. Wade embodied in the four rules recently published. There is, however, a third hypothesis, but one which we scarcely think probable, upon which this rumour might be accounted for, namely, that by having their independent jurisdiction in disputes with reference to confiscations recognised in the way in which it has been by the new rules, the Chinese authorities may have seen such an accession to their powers as may have led them to suppose that they can, without the expense of foreigners in their employ, gain all the advantages of an Inspectorate. We can scarcely, however, imagine that even the most infatuated Chinese official can have seriously entertained such an idea; and it would, therefore, seem that the rumour which has gained currency is either altogether unfounded, or is only a feint of the Chinese Government, by which they hope to gain some other end than the one which they wish to represent themselves as desirous to attain.

HONG KONG.

The dates of the present mail are to the 1st January, or three days later than per French mail published in our issue of the 5th inst. Nothing of any importance had transpired, and we welcome a correspondent's letter detailing the Canton of the present day, which will be found interesting. The following items are from the *China Mail*:—

The weather is assuming a more determined air, and suggesting associations connected with Christmas by a temperature of about 60 and under. The Supreme Court has been occupied for two days with the disposal of the last month's crime. Nine Chinese pirates have been sentenced to death; but it is to be feared they may escape such a desirable consummation of their career by a commutation of sentence.

We have been informed of a report being circulated to the effect that Captain Quin is about to resign his post of Superintendent of the Police, and that Mr. Tonnochy is to be pushed into that office. We have no hesitation in saying that, were Captain Quin to resign, Mr. Tonnochy would, likely be the person to whom the superintendency would be offered; but there is, to our knowledge, no change contemplated.

In Macao, things are going from bad to worse every day. The large number of ships engaged in the coolie trade, and the enormous amount of money offered for coolies, turn every honest Chinaman's heart, and we daily hear of kidnapping and other outrages committed on the unprotected and unwary. In order to mitigate this evil, the agents for Cuba and Peru have lately commenced giving better *chau-chau* to the coolies whilst in the barracoons; and we hear that, after they are softened down to compliance, they are made tolerably comfortable, not in order to remove the stigma of slavery, but, in fact, from no other motive than to keep them in a good condition that they may fetch a high price in the market. We trust France will soon withdraw her protection from this nefarious traffic, when the whole will cease to disgrace the Christian name in China.

We have been favoured by Captain Mortinsen, of the Hamburg barque *Looling*, now in Amoy, with the following report:—

On the 12th December information was forwarded to H.M.'s gunboat *Grasshopper* that a fleet of pirates were in the vicinity of Amoy. She accordingly got up steam, and left the harbour at midnight. On the 13th at 2 A.M., two hours after her departure, arriving in Chimmo Bay, she fell in with three piratical junks, and another, a trader, which had been captured by them. The pirates fired one shot; which, however, did not fall near the gunboat, who replied with a shell. They then took the water, and succeeded in reaching the shore. The commander of the gunboat, quickly landing his crew to pursue them, managed to capture nineteen of their number, about fifty others escaping. The *Grasshopper* returned to Amoy the next day, and delivered the miscreants to the native authorities. The captain of the captured trading junk had been killed by the pirates during the fight. The leader of the last batch of

Digitized by Google

pirates captured had been flayed alive, it is said, in a most elaborate style.

H.B.M.'s gunboat *Opossum*, Commander St. John, has again been successful in her endeavours to quell piracy on the coast. In Bias Bay she captured a large piratical junk and eighteen of her crew, which she delivered over to the Chinese authorities.

A new tea-clipper, named the *Ariel*, commanded by Captain Keay, late of the *Falcon*, arrived in harbour on the 14th Dec., after a very fine passage of 99 days. She is intended as a rival to the *Fiery Cross* and *Serica*, and will probably prove a formidable competitor. Her builders are the well-known Messrs. Steele and Co., of Greenock. She is a beautiful model; and, taking her altogether, we consider her to be the finest and prettiest craft we ever set our eyes upon.

The British ship *Thomas Seddon* reports having had moderate weather until entering the China Sea, since which period she has encountered a succession of strong gales. On Oct. 17th, when in lat. 10.59 N., long. 96.49 E., held communication with the barque *Nebuddar*, from Penang bound to Rangoon, out 30 days; and Oct. 24th, in lat. 15.14 N., long. 19·57 W., the ship *Peilades*, from Hong Kong bound south.

The American ship *Santee*, while leaving the harbour, bound to Manila, on the 29th December, through the negligence of the Chinese pilot who was in charge, ran into the P. and O. Co.'s steamship *Aden*, which vessel was lying alongside the *Ottawa*, knocked away her mizen-mast, port chain-plates, &c. &c., and caused very considerable damage. The pilot, simultaneously with the vessel's striking, jumped overboard. The *Santee* has anchored, awaiting the result.

(To the Editor of the *Daily Press*.)

Sir,—The following information may be of use to master mariners and others not acquainted with the S.W. end of Formosa. The British schooner *Julia Ann*, under my command, left Hong Kong on the 30th November, laden with a very valuable cargo bound to Yokohama in Japan. I worked up the coast as far as Breaker Point according to the general directions given. I then took my departure intending to go round the S.W. end of Formosa, which island I sighted on the 3rd of December; at 5 P.M. I sighted the shipping in the harbour of Taicow. Steering along close in shore with a depth of about 8 or 9 fathoms, as shown by the *Rifleman's* charts of 1863 and 1864, and apparently a bold coast, I was making to the anchorage as shown on the chart above mentioned inside of Cambay Island. The lead going but gave no bottom at 6 fathoms, when suddenly I struck on a very hard sand spit which runs off shore about three miles and not marked on the *Rifleman's* chart of 1863, although the anchorage is marked about one mile off shore; now had this extensive sand-bank been marked on the chart I should have saved a very valuable cargo and ship from destruction, as the vessel and nearly all of the cargo is totally lost. W. LEONARD, Master of *Julia Ann*.

Taicow, Formosa, 11th December, 1865.

The following mercantile notices have appeared:—

The interest and responsibility of Mr. Thomas S. Odell in our firm ceased on the 31st December, 1865, and Mr. Earnest Deacon has this day been admitted a partner. Deacon and Co., Canton, January 1, 1866.

The interest and responsibility in our firm of Mr. Robert Richard Westall and Mr. Randal Humpston Chambers ceased on the 31st ultimo, and Mr. William Hargreaves is this day admitted a partner. Our partners in China now are Mr. William Hargreaves, Mr. Robert Brand, and Mr. Justus William Henry Escherich. Smith, Kennedy, and Co., Hong Kong, January 1, 1866.

The screw steamer *Far East* arrived from Calcutta and Singapore on the 1st January, having experienced very heavy weather in the China Sea.

(FROM A CORRESPONDENT.)

In my last I undertook to give some little account of the present condition of Canton; and having just returned from that place I hasten to put my impressions concerning it upon paper. As I mentioned lately, the means of communication on the Canton River have been lately largely increased by the operations of the Steamship Company, formed to compete with the daily steamers running under the flag of Messrs. Russell and Co., the well-known American firm. Two rival steamers now make the passage each way daily, and although the feeling of personal animosity displayed by Messrs. Russell and Co. has led to such keen competition as reminds one of scenes on the the Hudson or Mississipi, the British company appear likely to prosper and to triumph in the long run, owing to the tact and good fortune of their manager and the general support of the community. A wharf is now in rapid course of construction for the company, to facilitate the landing of goods and passengers, the special sanction of the local Chinese Government having been obtained for the purpose; and as this is the first undertaking of the kind ever proposed at Canton, the concession is somewhat noteworthy, as evincing a readiness to depart from ancient precedents for the good of the mercantile community. The new wharf, the construction of which is watched with much interest by the Chinese, abuts on the old factory site, the desolate condition of which I referred to in my last.

Not even the ruins of the once solid and commodious hongs now remain upon what was once the centre of all foreign commerce with China. The parallelogram of twelve or fifteen acres in extent, which contained during upwards of 150 years the seat of intercourse between the Chinese and foreign licensed monopolists of trade, and their successors, the merchants who crowded to these seas after the war of 1841, is now a grass-grown area, with only a few broken slabs of granite here and there, and vestiges of concrete pathways or areas, to mark the former existence of the buildings which ten years since were so closely crowded within its limits. At the rear the busy hum of the suburbs fills the narrow thoroughfares stretching north and west, whilst along the river bank to the eastward still rise the blackened columns of the native warehouses destroyed by the conflagrations ensuing upon the hostilities of 1856. Further up the river the scene grows more cheerful, for, passing the establishment of the Foreign Customs, a neat building in the European style, the eye rests upon the solid river wall, green croquet-ground, and multiplying buildings of the Shamien site, the new position for British residences. This newly established settlement, occupying perhaps the coolest and most healthy situation in the South of China, (and differing thus greatly from the confined and sultry locality of the old factories) is an artificial island, constructed during the military occupation of Canton by the allied troops, on the site of a sand flat, at the south-western extremity of the suburbs, and immediately facing the broad outlet of the Macao Reach. A solid sea-wall of dressed granite, rising about four feet above the highest level of high water, encloses the site, which was filled in with sand and the rubble derived from the old factory ruins, and forms an oval of about 800 yards in length, and 300 in extreme breadth. A canal 100 feet in width divides this site from the Chinese suburb; and the land itself, divided into lots, was sold some years since to the various merchants. All the British houses and most of the few Germans, with a considerable number of Parsees and Moormen, own lots on Shamien, but owing to the depressed condition of trade, but few substantial houses have been erected. The new buildings of the British Consulate, recently completed, occupy a central position facing the river, and appear to offer ample accommodation to the various officers stationed at this port; and, at the extreme western point, a very neat church and parsonage were among the first buildings constructed. Three or four large houses and as many bungalows are all that have yet been erected by the mercantile community, who have not felt encouraged to do more than erect mat sheds (by courtesy bungalows) for occupation during the summer, retiring for the cold season to the Chinese houses which line the river bank on the side opposite the city. A sad apathy is but too visible by even a transient visitor at Canton. The once numerous British firms have been reduced to barely a tithe of their former number, and these for the most part represented by but a single clerk apiece. The proximity of Hong Kong and the facilities afforded by cheap steam communication have concurred in almost suppressing Canton as a place of foreign business, except for a very limited description of merchandise.

Mr. Cobden's pet theory respecting the manner in which trade should be carried on with China has been in a measure worked out at this place, and the results, as regards the majority of British merchants, is not satisfactory. Cheap continental houses, established at Hong Kong, find great advantage in dealing with the Chinese brokers who visit the colony to transact business; but the result, however favourable to the revenue of Hong Kong, is by no means calculated to advance the interests of genuine British trade with China. Notwithstanding their paucity in numbers and stagnation in business, however, the Cantonions have the reputation of being a sociable and agreeable community, which is more than can be said for many more favoured settlements on the coast.

Some amusement has been excited here by the statement, copied in one of your late numbers from a French source, setting forth the gratifying news that the "Bureau of Sciences and Arts" at Peking had reported favourably upon railways and telegraphs, and strongly recommended their introduction. Probably none but a Frenchman would be ignorant or unblushing enough to speak of a "Bureau of Science and Art" in connection with a Government which knows nothing of science and considers art beneath its notice;

Digitized by Google

but you may rest assured not only that no such "Bureau," or anything like it, exists in China, but that the Chinese Government will resist to the death the spread of what it has already pronounced dangerous and revolutionary innovations. A Russian gentleman, M., or Count Hippolyte, has but recently returned home from Peking, where he has sought in vain the consent of the Government to extend the Russian telegraph from Kiachta through Chinese territory. The hoax I have above referred to probably owed its origin to the inventive mind of the individual who some years ago published an account in Paris of the Peking *Gazette*, a dry and harmless little record of stale official documents, which he described as a daily newspaper of the size of the *Moniteur*, with a *comic* supplement (!) frequently containing caricatures of foreigners. This is worse, if anything, than the "Bureau of Sciences."

SIAM.

BANGKOK.

Dates are down to the 23rd December. A considerable improvement is noticed in business generally. The circular of Messrs. Scott and Co. reports the *Bessie* loading for London, but no arrivals or departures direct with Europe or America. Several were loading for China, Java, &c.

RICE.—The supplies are moderate, and a good demand has sprung up, which causes prices to keep high, but when the market is abundantly supplied, say about the end of next month, or in February, a considerable fall is anticipated. Present rates are as follows:—Common cargo, 55 tls. per koyan. There is still a great deal of water on the ground, which interferes with the harvest, but the greater part will be secured by February. Beyond doubt the crop is the largest that has been produced here for many years.

SUGAR.—There is very little of last year's produce remaining, and for local consumption small quantities command 12¼ tls. per picul for No. 1, and 11½ tls. per picul for No. 2. The growing canes are in a backward state, caused by the large quantity of water still on the ground, and they require another month of dry weather to ripen, so that we do not look for supplies of new sugar arriving to market before February.

JAVA.

BATAVIA.

Great dissatisfaction is felt among all the merchants and tradespeople in Batavia about the narrow-minded laws and regulations at the office of imports and exports, which become so troublesome and unbearable that it is said the port might as well be shut against general trade if this is to be continued. The explanation which the functionaries are pleased to give to the tenor of the laws and regulations under which they are to act and the execution of their duties accordingly, seem to have no small share in adding to this feeling of dissatisfaction.

By order of the Governor-General, the ports of Telok-Betong in the Lampong districts, and Tandjong-Pandan in Billitan have been declared to be free ports from the 1st January, 1866,—Telok-Betong, a port in the Lompong districts, has been nearly destroyed by fire. Loss valued at one million.

The production of coffee and sugar in Java is this year far greater than was expected. The original approximation was: 820,500 piculs coffee, and 1,138,718 piculs sugar, whilst the real production is: 926,741 piculs coffee and 1,786,915 piculs sugar, which will realise about 70 millions.

It is rumoured that Assahan will be incorporated with Siak, so as to form one residence, whereas now Siak is only an assistant-residence.

MALACCA STRAITS.

SINGAPORE.

Dates are down to the 8th January. The P. and O. Mail of 27th November did not arrive out until the 6th January, owing to detention on this side by bad weather. The following notice has appeared:—

Under instructions from the managing directors, Mr. Frederick Dallas Barnes will act as agent for the P. and O. Company at this station until further orders.—S. J G. Jellicoe, agent.

P. and O. S. N. Co.'s offices, Singapore, Jan. 2, 1866.

The past fortnight has been in a great measure given over to the festivities of the season, and few political subjects have come up for discussion. The Chamber of Commerce, however, have again had to protest against the proceedings of the Tumongong of Johore with respect to the produce exports from his territory. The Island of Singapore itself has unfortunately almost ceased to produce those old exports for which it was formerly noted, and what is now termed "Singapore Pepper" and "Singapore Gambier" is almost entirely the growth of the mainland of Johore, from which it is conveyed to the market here in small open boats. For a long time the Tumongong was content to allow these products to pass from his territory unnoticed, deriving no other benefit than the revenue which he exacted from the cultivators, by means of the opium and gambling farms. The Malay potentate however, has of late years become more enlightened as to the advantages which the absolute possession of a large fertile territory in the immediate proximity of one of the largest Eastern markets gives him, and, guided by the advice of tolerably astute advisers, he seems now resolved to turn his position to the best account by changing the market for the produce of his territory from Singapore to his own capital at Tanjong Putri. With this object he has issued what we must take as a preliminary decree, that no produce shall be exported from his country unless it is previously brought to Tanjong Putri and an export permit obtained. No export duty is imposed, but by thus bringing together, from the various rivers by which Johore is intersected, the entire produce of his territory to one point, he will have half accomplished his purpose; and at the other half he is at present dilligently at work This

From an article in the Java Government Gazette of 15th December, 1865, we learn that Mr. H. O. Robinson's Mail Contract for the Eastern Archipelago has been declared null and void, and has been given to the Netherlands India Steam Navigation Company established at the Hague, and represented in Java by Mr. A. Frazer.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

COUPER—On the 25th Jan., at Craigiebuckler House, Aberdeen, the wife of John Cardno Couper, of Whampoa, and of Craigiebuckler, of a son, stillborn.

FRASER—On the 15th Dec., at Shanghai, the wife of James Campbell Fraser, Esq., prematurely, of a daughter.

KERSHAW—On the 27th Jan., at Suffolk Lodge, Brixton-road, S., the wife of William Kershaw, Esq. (Messrs. Kilburn, Kershaw, and Co.), of a daughter.

LOCOCK—On the 28th Jan., at 21, South Audley-street, the wife of Sidney Locock, Esq., Secretary to H.M.'s Legation in Japan, of a daughter.

LYALL—On the 4th Feb., at 14, Gloucester-square, the wife of George Lyall, Esq., of Hong Kong, of a daughter.

WILKINSON—On the 26th Jan., at Carlton-terrace, Hastings, the wife of C. J. Wilkinson Esq., Commander P. and O. Co.'s Service, of a daughter.

YOUNG—On the 31st Dec., at Irwell Bank, Singapore, the wife of Jasper Young, Esq., of a son, stillborn.

MARRIAGES.

BECKER—HJELSTROM.—On the 5th Jan., at St. Andrew's Church, Singapore, by the Rev. C. J. Waterhouse, M.A., Chaplain, Friedrich Albert Becker to Elisabeth, daughter of Captain Hjelstrom, of Rotterdam.

DOYLE—BALL.—On the 6th Feb., at St. James's Church, Spanish-place, by the Rev. Anthony Ball, brother of the bride, assisted by the Very Rev. Monsignore Searle, Henry Edward Doyle, Esq., third son of John Doyle, Esq., of 54, Clifton-gardens, Maida-hill, to Jane Isabella, daughter of the late Right Hon. Mr. Justice Ball, of Stephen's-green, Dublin.

EWING—JONES.—On the 27th Jan., at St George's, Hanover-square, by the Rev. George Eastman, B.D., Harriett Janet Jones, of Laurie Park, Sydenham, to William Ewing, Esq., of Glasgow. No cards.

GWYTHER—BEVIS.—On the 6th Feb., at the Congregational Church, Ramsgate, by the father of the bride, John Howard, son of George Gwyther, Esq., of Upper Holloway, London, to Jane Gidley, eldest daughter of the Rev. H. J. Bevis, of Ramsgate, No cards.

KATZ—SCHWARZ.—On the 27th Dec., at the Synagogue, Singapore, Hermann Katz to Roza Schwarz.

MAITLAND—CROSBIE.—On the 3rd Feb., at St. Matthew's Church, Bayswater, by the Rev. Robin-on Duckworth, M.A., Dean and Tutor of Trinity College, Oxford, cousin of the bride, John Andrew Maitland, Esq., of Shanghai, to Margaret Nicol, eldest daughter of James Crosbie, Esq., of Banff, N.B.

UNDERWOOD—WOOD. On the 8th Feb. at the parish church, Eccles, by the Rev. J. Pelham Pitcairn, M.A., Philip Henry Underwood, of Shanghai, to Eliza Arabella, eldest daughter of John Thomas Wood, of Patricroft House, near Manchester. No cards.

DEATHS.

DONALSON—On the 16th Dec., at Hong Kong, the infant son of Mr. Thomas G. Donalson, Public-gardens.

APPER—On the 29th Dec., at Canton, of extreme debility, Elizabeth Ball, the wife of the Rev. A. P. Happer, after a residence of twenty-seven years in the East, aged 56.

TWISS—On the 24th Jan., at 9, Talbot-terrace, Bayswater, Lieut.-General John Twiss, Royal Engineers, aged 68.

WALKER—On the 26th Nov., on the passage from Melbourne to this port (Hong Kong), of apoplexy, Captain Henry Edward Walker, of the ship Joshua Bates, aged 52.

COMMERCIAL REPORT.

CHINA IMPORTS.

HONG KONG.

COTTON YARN.—This article shows a decline in value equal to about $5 per picul, when compared with the quotations of the proceding fortnight. The only settlement reported consists of 25 bales of very common Twist. Grey Shirtings: There is but little demand at present among the Chinese dealers for these goods, their previous purchases "to arrive" sufficing apparently for their present wants, while the receipts by the Ariel, Ladye Love, and Crest of the Wave have for the time given them large stocks to choose from. Prices show a decline ranging from 15 to 25 cents per piece, and actual sales are reported at 2,500 pieces to Chinese, 14,000 pieces to foreign buyers, and about 6,000 pieces of sea damaged goods sold by auction. White Shirtings: Remain without material alteration to notice in price, and sales are

Digitized by Google

estimated at 3,500 pieces for the fortnight. T-Cloths: Have participated to some extent in the decline experienced by unbleached Long Cloths, and the settlements for the past fortnight are estimated at 1,000 pieces on the spot, and 1,500 pieces "to arrive" at a decline of about 10 cents per piece. American Drills: Quotations are purely nominal, there not being any of this class of goods on the market. White Spotted Shirtings, Dyed do., Brocades White and Coloured: The settlements of these goods during the fortnight consist of 2,870 pieces of Dyed Brocades, and there does not appear to be any inquiry at present for Spotted Shirtings. Damasks and Chintzes: 100 pieces of Turkey Red Cloth have found buyers. Handkerchiefs: There are not any sales of these goods to mention.

RAW COTTON.—Moderate supplies of this staple continue to come forward from India, and the Northern Ports of China, but the dealers restrict purchases to the supply of immediate wants, and settlements for the fortnight do not exceed 4,000 bales of all kinds. Prices have declined to the extent of about $3 per picul. In the Canton market the sales since the date of last report are estimated at 1,800 bales, a decline in value amounting to tls. 1 to 2 per picul.

WOOLLENS.—Spanish Stripes, Medium Cloths, Ladies, and Habit Cloths: The first mentioned have met with a fair amount of inquiry during the past fortnight, and have been purchased to the extent of 1,050 pieces; prices remain without alteration. Long Ells: A further trifling decline has to be noticed in the value of these goods, which have met with a fair amount of inquiry since the date of last report. Sales are estimated at 1,500 pieces. Camlets remain unchanged in price, and settlements consist of 560 pieces of English manufacture. Lastings: The sales of the past fortnight are estimated at 380 pieces. Blankets: There have not been any sales of these goods reported.

METALS.—Iron Nail Rod, &c.: A moderate amount of business has been transacted during the fortnight in the various descriptions of iron imported for sale to this market, and the settlements are put at 850 piculs of Nail Rod, 350 piculs of Bar, 450 piculs of Hoop, and 370 piculs of Iron Wire. The purchases in the Canton market are restricted to Nail Rod, of which 1,100 piculs have found buyers. Lead: Is slightly dearer in price, and has met with moderate inquiry both in this and the Canton market. The sales reported are 2,600, and 1,150 piculs respectively, while in Foochow 1,670 piculs have been placed against Tea, at the equivalent of $6.50 to 7 per picul. Tin: 250 slabs have found purchasers. Tin Plates: Without sales. Steel: Meets with but little inquiry.

COALS.—Hong Kong: The arrivals since last report amount to 3,600 tons of English and North Wales qualities, of which 1,000 tons even for consummers and 1,600 tons had been sold to arrive at $14. The remaining 1,000 tons will probably realise the same price, but are held for an advance. Australian scarce and in demand, and may be quoted $10·50 to $11. Shanghai: There has been a less active market for coals during the past fortnight, and but few sales can now be reported. Quotations from ship here are:—For English steam coals, 10 to 10·5 tls. per ton; Cardiff, 10 to 11·5 tls. per ton, and nominal for both; American 14·5 to 15 tls. per ton, with sales; Sydney, 8·7·5 to 9 tls. per ton; Japan, 8 tls. per ton; Keelung, 6·5 to 7 tls. per ton, with sales.

CHINA EXPORTS.

CANTON.—A very limited business has been done in this market since the date of our last, owing partly to the news received from home by the last two mails and partly to buyers holding off during Christmas time. The principal transactions have been for America, to which country a display of eagerness to forward shipments has been shown; prices remain nearly the same as those last quoted.

AMOY.—During the fortnight a good steady business has been done for America at about previous rates. There are still about 5,000 packages to arrive from the country, but they principally consist of very common and inferior descriptions.

FOOCHOW.—The Tea market has remained active during the fortnight. Congous: On receipt of the London mails of 10th and 17th October buyers entered the market, and in a few days swept off nearly the whole of the remaining stock, thereby causing an advance of from one to two taels. Latterly transactions have become restricted, owing to the smallness and the poor assortment of what remains unsold. Oolongs have been in good demand at previous quotations, other kinds have been dealt in to a small extent at previous quotations.

SHANGHAI.—Black Teas: The stock on offer at date of our last has been cleared at previous rates. About 4,000 chests of common Oonam and Ningchow have since arrived and been placed on the market, which when sold will nearly close our export for the season. There will no doubt be a deficiency of 5,000,000 lbs. in the shipments from this and the river ports as compared with last year's. Settlements amount to 75,000 chests common Oonam to fair Ningchow kind, at tls. 20 to 28. There have been no re-shipments, and the stock comprises only 3,500 chests.

HANKOW.—Settlements during the fortnight amounted to something over 4,000 chests at fully up to previous rates. The supply of country packed tea had come to an end. The stock comprised only 1,800 half-chests Hankow packed tea, and the season might be considered closed. Quotations were, Oonams, common to fair, tls. 15 to 16½. Total shipments to date, 670 chops or 325,000 chests or 32,706,500lbs. against, 715 chops or 363,000 chests or 36,200,400lbs. to same date last year.

KIUKIANG.—Black Teas: Of Hohow and Ningchow tea 1,570 packages had arrived and been taken at once, and 330 packages Ningchow shipped to Shanghai on native account. No tea was left on the market. Quotations were, Ningchows, common to fair, tls. 20 to 22; Hohows, common, tls. 12¼ to 14. Total shipments to date, 113,200 chests or 8,748,100lbs., against 116,100 chests or 9,421,600lbs. to same date last year. Green Teas: The high rates for which the teamen are firm in holding their stocks had rather deterred buyers, and only 4,400 half-chests had been settled. These sales showed no decline in rates, tls. 42½ having been paid for "Teen-mow" second crop. In addition to the sales 11,000 packages had been shipped to Shanghai, partly contracts partly on native account, and about 13,000 packages were left on the market against 114,300 packages at same date last year. The estimate of total supply at Kiukiang for the season is now 140,000 packages, against 230,000 last year. This deficiency is partly due to some of these teas having reached us this year via Ningpo. Quotations were—Fychows and Moyunes common to fair, tls. 25 to 34; fine to finest, tls. 36 to 42½. Total shipments to date—85,900 half-chests or 5,167,900 lbs., against 28,400 half-chests or 1,686,000 lbs. at same date last year.

YOKOHAMA.—The demand for teas has been unabated during the past fortnight, and a further advance has taken place for fine descriptions. Great complaints have been made of the parcels brought forward for the past month, on account of their being much mixed with coarse and common leaf, notwithstanding which they have all been taken at high prices. The stock is now less than it was two weeks ago, and the settlements are estimated at about 4,000 piculs. The quotations are—Common, $19.50 per picul; good common, $21 to 24 per picul; medium, $27.50 per picul.

RAW SILK.—CANTON.—Very little of the 7th crop has yet come forward, and settlements consist principally of the 6th crop and of the commoner grades. Holders are still very firm, and prices have again advanced upon almost all kinds. Buyers are, however, holding off for the present which will probably make settlements in the course of a few days somewhat easier to effect. The settlements of the fortnight are reported at 400 boxes and 450 bales—in addition to which 150 bales pierced Cocoons and 150 do. Waste Silk have been placed. Loong-kong, No. 1, $600 to 610 per picul; No. 2, $585 to 595 per picul.

SHANGHAI.—There was little doing in this market till the last mail arrived, when the continued reports of high rates at home with prognostications of still higher ones for the future caused an active demand till settlements amounted to 1,200 bales. Fine kinds have been most sought for, and the equivalent of 33s. per lb. has been paid for one parcel chop Tsatlees the highest price ever known in China. Our quotations show an irregular advance of from 10 to 30 taels per picul. The arrivals have been very moderate, and the stock is down to 1,500 bales. Quotations are:—Tsatlees, chops No. 1, tls. 630 to 640 per picul.

YOKOHAMA.—The dealers have shown a desire to dispose of their produce, but being unwilling to do so at a reduction in price, and in view of the non-arrival of the London and Continental advices till late, no inducement was offered for extensive operations. The settlements amount to about 450 shipping bales, leaving a large unsold stock, estimated at 2,000 native bales, principally consisting of medium and inferior grades of hanks, with a few parcels of Koshiu and some Oshius and Sodais; there is also included in the above a great quantity of silk, which, having been rejected by foreigners for its inferiority has been replaced on the market. Mybash and Sinchu $750 to $890.

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Private.
At Yokohama	6 months sight.	4s. 6¼d.	4s. 7d. to 4s. 8d.

From SINGAPORE.—For London: (*via* Cape of Good Hope), Jan. 6, Latona; For Falmouth: Hermelin. For Liverpool: Dec. 30, Arab Steed. For Europe (*via* rice ports), 26, Teresa. For New York: 30 Caroline Elizabeth. For Boston: 29, Alexander.

LOADING.

At YOKOHAMA.—For London: Cleveland. For New York: Flatworth, Monkchester, Lucerne.

At SHANGHAI.—For London: Rajah of Cochin, Peter Denny, Petchelee. For New York: Memento, Indus, Horatio.

At FOOCHOW.—For London: Ocean Spray, Albuera, Assyrian (all full).

At HONG KONG and CANTON.—For London: Victoria. For New York: Gem of the Ocean, Antelope, Dan.

At MANILA.—For London: Monsoon, Moulin. For Falmouth: Ferozepore. For Hamburg: Voladora. For New York: Goethe.

At SINGAPORE.—For London: William Simpson, County of Ayr. For Falmouth: Auguste and Meline. For Bordeaux: Mohely. For United States: Agnes, Borneo, Chineseren, Fritz and Anton, James Paton.

VESSELS PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA, &c.—December 18, Glencoe, from London to Shanghai; 23, Taymouth Castle, Glasgow to Singapore; 24, John Bunyan, Cardiff to Shanghai; 4, William and Clara, Amsterdam to Batavia; 5, Hugo Grotius, Rotterdam to Batavia.

From CHINA, &c., to ENGLAND and CONTINENT.—December 5, Forerunner, Singapore to Falmouth; Beemah, Foochow to London; Santon, Macao to London; 8, Betsie Stanton, Japan to London; Hercules, Batavia to Amsterdam; 9, Invincible, Shanghai to London; 10, L. E. Ashby, Shanghai to London; Corea, Foochow to London; Robin Hood, Shanghai to London; Horsa, Shanghai to London; Waalstroom, Shanghai to Amsterdam; 13, Favorite, Samarang to Channel; 15, Brunswick, Singapore to Liverpool; Lottie Warren, Manila to London; 16, Louis Meyer, Batavia to Holland; 19, Bessie, Bangkok to Falmouth; Aldebaren, Foochow to Falmouth; 20, Chanticleer, Japan to London; Singapore, Foochow to London; Rosella, Singapore to London; 22, City of Quebec, Shanghai to London.

From CHINA, &c., to UNITED STATES.—December 11, George Beeker, Shanghai to New York; 12, Madagascar, Manila to New York, Nabob, Foochow to Boston; 20, Atilla, Singapore to New York; 23, Oscar, Shanghai to New York.

FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London: Tea and Cotton, £2 to £2 10s.; Silk, £3 to £3 10s.

At SHANGHAI.—There is no improvement to notice either for home or coasting, the vessels on the berth for London are loading slowly at 30s. per ton of 50 cubic feet, and those for New York at £2 per ton of 40 cubic feet. To the rice ports there is no inducement offering.

At HONG KONG.—A good demand for tonnage from the rice ports has existed, and rates have gradually improved, varying from £2 5s. to £3. Several home charters from the Canton waters have been made as follows:—The Victoria, chartered for London at £1 to £1 15s. per ton, and the Antelope and Dan have been taken up for New York, the former at £1 10s. and the latter at £1 12s. 6d. per ton; for Hamburg the Iris and the Uranus have taken the berth, the former is loading at £1. 15s. to £2 per ton; according to the circular of George Holmes, the estimated number and tonnage of disengaged vessels in harbour is 52 vessels and 26,903 tons.

MANILA.—The Labrador completed her cargo at £2 for unclayed sugar and the same rate for hemp. The Moulin, for London, has engaged about 200 tons hemp at £2 5s. per ton.

SINGAPORE.—Vessels have been in fair demand to load for Europe from the Birmah rice ports at gradually advancing rates. The highest paid have been £3 5s. per ton to the United Kingdom, or £3 10s. if sent to the Continent.

CASUALTIES.

FOOCHOW.

On the 24th December the barque Eurydice, tea laden for London, in passing down the "Min" struck on Pagoda rock and had to discharge all her cargo.

COMMERCIAL POSTSCRIPT.

The prospectus of the Mont Cenis Railway—which will reduce the time (in conjunction with steamers from Brindisi) to India and China, by two days—has been issued, and will be found in our advertising columns. In addition to the route being shorter, it will be also an agreeable change *en route* to Alexandria to proceed from Paris to Macon, thence over Mont Cenis to Turin. Alessandria, Bologna, Ancona, on to the port of Brindisi, and thence to Alexandria.

ARRIVALS NOT INCLUDED IN THE TABLES.—Feb. 6, off the Start, from Batavia, Zephyr; 5, off Scilly, from Batavia, Dageraad; 9, at Deal, from Singapore, Rowena; Jan. 25, at Boston, from Manila, Ocean Rover; Feb. 9, at London, from Hong Kong, Minnie; at Queenstown, from Manila, Edward; 9, at London, from China, Herald, from Ceylon, Liberator; Feb. 8, at Texel, from Batavia, Elshout, Galilei; from Samarang, Franklin; at Brouwershaven, from Pasaroeang, Pudsey Dawson; 9, at London, from Colombo, Iono; at New York, from Penang, Casilda; 8, at Marseilles, from Sourabaya, Triton; at Queenstown, from Manila, Armstrong; 12, at Liverpool from Manila, Gloucestershire.

DEPARTURES.—Feb. 8, from Sunderland for Hong Kong, Caldew; 9, from London for Yokohama, Isles of the South; for Newport and Hong Kong, Ariosto. Feb. 9, from Cardiff for Shanghai, Pauline; 6 from Broomielaw for Singapore, Huntly Castle; 10, from London for Shanghai, Westminster.

SPOKEN.—St. Vincent de Paul, Saigon to Toulon, Dec. 28, 9 S., 12 W. Challenger, London to Japan; Jan. 13, 1 N. 23 W. India, Rotterdam to Bataiva, Dec. 18, 21 S., 35 W.

LAID ON.—At Glasgow: For Batavia, Sam and Srbya, Betty; for Colombo, Swanley. At London: For Shanghai, Aurora Australis; for Yokohama, Minnie.

CASUALTIES.—The Dageraad, Dumker, which arrived at Brouwers-

Digitized by Google

haven Feb. 8, from Batavia, had lost both anchors in the roads, and has sailed for Dykwater; assistance has been sent to her.

MISCELLANEOUS.—Off Ascension: Dec. 29, from Sourabaya for Amsterdam, Lady Alice.

Off ST. HELENA.—Jan. 1, from Batavia for Flushing, Susanna and Elizabeth.

At TABLE BAY.—Dec. 15, from Hong Kong, Constance.

At MAURITIUS.—Dec. 28, from Yokohama, Bessie Stanton, Cole.

THE ROYAL NAVY OF 1865 AND 1866.

In 1865 the Royal Navy of Great Britain was composed of 765 ships of all classes, of which 193 were in actual commission (carrying 3,996 guns), exclusive of Royal yachts, tenders, gunboats, cruisers, tugboats, &c., engaged in harbour duty. This list comprised 16 ships of from 70 to 104 guns, mounting 1,276 guns; 27 of from 30 to 67 guns, carrying 1,119 guns; 29 of from 20 to 29 guns, carrying 638 guns; 38 of from 10 to 19 guns, carrying 556 guns; and 83 of from 1 to 9 guns, carrying 347 guns. Of the above 11 were either in all or partly iron cased, and their joint armaments represented 216 guns. In addition to this number there were then building 28 ships of all classes, namely, four iron screw ships, one iron screw corvette, one hydraulic iron cased vessel, two double-screw iron and wood gunboats, and 20 wooden screw ships, frigates, corvettes, &c.

The ships paid out of commission since the commencement of the year 1865 are 36 in number, representing an armament of 670 guns. The following is an alphabetical list:—Alecto, 3, Commander W. H. Blake; Blenheim, 60, Captain T. H. Mason; Challenger, 22, Captain J. J. Kennedy, C.B.; Charybdis, 21, Captain E. W. Turnour; Coromandel, 5, Lieut. D'Arcy A. Denny; Curlew, 9, Commander J. S. Hudson; Dart, 5, Captain F. W. Richards; Edgar, 71, Captain T. Brandreth (bearing the flag of Admiral Sir S. C. Dacres, C.B.); Euryalus, 35, Captain W. M. Dowell (bearing the flag of Rear-Admiral Sir A. L. Kuper, K.C.B.); Geyser, 6, Commander A. J. Thrupp; Griffon, 5, Commander L. G. Perry; Harrier, 17, Commander W. H. Fenwick; Hawke, 60, Captain E. Heathcote; Himalays, 6, Captain T. B. Lethbridge; Liffey, 39, Captain G. T. Parker; Magicienne, 16, Captain W. Armytage; Medea, 6, Commander D'Arcy S. Preston; Miranda, 15, Captain R. Jenkins; Mullet, 5, Commander C. H. Simpson; Naiad, 6, Master-Commander G. Reid; Orestes, 21, Captain A. H. Gardner; Orlando, 46, Captain J. B. Dickson; Petrel, 11, Commander E. Madden; Phaeton, 39 Captain G. Le G. Bowyear; Plover, 5, Commander the Hon. A. L. Corry; Rinaldo, 17, Commander the Hon. M. H. Nelson; Satellite, 21, Captain S. S. L. Crofton; Scorpion, 4, Captain J. Commerell (V.C.); Shannon, 35, Captain O. J. Jones; Styx, 6, Commander W. B. Urmston; Tartar, 20, Captain J. M. Hayes; Virago, 6, Commander C. F. Palmer; Wanderer, 4, Commander M. C. Seymour; Weser, 6, Commander Arthur H. J. Johnstone; Wye, Master-Commander V. G. Roberts; and Zebra, 17, Commander E. G. Lindsay. To this list must be added the names of the Racehorse, 4, Captain Boxer, totally lost on the north-west coast of Shantung, China, on the 4th of November, 1864; the Bombay, 67, Captain Colin Campbell, burnt off Mount Video on the 14th of December, 1864; and the Bulldog, 6, Captain Charles Wake, destoyed by order of her captain, having grounded while bombarding off Cape Haytien on the 23rd of November last.

The ships commissioned since the 1st of January, 1865, are 32 in number, representing an armament of 509 guns. They are as follows:—Arethusa, 35, Captain R. J. G. Macdonald; Basilisk, 6, Captain W. N. Hewett (V.C.); Bristol, 39, Captain G. T. P. Hornby; Caledonia, 31, Captain the Hon. A. C. Foley, (bearing the flag of Rear-Admiral R. Yelverton, C.B.); Constance, 39, Captain E. K. Barnard; Favourite, 10, Captain F. H. Shortt; Gannet, 3, Commander W. Chimmo; Greyhound, 17, Captain C. Stirling; Helicon, Commander M. Singer; Landrail, 5, Commander, H. L. A. L. Maitland; Lee, 5, Lieutenant O. T. Lang; Malacca, 17, Captain R. O. Oldfield; Megæra, 6, Captain M. B. Dunn; Mutine, 17, Commander W. H. Blake; Narcissus, 39, Captain Colin A. Campbell; Niger, 13, Captain A. C. Byng; Oberon, 3, Lieut.-Com. E. H. Verney; Octavia, 30, Captain C. F. Hillyar; Pallas, 6, Captain M. Connolly; Prince Albert, 4, Captain R. Wilmshurst; Revenge, 73, Captain G. Le G. Bowyear; Royal Sovereign, 5, Captain C. F. Herbert; Scorpion, 4, Captain J. Commerell (V.C.); Scout, 21, Captain J. A. P. Prince; Serpent, 4, Commander E. J. Bullock; Sparrowhawk, 4, Commander E. A. Porcher; Sphinx, 6, Captain R. V. Hamilton; Spiteful, 6, Commander A. D. W. Fletcher; Terrible, 21, Captain G. A. Napier; Topaze, 31, Captain M. de Courcy; Torch, 5, Commander G. A. Douglas; and Wyvern, 4, Captain H. J. Burgoyne (V.C.).

By a careful digest of the *Navy List* for January, 1866, we find that the number of ships now in the Royal Navy is 799, of which 188 are in actual commission, exclusive of those belonging to the same classes as those exempted in our review of 1865. There are, as in 1865, 16 ships of from 70 to 104 guns, mounting 1,278 guns; 26 of from 30 to 67 guns, carrying 952 guns; 26 of from 20 to 29, carrying 577 guns; 38 of from 10 to 19 guns, carrying 555 guns; and 81 of 1 to 9 guns, carrying 380 guns. This gives a total armament of 3,692 guns, being a reduction of 244 guns on the preceding return. There are 16 partly or entire iron-clad ships afloat, against 11 in 1865, and their armament shows an increase of 24 guns.

There are also building in the Royal yards 22 vessels of all classes, of which no less than three are "first-rates," as they are called in the terminology of days gone by, but which among naval men are known for their use as offensive ships by the less euphonious title of "slaughter-houses." An alphabetical list is subjoined:—

Name of Vessel.	Guns.	Description.	Where Building.
Blanche..	4	screw sloop..	Chatham.
Bulwark..	81	screw ship	Chatham.
Camel	—	iron paddle-tug	Jarrow.
Danae	4	screw sloop..	Portsmouth.
Daphne	4	screw sloop..	Pembroke.
Dryad	4	screw sloop..	Devonport.
Myrmidon	4	screw gun-vessel	Chatham.
Nassau	4	screw gun-vessel	Pembroke.
Newport	5	screw gun-vessel	Pembroke.
Niobe	4	screw sloop..	Deptford.
Northumberland ..	26	iron-clad screw	Millwall.
North Star	22	screw corvette	Sheerness.
Nymph..	4	screw sloop..	Deptford.
Penelope	10	iron-clad double ram ..	Pembroke.
Plover	3	double-screw gun-vessel ..	Deptford.
Reindeer	7	screw sloop..	Chatham.
Repulse	81	screw ship	Woolwich.
Robert	81	screw ship	Devonport.
Sylvia	4	screw gun-vessel	Woolwich.
Trusty	—	iron paddle-tug	Jarrow.
Viper	2	double-screw iron gunboat..	Poplar.
Waterwitch	—	hydraulic iron-cased gun-vessel	Blackwall.

It will thus be seen that the Royal Navy for 1866 is constituted of fewer commissioned ships than it was in 1865, and has a lesser armament of guns. But it must not, therefore, by any means be inferred that its efficiency has been sacrificed in a corresponding degree, or that we stand in a less secure position than we did at the commencement of 1865. A glance at the analyses above will show a reduction in three out of five classes of ships of our navy, while other two are equal as regards numbers. In the iron-clad fleet there has been a considerable increase, and when we look around at the reserve of armour-clad ships, and note the number that could be brought into service in the case of emergency at the shortest notice, our feeling of security is complete.

The satisfaction, in the face of an apparent lessening of our defensive strength, may be easily explained. The maritime wars of England will never again be fought with such ships as the names of Nelson, Howe, Collingwood, or Jervis were associated with. Their date of service as war-ships has passed away, as has been conclusively proved by the history of the past three or four years. The world has been told that a single fleet steamer, mounting one or two guns of heavy calibre, could inflict the most serious damage on the navy of a powerful State, and pass from one depredation to another with peculiar immunity, until, in turn, she fell in with a hastily-constructed ironclad, mounting superior calibre to her own, and then the tide of success soon turned. So it would be with England in case of war. Of all our large ships and frigates how many would it be safe to send to sea to confront an enemy? One vessel of the Wyvern or Scorpion class, capable of steaming at a greater speed than ordinary ships, would "run the gauntlet," as it is termed, of a whole squadron of frigates unscatched, leaving behind her doubtless some of the ships in a sinking state. It is but a question of three essentials—the best kind of armour, the greatest possible speed, and the best kind of gun: provided with these one small ship would overmatch whatever might be brought against her unless alike provided for defence and offence. When such ships, therefore, as the Edgar, the Hawke, or the Blenheim are paid out of commission, and are placed in that ill-defined class, "the ordinary," the public have a right to be pleased with the putting aside an arm of the service which has become powerless for all practical purposes in upholding the ships of their class as men-of-war. Looking at it merely in this abstract view it is satisfactory; but, beyond this, the public expenses are considerably lessened, and a fine body of first-class seamen are set free to join ships of the navy of the present day.

REPRESENTATION OF THE COLONIES IN PARLIAMENT.—Mr. Montgomery Martin, formerly Colonial Treasurer at Hong Kong, has addressed the following letter to *The Times* on this subject:—"Sir,—During the discussion for a reconstruction of the House of Commons, or for a redistribution of political power, permit me to put in a word for some absent fellow-citizens who cannot be in England next month in time for the adjudication of this subject. My proposition is to admit the intelligent, wealthy, and populous dominions of the Crown beyond the mere precincts of Great Britain and Ireland to have a voice in the Imperial Legislature.—My last petition to the House of Commons, presented by Sir John Pakington, sets forth the basis on which the proposition is founded. In few words it is, that those integral parts of the empire termed, for want of any better name, "colonies," shall be authorised to send representatives to the House of Commons, who shall sit therein and vote on all questions but such as affect the internal taxation of the people of the United Kingdom. Thus, for instance, the "colonies" possessing "responsible government" to be authorised to depute from their local Houses of Assembly one or more representatives for the Imperial Parliament, to be elected for five or for seven years—or for the duration of the House of Commons – to which they are delegated. Canada to elect two representatives; Nova Scotia, New Brunswick, Prince Edward Island, and Newfoundland one each—six; New South Wales, Victoria, South Australia, Queensland, Tasmania, and New Zealand, one each—six; the West India Islands, one; British Guiana, one; Cape of Good Hope, one; Natal, one; Mauritius, one; Ceylon, one; Malta, one—seven; Calcutta, one; Madras, one; Bombay, one—three. Total, 22. These two-and-twenty voices or votes could have but small influence on the party divisions of 650 members; but they would be listened to and be respected on all questions affecting the constituencies and interests which they represented. At present, the House of Commons practically declares war against any foreign Power without those constituencies being heard, although their lives and property are immediately placed in jeopardy by such declaration of war. Tariffs of trade and treaties of commerce are made without ever hearing how they may affect millions of British subjects and hundreds of millions of property belonging to them. Surely this is not just? We are now requiring British America, Australasia, &c., to provide their own means of defence against foreign aggression, such aggression being the result of votes or decrees of the Imperial Parliament, where those now absent millions have no voice! There are various other arguments of policy, prudence, and nationality in favour of the course I have so long advocated as one of the best means of union and strength for the wide-spread British Empire, which is weak and vulnerable at many points while disunited, but may be made the most powerful, prosperous, and durable kingdom that has ever yet existed on this earth."

The London & China Telegraph.

LONDON, TUESDAY, FEB. 13, 1866.

FRANCE AND THE FAR EAST.

THE annual *expose* of the situation of the Empire, published, as usual, by the French Government at the commencement of the year, contains a few passages which demand a place in our columns. Under the head of Marine we find the following:—"The situation of affairs is so far improved in China that "we are not called upon to occupy ourselves with the defence "of European interests formerly so seriously threatened by the "Taipings. In Japan, since the events of Simonoseki, which "led, in 1864, to a new Convention with the TYCOON, our re-"lations have continued to improve. In presence of these facts, "our naval station there has been reduced to its ordinary propor-"tions. Cochin China sees our authority confirmed; calmness "and peace reign amid the population, which comprehends more "and more every day how valuable our authority is to all their "interests. The judicial service, organised by the decree of "the 25th July, 1864, was organised at Saigon in the month of "March last. Public instruction has been the object of con-"stant solicitude on the part of the local Government; at the "present moment the schools number twenty-four and the "pupils six hundred, to which must be added two hundred boys "and girls at the college of the Bishop of Adran. An agricul-"tural commission has been formed at Saigon. The maritime "movement as well as the coasting trade exhibit a constantly "growing increase; commerce, likewise, follows an upward "course; the financial situation improves every year, and the "public works proceed with activity."

The Imperial school of Oriental living languages has edited a grammar of the Javanese language, the first that has appeared in France. The Imperial Printing-office also announces the appearance of a Javanese grammar, by the Abbé Favre, but we presume that the two works are one and the same.

SILK IN FRANCE.

THE state of affairs at Lyons has undergone a great change; the quantity of raw silk taken into consumption has fallen off considerably during the past fortnight. During the week ending with the 27th January only 769 bales of silk were registered by the *Condition* office, the total weight being 54,138 kilogrammes, or 6,696 kilos. less than during the preceding week; last week, that ending Feb. 3, the quantity was still less, namely, 645 bales, weighing 44,703 kilos.; thus exhibiting a falling off of 9,500 kilos. as compared with the previous week, and of 12,000 kilos. as compared with the same week last year. No uneasiness is expressed at this change in the aspect of the market, for it is remembered that during the past two months the purchases have been very heavy; besides, the stock on hand is very much reduced, and holders demand heavier terms than manufacturers are willing at present to pay. Moreover, the French purchasers are naturally watching the English market with great interest; they declare that the late prices demanded for the silk from the Levant were far beyond the comparative value of the material, and trust that the fall which has taken place is only the commencement of a heavier one. The prices in England, of course, have a great influence on the French market; and while the stock keeps so low as it is at present in France that influence is all the more powerful. There is much said at Lyons about a judicious return to normal prices; but while no stock either of the raw material or of the manufactured article worth mentioning is in the warehouses, some people may probably be of opinion that the words judicious and normal are not quite in unison with the state of the market and the proposition for a reduction in the price.

THREE of the Satsuma officers who lately visited this country under the guidance of Mr. Holme, returned with that gentleman to Japan by the last mail. The remainder of the party (with the exception of the students who remain to study under Professor Williamson) will follow shortly.

A BLUE-BOOK has just been issued containing further commercial reports received from Her Majesty's Consuls in China for the year 1864. These were presented to both Houses of Parliament by Her Majesty's command on the opening of the present Session, and will be noticed in our next.

THE QUEEN'S SPEECH.

One of the clauses thus refers to Japan:—

"The negotiations which have been long pending in Japan, and which have been conducted with great ability by my Minister in that country, in conjunction with the representatives of my allies in Japan, have been brought to a conclusion which merits my entire approbation. The existing treaties have been ratified by the Mikado; it has been stipulated that the tariff shall be revised in a manner favourable to commerce, and that the indemnity due under the terms of the Convention of October, 1864, shall be punctually discharged."

PAPERS ON CHINA ORDERED.

Colonel NORTH: Correspondence which has taken place relative to the sickness and mortality in the 2nd Battalion of the 9th Regiment and 2nd Battalion of the 11th Regiment in China and Japan.

Colonel SYKES: Correspondence in the Colonial-office respecting the rendition by the acting Governor of Hong Kong, Mr. Mercer, to the Chinese authorities at Canton, of a person described in the public journals as the Mo-Wong, and his barbarous execution.

Naval and Military.

The military invalids brought on Feb. 3 from Hong Kong and the Cape of Good Hope in Messrs. Teighe and Smith's ship Gresham were disembarked and forwarded to the Royal Victoria Military Hospital at Netley. A board of officers, consisting of Rear-Admiral G. G. Wellesley, Colonel Shadwell, Adjutant Quartermaster-General, Dr. Innes, the principal medical officer of the S.W. district, and other officers, afterwards assembled on board the Gresham to inquire into the causes of the excessive rate of mortality which had prevailed among the troops during the voyage home, upwards of 40 men, women, and children having died on board since the vessel sailed from Hong Kong. The report of the Board was to the effect that the large number of deaths was solely attributable to the weak and sickly state of the troops at the time of embarkation at Hong Kong, the accommodation afforded to the troops on board the ship, the height between decks, and their thorough ventilation proving the Gresham to be a ship of unusual excellence for troop-carrying duties. The officers accompanying the troops on the voyage expressed themselves in terms of warm admiration of the conduct of the commander of the Gresham, Captain Brayley, and especially with the manner in which he endeavoured by every means in his power to anticipate the wants of the sick during the voyage.

In our last (says the *Army and Navy Gazette*) we mentioned several movements of regiments about to take place. The following may now be considered as settled. They in some respects modify, and in some add to, our information of last week, which otherwise remains correct:—The 2nd battalion 2nd Royals, Bermuda to England; 2nd battalion 3rd Buffs, Barbados to England; 2nd battalion 4th Regiment, Malta to Nova Scotia; 2nd battalion 11th, China to the Cape (not to Bengal, as previously arranged); 1st battalion 15th, New Brunswick to Bermuda; 2nd battalion 16th, Nova Scotia to Barbados; 1st battalion 22nd, Malta to New Brunswick; 1st battalion 25th, Canada to England. The change of destination of the 2nd battalion 11th to the Cape is commendable, considering how much the battalion has suffered in China. The change will render it necessary to send out one more regiment from home to India—probably the 5th Fusiliers—and one less to the Mediterranean. Hence it is probable that the 87th Fusiliers will not go abroad until 1867.

A letter has been published from General Guy, of Hong Kong, reporting on the general good conduct of the marines on board the *Conqueror*.

On the 8th inst. Admiral Seymour was entertained by the officers of the *Victory* as a farewell. Sir Michael will be succeeded by Admiral Sir Thomas Pasley next month.

The *Gazette* of last Friday notifies promotions in the Royal Engineers, consequent on the retirement on full pay of Colonel R. C. Moody, who receives the honorary rank of major-general. Lieutenant-Colonel Sampson Freeth becomes colonel, Captain Fitzroy Somerset lieutenant-colonel, and Second Captain and Brevet Lieutenant-Colonel Charles George Gordon, C.B., becomes captain.

NAVAL APPOINTMENTS.—Captain R. Dew, C.B., to the Royal Adelaide, additional, for service in the Lord Clyde. Lieutenants—Philip N. Tyrwhitt, to the Princess Royal, additional, for disposal; William F. L. Elwyn, to the Princess Royal. Master—John W. Reid, additional, to the Princess Royal. First-class Assistant Engineers—John Aitken and William Thomas, additional, to the Princess Royal. Engineers—Joseph Rothery, and William Ross, additional, to the Princess Royal.

ARMY APPOINTMENTS.—Lord Templetown will be succeeded by Major-General the Hon. Sir A. A. Spencer, K.C.B., who lately returned from the command of a division of the Madras army. Major-General F. W. Hamilton, C.B., now Vice-President of the Council of Military

Digitized by Google

Education, will, in all likelihood, succeed Major-General Walker, C.B., in command of the troops in Scotland, at the expiration of that officer's period of Staff service in April. It is probable that Major-General W. C. E. Napier, now commanding a brigade in Ireland, will succeed Major-General Hamilton as Vice-President of the Council of Military Education. Before his appointment to his present command, Major-General Napier was for some time commandant of the Staff College. As we led our readers to anticipate a fortnight ago, the post of Military Assistant at the War Office, in succession to Major-General Crofton, will be filled by Colonel Shadwell, Assistant-Quartermaster-General at Portsmouth. Colonel Shadwell was for a long time on Lord Clyde's Staff, served in China, India, and the Crimea, with distinction, and has the reputation of being an excellent man of business. The new appointment is made on the usual Staff scale of five years' tenure. Lieutenant C. Garsia, 1st battalion 11th Foot, has been appointed Aide-de-Camp to Major-General O'Grady Haley, C.B., commanding a division in Bengal.

JAPANESE SILK.

(To the Editor of the *London and China Telegraph.*)

SIR,—It is a fair subject of inquiry whether the Tycoon's Government itself is not concerned in the adulteration of silk bales, of which our merchants at Yokohama so bitterly complain, very mixed and inferior qualities making a large proportion in the deliveries to order. In China we know the supervision of business transactions with foreigners, so far as the strict fulfilment of contracts is concerned, is excessively loose, but in Japan every minutia of the trade, even to the recalling of produce on its way to the open ports, is held well in hand by the officials at Osaca, who persist in regulating trade transactions for political and other purposes. We have had abundant evidence of their endeavour to restrict exports as well as imports, and this making up of parcels of common kinds, ostensibly of fine silks, is, I apprehend, only another form of discouraging foreign purchasers, and so neutralising that greater freedom of intercourse which circumstances compel them to allow. This communication will answer its purpose of leading to some expression of opinion on the subject in your columns by merchants resident at Yokohama and other ports; and especially in calling the attention of Her Majesty's Envoy to the subject. In the revision of the treaty, we must *distinctly stipulate* for all that our present treaty rights *merely imply*. The Japanese by their cunning beat us in details, in the carrying out of articles not loosely but too comprehensively worded for the Japanese mind. For myself, I shall not complain of any length which the revised British treaty may assume. Brevity is the soul of wit, but I am doubtful of its efficiency in dealing with the Japanese mind.—Yours, &c., AN IMPORTER.

P.S.—In the present aspect of the cotton trade our merchants in Yokohama appear to be paying too high for medium and inferior cotton. Whilst the quotation for the best Maibash and Sinchu is $880 to $890, medium rises as high as $840 to $860, and inferior to $770 to $810 per picul. Even medium Ida is quoted at but $50 lower than the best Maibash and Sinchu. Koshio was much lower, but still too high.

East India Buildings, Feb. 5, 1866.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, FEB. 8.

Since a fortnight we are thrown into a ministerial crisis, which occurred on the most unexpected moment. The Cabinet—and in the first place our *premier* Mr. Thorbecke—enjoyed the majority of both the Chambers of the States General and the confidence of nearly the whole country. Without a vote of distrust, without the fact that one of the proposed bills was rejected, we at once heard that Messrs. Thorbecke and Olivier had asked for their dismission, while Messrs. Van de Putte and Cremers had placed their "portefeuilles" at the disposal of the King. I need not say that this fact caused the most painful impression throughout the country, while it was supposed that the Liberal system would fall with the eminent leader of the Liberal school. After some days had elapsed, the King charged Mr. Fransen van de Putte, a statesman of some two years, to compose a new cabinet, with the aid of Mr. Van Bosse, who afterwards declined. Every day has brought its rumours about those who would be invited to be members of the new Cabinet, but nothing can be said thereabout, with any security. In truth, all that we know is that we know nothing—not only about the new members, but also about the reason of the crisis. It is said—as I told you—that a difference of opinion had arisen between Mr. Thorbecke and Mr. Van de Putte, about the introduction of the *code penal* in India, but this rumour is generally distrusted, and in the first place by the Liberal papers. On the other hand, it is believed, that the fall of Thorbecke has been caused solely by the intrigues of Mr. Kappayue van de Cappellen and others. But, as I said to you, I cannot say what is the truth, and no paper can say it for me. This, however, is certain that it will bevery difficult for Mr. Fransen van de Putte to form a new Cabinet, and when formed no long life can be predicted for it. Our political condition just now bears considerable resemblance to the atmospheric phenomena experienced in tropical climates when a tornado or earthquake is about to bring trouble and alarm upon men, and the imminent cloud which hangs ominously in the political horizon of the new Cabinet is the Culture Bill, that being the turning point of the Ministerial policy.

A new Ministry has been formed, constituted as follows:—Colonies, M. Fransen van der Putte; Finance, M. Vanbosse; Interior, M. Geertsema; Foreign Affairs, M. Cremers; Justice, M. Picke; War, and *ad interim* Marine, M. Blanken. M. Thorbecke has been appointed Minister of State, and M. Olivier Commander of the Order of the Dutch Lion.

The last mail brought the news that the steamer *Platypus* was expected at Batavia, coming from Queensland, with the aim to make an inquiry for the steam line between Australia and Batavia. The *Java Bode*, which inserted this news, says:—"The interest which is shown as well in Australia as at Singapore differs singularly with the equivocal and indifferent words of our Minister of the Colonial Department." I believe now that I can give you the assurance that Mr. Fransen van de Putte will not grant the subsidy, of which I spoke in my last letter.

The Peruvian man-of-war *Independenzia* has been lying off Ter Neuzen, and was joined there by seventy Englishmen. As this ship, which was built in England, was obliged to leave that country, her appearance on our coast created some sensation at the Hague. The Minister of Foreign Affairs at once ordered that H.M. steam frigate *Adolf Herzog van Nassau* should start for Ter Neuzen, to watch the *Independenzia*, and to prevent international laws as well as the neutrality of our country from being violated. An inquiry, however, made by the Secretary-General of Foreign Affairs, led to the conviction that this ship was really a Peruvian man-of-wiar, and that there was no danger at all that our neutral position would be volated. The *Adolf*, however, will remain in the proximity of the *Independenzia* to prevent any difficulty.

Our Minister of the Marine Department, Mr. J. C. Huyssen van Kattendyke, after a severe illness of several weeks, died yesterday, at the age of 50 years. The country loses in him a great statesman. General Blanken, minister of the war department, is appointed *ad interim* to the department of marine.

An anti-Church, or rather anti-Christian, movement has been working here for some time past. I told you that one of our most eminent preachers, Dr. Pierson, had resigned as M.D. and published a *brochure*, in which he said that the "Church" was no longer a want of our age. He followed the example of Mr. Busken Huet, in resigning. Since Mr. Pierson left for Heidelberg, a paper war has been going on between the most learned of our clergy, and it is strange, but true, that still more of them have resigned. Every day our papers make mention of the fact that "*Domine*" X or Y solicits for a civil position—director, journalist, clerk, &c., and not unfrequently they return to college to study for the medical or legal profession. These are the first consequences of the new doctrine; what will be the final ones?

As soon as the Members of Parliament assemble, a bill will be introduced, by which it is proposed to abolish capital punishment. There is, however, still a very vehement opposition against the measure, which is much strengthened by the singular fact, that several years have elapsed without so many murders having been committed as have been perpetrated within the last few weeks.

Within a few days a new opera, "Aleida van Holland," music by our compatriot, Mr. W. F. Thooft, will be brought *en scene* in our theatre. It is said that it will be a very meritorious musical work.

De Tyd, our clerical paper, has gathered now 150 000f. in behalf of the Pope. It is not only the Dutch money which the Holy Father wants, he wants also our young men, who in large numbers engage themselves for the Papal army, in spite of the warnings that they never can return to their mother country as Dutchmen, while all those who serve foreign monarchs, without the consent of their king, lose their national rights.

The rinderpest still spreads itself more and more; the plague has attacked five provinces, viz.,—North Holland, South Holland, Utrecht, North Brabant and Zeeland. The official returns show that since the outbreak of the plague till the 3rd inst., 33,560 beasts were attacked, of which 10,580 died, 7,911 were slaughtered, 12,132 recovered, while the rest remained under treatment. The Government returns more and more to the system ordering the slaughter of the beasts which are attacked.

A general exposition of art and industry will be opened on the 17th of June till the 17th of October in the Crystal Palace in Amsterdam.

The *Kai-yoo-maru*, a fine steam frigate built for the Japanese Government by the Dutch Trading Company, is approaching completion, and is expected to leave for Japan about September next. She is about 2,400 tons measurement, 450-horse power, and will carry a battery of 26 heavy guns, most of them rifled. She is to be commanded for the outward voyage by Lieutenant Dinaux, and will have a crew of about 300 men. Seven Japanese officers intend returning to Holland in her. This vessel, by the time she reaches Japan, is expected to cost the Government about half a million of dollars. Among the passengers by the outgoing French mail is Dr. Gratama, who goes out in the service of the Japanese Government, as assistant to Dr. Bauduin, the Principal of the Imperial Medical School at Nagasaki.

COMMERCIAL.

COFFEE.—The market is very firm, and a large business doing. On the February auction of the Dutch Trading Company 85,862 bags Java will be offered; besides, the company mentioned that only 350,000 bags will be offered during the months, March to June, while in July no auction will be held. As the quantity offered this month consists chiefly of white sorts, there was in private hands much inquiry for green and other qualities. The following parcels were sold since our last report: 1,400 bags Java, ex Isis, at 43½c.; 1.200 bags ditto, ex ditto, at secret prices; 400 bags ditto, ex Alessa Augusta; 3,500 bags Padang, ex Caduceus, at 46c.; 1,500 bags Java, ex Harvest Home; 2,400 bags Java, ex Caduceus, at 45½c.; 769 bags ditto, ex Isis; 3,410 bags Java, ex Zephir, at 45c.; 2,000 bags Java, ex Kosmopoliet II. A still larger business would be done when holders did not decline to operate without an advance. Stock of the Trading Company, 320,000 bags, against 506,800 bags in 1865: on warrants, 63,409 bags, against 70,756 in 1865; private stock, 77,000 bags.

SUGAR.—The condition of the market is rather unaltered, and only

Digitized by Google

4,000 kr. were sold, high numbers Java mostly at ¼f. to ⅜f. above the November prices. The quotation for the low numbers, however, declined ¼f. to ⅜f.

TEA.—Without transactions: the market is inactive, the trade being occupied inspecting the parcels, which arrived per Yeavering Bell from Foo-chow foo, and which are to be offered in public auction on the 21st. The valuation of this cargo is as follows:—fine Kaisou Congo, 115 to 128c.; finest Kaisou Congo, 120 to 185c.; Superfine Kaisou Congo, 150 to 210c.; finest Kaisou Congo, 130 to 185c.; extra superfine Souchou, 225 to 230c.; superfine Souchou, 250 to 260c.; finest Souchou, 240 to 250c.; superfine flowery Pecco, 250c.; finest flowery Pecco, 220c.

RICE.—There is much want of stock, and in consequence the market is inactive. The second hand declines to operate without a considerable advance, but at this price there is no speculative inquiry.

SPICES.—There is only a trifling business doing, and the holders should willingly sell at a somewhat lower rate, but there is no demand besides for Mace, in consequence thereof the 47 chests imported per Caduceus were sold at very firm prices. Nutmegs: No. 1, 77c. to 78c. Stock Nutmegs: 1,075 casks. Mace: 626 casks. Cloves: 1,422 casks. Cinnamon: 1,716 fard. Pepper: 2,589c.

TOBACCO (JAVA LEAVES).—In waiting for the auctions, which will be held on the 13th, and on which are to be offered 2,936 bales, the market is inactive. The stock here consists of 3,282 p. Java.

MANILA SEGARS.—In the auction of the 31st Jan. the following quantities were sold:—400 m. 2a Cortados Cavite, 1865, partly sold at 37½f., the rest retired at 40f.; 230 m. 2a Cortados, 1864, partly sold at 35f., the rest bought in at 37f.; 350 m. 2a Cortados, 1865, partly sold at 35½f., and the rest retired at 37f.; 130 m. 2a Cortados Cavite, 1865, only 5,000 were sold at 37f., the remaining bought in at 40f. The market is very firm, notwithstanding the large stock.

COTTON.—The market closed dull, and a trifling business was doing.

HIDES.—The market was very active, and the following parcels were sold at firm prices:—1,321 p. Samarang buffalo (dam) at 26c. to 29c.; 200 p. buffalo ex Jedo, 293 p. ex Cadan, and 1,000 p. do. ex Caduceus.

INDIGO.—With a good demand, and all that was offered—90 ch. Java and 45 ch. Bengal—was sold at very firm prices; fine quality is willingly paid with 10c. to 15c. above valuation.

SAPAN-WOOD.—A considerable business was doing, and 8f. is willingly paid for sailing parcels. About 1,000 tons were sold last week.

TIN.—The market is very dull in consequence not only that the quotations of English tin decreased £5 on the London market, but also because it was known that the Trading Company will offer in auction on the 22nd of March 111,800 slabs. It is feared that prices will undergo a further decrease. 1,600 slabs were sold at 55⅜f. 900 slabs at 55½f., and 1,000 at 55f. Stock of the Trading Company 125,933 slabs against 108,598 in 1865.

ARRAC.—58 cases Batavia alcohol, and 32 casks Batavia ex Codan were sold.

COCOANUT OIL.—Without alteration or transactions.

DRUGS.—Camphor: Very firm; and with some transactions at advanced prices. Cubeben: In auction were sold 501c. (dam) from 42c. to 42½c. Gum Benzoin: 7 chests arrived per Caduceus were sold. Gum d'Amar: 4000 chests, ex Veritas, were sold. Gum Elasticum: Very firm; and fine 2A was sold in loco at 140f. Gutta Percha: 2,000 kilos. ex Caduceus were sold at secret prices. Vanilla: Very dull; to-morrow, 150 kilos Bourbon, and 50 kilos. Java are to be offered in auction.

RATTANS.—The transactions were of great importance, 1,558 bundles ex Aletta Augusta; 1,420b. ex Theodor Dell, and 4,800b. ex Veritas were sold,

MONEY.—The rate of discount is still unaltered and high, and the business on the stock market very unimportant, the quotation is rather nominal. 2½ per cent., Dutch, 61⅛; 3 per cent., 71⅜; 4 per cent., 95⅜; Trading Comp., 146½; Dutch Rh. railway, 132; Rotterdam Bank, 102½.

CHANGE.—London: 3 mo., f.1,165; 2 mo., f.1,173; short, f.1,186; Paris, 3 mo., f.4,650; 2 mo., f.4,670; short, f.4,710; Hambro, 3 mo., f.3,490; 2 mo., f.3,510; short, f.3545; Bremen, 3 mo., f.18,940; St. Petersburg, 3 mo., f.148.

PASSENGERS INWARD.

From JAVA: Per Prinses Amalia, Mrs. Prive and family, Wessels and family, Chomel and van Es; per Judea Packet, Mr. van Dyk and family; per Kortenaer, Mr. Sorilon and family; per Henrietta Gerardina Susanna, Mr. Lusnik and family.

ARRIVALS.—Jan. 23, at Texel, from Batavia, Prinses Amalia, Ann Forster; from Passaroeang, Lodore; 25, at Texel, from Batavia, India Packet; 27, at Brouwershaven, from Samarang, Wallaroo; 30, at Brouwershaven, from Passarveang, Dorothea; from Batavia, Kortenaer; 31, at Texel from Batavia, Stad Leiden; from Padang, Lady of the Lake; from Batavia, Henrietta Gerardina Suzanna, Burgomeester Hoffmann; at Texel, from Batavia, Ida Elizabeth, Verden; Feb. 3, at Brouwerhaven, from Batavia, Nieuwland; at Texel, from Batavia, Koophavel; from Macassar, Louise; 4, at Texel, from Batavia, Anna and Sophia, Estafette, Mentor, Stad Ensebede; 5, at Texel, from Java, Friesland; 6, at Brouwershaven, from Batavia, Tuisko; at Texel, from Tjelatjap, Jacoba and Anna.

DEPARTURES.—Jan. 31, from Brouwershaven, for Melbourne, Nieuwe Waterweg.

RUSSIA, GERMANY, &c.

(FROM OUR CORRESPONDENT.)

HAMBURG, FEB. 7.

I am now enabled to announce to your readers that the Austrian expedition to the Far East is at length fully decided on by the Council of Ministers, and only awaits formal confirmation on the part of the Emperor. Though as yet many of the details are not settled, the broad features of the plan agreed to are as follows:—The expedition is to be entirely of a diplomatic nature, and its object is to negotiate treaties of amity and commerce with China, Siam, and Japan. It will be placed under the command of Rear-Admiral Von Tegethof, who commanded the Austrian frigate *Schwartzenberg* in the action of the 9th of May, 1864, with a Danish squadron in the North Sea, off Heligoland, and who was promoted to his present rank for the gallantry he displayed on that occasion, though his seamanship has been called into question for permitting his ships, under steam, to allow the Danish squadron to come down and pour in a raking fire in succession, which occasioned the severe loss he suffered (116 killed and wounded out of a complement of 350 men), besides setting fire to the frigate's foretopmast and bowsprit, which obliged her to decline further fighting, and bear up for Cuxhaven to repair damages. That ship is now cruising in the Levant, still under the command of the same officer, who has been recalled by telegraph to fit out the vessel at the Imperial Arsenal at Pola for the approaching expedition, which is to start in March. The *Schwartzenberg* will be accompanied by the corvette *Archduke Frederick*, Captain Wipplinger, who will be placed under the orders of the Rear-Admiral. The latter vessel has been stationed in the North Sea ever since the war with Denmark, but is now on her way to the Adriatic, having also been recalled telegraphically. The diplomatic negotiations will be confided to the Chevalier Karl von Scherzer, the historian of the "Expedition of the Novara," who has been selected for the post by the Minister for Foreign Affairs, and for which he is in every respect eminently qualified. He will have under him a diplomatist from the Foreign Office, in the person of the Councillor of Legation Isfordink, a gentleman of experience, and well versed in the details of drawing up treaties. The ships are to be fitted out for two years' foreign service.

The circumstance that may be said to have led immediately to the decision being so suddenly taken is the official report lately sent in by Rear Admiral von Tegethof of his examination of the state of the Suez Canal and its prospects for the future; which report is of such a favourable nature as to demonstrate to the satisfaction of the Council of Ministers the importance of the opening of the canal for Austrian interests, and the necessity for being prepared in time to take advantage of it, or else the cream will be skimmed off by France and Italy, who are also in the field and taking active measures for securing at least their fair share of the anticipated enormous traffic that must take place by the new route to the Far East.

At Trieste the intelligence has been received with the greatest satisfaction and enthusiasm, as was to be expected, and already a prospectus is being prepared for the formation of a new company to run a line of steamers between that port and India, China, and Japan, to be ready to commence operations as soon as the Suez Canal is opened for the passage of large vessels.

The Russian journals seem untiring in their praises of the new telegraph tariff that came into operation on New Year's Day, laying particular stress on the fact that the greatest reduction in the charge is for telegrams to the more distant parts; thus a message to Irkutzk, which hitherto cost 10 roubles, can now be sent for 4 roubles, and to Kiachta 4½ roubles instead of 10½ roubles formerly.

At Altona the first Burgomaster is always a lawyer by profession, whilst the second is chosen from among the commercial and industrial community. The mercantile Burgomaster having resigned, Mr. W. Pustau, the China merchant, will in all probability be elected by his fellow-citizens to this post of confidence.

M. Alexis de Lentz, of the Russian Embassy at Peking, is promoted to the rank of Collegial Secretary, with Seniority to date from the 18th of August, 1865.

COMMERCIAL.

COFFEE.—Orders come in freely and give a lively tone to the market, whilst the deliveries continue satisfactory. Without being higher, prices are firm. Sales of the fortnight 27,000 bags. The imports in January were 5,800,000 lbs., against 6,600,000 lbs. in January last year, and 1,800,000 lbs. in 1864. Present stock 21,000,000 lbs., against 11,000,000 last year, and 7,000,000 in 1864.

SUGAR.—Holders being more disposed to sell submitted to a reduction of 4 to 8 sch. bco. per centner, without, however, creating much business. Among the sales were 5,000 bags of brown Manila at 17 mks. bco. In the refined market former prices could with difficulty be supported, and purchasers were rather shy.

RICE remains in the same quiet state, the values being steady.

SPICES.—There is an improved demand for Cassia Lignea, and higher prices are paid. Flores have also risen, and are likely to go up still further, as the stocks are very small. Ginger is firmer, and Pepper maintains its value.

SPELTER.—This market has been steadily improving since last mail. Nothing is now to be had under 15 mks. 12 sch.

SHIPPING.—ARRIVED.—*Pathfinder* from Macao, in 75 days from Anjer.

Literature.

A Treatise on the Nature and Cultivation of Coffee: With some Remarks on the Management and Purchase of Coffee Estates. By Arthur W. Lascelles, Managing Director Moyar Coffee Com-

Digitized by Google

pany (Limited). London: Sampson Low, Son, and Marston. —The author of the above work treats very ably of the effects of various elevations on the plant, but that part of the volume which will engage most attention is where he enters on the question of comparative outlay and returns. To reduce the expenditure is of course the great problem occupying the minds of planters, and the topic necessarily involves the consideration of the entire treatment of the plant and the ripened berry. Unquestionably there is much loss in existing processes, which more diffused experience will curtail. We notice in the *Colombo Observer* a letter pointing out the great loss on large estates from the neglect of planters, especially in wet weather, to separate promptly "tails" and "washings." As to the land, when needing a stimulant, the author advises a compost of coffee pulp, wood-ashes, and common salt, with thoroughly decomposed vegetable matter. The ordinary phosphate of lime sold in England is also recommended for the securance of continued fruitfulness. Other items connected with general cultivation, the condition in which the berry should be gathered, and the process of curing, are minutely adverted to, with the operations that succeed curing, and relate to preparation for export. To the influence of the system of cultivation adopted we are disposed to attach the very highest importance, and the author does not undervalue it. Mr. Lascelles affirms that as to quality—though opinions on this point differ—it is more influenced by cultivation than elevation. Adopting the analogies provided by the growth of cereals, we cannot well do otherwise than adopt the same conclusion; it is certainly indisputable that careful cultivation increases the crop. The author places the average selling price of coffee on parchment at Colombo, as on the coast of India, at 60s. per cwt., and charges for subsequent preparation and shipping at £5 per ton.

The emphasis which Mr. Lascelles places on the valuation of estates on the basis of an average of three or four years, shows his conviction that a very different principle has at times obtained. He would suspect a bumper crop as the result of very "extraordinary manuring and pruning." The warning as to the introduction of Coffee Companies by Financial Associations, who necessarily demand high commissions, and who are the first after a certain time to flood the market with the shares which make part of the price for the purchase of their influence, is applicable to all companies of an industrial character. But in view of the numerous Ceylon Coffee and even Tea Companies that are probably destined to make their appearance, and the fact that Financial Companies are active bidders for promotion of business, the warning is not without importance, coming as it does from one who has looked closely into the conditions of profitable cultivation, and who extends his survey of results beyond "the guarantee period" to the time when estates should return the full capital invested, together with handsome interest. It is possible that a property may, during the period of guarantee, yield, by a system of forced tillage injurious to the soil, a very high return, and as a consequence relapse into a condition requiring a heavy drain on capital to produce in future even average crops.

CHINA COTTON.—The *Railway, Banking and Commercial Almanack*, in speaking of the countries to which deficiency of cotton supplies in 1865 should be credited, remarks of China: "The latter country may be omitted from future calculations; it does not grow enough for its own consumption; what it has sent to Europe of late years has been forced hither by excessively high prices; and when that temporary stimulus is withdrawn, that temporary effect produced by it ceases,—added to which the ingenious varieties of fraud and adulteration for which our Chinese friends possess such an inherent talent, and which they have an opportunity of indulging without stint in preparing and packing cotton, have disgusted European customers who have generally determined to look elsewhere for what they require. We may add to the foregoing, that at present, prices both for China and Japan cotton are merely nominal; according to last official accounts the quantity at sea from India and China amounts to 136,000 bales."

KIDNAPPED BY A CHINAMAN. – The desire of the Chinese to adopt European children appears to be so stong as to lead them in some instances to break the law. Recently a Chinaman was arrested upon the criminal charge of stealing a child. The accused states that he has had the child in his possession for some time, and we can only say that it looks as if it had been well cared for. We have reason for expressing a desire that the case will be fully investigated. In connexion with this, we may state that the Chinese have a great inclination to adopt European male children to whom their cast of countenance may be pleasing. Instances are under our own knowledge where the Celestial has offered a good round sum in exchange for a child to whom he had taken a liking.—*Australian Paper.*

LOSS OF THE P. AND O. STEAMER "JEDDO," FROM HONG KONG TO BOMBAY.—The P. and O. Company have received the following telegram:—"The company's mail steamship *Jeddo* left Hong Kong on the 15th of January. She duly arrived at Point de Galle and landed there all her passengers, mails, and cargo for Europe, and proceeded for Bombay. On the night of the 2nd Feb. she ran on the Choul Kadu Shoal, about fifteen miles south of Bombay. She had on board two passengers only, 76 boxes of specie, and a general cargo from China. Two of the company's steamers were immediately sent to her assistance, and at the date of the latest telegram (5th) all mails, passengers, and specie, and 200 packages of cargo had been landed at Bombay; 700 packages of merchandise still on board, more or less damaged. The company's agent telegraphs, 'I do not think the ship can be saved.'"

Messrs. Scott and Co., Cartsdyke, launched the Ajax (ss), of 2,279 gross tonnage and 1,627 tons register, 309 feet long, 38 feet 8 inches beam, and 28 feet 4 inches depth of hold, for Mr. Alfred Holt, of Liverpool. This vessel forms one of the fleet of steamers which are intended to keep up a monthly line of communication between Liverpool and the Chinese ports *via* the Cape of Good Hope. The machinery, of 300 H.P., is constructed by the Greenock Foundry Company.

Monetary and Commercial.

The *Economist* says:—

The demand for silver for the East, to pay for cotton, is, according to the best authorities, likely to last for a month or so to come. After that, in all likelihood, the cotton payments will be provided for, and we may expect increased ease. But we must not even then expect great ease. Ordinary credit is sound. The revelations of the Joint-Stock Discount Company and other such companies are disastrous to those concerned, but they have no diffused effect. The public at large never heard of them; their momentary success was known only within a small circle, and their present disasters will spread dismay within that circle only. There are no signs of a collapse in industry—not even of a mitigated and minor collapse such as we had last year, far less of such a collapse as in the spring of 1848 or 1858. And till that happens—so long as trade continues as vigorous as now—the value of money will continue as now. To some extent, it is said, the high rates of interest have checked transactions, but we are not inclined to believe they have done so to a great extent.

The telegram from Hong Kong of the mails of the 15th January arrived on the 31st, which is the quickest time, we believe, on record.

The Hindustan, China and Japan Bank has complied with the standing orders in respect to its Bill for the reduction of the nominal amount of shares to be brought forward this session. The Bill passed the Examiners on the 30th ult.

The biddings for £350,000 in bills on India took place at the Bank of England. The proportions allotted were—to Calcutta, £244,100; to Madras, £5,900; and to Bombay, £87,200. The *minimum* price was as before, 1s. 11½d. on Calcutta and Madras, and 1s. 11¾d. on Bombay. Tenders on Calcutta and Madras at 2s. will receive about 85 per cent., and on Bombay at 2s. 0¼d. in full; above these prices in full. A slight increase is thus shown in the demand for means of remittance to Calcutta, and a diminution as regards Bombay.

It has been decided to adopt a memorial to Government praying for the continuation of the present P. and O. line between Suez and Mauritius.

At a meeting of the Telegraph to India Company, the following statement was made:—

The directors report the due payment by the lessees of the Egyptian line of £1,250 for the half-year ending 31st December, 1865, out of which they recommend that a dividend be paid at the rate of 5 per cent. per annum free of income-tax. The directors express their hope and expectation that the important object for which the company was formed, viz., to secure an independent and alternative line between Great Britain and India, may be accomplished at an early period. They learn with satisfaction that the receipts of the Persian Gulf line, with all its imperfections in the transmission of messages through the several intervening States of Europe, yield upon the expenditure of £400,000 a percentage far exceeding the most sanguine expectations. They are confident that the experience obtained may now be made use of, so as to render the laying and maintenance of a properly constructed cable a matter of certainty, and that it is only a question of time. The directors have always urged upon the Government the imperative necessity for alternative lines, to provide against those contingencies which cannot be avoided, and they regard the Red Sea line as offering advantages in all respects far superior to any other, from its sectional short lengths and the commercial importance and returns of the line when opened.

The following is an outline of the service to be run from Liverpool to China by Mr. Alfred Holt, of Liverpool. Particulars of the vessels will be found amongst our Ship advertisements.

OUTWARDS.—To proceed direct to Mauritius, calling there for a few hours only, to land and receive specie, parcels, and passengers only;

Thence to Penang, where the stay will probably be about 36 hours;
" Singapore, staying about 3 days;
" Hong Kong, " 4 "
" Shanghai, where the voyage will end.

The length of voyage from Liverpool to each of the above ports (including detention in ports) is expected to be:—

To Mauritius	39	days;
" Penang	54	"
" Singapore	57	"
" Hong Kong	66	"
" Shanghai	76	"

HOMEWARDS.—The same route will be taken, and in addition, a call of 5 or 6 days will be made at Foo-choo-Foo; and the call at Mauritius will be lengthened to about 2 days.

The length of the homeward voyage to England is therefore expected to be (including detention in ports):—

Digitized by Google

From	Shanghai	77	days.
,,	Foo-choo-Foo	69	,,
,,	Hong Kong	65	,,
,,	Singapore	57	,,
,,	Penang	54	,,
,,	Mauritius	38	,,

Additions to these ports of call may be made from time to time; but if done, care will be taken to avoid any material lengthening of the voyage.

FREIGHT.—Outwards: £6, and 10 per cent. per ton of 40 cubic feet.

FREIGHT.—Homewards: The rate will vary according to sailing vessel rates. The intention being to ask a small advance on these.

All the steamers have been built on the Clyde; they are of full power; and will steam the whole passage, both out and home. The rates of passage money will be about three-fourths of those charged by the Overland Route.

BANK AND MISCELLANEOUS SHARES.

MANCHESTER MARKETS.

The market rules in favor of buyers. The following are the quotations:—Grey Shirtings, 7 lb., 14s. 9d. to 15s.; 9 lb., 21s. Cotton Yarn, Nos. 16-24, 2s. 1d. to 2s. 2d.

ARTICLES OF IMPORT.

TEA.—There has been a moderate amount of business passing during the last fortnight, the comparatively cheap prices at which the Teas from recent arrivals have been offered, have induced both the Trade and Exporters to buy to a fair extent, and latterly there has been a slight improvement in the blackish-leaf kinds, ranging from 1s. 9d. to 2s. per lb. The Public Sales have also passed off with fair spirit at fully former prices. Low and dusty kinds of Congou have been in fair demand at former prices. Fair to good common have recovered the decline of ½d. per lb. last quoted. Fair to good flavory kinds, of old Import, show no further change; those of new Import have sold rather more readily at the decline lately established. Fine to finest show no alteration, business in them being limited. Common to fair black-leaf kinds, of old Import, have again sold about ½d. per lb. lower; the recent arrivals of this class, have been difficult of sale; medium to good qualities have been taken to ome extent at from 1s. 7d. to 2s. per lb., the later sales showing some slight improvement; fine to finest remain much as before. The new Canton-make kinds show no great variation. In Oolongs there has been a fair business doing, there having been a few purchases for Export, and prices are fully maintained. In Souchongs there have been sales made at rather lower prices. Flowery Pekoes show no material change. In Scented Teas business has been to a fair extent, prices showing but little alteration, the fresh arrivals having been moderate. In Uncolcured Japans the sales made have been on a par with the decline established in the publie sale quoted in our last. In Green Teas there has been a small business, the late arrivals having as yet only been partially placed on the market; prices, however, are firmly maintained, in the prospect of the spring demand for export to Canada. Hysons have not been so readily saleable. In Canton Greens there is no material change, but the commoner kinds are not easy of sale. The stock in the United Kingdom on the 31st ult. was estimated at 83.000,000 lbs. against 94,200.000 lbs. last year, and the quantity afloat at 47.717,903 lbs., against 42,285,220 lbs.

SILK.—The state of the silk trade is thus referred to in the circular of Durant and Co.:—We have to report a very quiet market. The deliveries of last month were very favourable, larger than for many previous months, marking that consumption is progressing on the fullest scale of recent times, and we bear of no present disposition to reduce, although the deliveries this last week have been small, but there is an evident determination on the part of all consumers both here and on the Continent to work down their stocks, and to be light during the critical months of April and May; hence transactions almost from the commencement of the year have been upon a very limited scale. The stock of China silk begins to show diminution, and this diminution will in all probability become greater month by month. Of Japan silk the stock is very small, especially if we deduct some 700 bales of comparatively unusable classes. Bengal silk shares in the general quiet. The next periodical public sales are fixed to commence on the 21st inst."

COTTON.—In the week closing on Friday, February 2, there was a decline in prices on the spot of 1d. on Western Madras, and 1¼d. on Tinnivelly and Salem. On Monday, the 5th, the demand revived, and has continued without intermission throughout the week at gradually hardening rates, the advance since the 2nd being fully ¼d. per lb. on Tinnivelly and ¼d. to. ½d. on Western Madras. Sales to arrive 3,000 bales Tinnivelly at 14½d. to 15½d. from January to September, closing at 15½d. for December, guaranteed good fair. The quotation for Tinnivelly is from 12d. ordinary to middling, to 16d. for good to fine. No sales of China or Japan to report, the stock in London on the 8th inst. being only 321 bales. Middling Orleans is quoted in Liverpool at 19½d., and fair Dhollerah at 16¼d. per lb.

SUGAR.—The market has continued extremely flat since our last advices, and prices are 1s. per cwt. below those of the 26th of January. 4,000 bags muscovado Manila were sold this week at 28s. per cwt.

COFFEE.—Prices remain without alteration. At public sale. this week 680 casks, 800 barrels and bags Plantation Ceylon went off with a fair competition, fine ordinary mixed to low middling 73s. to 82s. 907 bags Native were likewise sold at steady rates, good to fine ordinary 68s. to 70s. 6d Privately, 170 casks of inferior quality have been placed at 56s. to 57s. 6d. 1.537 bags Manila and 152 bags Malabar, at auction, being held for stiff prices were withdrawn.

RICE.—This market continues in a very stagnant condition. Of 3,680 bags Bengal, in auction, on the 9th, 2,450 bags were realized at a decline of 6d. per cwt. on the last sales, ordinary mixed to fair Dacca grain 12s. to 13s., low and low middling broken white 12s. to 12s. 3d.; 2000 bags Arracan were bought in. Privately, 5,000 bags good Nakrenzie are reported sold at 10s. 7½d. cash, which is again cheaper, and business is supposed to have been done for arrival at 10s. to 10s. 3d. Continental terms.

RUM.—A small parcel of Penang has been sold at 1s. 5½d., with 60 hhds. extra quality at 1s. 6½d. per proof gallon.

CAMPHOR.—1s 5s. per cwt. dearer on the average. Considerable business has been done in both descriptions up to our higher quotations of £6 for China, and £6. 2s. 6d. for Japan, and the market remains perfectly firm.

CASSIA LIGNEA.—Rather dearer, with limited trade privately: no auctions. Buds: Retail business at £11 per cwt.

CINNAMON (CEYLON).—The recent quarterly sales went off well at par to 3d. per lb. decline upon the last quarterly sales, the greatest reduction being in the good and fine first quality. 2,136 bales nearly all found buyers; 438 bales 1st sort 2s. to 2s. 10d., with superior at 3s. to 3s. 4d.; 1,034 bales 2nd, 1s. 9d. to 2s. 9d; 505 bales 3rd 1s. 8d. to 2s. 4d.; 159 bales 4th and Jungle 1s. 4d. to 1s. 9d.

COCOANUT OIL.—This market has been very inactive, and prices have gone back 10s. to 20s. per ton, with very limited trade. 60 casks Cochin, 76 casks Ceylon, 59 casks Sydney, and 28 casks Madras at auction.

DRUGS.—Cubebs: Nothing of any importance doing. Dragon's Blood: Steady; of 16 cases at auction two sold at £11 per cwt. for very good lump, and £7 17s. 6d. fair. Galangal Root: Steady; and of 270 bags at auction three-fourths sold at 13s. per cwt. for fair. Rhubarb: In increased demand, and dearer; and 192 boxes at auction mostly sold at 7s. 6d. to 7s. 8d. per lb. for fair flat, and 6s. 11d. to 7s round, and 3s. to 5s. 4d. ordinary to middling.

GUMS.—Benjamin: Quiet; and of 20 cases Sumatra at auction only one-fourth sold, at £12 5s. to £12 10s. per cwt. for fair second quality. Damar: Continues steady; and of 175 cases at auction one-fourth sold at 55s. to 58s. per cwt. for fair to good picked. Gamboge: Scarce, firm, and enquired for.

GUTTA PERCHA.—Moderate business privately, upon former terms, for reboiled. 85 baskets and 26 tons at auction retired.

HEMP (MANILA).—Limited business done privately on current roping at £45 to £46 per ton.

HIDES.—Prices have declined ¼d. to ½d. per lb., 3,700 Singapore and Penang Buffalo offered, 1,123 sold at from 4⅜d. to 5d. per lb.. 623 Manila Buffalo offered and sold, 1st heavy 4½d. per lb., 2nd heavy, 3¾d. per lb.; light, 3½d. per lb.

OILS.—Anniseed: Speculation has gone on, and large business has again been done on the spot and for arrival up to 9s. 3d. to 9s. 4d. per lb. on the spot, and 9s. 9d. for arrival. Cassia: Is again rather dearer; 20 cases at auction sold at 7s. 10d. per lb., and subsequently at 8s. and for arrival 8s. 1½d., upon which terms the oil remains firm. Cinnamon: Very firm; 3 cases sold at auction at 3s. 4d. to 3s. 8d. per oz. for good. Citronelle: Is dearer; 23 cases at auction sold at 4d. to 4½d. per oz.

PEPPER.—Black: Is the turn dearer; considerable business done in Sumatra and Penang up to 3½d. per lb. for the former, and 3½d. the latter. 1,287 bags Singapore at auction retired; 1,174 bags Penang sold at 3⅜d. to 3½d.; and of 600 bags Tellicherry, a few sold as 3¾d. to 3⅞d. White: Firm; and 100 bags Singapore, and 50 bags Penang at auction, sold at 5⅞d. to 6⅛d. per lb. for fair to very good.

SPICES.—Cloves: Nothing doing in Penang and Amboyna. Zanzibar very firm; 912 bags sold at auction at 3¼d. to 3⅜d. per lb. for fair. Mace: Steady; of 10 cases Penang at auction half sold at 1s. 3d. to 1s. 7d. per lb. for ordinary to middling reddish. Nutmegs: Not any auctions have been held; good business has been done privately at an advance of fully 1d. per lb.

SAGO.—Quiet; 938 boxes at auction mostly sold at 18s. 6d. to 19s. per cwt. for middling medium. Flour: Nothing of any consequence doing.

TOBACCO.—Manila Cheroots and Segars: The late imports have proved too heavy for general purposes; for Segars there is a good demand. Manila Leaf: Prices rather firmer, especially for the better classes. Japan:

Digitized by Google

A parcel of this growth is expected shortly. Java: Anything reasonable in price suitable to the requirements of the trade has found buyers; but musty, heated, badly feathered tobacco, though offered at prices ruinous for the shippers, remains neglected. Quotations—Java, 5½d. to 13d.; Manila, 6d. to 3s.; Japan, 4½d. to 8½d.; Manila Cheroots, 7s. to 8s.

TERRA JAPONICA.—Cutch Pegue: Steady; of 722 bags at auction, half sold at 30s. to 30s. 6d. per cwt. for good. Gambier: Flat, and the turn cheaper; of 830 bales at auction, half sold at 20s. 9d. to 21s. per cwt. for fair.

MISCELLANEOUS.—Blacklead: Steady; of 561 barrels at auction two-thirds sold at 12s. to 14s. 6d. cwt. for middling lump, and 7s. to 7s. 6d. dust. Galls: All kinds in better supply, and market flat and drooping. 178 bales Turkey at auction all retired; and 136 boxes Japan sold at 61s. to 61s. 6d. per cwt. for good. Ebony Wood: Firm; 19 tons Ceylon at auction sold at £9. 7s. 6d. to £9. 12s. 6d. per ton. Musk: Firm; 128 caddies Tonquin at auction sold at 38s. per oz. for fine picked, 24s. to 29s. 6d. middling to fair, and 15s. 6d. to 20s. pickings. 2 tins grain retired. Rattans: Very flat; and of 37,428 bundles Singapore, and 7,348 bundles Penang at auction, a few only sold at 3s. to 5s. 6d. per 100. Sapan-Wood; Manila dearer; 30 tons sold at auction at £15. 10s. to £16. 10s. per ton. Mother o'Pearl Shells: Dearer: 50 cases Manila sold at auction at £6. to £6. 2s. 6d. per cwt. Star Anniseeds: Remain scarce: sales of recent arrival are reported at £7. 10s. per cwt. Sticklac (Siam).—Quiet: 77 cases at auction retired. Vermilion: Very scarce and dear; 3 boxes at auction sold at 3s. 10d. per lb.; subsequently retail sales effected at 4s.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £7 to £7. 5s.; nail rod, £8. 10s. to £9; hoops, £9. 15s. to £10; sheets, single, £10. 10s. to £10. 15s.; Staffordshire bars, £8. 10s. to £9. 5s.; rails, £7.

STEEL.—Swedish keg, £15. 10s. to £16.

COPPER.—Sheet and Sheathing, £101 to £103 per ton; yellow metal, 8¼d. to 9d. per lb.

TIN.—£95 for block; £96 for common bars. Tin plates, best charcoal, I.C. 34s. to 35s.

LEAD, &c.—English pig, W.B., £22. 5s.; shot, patent, £24. 5s.; sheet, £22. 5s. to £22. 10s.; spelter, £23 to £23. 10s.; zinc, English sheet, £30; quicksilver, £8.

The following is from the Circular of Messrs. French and Smith:—The course of business in the Metal Market the past month has been very irregular, which must be attributed to the uncertainty generally felt as to the prospects of the Money Market. The demand for shipment has been light, while consumers purchase only for their immediate wants. Iron: Welsh and Staffordshire makers are fairly supplied with orders. Scotch Pig Iron has been very unsteady, the speculators for a rise having allowed the market to go back 6s. 3d. On the 29th, since which it has rallied and closes at 68s. being to-day's quotation. It is well understood, however, that the stock on warrants has largely increased during the month. Copper: After the reduction of the 22nd ulto. of £5 per ton, many transactions were reported, and large sales of English were made to French houses. The market, however, is not active for immediate delivery, and orders for manufactured are very scarce. Fine foreign copper is firm, Burra, £98. Kapunda, £99 to £100. Chili, £91. Tin: The large stocks Banca and Straits weigh so heavily on the market, that the price has gradually receded to, Banca £92 10s., Straits £90. In consequence the English smelters were compelled to reduce the price of English £5 per ton on the 2nd instant, but this reduction is not sufficient as foreign is still much cheaper than English. The quantity of Straits Tin afloat for Europe is about 1,378 tons, against 1,171 in 1865, and 780 tons in 1864. Tin Plates: The makers continue well employed at full prices. The shipments last month were 95,000 boxes, against 62,000 boxes in January, 1865. Lead: During the month of January, the transactions were but small, and, in consequence, prices are a little easier.—We quote, W. B. £22 5s. L. B. and Co., and similar brands £21 5s. Spelter is dull, and price about £23. The stock in London, 31st ult. was 6,241 tons, against 10,344 tons last year. In other metals no alteration.

FREIGHTS AND CHARTERS.

Partially owing to the unsettled state of the weather and the continued high rate of discount, the shipping market is somewhat duller, and rates in outward freights are a little easier.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Shanghai: 40s. weight, 30s. to 35s. meast. To Hong Kong: 40s. weight, 30s. meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Ceylon: 40s. weight, 20s. measurement.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per Keel. For Batavia: £26. 10s. For Hong Kong: £50. For Galle: £42. For Singapore: £42. For Shanghai: £60. From Newport, Cardiff or Swansea, per ton. For Hong Kong: £2. 8s. For Manila: £1. 15s. For Galle: £2. 2s. 6d. For Singapore: £2. For Shanghai: £2. 16s.

The Admiralty have invited tenders for the conveyance of 16 tons naval stores from the River Thames to Colombo, and of 6 officers, including a medical officer, 1 lady, 1 child, 3 staff-serjeants, 102 men, 18 women and 18 children to Hong Kong, and have engaged freight for stores in the Melbrek for Hong Kong, and the Brothers for Trincomalee, the tenders for the conveyance of about 4 officers, 1 lady, 1 child, 38 men, 6 women, and 5 children from Kingstown or Queenstown to Japan have been rejected.

The Hotspur has been chartered by the P. and O. Company in addition to the Agincourt, to convey boilers, stores and coals, to Hong Kong.

CASUALTIES.

The Harkaway, Simkins, for Batavia, which put back into Milford, 31 Jan., still makes water, and has run up the river on the mud in shelter, to free a few feet for the purpose of further examination, and to endeavour to stop the leak, if possible, without discharging.

The Earl of Shaftesbury, Kromann, which arrived at New York, Jan. 17, from Singapore, had met with very heavy weather, during which she had her bulwarks stove, and damaged her rudder.

The Hydra, Breckwoldt, from Foo-chow-foo, has been towed into Scilly with loss of two anchors and chains and fore and main masts cut away, having got in among the rocks on the night of the 5th Feb., she however, makes no water.

The Chalgrove, from Liverpool for Shanghai, put into Queenstown, Feb. 5, with deckhouse smashed.

The Koophandel, Mooi, from Batavia, which arrived at Amsterdam, 3rd Feb., had broken her foremast.

PROSPECTUS.

Concessions have been obtained from the French and Italian Governments for constructing and working a Locomotive Railway over the Mont Cenis.

This railway crosses the Alps from St. Michael, in Savoy, to Susa, in Piedmont, a distance of forty-eight miles, connecting the railways of France with those of Italy, thus completing the last link of a direct line of 1,406 miles from Calais to the Port of Brindisi, on the Adriatic, whereby an improved route will be created from France and England to Italy, Egypt, and the East, and a saving of two days effected in the transit of the Indian Mail.

The Mont Cenis Railway will be constructed on the existing Imperial road, the grant of a sufficient width of which, free of charge, has been made by the two Governments, and this grant may be considered equal to a subvention of £200,000.

For working this line, the centre rail system of locomotives will be adopted, the practicability of which has been proved by trials made on the Cromford and High Peak Railway, in England, and afterwards on the Mont Cenis, where the system has recently been submitted to every variety of test before Commissions of Engineers appointed by the French, Italian, English, Russian, and Austrian Governments.

These five Royal Commissions, in their official reports, have concurred in expressing their conviction that the trials made on the mountain have fully proved the practicability and safety of working the proposed railway over the Mont Cenis. And the complete success of the system having thus been established, the Governments of France and Italy have granted the Concessions for the railway, and the privileges asked for.

The English Commissioner, Captain Tyler, R.E., in his report to the Board of Trade, published by order of the House of Commons, states that this scheme for crossing the Mont Cenis is, in his opinion, practicable, both mechanically and commercially, and that the passage of the mountain may thus be effected, not only with greater speed, certainty, and convenience, but also with greater safety than under the present arrangements.

The interest they feel in an enterprise of so great importance to England, France, and Italy, as well as to the future of Railway construction in all countries, has induced the Directors to lend their aid to this undertaking. They wish it to be known that no contracts for works or supply of materials have been entered into, and that the works of the Line will be executed with a view to secure the best conditions for the Company, and the greatest possible economy.

After careful consideration of the estimates prepared by Mr. Brunlees, the Directors have satisfied themselves that the cost of the Line will not exceed £375,000, or £8,000 per mile, including rolling stock, payment of interest at 7 per cent. during construction, and preliminary expenses.

In the estimates of working expenses, the Directors have made ample allowance to provide for all the special circumstances of gradients, curves, and climate.

The gross revenue produced by the existing traffic on the road, calculating only the same annual increase as that of the past years, and taking no account of the increase of traffic that invariably results from the opening of a railway, will be sufficient, after paying working expenses and 7 per cent. interest on Bonds and Shares, to reimburse both Bond and Share Capital, and leave a profit of £233,000 at the end of seven years.

The period for which the Concessions are granted extends until the opening of the Great Tunnel of the Alps, which, taking the most favourable view of the time required for its completion, will give at least seven years of working of the Mont Cenis Railway; from which the following results may be expected:—

Revenue for seven years		£948,717
Value of Plant at end of seven years ...		70,000
		£1,018,717
Working Expenses	£284,613	
Interest at 7 per cent. ...	125,440	
Capital paid off	375,000	
		785,053
Surplus Profit after paying the Capital and Interest		**£233,664**

The profits of the Company in each year are to be applied:—

1st. In payment of interest on bonds.

2nd. In payment of a dividend of 7 per cent. per annum upon the shares.

3rd. For the purpose of creating "a Bond Redemption Fund."

4th. After the Bond Redemption Fund is completed, for the purpose of creating "a Bonus Fund," to be applied in payment of a bonus of £20 per share. After which payment the preferential dividend of 7 per cent. per annum will cease in respect of such share.

5th. One-half of the residue or surplus profits in each year will be divided among the Shareholders, and the other moiety will be paid to the Concessionaires.

It will be seen that the Concessionaires receive no compensation for the value of the Concession which they transfer to the Company until the reimbursement of the Capital within the seven years, by annual instalments, as above, has been provided for.

A Railway connecting Italy and a population of over twenty millions on the south, with France and a population of forty millions on the north of the Alps, between which countries there at present exists no other land communication than by diligences and carts or sledges, must have the effect of largely increasing the traffic, seeing that the journey over the Mountain would be made by the passenger trains in 4½ hours, instead of the 10 to 15 hours; and by the goods trains in 8 hours in place of 3 days as at present.

There may also, in addition, be expected the carriage of the fast overland Indian Mail, and the passengers travelling with it; and considerable quantities of merchandise now conveyed between Italy and France, via Marseilles.

A further annual increase of 10 per cent. due to the facilities afforded by the Railway, may therefore be assumed; and the revenue thus accruing would give the shareholders a profit of 18 per cent. per annum on the capital employed, in addition to the 7 per cent. received as interest on the shares until reimbursed. After the above period, and for the remainder of the Concession, the profits of the Railway would consist of the entire amount of net earnings, clear of all interest and capital charges.

Copies of the Prospectus and Forms of Application for Shares may be had of Messrs. Laurence, Son, and Pearce, 7, Angel-court, Throgmorton-street, and also of the Secretary, T. S. Cutbill, Esq., 13, Gresham-street, E.C., where copies of the Concessions, and reports of the Government Commissioners may be seen.

THE CHINA TRADERS' MARINE INSURANCE SOCIETY OF HONG KONG (Limited).

CAPITAL, 1,000,000 dols.
n 200 Shares of 5,000 dols. each. 1,000 dols. per Share Paid up.

Richard Deacon, Esq. (Messrs. John Burd and Co.)

GENERAL AGENTS.
Messrs. Augustine Heard and Co.

The Allotment of Shares will take place on the 3rd day of October next, and further Applications for Shares will be received until the 3rd of October next.

Application to be made in the form given below, and addressed to the General Agents, from whom any information can be obtained.

FORM OF APPLICATION FOR SHARES.

To the General Agents of the China Traders' Marine Insurance Society of Hong Kong (Limited).

Gentlemen,—I hereby request that the Committee will allot to me shares in the above Company, and I agree to accept such shares, or any less number which may be allotted to me, and to pay the first call of One thousand Dollars per Share, and further calls to such amount and at such times and in such manner as may be authorised by the Articles of Association of the said Company, and to subscribe the Articles of Association when called on to do so. I am, Gentlemen,

Your obdient Servant.

Hong Kong, Sept. 7, 1865.

ASIATIC BANKING CORPORATION

Incorporated by Royal Charter.

Authorised Capital, £2,000,000. Paid-up Capital, £500,000. Reserve Fund, £175,000.

Head Office, No. 4, Lombard-street.

BOARD OF DIRECTORS.
FRANCIS BOYKETT, Esq., Chairman, (Messrs. Timothy Wiggin and Co).
JOHN A. RUSSELL, Esq., Deputy Chairman (Messrs. Grey and Coles, and Grey and Co. Bombay).
THOMAS CARDWELL, Esq. (Messrs Thomas Cardwell and Co., and Cardwell, Parsons and Co., Bombay.
CHARLES A. FEARON, Esq. (Messrs Fearon and Co. late of Messrs. Augustine Heard and Co., China)
WILLIAM MAITLAND, Esq. (Messrs. M'Killop, Stewart and Co., Calcutta).

Agencies and Branches are established at Bombay, Calcutta, Madras, Singapore, Penang, Ceylon, Hong Kong, Shanghai, and Melbourne.

The Corporation grant Drafts, collect and negotiate Bills of Exchange, payable at the above places, issue Letters of Credit and Circular notes, and conduct every description of Banking business connected with the East. They effect the purchase and sale of Indian Securities, the receipt of Pay, Dividends, &., and undertake the safe custody of securities. By order of the Board, F. W. Lawrence.
Acting General Manager.

PORT OF AMOY.

SHIPOWNERS, AGENTS and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer, and a Blacksmith. Dry Godowns for the reception of vessel's stores, &c., when requiring to discharge them.

Amoy, March, 1865.

THE BANGKOK DOCK COMPANY'S NEW DOCK.

This magnificent Dock is now ready to receive Vessels of any burthen, and the attention of Shipowners, Agents, and Masters is respectfully solicited to the advantages for REPAIRING and SPARRING VESSELS, which no other Dock in the East can offer.

The following description of the Premises is submitted for the information of the public. The dimensions and depth of water being:—

Length	800 feet.
(To be extended.)	
Breadth	100 ,,
Depth of water	15 ,,

The Dock is fitted with a Caisson, has a splendid entrance of 120 feet from the River, with a spacious Jetty on each side, where vessels of any size may lay at any state of the tides, to lift Masts, Boilers, &c., with powerful Lifting Shears, which are now in the course of construction.

The Dock is fitted with Steam Pumps of great power, insuring despatch in all states of the tides.

WORKSHOPS.

The Workshops comprise the different departments of Shipwrights, Mast and Block Makers, Blacksmiths, Engineers, Foundry, &c.

The whole being superintended by Europeans, who have had many years' experience in the different branches.

The workmen are the best picked men from Hong Kong and Whampoa.

The Company draws particular attention to the great advantages this Dock offers, being in a Port where the best Teak and other Timber can be had at the cheapest cost.

A Steam Saw Mill is also in connection with the Dock, to insure despatch in work.

The Keel Blocks are four feet in height, and can be taken out or shifted without cutting or causing any expense to ships having to get them removed.

The Company is also prepared to give estimates or enter into Contracts for the Repairs of Wooden or Iron Ships, the Building of New Ships, Steamboats, &c., or any kind of work connected with shipping.

All Material supplied at Market price. Vessels for Docking may lay at the Company's Buoys or Wharf free of charge, until ordered to remove by the Superintendent.

Captains of vessels before leaving the Dock must approve and sign their Dockage Bills.

All communications respecting the docking to be addressed, until further notice, to the undersigned, by whom all Bills will be signed and collected.

JOHN BUSH, Managing Director.

Bottled Ales and Wines, &c.

"NO BUYERS for the BEST BRANDS, unless RE-PACKED," in consequence of repeated BREAKAGE.—Melbourne Journal of Commerce, Nov. 16. Heating and Breakage entirely prevented, and 15 per cent. saved in Freight of Cases by using SYMER'S BOTTLE PACKINGS AND COOLERS. Price ¼d. per dor. Bottlers contracting for large quantities effect so great a saving in labour, &c., that they can supply them at one-fourth less in price to Shippers, who will find it most profitable to order their goods to be so packed in future. In use by all the leading London houses.—T. WHITEHEAD, 37, EASTCHEAP, E.C Sole Manufacturer.

HOLLOWAY'S PILLS.—ILL-CONDITIONED STOMACH.—Few persons, save those who have long endured the hydra-headed disease called Dyspepsia, can form any notion of the great expense chronic Indigestion entails on muscle, nerve, mind, and temper. In the early stages of this protean malady the purifying, regulating and aperient Pills invented by Professor Holloway exert the most wholesome power by accurately adjusting the functions of the stomach, liver, bowels, and the minor organs subserving the solution of man's daily food. In confirmed debility of digestion Holloway's Pills are likewise reliable remedies which may be confidently resorted to in all stomachic, hepatic, renal, and alvine derangements, without the slightest doubt of their ability to release the sufferer from almost insupportable misery.

GELLE FRERES' PERFUMERY.

CHIEF ESTABLISHMENT, 35, RUE DES VIEUX AUGUSTINS, à PARIS.

THE house of GELLE FRERES, celebrated for the superiority of its Perfumery, addresses itself to the fashionable world as much for its essentially hygeianic, refreshing, and tonic preparations as for its delicate and distingué perfumes.

BOYVEAU LAFFECTEUR'S ROB.
The only one authorised and adopted in France, Belgium, Austria and Russia.

THIS Vegetable Syrup, prepared and guaranteed genuine by the signature of Dr. GIRAUDEAU DE ST. GERVAIS, is very superior to the purifying syrups. It effects a radical cure, without mercury, in all affections of the skin, scurf, scrofula, &c., and symptoms arising from the acrid state of the humours. The Rob is especially valuable in diseases which have resisted the effect of mercury or iodide of potash. The general entrepot of 12, RUE RICHER, PARIS.

Sold Retail.—London: Jozeau, Hannay. New York: Fougera, Gaudelet, Milhau. Gibraltar: Patron and Danilowich Malta: Dr. Pirotti, Bugeja, Magri, and Rolando, Esperanza. Silk, Alpaca, Gingham Steel Frames, Canes, Fittings and all kinds of Materia for the Trade. Oiled and japanned silks and cambrics.

CAUTION.

THE GROSS FRAUDS which continue to be practised by obscure manufacturers, more particularly in Germany, by imitating the Labels attached to JOHN GOSNELL and Co.'s PERFUMERY, render it imperative upon the Proprietors to Caution the public against such nefarious proceedings, and to request their friends and patrons to purchase only of respectable dealers, who import direct from JOHN GOSNELL and Co., and invite special attention to the address, 12, THREE KING-COURT, LOMBARD-STREET, LONDON, E.C.

JOHN GOSNELL and Co.'s SELECT PERFUMES.—Ess Bouquet, Royal Yacht Club Bouquet, Jockey Club Perfume, Essence of Wood Violet, Victoria Bouquet Garibaldi Bouquet, Frangipanni, Military Bouquet, The Bride's Bouquet, Tea Rose, Russian Leather Perfume.

JOHN GOSNELL and Co.'s Stereodesmic or Dentists Tooth Brushes and Trichosaron Hair Brushes, warranted to purchasers.

JOHN GOSNELL and Co.'s Instantaneous Hair Dye.

JOHN GOSNELL and Co.'s Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s. 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty and by Special Appointment to H.R.H. the Princess of Wales, London.

Keating's Cough Lozenges.

JUDGED BY THE IMMENSE DEMAND this Universal Remedy now stands the first in public favour and confidence: this result has been acquired by the test of fifty years' experience. These Lozenges may be found on sale in every British colony, and throughout India and China. They have been esteemed wherever introduced. For COUGHS, ASTHMA, and all affections of the Throat and Chest, they are the most agreeable and efficacious remedy.

Prepared and sold in boxes and tins of various sizes, by THOMAS KEATING, Chemist, &c., 79, St. Paul's Churchyard, London. Sold retail by all druggists and patent medicine vendors in the world.

N.B.—To prevent spurious imitations, please to observe that the words "KEATING'S COUGH LOZENGES," are engraven on the Government Stamp of each Box without which none are genuine.

Per P. and O. steamer, from Southampton, March 20.—To Shanghai: Mr. C. G. Webb. To Ceylon: Mr. F. R. Bone.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

From this port we have files of the *Japan Herald* to the 30th December. The mail of the 20th October arrived on the 25th December, and the latest telegrams received from London reached to the 6th November.

By the steamer *Cadiz*, which conveyed the above named mail, the British Minister, accompanied by Lady Parkes and family, returned from Shanghai.

With regard to the proceedings arising out of the late extraordinary action of the American Consul, the *Japan Herald* says, "As yet we have not heard whether Sir Harry Parkes has given his formal opinion on the case between the Consuls of Great Britain and the United States. We are happy to be able to state, however, that Sir Edmund Hornby has expressed himself strongly in favour of the action taken by Mr Flowers, the British Acting Consul, in the recent assault case. The true state of the law is, that a Consul cannot compel any one, not of his own nationality, who may happen to be in the court as a spectator, to enter the witness box; but if, at his request, such an one does permit himself to be sworn, he must answer all such questions as the Court deems pertinent. Under these circumstances Mr. Seare was clearly in contempt. But no Consul has the power of awarding punishment to a subject of any other nationality. The proper course is, to make a complaint to the Consul of the nationality of the person in contempt, who alone can decide on the measure of punishment and its mode of execution. Thus throughout the whole affair, Mr. Flowers took a correct view of the case, and it gives us extreme satisfaction to find that Sir Edmund Hornby has mentioned in terms of high commendation the temperate and resolute manner in which he upheld the dignity of his court and of his office, under circumstances most painful and trying."

An Envoy Extraordinary of his Majesty the King of Belgium had arrived to conclude a treaty with Japan.

With reference to doubts entertained by some persons as to the genuineness of the Mikado's ratification of the treaties, the *Herald* says, "If the ratification be, as we hope and think it is, genuine, this is a very great event to be placed to the credit of 1865; but some express serious doubts, and we cannot pretend that there is absolute certainty in the matter—such as would enable any one to declare that it could not be called in question. It is quite believed in by the Japanese officials; and it is spoken of as a certainty by officers of an independent Daimio, who were lately in Yokohama on business, and spoke of it without any shade of doubt. To those who have not faith, it must be left for time to resolve."

An important case had been decided by the British Consul, between the Governor of Kanagawa, represented by I sono Masanoske, and Robert Brett, agent of the Chartered Mercantile Bank of India, London and China. The plaintiff claimed from the defendant the sum of sixty-six dollars and

Digitized by Google

fifty-eight cents, being ¼ the annual ground-rent of lot No. 79, in the occupation of defendant for the year 1862. The land had been originally alloted to M. Van Polsbrock, a Dutch subject, and now Consul-General for Holland, and still stood in his name on the land officers' books. When the Custom-house applied to him for the rent for the years 1862-3-4, he said he had sold the land to a British subject (Mr. Brett), and that the British subject in possession should pay all the due rents. Application was then made to the British Consulate for the rent, and rent for 1863 and 1864 was paid, and the land officers were told that as the British subject was not in possession of the land in 1862, the British Consulate could not collect the rent for that year, and that the Custom-house should look to the Dutch Consulate for the rent for 1862. The Dutch Consulate was applied to, and again refused to pay the rent, referring as before to the British subject in possession. Five other lots were in the same position, and the rents of all for 1862 were applied for at the same time at the British Consulate, all the lots being then in the possession of British subjects; failing to obtain the rent of lot No. 79, these proceedings were taken against the present tenant. The defendant pleaded that he was given to understand, when he purchased the land, that the ground rent for 1862 had been paid, and that under any circumstances he was not liable for liabilities incurred before it came into his possession. H.M. Consul, however, held that the ground was liable for the rent due on it to the Japanese Government, and that the ground must discharge that liability. The lot being registered as in the possession of the Chartered Mercantile Bank of India, London and China, the bank must, therefore, pay the present claim and the costs of the action; but may, if it thinks fit, look to the previous possessor for indemnity.

On the 13th December, about 1.40 A.M., a very severe shock of earthquake was felt in the settlement, which lasted about thirty or forty seconds; four distinct movements were felt, accompanied by the usual continuous vibration. The shock was felt very severely in the camp.

The Yokohama Chamber of Commerce had completed its organisation, and adopted a well-digested code of laws. It would commence operations with the beginning of the year, and turn its attention at once to the impending revision of the tariff.

In his Christmas sermon, the Rev. Mr. Bailey, Consular chaplain, made an appeal to his congregation on behalf of distressed British subjects who find themselves at this far away point of the earth, stranded without the means of livelihood or of returning to lands where work is to be got. His call was fairly responded to and some £40 to £50 was collected, which has been placed in the hands of H.B.M.'s Consul as the nucleus of a fund.

A disgraceful riot seems to have taken place on Christmas day, in the shape of a fight between English and French sailors. The commencement of the disturbance was on the previous afternoon, when three or four men and boys belonging to H.B.M.'s Navy were attacked before they had been many minutes on shore by a number of French sailors, who beat them considerably. Complaint was made to the Municipal Psice and the assailants were shown to Superintendent Dury, but as the complainants could not actually identify the individuals who had severally assaulted them, he could not of course interfere. On Christmas day about 4 P.M. some French sailors were climbing a pole, which had been erected in front of one of the grog shops, and, on an Englishman successfully achieving the feat, a stone was thrown at him, which severely hurt his arm; and, on his slipping down the pole, his friends immediately attacked the Frenchmen, which led to a general *mêlée*. The fight lasted till nearly midnight, and a good many men were injured, more or less severely. As soon as information was given to the French authorities on shore, a picquet was sent to the scene of action, and with the assistance of the Municipal Police, a very large number of the combatants were secured and placed in durance vile.

H.M.S. *Argus* had left for Hong Kong. The gunboat *Kestrel*, for the purchase of which tenders had been invited, was sold to Messrs. Glover and Co. H.M.'s troop ship *Adventure* had also left for Hong Kong, having on board Vice-Admiral King and a large number of officers and men as passengers; among the former, Dr. Hague, late of H.M.S. *Princess Royal*, who has lately (through the death by drowning at Nagasaki of Dr. McSorley) obtained promotion, and now proceeds to join H.M.S. *Rattler*. Lieutenant and Commander Grant and Mr. Woods, and the late crew of the *Kestrel*, also took passage to Hong Kong in the *Adventure*. She was expected to take the Inland Sea route and visit Hiogo, staying at Nagasaki about three or four days.

NAGASAKI.

The latest date from this port is the 21st December, and there was no news of importance, either political or mercantile.

A correspondent gives the subjoined list of steamers recently sold to the Japanese, with the amounts paid for each :—

Kin-lin, to Prince Satsuma, for $56,000, sold by Glover and Co.

Sir Harry Parkes, to Prince Kaga, for $95,000, sold by J. Loureiro.

Union, to Prince Satsuma, for $60,000, sold by Glover and Co.

Sarah, to Prince Satsuma, for $19,000, sold by Glover and Co.

Pembroke, to Prince Satsuma, for $25,000, sold by J. Loureiro.

Gerard, to Prince Satsuma.

Ayrshire Lass and *Elgin*, to Prince Tzikusen, for $150,000, sold by Glover and Co.

CHINA.

CHING-KIANG.

From this port (the correspondent of the *Herald* writes): —We learn that the officials are most anxious to concentrate trade on the city side of the Yangtsze, and revive the former mercantile greatness of the place. The fact of the hulks being moored where they are at present throws very considerable difficulty in the way of carrying out this plan. The Chinese are persuaded that Chin-kiang may be made the outlet for much native produce if sufficient inducements are held out to merchants and junk-owners. It appears to us incomprehensible that the Anhuei teas should go to Kiukiang instead of to Chin-kiang unless the excuse that there is no safe anchorage off the latter city be held valid. However, this difficulty will soon vanish, for not only has the Governor-General taken the first step towards directing trade into its old channel by ordering the native merchants to remove from Ch'i hao k'ou, on the opposite bank, and take up their residence at, or in the vicinity of, Chin-kiang, but he has also directed that a creek be opened to the west of the foreign concession, three thousand Chinese feet long, one hundred wide, and about twenty deep. This basin is intended merely as a commencement, and it will be enlarged indefinitely as the trade of the place increases. The branch of the Grand Canal outside the city is also to be cleared before the spring, and rendered fit for navigation. These important works have been confided to the superintendence of one Hsu, probably a relative of Hsu Taoutai, and it will thus be seen that the authorities are in earnest in wishing to restore the city of Chin-kiang to its ancient renown. Ch'i hao k'ou will, under the proposed arrangement, be transformed into a salt station.

SHANGHAI.

The P. and O. mail of Nov. 10 arrived out on Dec. 28. The French mail of Nov. 17 arrived on Jan. 8. The dates are now down to the morning of the 9th.

The clearances have been the *Memento* (Dec. 23, tea for New York), and *Oriflamme* (Am. str., Dec. 30, tea for San Francisco). The *Jubilee*, which by last mail was reported badly ashore and discharging cargo, has since been got off in safety, and now lies in the river.

The Chamber of Commerce has published the first number of a Circular and Price Current to be forwarded by each mail.

Our readers will regret to learn that the Volunteer excitement here is gradually dying out. But a few months ago Shanghai was justly proud of its Volunteer corps, and congratulated itself on possessing so many energetic men ready to devote a considerable portion of their leisure to those exercises, the advantages of which would be fully proved only in case of danger and emergency. To go back a little further, it is but four years since the Volunteers were regarded as the protectors of the settlement, and the more lazy or peaceful inhabitants of the hongs went nightly to sleep with the consciousness that their slumbers were watched by vigilant Volunteer sentinels. It was only to be expected that with the crisis which called forth the enthusiasm, the enthusiasm itself should pass away, but no one could have anticipated so complete a reversion of feeling as was exhibited at a parade called for the distribution of the prizes won at the late rifle meeting.

The inquiry respecting Chang, the Chinese linguist, resulted in an acquittal, there being no sufficient evidence to establish the charge of squeezing, &c., made in the *Friend of China*.

The question of a lighthouse at the entrance of the Yang-tze has been noticed, but no conclusion arrived at as to its erection.

The following, on the registration fees, is from the *Shanghai Recorder*:—"The policy of taxing British subjects resident in Shanghai to the extent of five dollars for being registered at the Consulate appears to us a somewhat doubtful measure. The amount which can be gained in this manner to the revenue is so paltry when compared with the value of the China trade, that we scarcely think the plan can be upheld upon the principle that British subjects out here ought to pay for the protection of their Government. The great objection, however, to the scheme is that there is not any distinction of classes other than artisans and non-artisans. If any distinction is made at all, it ought surely to be more gradual than this. The youngest "junior" arrived by last mail must pay the same fee for registration as the richest merchant in the place. This certainly does not appear to us either just or advisable. We fully recognise the necessity for registration being made compulsory for Government reasons, and therefore take no exception at a fine being inflicted upon those who neglect it. We cannot, however, but think that the main object in view would have been more fairly met by making the fee for registration lower and the same for all; while the fine for neglect of registering might then have well been put at a higher rate, say at fifty or even one hundred dollars."

The same journal also has the following:—"Li, the acting Futai of this province, has resigned his appointment, making an excuse in accordance with Chinese notions of etiquette for so doing, namely, that he was desirous to return to his father to tend him during his declining years; probably, however, his real reason is the disturbed state of the northern part of the province. No successor has as yet been appointed.

"The business during the past fortnight has been comparatively limited both in imports and exports, with the exception, however, of the article of green tea, in which there has been great activity.

"The trial of Holmes, chief officer of the opium ship *Wellington*, who was arraigned before H. W. Dent, Esq., Portuguese Consul-General, upon a charge of having caused the death of a Chinaman by kicking, has been brought to a close. The testimony given was a fair specimen of that generally emanating from Chinese, utterly conflicting and inconsistent. The judgment in form has not yet been published; but it is to the effect that the defendant is acquitted on account of want of evidence.

"A correspondent from Newchwang informs us that Mr. Meadows has called a meeting to devise measures for the defence of the place. Some of the residents, among whom was our correspondent, do not seem to attach much weight to the rumoured insecurity."

TRADE OF 1865.

"The commencement of a new year forms a very desirable opportunity for taking into consideration a want, which has for a lengthened time been felt among commercial people in Shanghai. We allude to the defectiveness of the statistical returns of imports, exports and stocks. There is probably no place in the world where it is more necessary that accurate statistics should be made up, and perhaps also no place where this important matter is so defectively carried out. We recollect in former years very valuable statements used to be made up by the Chamber of Commerce, of the imports of manufactured goods. These were compiled from the Customs' returns, which, however, subsequently got so much in arrear that the plan had to be adondoned. This point we think calls for attention. The most practical method for obtaining this information would be from the export manifests of ships leaving London and Liverpool which are, we believe, to be purchased in writing at home at the price of 7s. 6d. each. This amount would of course be heavy for individual houses to pay; and the matter is, therefore, one which clearly points to the advantage of combined action such as could be secured by the Chamber of Commerce. The way in which the exports from home are classed in the *China Express* is not explicit. It could surely not be difficult to instruct some gentlemen conversant with the trade at home, to prepare a suitable statement for each mail which could be circulated in China for the common benefit. This plan would give the particulars of the quantities of goods shipped. The next point which it is desirable to ascertain, is the amount of the sales upon the market from time to time. This we much fear is almost hopeless; though we cannot but regret the circumstance, as the want of knowledge on this point has always placed the native at an undue advantage when purchasing from foreigners. We have endeavoured, as many of our readers are doubtless aware, to supply this information by sending round papers to a large number of houses who had kindly promised to give us a return of their sales. We regretted, however, to find that the totals at the end of the fortnight were generally far short of the sales which had taken place, and of course had to conclude that a certain number of sales were not reported. Though we regret having to give up our attempt to secure these returns for the public, we cannot but express a hope that the subject will not be allowed to drop by the Chamber of Commerce, who, as representatives of the merchants in this place, must have every interest in procuring reliable information upon such matters.

"It will be scarcely necessary to call to the recollection of of our readers that according to a resolution passed at the meeting of the Shanghai General Chamber of Commerce in August, the statistics of export of tea and silk will be now made up annually from the 1st January. The old system of dividing the seasons has proved altogether defective, and a great step in advance will be gained by the new arrangement.

"We are glad to hear that it is under contemplation for the Custom-house to issue a monthly statement of imports and exports. Should the scheme be matured, the tables will be printed at the Custom-house press. We doubt no that so desirable a step would meet with the general support as it will tend much to the advantage of the mercantile community."

On the supply of cotton, the following is of interest:—

Since the close of the American war this article has ceased to be exported to Europe, and notwithstanding the late considerable rise in prices at home, it is not likely the trade will be resumed unless prices here decline very materially; of this there is not much prospect, as the yield this season has been unusually small, so that prices are maintained at tls. 19.0.0 to 19.5.0 by the demand from the southern ports and for local consumption. Some of our residents have during the past summer attempted the cultivation of Egyptian cotton, but although the plant has flourished most vigorously, scarcely any of the balls have come to perfection.

On the Nien-fei movements the *Herald* says:—"The Nien-fei are reported to have gained a series of successes in the country to the north of the Yellow River. They are now in possession of the district of Chu-chow and have established their head-quarters at a place called Hsiaoh-sien. We also learn that Li Hung-chang's expedition to the Honan province has been countermanded, and he will therefore remain at Nanking as Governor-General. A mandarin named Puan, who held a high post under Gordon, has lately been sent to operate against the Nien-fei in the south of the Shantung. He is said to have opened his campaign by a most successful battle in which the rebels lost 2,000 men, but this is of course a gross exaggeration. His men are drilled partly in the European style, and his military stores are either foreign, or imitations of foreign stores. Amongst other munitions a large quantity of English rockets were sent up to him, but not one would go off. A despatch was sent to the Governor-General stating this fact and attributing it to their being old and past service. An examination however proved that the rockets had either been under water or exposed to so much damp that the composition had been reduced to the consistence of putty."

A meeting is shortly to be held to consider the plans for the new church. It will be remembered that the original designs were prepared by Mr. Gilbert Scott; but, being adapted for a building to hold only 460 persons, some alteration was needed to provide sittings for 800, the present estimated number of the congregation. Mr. Kidner, architect, of Shanghai, was employed to enlarge Mr. Scott's designs, and his drawings when completed were sent home for Mr. Scott's approval. This has recently been given, in terms of the highest commendation, and the work will now be proceeded with at once. The building is to cost taels 50,000, of which some 30,000 are already in the hands of the committee.

HONG KONG.

The French mail of 17th Nov. arrived out on the 3rd of Jan. The following P. and O. mail of the 27th, due about the 8th, had not arrived on the 15th Jan.

Digitized by Google

The news from Hong Kong and Canton is particularly barren, and the papers are mostly filled with North China and Japan news.

A report has been published of an inquiry held at a Marine Court into the circumstances attending the mutiny on board the *Pride of the Ganges*, belonging to Messrs. James Baines and Co., of Liverpool. It appears that this vessel, under the command of Captain Jack, took on board at Whampoa 301 Chinese passengers for Demerara, under the auspices of the British and West India Emigration Society, and sailed for her destination on the 9th December. According to the evidence of the chief officer and other witnesses examined, there was a disturbance on board the ship while at Whampoa, owing to a few of the last passengers engaged having received a higher premium than the rest. The discontented portion were, however, appeased by Mr. Samson, the Emigration Agent, coming down from Canton and paying them the difference. The passengers were all kindly treated by the captain, and all seemed content when she left Whampoa in tow of the steamtug *Fame*. On the following day some complaints, apparently unfounded, were made about the quality of the rice. On the 11th the outbreak took place, commencing with a rush of coolies from below, armed with stanchions, &c. The captain, who was below at the time, came on deck to ascertain the cause of the disturbance. James Young, a seaman, who was at the wheel, thus describes what followed:—"He had scarcely got on deck when some of them came down upon him with a stanchion. They beat him very much. He was then between the companion door and the mizen rigging. He made a rush into the lifeboat that was on the davits. When he was half way into the boat one of them came down on him with a blow on his back with a stanchion. He came back on the deck on his feet. I think his back was broken. He then walked towards me at the wheel. I looked him straight in the face, and I saw that his right eye was completely out of the socket. It was I think on his cheek, as I saw something white on it. I did not see the left eye at all. As he came towards me he held up his hands and said, with a mournful voice, 'Oh stop! stop!' Then one of the Chinese who was standing behind came down on his head with a stanchion and he dropped on the deck. They then lifted him up and threw him overboard. I saw him thrown overboard." While this was taking place the purser, Mr. Adolphus, was half strangled and thrown overboard. The chief and second officers escaped into the cabin, barricaded themselves in, and defended themselves for about half an hour, when the Chinese began to break up the deck. They then came up, and were ordered to take the ship to Honam, or Hainan. Mr. Vivers, the chief officer accordingly navigated the ship to the coast of Hainan, where she anchored. Here the mutineers quarrelled among themselves, some wishing to go to Honam and others to proceed to Demerara; the former party were for killing Mr. Vivers, but his life was saved by the others. Eventually they all left the ship and went on shore, upon which Mr. Vivers slipped the anchor and made sail, having only two Chinese left on board, a doctor and an interpreter. This was on the 14th December, and they arrived at Hong Kong on the 31st. Mr. Samson's attendance had been required by the Court, but he was said to be some two hundred miles up the country, and therefore did not appear. The Court adjourned to consider its decision. A report was in circulation among the people to the effect that letters had been received from Cuba, stating that whenever a Chinaman is about to quit the country, their money, clothing, &c., are taken away by order of the Government, which, not allowing them to be on the island without employment for any longer period than two months, takes them and *nolens volens*, forces them into an engagement, and compels them to remain and die on the island. Perhaps the affair of the *Pride of the Ganges* owes its origin to these apprehensions.

The following letter relates to passenger grievances against the P. and O. Company:—

SIR,—Is it worthy of so great a company as the P. and O. to crowd their passengers together as if they were bales of goods and had only paid for cargo-space? I have lately arrived in Hong Kong having come out *via* Bombay, and in the *Malta* which brought me from Suez to that port I was one of four in a cabin, about six feet by ten. I had no means of measuring it exactly, but its breadth fore and aft was the length of one berth, its length from the ship's side to the partition separating it from the fore-saloon certainly not more than ten feet; less than that I believe. The original plan of the cabin had only provided for three berths (one too many) but a fourth had been slung, with brass rods from the beams, at right angles to the others. The cabin contained but one washing basin, and the impossibility of keeping portmanteaux and necessary articles of dress in so miserably small a space, led to the utmost confusion. If the understanding from the first had been that I was to be treated in this manner I should have no right to complain, but the plan of the ship which I saw in London represented the cabin as containing but three berths. On the supposition that this was an honest plan, I took my berth, and I doubt very much whether the company would have a valid defence if anyone chose to bring an action against it under such circumstance, on the ground that it had not fulfilled its contract faithfully. This happened moreover. The berth next the ship's side with no other over it, was numbered, say X. That next the bulkhead and the other above were numbered say Y and Z. I took X, the whole three being disengaged when I paid my passage. When I got on board the ship I found the figures did not correspond with the plan. The berth next the side had the number Y, one of the others had my number X. Of course by this time all were occupied, so I went to the purser and explained my grievance. I could get no redress, however, and was jauntily told that I had taken X, had got X, what more could I say. I humbly put a case and asked the purser whether, if it had pleased the authorities to number one of the coal bunkers X, he would think that having "got X" ought to be enough to satisfy a passenger who had chosen the number from a plan which showed it in the after-saloon. My remarks, however, were deemed irrelevant.

It seems to me that a great deal more might be done by the company for the pleasure and comfort of the passengers than is done at present. In taking a passage one does not contract to be entertained and amused, and I do not, therefore, urge, as a grievance, that the ships are destitute of books, papers, maps, and everything which might tend to keep the passengers from leading a pig's life, dividing their time between eating and sleeping. Still I cannot see why it would be impossible to furnish the saloon with libraries of amusement, containing besides novels, a few such books of travels and science as the incidents of the voyage would probably lead people to refer to; and why the bulkheads should not be hung with maps or charts of the countries traversed by the overland route. Then there should certainly be a piano on board every ship, and a decent little band of three or four players.

I am not touching on subjects of serious importance. The irregularities of the mail service, the frequent accidents which delay their transmission are graver annoyances than those of which I have spoken. Still reform in small matters may often go hand in hand with improvement in others of greater moment, and I do not think it is asking too much, to require the accommodation in the ship, which is engaged at the office, reasonable space, toilet appliances in the cabins, and a little intellectual food to make up for the bad sherry and cold potatoes.—I am, Sir your faithfully,

X.

The American steamer *Fusi-Yama*, Captain Hallet, arrived from New York on the 31st December. She is destined for a sloop-of-war, and has been built to order for the Japanese Government. Her hull, &c., was constructed by Messrs. Westervelt and Co., of New York, and her machinery by Messrs. Murphy and Co., of the same place. She carries a very heavy armament, viz.:—one 100-pounder, four 9-inch Dalghrens, three 30-pounders, two 24-pounder howitzers, and two 12-rifled ditto; her engines are about 175-horse power nominal, but are capable of working to a much higher extent. Having coaled and got into fit order for presentation, she will proceed to Japan, to be at once delivered over to the authorities there.

"Some time ago," says the *Daily Press*, "a vessel called the *Po tung*, chartered to certain Germans, and employed by them, in defiance of stipulations to the contrary, in supplying arms to the Taipings, was seized, after she had resumed legitimate operations, by the Custom-house authorities at Amoy. She was employed by them as a cruiser, and was afterwards transferred to the Canton authorities, by whom she was used for patrolling the river. A few days ago she extended her field of operations, and seized a passage boat outside Hong Kong, took out her opium, and released her. She then chased another passage boat, the opium on board of which was thrown overboard. It is not a little curious that we should be sending our gunboats to perform work for the mandarins, and catch Chinese pirates, while at the same time their cruiser comes down—out of the jurisdiction of the Canton authorities—and blockades our port. If this *Po-tung* is a revenue cruiser, an armed vessel belonging to the Chinese Government, why cannot she assist our gunboats in rooting out the piracy which disgraces this coast?"

The following is the report of the steamer *Far East*, Captain Jones, reported in our last as arrived at Hong Kong:—"The *Far East*, from Calcutta on the 30th November, Sandheads on the 2nd December, Penang on the 10th December, Singapore on the 14th, and Labuan on the 19th, came up to the eastward of Palawan Island, encountering strong N.E. winds and S.W. currents, and found it a more difficult passage than that of the regular Palawan route. At Calcutta English coal was not obtainable, in consequence Bengal coal had to be taken with which steam could not always be kept up, frequent stoppages being necessary from this cause. Since the 25th, when off Manila have had N. and N.W. winds, and mostly under canvas from above causes."

The barque *Palawan*, bound from Sydney to Shanghai, was wrecked near Bordelaise Island, in lat. 7.33 N., long. 155.20 E.

Captain Page and his crew were brought on to Hong Kong by the *Ana*, from Guam, after having suffered much and long-continued hardship, and lost everything they had in the world.

The following mercantile notices have appeared :—

The interest and responsibility of Robert James Farbridge, Robert Muirheid Reddie (deceased), and James Whitlow, in our establishments in China, ceased yesterday, and to-day we have admitted as partners therein Cridland William Farbridge, Joseph Farbridge Holliday, Richard Rowett, and Joseph Perrott Barnes.—Holliday, Wise, and Co. Hong Kong, Jan. 1, 1866.

The interest and responsibility of Robert James Farbridge in our firm in this city ceased yesterday, and we have to-day admitted as partners therein Cridland William Farbridge and Joseph Farbridge Holliday.—Holliday, Wise and Co., Manila, January 1, 1866.

The interest and responsibility of Mr. C. A. Hubener, and of Mr. Arthur Booth, in our firm ceased on the 31st December, 1864, and 31st December, 1865, respectively; and Mr. H. Emil Hubener, and Mr. Oscar Booth, have this day been admitted partners in our firm.—Bourjau, Hubener and Co., Hong Kong, January 11, 1866.

The interest and responsibility of Mr. Francis Bulkeley Johnson in our firm ceased on the 30th June last, and Mr. John How Cheverton is now admitted a partner.—Johnson and Co., Hong Kong, January 1, 1866.

The Overland Trade Report has a long account of some atrocious cruelties lately practised by the Chinese authorities at Amoy on pirates, suspected rebels, and others. Most revolting details are given of the execution of certain criminals who were put to death by slow torture in front of the Hamburg Consulate. There seems strong reason to believe that when pirates are captured by British gunboats and given up to the native authorities for punishment, the real criminals seldom suffer the penalty, substitutes being found by some means. The *Daily Press* correspondent says :—"The gunboat *Grasshopper* captured nineteen pirates at Port Matheson, brought them to Amoy, and delivered them up to the 'Totai' They were tried, all found guilty and condemned to death. But five of the number had friends here, who paid sums of money to the Totai, and procured their release. This I know for a fact, for I happened to accompany nineteen of the prisoners from the prison to the Totai's on the day of their final condemnation and execution ; money having been already paid for three of them, and security given for their good behaviour in future, they had been liberated. When I entered the Yamun the prisoners were brought before the Totai, and their names called over. At this time a respectably dressed Chinaman came to the front, with a handkerchief full of rolls of dollars, and I noticed that the Totai cast a peculiarly longing eye towards the handkerchief, and beamed very complaisantly upon this Chinaman, who performed a very short-winded Kotow, and then presented a petition to his Excellency, which he received and read, and in a few minutes a servant was ordered to receive the Mexicans, and count them, the petitioner accompanying him. The dollars being found correct (I should estimate them at about $500), the crier of the court called out the names of two of the pirates, who were taken apart from the others, their shackles knocked off, and allowed to depart with their kind friend and benefactor! So much for Mandarin law and justice. Out of nearly 50 pirates brought into Amoy by our gunboats, during November and December, all of whom were taken in the very act of piracy, having been given over, only 14 have been executed, all the others having found a friend at Amoy, who was willing to pay a certain sum of money for their liberation."

JAVA.

Summary of Java news brought by the new contract steamer *Koning Willem III.*, with dates to 16th Jan. :—

The Governor-General returned from his tour of inspection on the 18th December. The Industrial Exhibition closed on the 31st December.

Rattan flogging, a punishment frequently administered by the police, has been abolished throughout Netherlands India ; also the reed flogging in the army.

The new law on the Government cultures presented by the Minister of the Colonies to the Chambers, is a topic of general interest in Java. It is received favourably, and will probably be passed.

Order has not as yet been restored at Ceram ; the troops met with little resistance from the natives at their approach. Fighting continues at the West Coast of Borneo. An act of courage and great presence of mind was displayed on board the Government steamer *Boni* during one of the numerous expeditions against the enemy. When attacking a fortified camp, a smart firing was kept up on board the *Boni* to protect the disembarkation of a landing division. A mortar being fired, the burning grenade struck against the iron chain of the awning and rebounded on deck. Immediate command was given to all present on deck to lay down, but Captain Kilian, of the artillery, seized, without a moment's hesitation, the burning grenade with both hands, and threw it overboard, where it burst, having scarcely reached the surface of the water, giving the vessel a severe shock.

SIAM.

BANGKOK.

Our dates are to the 14th Jannary. The chief item of intelligence is the death of his Majesty the Second King of Siam, who died of dysentery. He was a very worthy and enlightened Prince, and will be deeply regretted by all foreigners as well as by his own people.

We regret to hear that the publication of the *Siam Times* is discontinued, but believe that its suspension is only temporary.

MALACCA STRAITS.

SINGAPORE.

The P. and O. mail of 11th Dec. arrived out on the 16th Jan. The dates are now down to the 22nd. The *Straits Times* expresses surprise that the Postmaster-General should have renewed the contract with the P. and O. Company. This contract is terminable or subject to revision yearly, and if another company can show their ability to perform the various services better, there is room for them. Unfortunately, experience is against them up to the present time. The French company has been extremely well managed, but at an enormous cost to Government.

With regard to the impediment which it was rumoured, and to which we referred in our last, that the Tumongong was about to impose to the exports of produce from his territory, very little further has transpired. The protest of the Chamber of Commerce, of course, duly reached his Honour the Governor, and we understand that an official inquiry into the subject is now on foot. As we stated as far back as eighteen months ago, it will be exceedingly difficult for the local government here to interpose, on the strength of existing treaties, against any cation of the Tumongong in Johore short of the establishment of differential duties. It is quite clear, however, that independent action upon the part of the Tumongong, who is so near a neighbour, must be prejudicial to the interests of Singapore, and it may now be time to see whether or not our treat es with him cannot be rendered more stringent. The English Government, in the absolute possession which is granted them in the treaty of 1824, of the waters of the old Straits, possesses a strong means of coercion.

The first criminal session of the year, which was opened on the 9th Jan., was closed a few days afterwards, very few difficult cases having to be adjudicated. One man, a ticket-of-leave convict, was convicted of murder, and suffered the extreme penalty of the law on the 17th Jan. At the close of the session the grand jurors presented to Sir Richard McCausland, the Recorder, a farewell address, in which they expressed a very high eulogium of the learned Judge's administration during the past ten years, and thanked him for the courtesy which he had invariably extended to them.

The ice works, which have long been the subject of dissatisfaction and complaint, have now passed into the hands of the Singapore Ice Company, whose operations will be carried out on a scale commensurate with all the requirements of the place. A general mourning was observed here on Friday on account of the death of his Majesty the second King of Siam, news of which event reached this by the Siamese steamer on the day previous. The weather still continues rainy, but next month will see the commencement of the hot season.

We extract the following from the *Bombay Gazette* of 13th of December :—"We understand that the 7th M.N.I. and 11th M.N.I., which were under orders to move from Rajpore to Singapore, and from Singapore to Rajpore respectively, have been ordered by Sir Gaspard Le Marchant to stand fast another year."

The Portuguese steam frigate *Maria Anna*, Captain Rosa Oliviera, from Timor, anchored in the harbour on the 12th of January.

We have no Penang papers to hand, and presume they have been again addressed via Southampton.

At Shanghai, Bills on India, Rs. 298 to 299 per 100 taels. At Hong Kong, Rs. 218 to Rs. 219 per $100. Bar Silver at Shanghai, 111 taels; at Hong Kong, 10½ per cent. prem. Mexican dollars at Shanghai, taels 72 per 100 and Exchange on Hong Kong, 26 to 27 discount. Hong Kong and Shanghai Bank shares, 12 per cent. prem.; Gas Company in demand by Europeans and Chinese at £3 and £4 prem. per share; Hong Kong and Whampoa Docks, 40 prem.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—The continued good advices from London make exporters confident, and the markets are being fast swept of all available parcels. Black Teas continue to advance, although the assortment is becoming very poor. Green Teas are being taken at irregular, but still at high rates. The season is drawing fast to a close.

CANTON.—Our market remained rather inactive until the last week, when the news brought by the French mail of 17th November stimulated buyers to make purchases—Canton Gunpowders more especially attracting attention for the English market, which was reported to have advanced for these kinds considerably. Country Congous: Our stock has been increased by the arrival of two more chops, for which offers have been made, but as yet no transactions have taken place. Country Greens: Two small chops are expected here in the course of the fortnight with more to follow very shortly. Canton Gunpowders have been in great demand, and considerable settlements effected. Prices have advanced tls. 3 to 4, and holders are now very firm at closing rates. Stocks are now much reduced, and consist almost entirely of the common grades.

AMOY.—There has been an active demand for America and all clean teas have met with ready sale at full prices. Oolon Ankois 7,079 packages have been settled at $14 to 19 for inferior and common, $20 to 24 for good common to fair, and $28 to 30 for good to fine cargo. Fairly Clean Ankois have realised at $13 to 14 per picul. Congous: Only 88 packages. Low Common have been taken at $13.

FOOCHOW.—A good demand continues for Congous. Some further supplies of inferior quality have arrived from the country, which were disposed of at full rates. Some Foochow packed is now on the market. The total quantity thus brought forward exceeds 3,000 packages. A good business has been done in Oolongs for shipment to New York at a trifling advance. About 2,000 packages of the cargo of the Eurydice were found damaged; these were mostly Amoy teas and were sold at auction, bringing high rates. The following are the settlements for the fortnight:—Congous, 7,500 chests at 8 to 13 taels for dust and broken leaf; 14 to 17 for ordinary common; 17 to 19 for good common; 20 to 23 for a little flowery; and 24 to 25 for fair flowery. Souchong, 220 chests common to medium at 19 to 21 taels. Oolongs, 12,000 half-chests at 8 to 19 taels for common to good cargo, and 20 to 26 for fair. Flowery Pekoes, 200 chests at 17 to 23 taels for common to medium. Scented Teas, 4,500 boxes at 8 to 22 taels for common to medium.

SHANGHAI.—Black Teas: The favourable news brought by the mail caused holders to demand an advance of one tael for the 3,500 chests Congou left in stock, which with 2,000 packages received from the river ports comprises the business of the fortnight. There are now only two country packed chops on the market, and few, if any more, arrivals expected. Several small musters of Shanghai packed teas are offering, but the making up of the chops depends entirely upon the price buyers will give. Settlements have been 5,500 chests of common Oonam at tls. 21¼ to 23, and common to fair Ningchow, at tls. 23 to 29½. Reshipments have only been 600 chests, and the stock consists of 750 chests. Green Teas: The market has been quiet. Settlements amount to 11,400 half-chests Fychow and Moyune, at tls. 29¼ to 51¼, and 600 half-chests Pinsuey at tls. 33½. Re-shipments have been 2,500 half-chests, and the stock is estimated at 13,000 half-chests Fychow and Moyune, and 3,000 half-chests local packed.

YOKOHAMA.—We have to advise a very animated Tea market; prices have advanced considerably, and in some instances show a rise of $8 per picul on our quotations of the 15th instant; the teamen are very firm in their demands. Settlements have been made for America with one or two exceptions, and consist chiefly of good medium to fine kinds; we estimate them at 2,400 piculs, leaving a stock of about 1,000 piculs, comprising the following:—the quotations are as follows: Good Common $20 to 25 per picul. Medium $26 to 35. Good Med. to Fine $36 to 45.

RAW SILK.—This opportunity conveys 1,247 bales for Southampton, 166 bales for Marseilles. Of the quantity taken for Southampton and Marseilles 830 bales are Japan.

CANTON.—The settlements of the fortnight amount to 220 piculs silk, 300 piculs pungum, and 200 piculs silk waste. Quotations are as under:—Loong-kong, No. 1, $615 to 625 per picul; No. 2, $600 to 610 per picul.

SHANGHAI.—Since the departure of the last mail to Europe, but little business has been done in China Silk, partly owing to the New Year's holidays, but more especially on account of the high rates ruling and the scarcity of good silks. The lower classes of Taysaams and Yuenfas may quoted slightly lower, though the prices paid for all descriptions have been very irregular. Arrivals from the interior are unusually small, and there is now no doubt that but little silk remains to be sent forward this season. Quotations are—Tsatlees, chops No. 1, none; do., chops No. 2, 630 to 635 tls. per picul; Taysaams, chops No. 1, 540 to 555 tls. per picul; do., chops No. 2, 510 to 520 tls. per picul.

YOKOHAMA.—There has been a much larger amount of business transacted than was expected, considering the high pitch that prices had attained to; the advices received by the Dupleix having caused some few buyers to enter the market and purchase to a considerable extent. Had this demand not set in, there is no doubt that the anxiety the native holders evinced to sell as we last remarked, would have had its natural fruits in some concession being made by them, and a lower scale of prices generally; as it is, the market rate has been sustained and fair average parcels of hanks must be quoted $920, whilst for anything very fine, a higher rate would readily be paid. The settlements for the present mail steamer may be estimated at from 800 to 900 bales, which will bring our export for the first six months of our season to about 7,400 bales against 8,500 bales last year, or a deficiency of 1,100 bales.

CHINA IMPORTS.

COTTON YARN has attracted but little attention during the fortnight. Deliveries amount to about 136 bales, of which 20 bales were Singapore goods and 30 were sold by public auction. Grey Shirtings: During the first part of the fortnight there was no inquiry for these goods, but on receipt of telegrams per Reiver from Calcutta a demand sprang up, and considerable sales were effected at from $4.75 to 4.85 for 8.4 lbs. goods. The market has since advanced 10 to 15 cents, sales "to arrive" having been made as high as $4.95 for 8.4 lbs. $5 to 5.15 are asked for goods on the spot, but there is but little disposition to buy pending the mail's arrival. Sales amount to about 24,300 pieces, principally to foreigners, 1,300 of which were sold at auction. White Shirtings have been but little sought after during the fortnight. Clearances only amount to 800 pieces. T-Cloths: There has been a small inquiry for these goods. Prices for 7 lbs. are rather firmer. 7,100 pieces have been sold. American Drills: None in stock. Quotations nominal. Of English Drills, 15 bales have been sold at auction at $5.35. White Spotted Shirtings, Dyed ditto, Brocades White and Coloured: These goods remain much as last reported; 750 pieces of the former have been disposed of, but of the others there are no sales to report, and quotations remain unchanged. Damasks and Chintzes: No sales have been effected. Handkerchiefs have also been quite neglected.

RAW COTTON.—A brisk demand has sprung up for the staple, and prices show a considerable advance. Europeans have been buyers to a moderate extent, both for speculation and, it is reported, for export to England. Clearances amount to about 12,000 bales, of which 5,000 are Bengal Cotton There have been no large arrivals, and the market closes very firm with a strong upward tendency. There is no Japan Cotton here, and prices are quite nominal.

WOOLLENS.—Spanish Stripes, Medium Cloths, Ladies' and Habit Cloths: There is but little demand for these goods; about 50 pieces Scarlet Spanish Stripes and 40 pieces Medium cloths have found buyers at previous rates. Long Ells show a decline in price, owing to a falling off in the demand. The only clearances reported are 100 pieces of H Scarlet. Camlets: 220 pieces of English Camlets have been sold at former prices. Lastings: No sales to report. Rates the same. Blankets remain without change.

METALS.—Iron: Nail Rod Iron has been in good demand, and prices have somewhat advanced. Deliveries amount to 5,000 piculs. 400 piculs of Bar Iron and 500 of Hoop have also found buyers. About 150 piculs of wire have been sold. Lead has been in good demand among foreigners, and prices have advanced about 25 cents. Sales are estimated at about 4,000 piculs. The stock still continues very large. In Canton there has been a corresponding advance, and 2,000 piculs have found buyers. Tin: The only sales reported are 50 slabs of Malacca Tin. Tin Plates: No change to report. Steel: Without sales. Quicksilver: About 200 flasks have been sold here and 300 in Canton.

COALS.—HONG KONG.—One small lot of Australian (400 tons) comprise the entire addition to our stocks. This parcel was eagerly bought at $12. We still quote English and Welsh firm at $14.

SHANGHAI.—Coals have remained firm, and sales have fetched fully last quotations. Stocks are decreasing, and though there is less eagerness on the part of buyers to increase their stocks at present rates, the market is in very healthy state. Stocks of coals, 6th January, 1866. English, 23,730 tons; American, 5,123 tons; Sydney, 3,053 tons. Import of Foreign Coals at Shanghai:—1858, 29,400 tons; 1859, 57,700 tons; 1860, 53,200 tons; 1861, 33,503 tons; 1862, 173,500 tons; 1863, 161,400 tons; 1864, 117,244 tons; 1865, 91,231 tons, viz.: From Great Britain, 51,355 tons; America, 11,217 tons; Sydney, 28,689; equal to 91,231 tons.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—From London: Dec. 27, Medina.

At SHANGHAI.—From London: Dec. 31, Jubilee. From Sunderland: 28, Prince Alfred; Jan. 6, Kirkland. From Cardiff: 2, Sailors' Home.

At HONG KONG and CANTON.—None.

At MANILA.—From London: Dec. 30, Manila.

At SINGAPORE.—From London: Jan. 7, Bride. From Glasgow: 11, Taymouth Castle. From Newcastle: 7, Newcastle; 14, J. W. A. Lorenzen. From Newport: 15, Herschel. From Amsterdam, 13, Bernard and Agnes.

At BATAVIA.—From Liverpool: Braganza, Bulgersteyn.

DEPARTURES.

From YOKOHAMA.—For New York: Dec. 22, Lucerne.

From SHANGHAI.—For New York: Dec. 27, Memento.

From FOOCHOW.—For London: Assyrian, Cambalu, Albuera, Ocean Spray.

From AMOY.—For New York: Dec. 31, Formosa.

From HONG KONG and CANTON.—For New York: Jan. 4, Gem of the Ocean; 7, Antelope.

From MANILA.—For London: Dec. 26, Moulin; 31, Monsoon.

From SINGAPORE.—For London: Jan. 17, Kinnaird. For New York; 10, Chesseren; 16, James Paton. For Boston: 18, Tordenskjold.

From HONG KONG.—For London, via Cape: Jan. 13, Layard, cleared, Agincourt. For Swinam: Whirlwind.

LOADING.

At YOKOHAMA.—For London: Cleveland. For New York: Monkchester, Flatworth, Louisa Bragington.

At NAGASAKI.—For London: Chanticleer.

At SHANGHAI.—For London: Rajah of Cochin (full), Peter Denny, Petchelee. For New York: Grasmere (full), Indus, Horatio, Hotspur.

At FOOCHOW.—For London: Adelina (full), Dilkhoosh. For New York: Buena Vista.

At AMOY.—For New York: Marco Polo, Amaranth.

At HONG KONG and CANTON.—For London: Queen of the Age. For New York: Dan, Hugo and Otto.

At MANILA.—For Hamburg: Voladora. For Cadiz: Elena. For Falmouth: Ferozepore. For New York: Goethe, Santee. For Boston: Mindoro.

At SINGAPORE.—For London: County of Ayr, William Simpson, Nancy Bryson. For Continent: Augusta and Meline. For Bordeaux: Mohely. For New York, Leotine. For Boston, Borneo.

At BATAVIA.—For Channel: Superb, Cheribon, Favorit, Stad Middelburg, Bustran Pot, Aegidia and Pauline, Kinderdyk, Joannes. For United States: Hong Kong.

FREIGHTS AND CHARTERS.

At SHANGHAI.—There is no improvement to report, although tonnage is scarce. The only demand for vessels has been for the rice ports at an advance of 2s. 6d. per ton, viz.: £2 17s. 6d. to United Kingdom, 30 lay days. An improvement in the freight market is, however, anticipated.

At FOOCHOW.—To London, £2 10s. per ton of 50 cubic feet.

At HONG KONG and CANTON.—Vessels on the berth for London and Liverpool are loading at £2 5s. to £2 10s., and to New York £2 and $12. From the rice ports to United Kingdom, £2 12s. 6d. to £2 15s.; to Continent, £3; to Bangkok and back, 40 to 45 cents per picul. The Circular of Geo. Holmes gives the estimate of disengaged vessels as 50, representing 23,037 tons.

SINGAPORE.—Freights generally have improved. The Ocean Home has been chartered to load at Penang for London, £2 dead weight, £2 10s. light freight, and £3 measurement. Wallace (1112 tons) from rice ports home, £3 all round. To Hong Kong the rate is 37½ cents per picul.

BATAVIA.—To load at rice ports to Channel for orders, £2 15s. to £3 per ton.

VESSELS PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA, &c.—Jan. 2, Ocean, from Cardiff to Singapore; 6, Tonia, from Newport to Singapore.

From CHINA, &c., to ENGLAND and CONTINENT.—Jan. 1, Excelsior, from Singapore to Liverpool; Lammermuir, from Foo-chow to London; 5, Labrador, from Manila to Liverpool; Earl Dalhousie, from Shanghai to London; 7, Arab Steed, from Singapore to Liverpool; 8, Bacchanter from Foo-chow to London; 9, Patrician, from Shanghai to London.

From CHINA, &c., to UNITED STATES.—Dec. 27, Archer, from Foo-chow to New York; 29, Tanjore, from Hong Kong to New York; Jan. 2, Prospero, from Foo-chow to New York; 4, Star King, from Canton to New York; Glenclune, from Foo-chow to New York; 5, J. N. Cushing, from Shanghai to New York; 8, Blanche, from Nagasaki to New York; Alexander, from Singapore to Boston; 9, Vinco, from Japan to Boston; Caroline Elizabeth, from Singapore to New York.

COMMERCIAL POSTSCRIPT.

ARRIVALS NOT INCLUDED IN THE TABLES.—February 23, at London, from Bankok, Hampton Court; from Shanghai, Lord Clyde; from Manila, Eduard; at Portsmouth, from Maulmain, &c., Almira; 22, at Portland Roads, from Batavia, Maria Anna; 7, at New York, from Macao, Alida; 25, at Deal from Foo-chow-Foo, Hydra; 11, at New York from Shanghai, Podesta; at Holmes Hole from Batavia, Silver Craig; 26, at Falmouth from China, Asia.

DEPARTURES.—Feb., from Amsterdam for Batavia, Tagal; 16, from Lisbon for Nagasaki, Eagle (s.s.); 24, from London for Hong Kong and Canton, Hotspur; for Shanghai, Fi Wan; for Cardiff and Galle, Montrose; from Rotterdam for Batavia, Nagasaki; 18, from Newcastle for Singapore, Holland; from Amsterdam for Batavia, Iago; 21, from Cardiff for Hong Kong, Pocahontas; for Singapore, Metis; 22, from Liverpool for Hong Kong, Avon; the steamer Douglas was to leave Aberdeen for Hong Kong yesterday; from Amsterdam for Batavia, Stad Assen; 23, from Shields for Singapore, St. Oswyn.

SPOKEN.—Silver Craig, Batavia to Boston, Feb. 7, lat. 41, lon. 70; Florentia, Foo-chow-Foo to London, Jan. 30, 3 N., 22 W.; Voorint, Batavia to Rotterdam, Jan. 4, 13 S., 8 W.; Abel Tasman, Bali to Amsterdam, Jan. 25, 13 N., 35 W.

JOHN SMALE, Esq., Attorney-General of Hong Kong (now in England), has been appointed Chief Justice. We have not heard who will succeed to the post of Attorney-General, nor as to the appointment of a Bishop.

APPOINTMENTS.—The Queen has been pleased to approve of M. Woldemar Nissen as Consul at Hong Kong for the Free Hanseatic City of Hamburg. The Queen has also been pleased to approve of M. Woldemar Nissen as Consul at Hong Kong for the Free Hanseatic City of Bremen.

THE JAPANESE COMMISSIONER.—Before leaving this country H. E. Shibata Hiouga no Kami and suite visited the studio of Mr. Herbert Watkins, in Regent-street, who took *carte-de-visite* portraits of the whole party, six in number. The likenesses are strikingly good, and form probably the best series of Japanese portraits yet taken.

THE CHANCELLOR OF THE EXCHEQUER AND THE TEA DUTIES.—The following correspondence in reference to the rumoured intention on the part of the Government to make a further alteration in the tea duties during the present session has taken place between Messrs. Cock, Spavin, and Co., tea merchants, and the Chancellor of the Exchequer. That firm wrote as follows, under date of the 16th inst.:—"9, Fenchurch-street.—Sir,—In consequence of a rumour current as to an intended alteration in the duty on tea, the sale of that article and the payment of the duty thereon are seriously obstructed; and we shall be much obliged if you will be

Digitized by Google

good enough to state (as you have lately done on a similar application from a member of the wine trade) whether such rumour is well founded or not. An emphatic 'No' on your part will benefit both the revenue and the trade at large, but in the absence of some positive statement on the matter the trade will be in a state of stagnation until the delivery of your budget.—We have the honour to be, &c., COCK, SPAVIN, and Co." To this the following reply was received :—"Downing-street, February 17.—Gentlemen,—I am directed by the Chancellor of the Exchequer to acknowledge the receipt of your letter of yesterday, and to inform you that, except in special cases, as for instance where the Government has itself done some act tending to create uncertainty and speculation, he is precluded by general rules of undoubted cogency from giving any reply to a question respecting fiscal changes. Mr. Gladstone desires me, however, to say that he is wholly at a loss to account for any such rumour as the one to which you allude, and he would have thought that the obvious circumstances of the case would have sufficed to prevent such a report being either circulated or believed.—I have the honour, &c., W. B. GURDON."

PAGE v. COWASJEE EDULJEE—JUDGMENT.—This was an appeal from the Supreme Court at Ceylon, which had set aside a decision of a district court. There had been considerable litigation respecting the sale of a ship. It was alleged that because some delay had occurred the vendor had sold the ship to another person. The parties went to law, and the case had been before the courts in the island. Lord Chelmsford delivered the judgment of their lordships, reviewing at considerable length the facts and the views entertained by the parties. The cases in the books ruled that a chattel was sold, although it remained in the possession of the vendor, and that there was no right to resell the property. One side could bring an action in trover, and if the chattel was sold an action for damages could be maintained. Their lordships hoped there would be no further litigation, but that an arrangement which must be obvious to all would be made between the parties. Their lordships set aside both the decisions in the courts below, but gave no costs to either side.

PRESENTATION OF BIBLES TO CHANG WOO GOW AND PARTY.—On the 21st the tall Celestial and his Chinese friends attended the Exeter-hall Hotel, for the purpose of receiving presentations of the Scriptures printed in their own language. The Rev. Mr. Summers, Professor of Chinese at King's College, presided, and read an address which, given with much freedom, and evidently with great command over the Mandarin dialect on his part, seemed to considerably astonish and impress the strangers. Chang Woo Gow replied with much earnestness, reading from a paper, which he presented to the rev. professor at the termination of his address, with a translation by Kwan Toon.

THE EARL OF DONOUGHMORE.—The Earl of Donoughmore died on the 21st after a protracted illness. He was born in April, 1823, and married April 7, 1847, to the Hon. Margaret, eldest daughter and co-heir of Mr. Walter Steele. He is succeeded in his titles and estates by his eldest son, John Luke George, Viscount Suirdale, born 1848. The death of the Earl of Donoughmore leaves a gap in the ranks of the Conservative party which will not be easily filled. Early in life the deceased nobleman entered the army, and served his country with distinction in China; but after his inheritance of his father's title and estates he devoted himself almost entirely to public life, and became one of the most industrious, active and useful members of the House of Peers. He fulfilled all the duties of a country gentleman with judgment and skill, and though for some years his declining health prevented him from taking that active part in country affairs which he always desired to do, he devoted a large portion of his fortune to the improvement of his estate and to the endeavour to render his tenants prosperous and comfortable.

COOLIE EMIGRATION TO THE WEST INDIES.—A recent Havannah price current contains the following statement with regard to the importation of coolie labour into Cuba :—"There have arrived during this year some 8,000 Asiatics in twenty vessels. The demand for this class of labour is steadily on the increase, owing to the extended cultivation on our sugar plantations. Contracts have changed hands, and recently the equipment of three vessels has been transferred from the original contracts to second hands at $357 for each person, another for $340 for each, with 10 per cent. discount, payable the half in cash and the remainder at three and six months' credit, with interest at 8 per cent." A Trinidad paper noticing the departure of the ship *British Trident* from that island, says :—"This vessel has taken from our shores 354 men and 87 women, with 73 children, who are now on their way back to a country where a few years ago our recruiters picked them up poor, lean, ragged, and starving. They have left us, as thousands who have seen them about the streets can testify, in good and robust health, dressed in gaudy garments, and glittering with silver anklets and armlets, and jewelled noserings and earrings. These 441 men and women are the possessors of £12,408 in hard cash, saved out of their earnings in Trinidad. It seems strange that this country, which is poor in men and women, and not over rich in money, should periodically be called upon to send away its labourers when it has trained them to be efficient, and the consideration should make us prefer Chinese immigration to that from India, for the Chinese, not being entitled to a back passage, have at least no temptation to leave the country held out to them. But if these Indian immigrants cannot be retained on the estates, but look for greater independence, it might be possible to retain them as settlers, if, instead of hoarding the Crown lands for a day when the nations of the earth shall be squabbling for a rood of our soil, a grant were offered to persons so well worth retaining."

THE CEYLON LEAGUE DEPUTATION.—On the 24th inst. a deputation, consisting of Sir James Elphinstone, Bart., Sir Arthur William Buller, Bart., M.P., Messrs. Shand, Dyer, Bischoff, and Watkin, M.P., had an interview with the Right Hon. Edward Cardwell at the Colonial-office, for the purpose of presenting the petition from the Ceylon League to the Queen. Mr. Bischoff, as agent of the League, handed the document to Mr. Cardwell, pointing out that it was signed by the principal estate owners and by the leading mercantile firms, both European and native, of Ceylon. After some conversation, Sir James Elphinstone adverted to the grievances of which the colonists complained, in regard to the mode of taxation, and as respected its incidence to the article of rice, advocating also the expenditure of funds in improving communication with India, and other external and internal interests. Sir Arthur Buller then took up the specific grounds of complaint set forth in the petition, and in illustration of the justice of the claim to more effective representation, alluded to the instructions lately sent to Trinidad for equalising the number of official and unofficial members, and the similar proposal that was entertained in reference to Jamaica, asserting that were the same terms accorded to Ceylon one of the principal grievances of the memorialists would be disposed of. Mr. Watkin called attention to the serious injustice of not giving tax and rate payers an influential voice in the administration of the colonial funds. After further remarks in reply to Mr. Cardwell, and in elucidation of the purposes of the petition, the Secretary stated that the subject-matter of the document would have his best consideration, but as it had not been transmitted through Sir Hercules Robinson the Home Government would apply for his Excellency's views thereon prior to tendering any advice to the Queen.

ST. HELENA, JAN. 23.—On the 6th instant the barque Ensign, from Shanghai for London, put into this port for medical advice for the captain, who was struck by a block falling from aloft. While off the Cape of Good Hope she experienced a heavy gale of wind, which obliged her to put under double-reefed topsails for several hours. Two men were washed overboard from the jibboom and drowned. One of these poor men was seen for upwards of two hours, but the other disappeared almost instantaneously. The moment the alarm was given the vessel was put about, and every exertion made to save him by throwing out the lifebuoy and ropes; but they could not be got near enough to him. Before losing sight of the poor fellow he was heard to say "I'm going." The boat could not be put out owing to the heavy sea on.

PROCEEDINGS OF LEARFED SOCIETIES.—At the meeting of the Nunismatic Society, on the 15th Feb., Mr. Holt gave an account of a collection of Chinese coins, formed by himself in China, exhibiting several examples. And at the meeting of the Zoological Society, on the 13th, Mr. Sclater exhibited part of a collection of mammals and birds sent home from the vicinity of Nagasaki, by Mr. H. Whitely, and called attention to several rare species represented in it.

NINE young priests educated at the College of the Foreign Missions' in the Rue de Bac, left Paris *via* Marseilles by the last mail, to preach the Gospel in Japan, Cochin China, and Thibet.

Literature.

Of books occupied with China and the East we must note the appearance of the Rev. Justus Doolittle's *Social Life of the Chinese*, published in the United States, but which may be had from Messrs. Sampson Low, Son, and Marston, the London agents. The writer will be well known, either personally or by reputation, to a large number of our readers, as "fourteen years member of the Fuh-Chau Mission of the American Board." The greater portion of the two volumes has already appeared in the columns of the *China Mail* of Hong Kong, in the form of letters; and all who made their acquaintance in that shape will be glad to receive them in a collected series, enhanced in value by more than 150 illustrations.—A second volume has appeared of *Oriental Races, Tribes, Visitors, and Residents of Bombay*—a series of photographs, with letter-press descriptions, making a very handsome book.

We learn from *Trubner's American and Oriental Literary Record* that an attempt has just been made by a native Chinese to afford foreigners a handbook for acquiring the Mandarin (spoken) language, as well to assist natives speaking the Northern dialects in learning English. Its title is "*Ying Yü Kwan Hwa Ho Kiang*—The English and Mandarin Languages conjointly explained;" and its contents are chiefly in the nature of a vocabulary, interspersed with conversations, the English sound being represented, in addition to the text, by Chinese phonographic devices of the ordinary description. The author is a native of Canton, whose father compiled many years ago the handbook of Cantonese and Mandarin, from which the late Robert Thom selected his *Chinese Speaker*.—The second or alphabetical part of *Morrison's Chinese Dictionary* has been reprinted, and will shortly be published in two handsome royal octavo volumes of about 750 pages each.

BANKS AND COMPANIES CONNECTED WITH THE FAR EAST.

Peninsular and Oriental Steam Navigation Company, 122, Leadenhall-street.

Messageries Imperiales, Head office in Paris, R. W. and H. Horne, agents, 4, Moorgate-street.

China Steamship and Labuan Coal Company, Ethelburga House, 70, Bishopsgate-street.

Netherlands India Steam Navigation Company, 12, Leadenhall-street.

Hong Kong and China Gas Company, 11, Old Jewry Chambers, J. H. Walduck, secretary.

Singapore Gas Company, 25, Poultry, Robert King, secretary.

Pacific Saw Mills, Hakodadi, Armitstead and Co., agents, 21, Old Broad-street.

Amoy Dock Company, Zulueta and Co., agents, 22, Moorgate-street.

Shanghai Wharf Company, D. and G. Latimer and Co., agents, St. Swithin's-lane.

Hong Kong and Whampoa Dock, Morrison and Co., agents, Crown-court, Philpot-lane.

North China Insurance Company, Ashton and Co., agents, Hatton court, Threadneedle-street.
Canton Insurance Company, Matheson and Co., agents, 3, Lombard st.
Union Insurance Company of Canton, Dent, Palmer and Co agents, King's Arms Yard, Moorgate-street.
Hong Kong Insurance Company, Gledstanes and Co., agents, 26, Austin Friars.
Hong Kong Marine Insurance Company, Farbridge, Holliday and Co., agents, Manchester.
Ceylon Company, 7, East India Avenue, J. Anderson, secretary.
Borneo Company, 7, Mincing-lane, R. Harvey, manager.
Matella Coffee Company, 70 Cannon-street.
Ouvah Coffee Company, do.
Ceylon Coffee Estates, do.
Hungaserian Coffee Company, do.
Tanjong Pagar Dock Company (Limited) of Singapore, Mactaggart, Tidman, and Co., agents, 5, Lime-staeet.

BANKS.

Asiatic Bank Corporation, 4, Lombard-street, F. Lawrence, manager.
Agra and Masterman's Bank, Nicholas-lane, Lombard-street, Mackintosh Balfour, general manager.
Chartered Bank of India, Australia, and China, 21, Threadneedle-street, G. N. Adam, manager.
Chartered Mercantile Bank of India, London, and China, 52, Threadneedle-street, D. T. Robertson, general manager.
Commercial Bank Corporation of India and the East, 64, Mcorgate-street, Robert Angus, chief manager.
Central Bank of Western India, 22, Old Broad-street, R. Davidson, agent.
Comptoir d'Escompte de Paris, Union Bank of London, agents.
Hindustan, China, and Japan, 1, Bank-buildings, Lothbury, J. Ouseley, general manager.
Hong Kong and Shanghai Banking Company, W. H. Vacher, agent, Gresham House, Old Broad-street.
Oriental Bank Corporation, Threadneedle-street, C. J. F. Stuart, chief manager.

*** Companies omitted in the above list will be included if the particulars are forwarded.

THE CULTIVATION OF TEA IN CEYLON.

THE Report issued from the Royal Botanic Garden of Ceylon has excited very general attention in England, but no portion in this brief official issue is invested with so much interest as the paragraph detailing the trials of the tea plant. The important commercial results that have ensued in India from the cultivation of the tea plant, after a series of early disasters, since the establishment of experimental tea gardens by the Indian Government at Tingrai and Chvowa, the extensive area over which the plant has there spread since 1835, and the prolific promise of the future, induce a strong confidence in the results of the experiments now being conducted in Ceylon. Government assistance, indeed, is not looked for; there is enough capital and enough enterprise to fill any new channel that shall be opened, provided reasonable ground for anticipating a satisfactory return can be shown; all that is required is sufficient and reliable data. We would have been better satisfied had Dr. THWAITES' Report contained a statement of the special varieties of tea plants cultivated; we hope, however, soon to have samples, when we will be able to throw light on this point. It is incumbent on those to whom seeds have been supplied, and who are planting out nurseries, that they should each keep careful records of their several methods of treatment, with other particulars as to locality, soil, weather, availability and cost of labour. In the successful cultivation of tea Ceylon will find a security for the enhanced value of its lands; for hitherto the land on estates above the range for coffee-growing plantations has been taken into little account. The experimental cultivation of tea will, we have no doubt, the present year be carried above the elevation of 5,000 feet, to which it has heretofore been confined.

How far those planters to whom seed has been entrusted have had experience elsewhere in tea-growing we are not informed, but Ceylon is not wanting in such individuals; and as treatment and manufacture, apart from the variety of the sed, composition of the soil, and the nature of the situation, have so much to do with results, we trust we shall not be without the benefit of their observations. We use the term *nature* of the situation advisedly, for India and China experience demonstrates that the configuration of the land, as distinct from mere altitude, exercises itself a most important influence. Ceylon has the example of Java to encourage her in the growth of tea; the conditions, indeed, of labour are different, but this is also the case with coffee; and we have confidence in the superiority of British skill and free labour to achieve the same relative degree of excellence in Ceylon tea as in Ceylon coffee. Although Ceylon will not have the advantages of the Indian tea districts in the price of labour, yet an average return on tea crops of 1s. 11d. per lb.—which was no more than the average price of the outturn on the 2,900,000 lbs. of Assam tea exported in 1864 against 1s. 6¾d. per lb. of China tea—would go far to render the cultivation remunerative, provided the necessary skill, combined with judicious economy, is exercised beforehand. We are not oblivious of the fact that of the fourteen Indian tea companies brought out, exclusive of the Assam—of which the market price of £50 shares on which £20 has been paid is £52—the shares of only one, the Upper Assam, are as high as 3 premium, that only three of the remainder are at par, the rest varying from ½ to 2 discount—including the Darjeeling and Eastern Assam, which have a heavy guarantee dividend extending over a period of three years from the date of the formation. But it is to be remarked that, notwithstanding the depreciation the shares have undergone as compared with nominal value, the anticipations originally set forth by the promoters, and enlarged upon in the reports of the several boards of directors, have been mostly exceeded; that their last dividends have been considerable; and that if these were not fully justified the cause is in the excessive outlay in the acquirement of the estates, as well as in the increased cost of labour under influences found to be in universal operation, and from which no habitable locality apparently is excluded. Eventually, as a partial compensatory influence, we have no doubt that machinery will take the place of the present various manual operations in the curing, to the immense advantage of such a country as Ceylon, where labour, so long as it must be imported, rules high. However successful the results of tea growing in Ceylon may be, we would hardly advise the formation at the outset of an Anglo-Ceylon Tea Company. It will rather be a matter for individual planters, or for existing companies, to seek to carry out on their own lands, and on a moderate scale, the cultivation of tea beyond the experimental stage. Tea, to be cultivated with a view to commercial profit, should be cultivated, we allow, on a large scale, nor will anything less justify the cost of the best appliances for curing. But capital is timorous, more especially when solicited for an industrial undertaking in a country new to that form of enterprise. At the same time, we are satisfied that a combination among Ceylon planters, *owning contiguous lands* suitable for the cultivation for the purpose of tea growing, would, if judiciously supervised, result in very material success, and so, eventually, encourage the formation of English companies for the same purpose.

SAM MENDEL'S MANCHESTER EXPORT TABLES.

Sam Mendel's well-known annual tables, extending the survey of our exports of cotton goods to foreign countries over a wide series of years, have thus an especial value. The figures presented are suggestive at a glance of the relative force of those influences operating at different periods to augment or curtail our exports; and although no absolute law for determining future variations is obtainable by deduction, a more approximate estimate is thus secured, by taking into account the present condition of markets and changes of circumstances, and the character of future demand on our manufactured stocks. Side by side with these tables, which give the monthly exports of plain cottons and yarn to the ports of the Far East, together with aggregate quantities for each quarter, and again, the monthly average throughout the past ten years, is to be placed side by side, another elaborate statement, also prepared by Mr. Sam Mendel, showing the monthly average fluctuations in the Bank of England rate of discount in the same period of time, as well as the ruling price of Consols and of cotton, yarn, and cloth. Thus all the means of comparison that can be expressed in figures is afforded for determining the home conditions under which the export trade has been conducted. A decrease in the quantity exported as between given years is thus shown not necessarily to imply a decrease in aggregate value and *vice versa;* whilst the influence of excessive stocks in foreign markets in one year, or in a series of years, in curtailing after shipments, quite apart from other adverse influences, is thus rendered apparent. Taking up that portion of these tables relating to shipments of cottons and yarns to China, Japan, and Ceylon, the following results are presented:—

To Hong Kong our exports of plain cottons were increased in 1865 by nearly 16,000,000 yards beyond the quantity of the preceding year; yet the 36,907,736 yards despatched to that port last year constituted little more than half the amount exported thither in 1860, or even the years 1859 and 1856. The minimum point since 1856 was reached in 1863, when the quantity of plain cotton exported to Hong Kong reached only 12,677,234 yards. In yarns, in which the chief export trade to China lies with Hong Kong, Sam Mendel's tables exhibit a regularly progressive decrease since 1859, when we exported 9,565,261 lbs., an amount reduced in 1864 to 1,601,810 lbs., and in 1865 to 1,140,830 lbs.

To Shanghai the export of plain cottons in five years of the series, or from 1857 to 1861 inclusive, very considerably exceeded the exported quantity in 1865, which reached 79,422,708 yards; 1863 will be remembered as peculiary adverse to large shipments, but in 1864 the amount rose to 37,138,127 yards. To Shanghai the export of yarns during the past two years has assumed some little importance, although the decline in the export of 1865 on that of 1864 is not favourable to the encouragement of any immediate or large extension in that quarter. The export of yarns in 1865 reached 81,000 lbs.; in 1864 158,249 lbs.

The comparison instituted between our exports of cottons and yarns to Japan does not of course extend beyond July of 1863, in which year we

Digitized by Google

made shipments of plain cottons to Yokohama to the extent of 15,600 yards, increased in 1864 to 2,728,102 yards, and in 1865 to 17,261,586 yards. An encouraging increase is displayed in the shipment of yarns to Japan in 1865 over 1864 amounting in the former year to 816,432 lbs., against 50,650 lbs. in the latter.

Our Manila trade in plain cottons has not yet reached the point it attained in 1859, 1860, and 1861; but the export of 1865 of 13,326,775 yards was a vast improvement on the preceding three years, the gradual increase indicating that it is in course of enlargement from permanently favouring influences. That our export of yarns to the same port does not exhibit the same result for 1865 is due to the extraordinarily large shipments of the preceding year, amounting to 122,980 lbs., against 32,250 lbs. in 1863, and 64,600 lbs. in 1862. As, however, the export in 1865 reached 104,502 lbs., we may also anticipate for this article an improving market.

Our trade in plain cottons to Batavia is encouraging, the export for the past twelve months attaining the figure of 16,172,834 yards—more than double that of either of the two preceding years, though not up to former annual exports embraced in this survey.

The exports of yarns, too, for 1865, show improvement on the exports of 1864, the amount last year shipped reaching 475,760 lbs., against 294,025 lbs. in the former period; the trade, however, in this article is much below previous dimensions, the high prices of late years having, of course, exercised an adverse influence.

To Ceylon the exported quantity of cotton in 1865, amounting to 13,630,888 yards, though nearly double the amount of 1864, fell short of the exports of each of the years from 1857 to 1863 inclusive. The export of yarns to Ceylon in 1865 reach 314,977 lbs., but this is less than hal the amount set down for 1863, and falls far below many of the preceding ten years, though a satisfactory increase on the export of 1864, which was but two-thirds of that amount.

THE DUTCH AGGRESSIONS IN SUMATRA.

(TRAVERS' CIRCULAR.)

Some months since we drew attention to the above subject, remarking upon the distinctive points of difference that existed between the British and the Dutch systems of colonial administration. Our object on that occasion being rather to compare results than to discuss any collateral issues, we abstained from dwelling upon one very prominent feature of Dutch policy—their system of quiet but persistent aggressions in the East. During times of great political excitement in Europe it is not unusual to hear the accusation of "territorial aggression" unhesitatingly and confidently brought against some one suspected country or ruler. At one time, it is the Emperor of the French, seeking to obtain possession of the Rhine provinces; another time, it is the Czar of all the Russias intent upon getting a footing in the Chinese dominions; or it is the English endeavouring to augment their already overgrown Eastern possessions. But all this time, whilst the great European nations are intent upon the affairs of the world, and each kingdom, in turn, disclaims all intention of so vaulting an ambition, the Dutch are creeping on, in the even tenor of their way, taking "here a little and there a little," just as their keen commercial instincts lead them. Actuated by no views but those of the purest selfishness, and intent only on the acquisition of such gains as their commerce, or to speak more correctly, their commercial monopoly will realise they pursue their course unreproved. Whilst an attempt by the French Emperor to incorporate the Rhenish provinces or the little kingdom of the Belgians with the French Empire would probably be deemed a sufficiently powerful cause to arouse all the European Governments to take up arms, the deliberate annexation of Siak by the Dutch, in distinct violation of the treaty of 1824, or their unlawful seizure of the principal ports on the the Sumatra coast, will pass unheeded by, perhaps even unknown, to the generality of political students. There can be no doubt that it is a very great benefit to any Asiatic people to come under European rule, and were Dutch commerce carried on in the same generous spirit that characterises European nations in general, their aggression might even come to be looked upon as a merit. Wherever the English, French, or American Governments pursue their commercial advantages beyond the legitimate requirements of trade, they do it in the interests of civilisation. Their merchants and their traders become their most successful, though unconscious, missionaries; nor whom commercial treaty is made by England are there any stipulations restricting its benefis to the two contracting parties, but the whole trading world is invited to participate in the prospective advantages. It was in this generous spirit that the English and French, on the conclusion of the commercial treaty with China, threw open the Chinese trade to the whole world, and declined to be the participators in a monopoly, even though it might have been to their own immediate benefit to do so. But it is a curious circumstance that widely extended as the Dutch commercial relations have been in the East, their progress has at no time been marked by any corresponding elevation, either moral or intellectual, in the condition of the subject nations, or attended with any benefits in which other nations might share. In Japan, where our trade has with difficulty only just effected an opening, it found that the Dutch have been carrying on their trade for centuries. But their selfish interest ignored all idea of aiming at any moral improvement in those with whom they traded, and their jealous monopoly would admit of no European rival to participate in their trading advantages. This system so quietly pursued for many years past, is likely at last to receive some check, as their continued interference with British interests in the East has provoked an equally determined opposition on the part of our Penang merchants, whose remonstrances will probably be heard in the House of Commons during the ensuing session.

COMMERCIAL REPORTS FROM HER MAJESTY'S CONSULS IN CHINA.

TIEN-TSIN.

The following is an abstract of Mr. Consul Mongan's report on the trade of Tien-tsin in 1864:—

In my present report I cannot give the results of my own observations of commercial matters within this district during the past year, as I was absent all that time in Europe on leave, and did not resume my duties as Consul here until the 1st of April, 1865.

1. *Shipping and Navigation.*—The following table, compiled from the Customs Trade Returns for the last four years, shows a steady yearly increase in the number and tonnage of British vessels at Tien-tsin since the port was first opened to foreign commerce:—

TABLE SHOWING THE NUMBER AND TONNAGE OF VESSELS ENGAGED IN THE TIEN-TSIN TRADE FROM 1861 TO 1864 INCLUSIVE.

	1861.		1862.		1863.		1864.	
	No.	Tons.	No.	Tons.	No.	Tons.	No.	Tons.
British	39	10,671	45	11,451	69	19,108	78	22,627
American ..	18	4,436	17	5,458	20	6,558	11	3,170
Sundry	54	12,054	25	5,012	45	10,010	96	45,171
Total ..	111	27,161	87	21,921	134	36,276	185	70,968

It will be observed that the number of British vessels in 1864 is exactly double, and that the amount of their tonnage is more than double what each was in 1861. The American shipping has fallen off in 1864, whilst that of Continental Europe, classed as sundry, shows a large increase on the returns of preceding years. Though opened to trade at the end of 1860, foreign commerce at this port may be said to have begun in the spring of 1861, and the experience of that year proved that the vessels most suitable for the Tien-tsin trade were steamers of light draught, such as could easily cross the bar outside Taku, and convey their cargoes up the river to Tien-tsin. At first, however, owing to the want of such steamers, small continental vessels were extensively employed. In 1862 that want was, to some extent, supplied, and the continental vessels, in consequence, did not make up one half of the number that entered the port in the previous year. There is a great increase of shipping, both as to number and tonnage, in 1863, and a still greater increase in both these respects last year. During the past year there was no direct trade from Europe or America with Tien-tsin.

2. *Trade and Commerce.*—The following statement exhibits the value of the import trade, as shown by the Custom-house returns, since the opening of the port:—Value of imports, 1861, £1,587,789 3s.; 1862, £2,247,006 16s. 4d.; 1863, £1,987,154 11s. 8d.; 1864, £2,421,050 6s. The tael is calculated throughout as the equivalent of 6s. 4d. sterling. The returns for 1864 exhibit a general increase in the quantity and value of imports; out of eight kinds of cotton piece-goods which are enumerated, seven show an aggregate increase of 175,999 pieces over the importation of the previous year, and one, "T. R. cambrics," shows a decrease of 12,160 pieces. Metals and woollens also show an increase, and opium a decrease, on the returns of 1863.

The subjoined statement compiled in the same manner, and at the same rate of exchange, viz., 6s. 4d. per tael, exhibits the value of the export trade from 1861 to 1864, inclusive:—Value of Exports, 1861, £146,164 15s. 8d.; 1862, £129,038 16s. 4d.; 1863, 289,185 7s. 8d.; 1864, 548,082 4s. 8d.

It will be seen from this table how very favourably the export returns of 1864 contrast with those of 1863, a circumstance due chiefly to the position taken last year by cotton as an export, but it is very doubtful whether this position can be maintained, and the balance of trade is likely to continue steadily against Tien-tsin until some important exportable article in general demand can be obtained.

This want may yet be supplied by a product, the demand for which seem to keep pace with the progress of civilization itself,—I allude to coal, extensive mines of which exist in the mountains to the north and west of Peking. It costs about 16s. per ton at the pit's mouth, and more than double this amount per ton is paid for transport to the coast; but the mines are worked in the rudest way, and the little coal that finds its way from the western range to Tien-tsin is conveyed on mules or camels from the mountains to Tung-chow, on the Peiho, and thence down the river in boats to this port.

The export of sheep's wool has steadily decreased within the last four years, the quantity exported in 1864 being only a little over one fourth of that exported in 1863. That of camels' wool, or camels' hair, as it is called in the Tariff, has, on the other hand, increased each year since 1861. Camels' wool comes principally from Mongolia, and foreign merchants must send their agents there to purchase it, the trade not having yet reached that stage in which the article would be brought down by the Mongolians themselves to Tien-tsin for sale.

GENERAL REMARKS.—Though the Customs Returns show an increase in the total value of the trade of 1864 over that of 1861, to £1,235,178 12s., still the foreign merchants complain of the great falling off that has taken place; they look with regret to the seasons of 1861-62, when large sums of money were made by many of the firms; and, statistics notwithstanding, there is no doubt that more business was done by foreigners in 1861-62 than in 1864. The explanation will be found in the fact that for the last two years the Chinese trader has been driving the foreigner out of the market. He has found that, by going down direct to Shanghai, himself, he can purchase goods there and bring them back to Tien-tsin for less money than he would have to pay if he were to buy the same articles here from the Tien-tsin agents of Shanghai firms. The consequence is that steamers now constanly come up the river laden with cargo, not destined to pass through foreign hands, but either purchased at Shanghai and brought here by a native dealer, or else consigned direct from a Chinese agent there to a Chinese merchant at Tien-tsin. Thus, whilst the business done by foreign steamers and native dealers has largely increased, that done by foreign merchants resident at the port has decreased; but, doubtless, some efforts will be made by the latter to recover the vantage ground which they occupied in 1861-62.

SHANGHAI.

The following is an abstract of Consul Sir Harry Parkes' return of the trade of this port for the year 1864:—

Imports.—Although the returns for the year 1864 exhibit a smaller

Digitized by Google

aggregate than those of 1863, the following epitomised comparison of the trade of the two years will show that the operations of the past year cannot on the whole be considered unfavourable.

HOME TRADE.

	1864. Taels.	1863. Taels.
British manufactures	9,766,161 ..	7,838,192
Metals	1,033,555 ..	1,245,057
Coal (including Australian) ..	782,138 ..	818,660
Miscellaneous, as hardware, &c.	414,231 ..	84,650
	11,996,085 ..	10,723,059
At exchange of 6s. 8d. per tael	£3,998,695	£3,574,353

Thus there has been an increase on the home trade of 1,273,059 taels, and other data which accompany this memorandum show that in the principal article, manufactures (the increase in which it will be observed is not less than 1,928,969 taels), the transactions have been satisfactory and remunerative.

A decrease is chiefly observable in the Indian and Colonial trade, which presents the following comparison.

INDIAN AND COLONIAL.

	1864. Taels.	1863. Taels.
Opium	14,293,079 ..	20,251,046
Rice	2,223,169 ..	3,043,576
Straits produce and sundries ..	1,863,070 ..	1,260,915
	18,379,318 ..	24,555,537
At exchange of 6s. 8d. per tael	£6,126,439 6 8	£8,185,179

The decrease, which amounts to 6,176,229 taels, is attributable to a smaller importation of opium, which points to a general depression in trade, and to a less demand for rice, which is not altogether an unfavourable system, as it is partly attributable to the improvement in agricultural industry consequent on the expulsion of the rebels from this province. The opium market is, however, already recruiting itself, and a comparison of the two mercantile years, 1863-4 and 1864-5 shows a larger importation in the latter than in the former.

The total import trade of the two years is as follows:—

	1864. Taels.	1863. Taels.
Home trade	11,996,085 ..	10,723,059
Indian and colonial	18,379,318 ..	24,555,537
	30,375,403 ..	35,278,596
At exchange of 6s. 8d. per tael	£10,125,134 6 8	£11,759,532

Exports.—A continuation of the comparison gives the following results in the case of exports:—

	1864. Taels.	1863. Taels.
Tea	12,161,699 ..	11,291,052
Silk	7,323,332 ..	7,142,387
Cotton	6,568,901 ..	8,267,788
Miscellaneous	202,552 ..	353,650
	26,256,484 ..	27,254,879
At exchange of 6s. 8d. per tael	£8,752,161 6 8	£9,084,959 13 4

The decrease in the year's trade is 995,395 taels; but it will be seen that the transactions in the staples of trade, tea and silk have increased, and that the diminution is limited to the cotton exportation, the natural consequence of falling home prices on a branch of trade which can be looked upon as adventitious only, and will probably entirely cease on the restoration of peace in the United States. It should be remembered that up to the time of the American war China has always imported cotton. In this Memorandum no note is taken of the importations or exportations of treasure, as these cannot be ascertained with accuracy. The estimated amount swells, it will be seen, very materially the aggregate of the trade.

Total Foreign Trade of Shanghai.—This Return presents an important comparison between the British trade of this port and that of all foreign nations during the past year. While that of Great Britain in imports and exports amounts to 56,923,931 taels, that of all other nations is 7,301,304 taels. Thus that of Great Britain has been rather more than seven-eighths of the whole trade of the port.

Return No. 6.—*Coast Trade.*—This return exhibits the amount of the local coast and river trade carried on in foreign bottoms, and which, as will be seen on comparing this with the previous return, has now amounted to nearly the same aggregate as that of the foreign trade. Extensive employment is thus afforded to foreign tonnage generally, and though it would be difficult to show under what flags it is distributed, Return No. 8 will serve to convey some idea of the proportion that may be assigned to each nation. Many of the goods thus carried consist of foreign goods re-exported and of a native produce brought from inland ports for foreign exportation; but in addition to these large quantities of the native produce is carried on native account between the Chinese ports as foreign vessels are gradually displacing native tonnage along the whole line of coast, and from almost the only navigation on the Yang-tsze River below Hankow.

Return No. 7.—*British Tonnage.*—This return shows that the total British tonnage inwards and outwards during 1864 was 2,883 vessels, and 1,328,780 tons; and in 1863 3,600 vessels, and 1,085,637 tons. The total decrease in 1864 was 767 vessels, and 76,857 tons. The diminution in the small craft and the smaller shipments of cotton will explain this circumstance.

Total Foreign Tonnage.—The total foreign tonnage of the port outwards and inwards is, 5,352 vessels, 1,860,902 tons. The British portion, as shown by the previous Return, being, 2,883 vessels, 1,028,780 tons. Most of the river trade is carried on in large American boats, which are found to be much better adapted to the river navigation than those of British construction. One large vessel of this class has lately been constructed at Shanghai by a British firm, and another built by the same owner has been recently launched. At present seven large river steamers and three smaller ones of 7,847 tons, under the American flag, run regularly on the river between Shanghai and Hankow, and three large steamers of 2,856 tons under the British flag are similarly employed. In the case of the sea-going steamers which run on the coast the proportion is much in favour of British vessels.

FOO-CHOW.

The following is Acting Consul Hewlett's return of trade for he port of Foo-chow during the year ending 31st December, 1864:—

As compared with 1863 there has been a very perceptible falling off in the tonnage of British vessels that have arrived at and departed from this port during the last year, viz.:—

Year.	Arrived. No. of Vessels.	Tonnage.	Departed. No. of Vessels.	Tonnage.
1863	332 ..	149,726 ..	.. 327 ..	147,563
1864	325 ..	131,123 ..	.. 325 ..	131,541
Decrease in 1864 .	7	18,603	2	16,022

This falling off may be partially accounted for by the decrease in trade in paper and tea from Foo-chow to Tien-tsin during 1864 as compared with 1863. The cause of this decrease has been the disturbed state of the neighbouring provinces, which has prevented the Thense men, the principal exporters of such articles coming down to Sin-chune (the up-country depot) to make their purchases for the Russian markets; another cause that has operated unfavourably in this respect is the large stock of black leaf tea now on hand at Tien-tsin.

At the same time, however, the returns of this year show an increase in the value of both imports and exports, as follows:—

	Imports.		Exports.
1863 ..	£2,071,107 15 0 ..	1863 ..	£3,503,751 10 0
1864 ..	2,207,774 15 0 ..	1864 ..	3,890,889 5 0
Balance in favour of 1864	£136,667 0 0 ..	Balance in favour of 1864	£387,137 15 0

Strange as it may appear, though, and notwithstanding these figures, which would seem to indicate a healthy commercial growth and development, I am compelled to state that the trade of Foo-chow during the year 1864 has been anything but satisfactory. The heavy exactions levied by the authorities to meet the expenses consequent upon the rebel disturbances then going on in this and adjoining provinces have affected most prejudicially the sale of imports of every sort, opium more especially.

The local dues, or "Lekin" as it is called, upon one chest of drug amounted, during 1864, to no less than 81 taels, 3m. 6c., making, with the import tariff duty of 30 taels received at a discount of 6 per cent., or 1 tael 8m., a total of 113 taels, 1m. 6c. on every chest consumed in Foo-chow, with an additional impost of 24 taels, 8m. on opium carried up country. These exorbiant taxes have had a most demoralising effect on the trade. Smuggling has increased to such an extent (it is estimated that no less than 16 per cent. of the drug that comes here is "run") as to have taken the trade in opium entirely out of the hands of the wealthy and old-established hongs who formerly conducted it, and it is now abandoned to the control of sundry small retail dealers, chiefly Chin Chew men, of little capital and no standing or character whatever. These dealers, taking advantage of the system of credit given by foreigners, are at all times ready to risk property not their own in an attempt to escape payment of the "Lekin" dues, and these being successfully evaded they are then of course in a position to under-sell the wholesale trader, who has been obliged to pay the full amount of "Lekin." It is not surprising, therefore, that the returns of opium this year should show a decrease of no less than 288 chests, as compared with the quantity imported last year, viz.:—1863, 6,769; 1864, 6481; decrease, 288 chests. In addition to this, from the fact of the trade being in the hands of dealers of the stamp above decribed, bad debts have been of frequent occurrence.

With regard to opium consumed up country, it is a remarkable fact that the supply is derived to a very great extent from Shanghai and the river ports, it being found that opium brought from any of those places can be sold cheaper than opium imported into and brought up country from Foo-chow. This without doubt is due to the heavy local exactions above mentioned.

With regard to exports, I regret to say that, in spite of strong remonstrances on the part of the foreign Consuls, the immunities secured to the merchant by the Treaty of Tien-tsin with reference to the payment of transit dues, have become almost a dead letter at this port. So well aware of this have the mercantile community become, that during the last two years no "Inland Produce Transit Certificates" have been made use of at all, the merchant or his agent preferring to pay the additional tax sooner than run the risk of having his tea stopped *en route* to this place, as it almost certainly would be if covered only by a Transit Certificate, for the inspection of which the Chinese officer at the barrier it is passing is to derive no emolument whatsoever. I am informed by a gentleman who has been for many years engaged in trade at this place, that during the last two seasons the export trade has been a losing one to most of those engaged in it, the high prices demanded for the leaf at the place of production not only precluding any profit, but in many instances entailing serious losses on the foreign shipper.

To Great Britain, the Continent of Europe, and the United States, there has been a large falling off in the export of tea. This has been in some measure compensated for by the rapidly increasing demands for tea in the Australian colonies, which are almost entirely dependent on Foo-chow for their supply. The state of political affairs in America has lessened the consumption of tea in that country during the past year to one-third. I am confident, however, that if a moderate reduction in the scale of local dues could be effected, the trade, not only in opium, but in every description of imports, such as cotton piece goods, &c., which is now almost at a standstill, would revive rapidly, while the operation of the Transit Certificate system, if it could be enforced, would certainly do a great deal towards ameliorating the trade in produce exported.

(Signed) A. R. HEWLETT.

—o—

OSAKA.

C'est le premier pas qui coute would seem to be the axiom which presented itself to the mind of Sir HARRY PARKES when he assumed the control of our legation in Japan. His long and thoroughly practical experience among the wily Chinese had taught him to believe that no half-measures would avail either with the Celestials or their insular neighbours, and that a slow, dilatory, and over-cautious advance towards any much-desired object would, in that Ultima Thule of Oriental perversity, be almost sure to defeat its own ends. Whether Sir HARRY PARKES was incited to great deeds by an unusual manifestation of energy on the part of the Home Government, or whether, not having the fear of the Circumlocution office before his eyes, he threw off the trammels of red tape with which it is usual to fetter our representatives in distant lands, and acted on his own responsibility, the result is alike satisfactory. Osaka is to be opened; the treaty is ratified; and in the QUEEN'S Speech, delivered at the opening of Parliament, Her MAJESTY expresses "entire satisfaction" at the great ability displayed by her Minister in these negotiations.

With regard to the benefit likely to accrue to foreign trade from the opening of Osaka, opinions seem to be much at variance; a majority of the local firms appear to be by no means sanguine of any good results, but this feeling probably arises from an indisposition to incur the inevitable expense of establishing branches there, which at first may not compensate for the additional outlay they will entail. At the first opening of the three original ports, enormous profits were made by those who were fortunate enough to bring into Japan articles of merchandise hitherto unknown to its people, and to procure for exportation the gold. then so cheap and plentiful among them. But now, full supplies of all descriptions of goods suitable to the country are imported and distributed through the length and breadth of its islands; while the precious metals have long since found their natural level, and ceased to be a source of profit in any way to the mercantile classes. It is therefore certain that no such tempting advantages await the first settlers at Hiogo as those which rewarded the early adventurers at the other ports. On the other hand, although no exceptionally brilliant results may follow the opening of Osaka, we are not inclined to believe that it will in any appreciable degree detract from the value of our settlements at Yokohama or Nagasaki. As regards silk, nearly all the most important districts lie East and North of Yedo, and Yokohama is the natural port of shipment for their produce; while Nagasaki lies in the midst of fertile tea and wax-producing provinces. The subject, moreover, deserves to be argued on a more liberal basis than that of individual or purely mercantile interests; the establishment of Osaka as a Treaty port will bring us into closer contact with the people of Japan, and stimulate those powerful Princes whose rich and extensive territories surround the Inland Sea, to cultivate foreign intercourse and open up the vast resources of their domains.

THE HONG KONG GARRISON.

IT is satisfactory to find that a large share of public attention has been attracted by the disgraceful facts lately made known regarding the sickness and mortality which have all but exterminated the unfortunate battalions of the 9th and 12th Regiments. For years China has been marked as the most unhealthy of all foreign stations both for naval and land forces; and Hong Kong especially has acquired a most unenviable notoriety in this respect, which, although lately modified by a short and transitory improvement, will now attach to it with greater force than ever. There seems little doubt that the frightful waste of human life which has recently occurred there is the result of an act not only of false economy, but of mean and unworthy parsimony on the part of the War-office. Regiment after regiment of English soldiers has been decimated by the fatal diseases incidental to a prolonged residence in that unhealthy island, while the Sepoy regiments employed in China during the last war bore up well under all the vicissitudes of its climate, and although engaged in active warfare, suffered comparatively little loss. And yet the only inference to be deduced from these two simple facts—an inference so obvious to even the meanest comprehension—has been deliberately ignored by Government. Intent upon a "penny wise, pound foolish" policy, the War-office preferred risking this terrible sacrifice of life—which long experience plainly told them must certainly ensue—to incurring the slight extra expense of garrisoning the place with native troops. The employment of even one native battalion would, it seems, have entitled the whole garrison to the Indian scale of pay and allowances; an advantage which, considering the enervating nature of the climate and the notoriously expensive character of the station, need hardly have been grudged them; but economy was the order of the day. An attempt was made in 1865 to carry on the garrison with European troops only; a "revised scale" of pay and allowances was adopted; Mr. GLADSTONE'S budget showed a few hundreds more of surplus; and—our brave soldiers, their wives and little ones, perished by hundreds. The evil of this injurious policy is aggravated by the fact that the colony has been saddled with a "military tax" for the support of its garrison to the tune of £20,000 per annum. If this sum *must* be extorted from the colonists, surely it is not unreasonable to demand a garrison composed of troops able to withstand the climate, and likely to be efficient in case of its services being required. We hope, however, to hear before long some confirmation of the belief expressed in our article of the 26th December, that this tax would henceforward be applied to a more appropriate purpose, namely, the suppression of piracy on the coast. In the meanwhile we trust that Colonel NORTH'S motion in the House of Commons will lead to such a strong expression of public opinion as will deter even the strongest advocates of military economy from a repetition of the dangerous experiment which has just shown such fatal results.

THE STRAITS TRANSFER.

LORD STANLEY, it will be seen in our Parliamentary intelligence, has called upon Mr. Cardwell the Secretary of State for the Colonies, to give some explanation as to the tedious delay which has been experienced in the transfer of the Straits Settlements from the Government of India to that of the Colonies. For the past two years there has only been just one little difficulty to get over, but unfortunately when surmounted, the one little trouble was found to be hydra-headed. Now we have the admission by Mr. Cardwell that the question of the military defences was still the stumbling block. Having fully discussed this "block" last year, we do not go over the ground again for the benefit of our readers, but we may find it necessary to do so for the enlightenment of the officials concerned. The session is yet very young, and we know that matters of graver importance must now engage the attention of the Ministry, and we therefore "bide our time" for a more convenient opportunity. Of course we have heard whisperings of certain turncoats at Singapore, but we do not from our own knowledge believe that has had any effect on the deliberations of the powers in Downing-street, and we still believe that the Bill will get through this session.

THE TRADE OF PENANG.

THE subject of the Pepper duties is now one of the items of interest to be supplemented to the Dutch aggressions in Sumatra. The petition to the Foreign-office has been for some time in the hands of the Earl of Clarendon, the Foreign Minister, and we understand that a promise has been given to bring the matter to a satisfactory conclusion during the present session. Petitions from Penang and Singapore, on the subject

Digitized by Google

of a reduction of the pepper duties, have also been presented by Lord Stanley, and, considering the eminently practical tendencies of our present Chancellor of the Exchequer, we can scarcely doubt but that the prayer of the memorialists will be granted. The cost of the article laid down here is about 3d. per pound, while the duty is 6d. and 5 per cent. *ad valorem*. Such an anomaly as this will surely be swept away in Mr. Gladstone's next Budget.

THE HONG KONG GAS COMPANY.

THE Hong Kong and China Gas Company, at a meeting on the 22nd inst., decided on granting additional borrowing powers to the directors to the extent of £5,000. The directors informed the shareholders that Mr. Whitty, the late manager, had by his neglect, through intoxication, retarded the progress of the company, but that the last reports from the local committee at Hong Kong gave a very satisfactory account of the new manager and of the demand for gas. The receipts this year might be estimated at £8,000, against an expenditure of £4,000 to £5,000. The shares in Hong Kong were saleable at £3 to £4 premium. The Chairman, Capt. Arrow, said that he could safely assure the shareholders that they had got a thoroughly good and profitable concern. The gas-fittings sent out from this country had realised a considerable profit. Extra retorts and other supplies were now in course of shipment. Mr. Walkinshaw, of Messrs. Turner and Co., who was present, in consequence of some remarks by shareholders, stated that his firm never undertook to be responsible for the management or erection of the gas-works, and he did not consider that his firm could be blamed for the *laches* of Mr. Whitty.

THE REPORT OF THE CEYLON MILITARY COMMISSION.

ALTHOUGH the precise boundary between colonial and Imperial interests will not always admit of clear definition, verging, as these do, at many points, one upon the other, there are certain broad and general principles which we have a right to claim shall be fully recognised and applied, whenever relative responsibility in apportioning the obligations pertaining to those interests is to be determined. In this view we cannot but express our own surprise at the conclusions come to in the Report of the Ceylon Military Commission now before us, both as to the fixed scale of military force it is recommended she should maintain—a scale far beyond her own requirements, and the further recommendation that she should garrison the purely naval harbour of Trincomalee, the troops stationed there being entirely cut off from all power of co-operation with other forces, and doing nothing in maintaining the general peace. On the other hand, Trincomalee is of inestimable value to Imperial interests, constituting a rendezvous for naval vessels, as a point of concentration from which they may be readily despatched to India, China, Japan, or any portion of the Eastern seas. No opinion in favour of the colony garrisoning Trincomalee could be elicited from civilians and even many of the Government agents, but the admission that the troops could be more cheaply rationed there, and which simply related to the question of distribution, was, by an illogical sequence on the part of the War members, made to do service as evidence in favour of the permanent location of certain forces at that point. It is evident that if colonial troops can be spared for Trincomalee, the military force which the colony is called on to maintain for purely colonial purposes is too large. We thus find that out of the entire cost for military purposes in Ceylon, estimated at £200,000 per annum, the colony has to pay no ess than £152,000, which, though considerably below the sum originally demanded of the colony and against which we emphatically protested, is yet too large a proportion in the grand total, considering how little Ceylon stands in need of this show of force on mere colonial account, and the value of the island to the British Government as the "key of India." The colonists, through the unanimous opinion of the Commission, is now committed to the garrisoning of all the leading coast defences; nor is its outlay, through the new arrangements made, arrested at the point of fixed contribution above indicated; the reduction of the Ceylon Rifle Regiment must involve a very considerable increase of pensions, and a still larger sum to be devoted to military buildings and fortifications; besides which the transfer to the local police of many of the civil duties performed by the troops must augment the current civil outlay. Whatever is thus unnecessarily spent, Ceylon loses in that most important of all immediate interests—the improvement of her communications. It is in the forwarding of her industrial interests, and more especially the extension of agriculture, that her true strength lies, and whatever retards this aim affects seriously not only colonial but British interests. Even now, Mr. CARDWELL withholds the necessary authorisation for the disposal of the surplus in the colonial Treasury chest. Now that he has the report of the Military Commission he may act, and allow Ceylon to deal as it pleases with the unexpended balance, after deduction of the fixed contribution. After all, we trust that this will be the last effort on the part of the Home Government to encroach on colonial rights. The discussion of the question, both here and in Ceylon, has done good in inciting to a more watchful regard of the true interests of the colony; the time of misgovernment is, we trust, fast passing away. Under a more enlightened administration the development of Ceylon must proceed with accelerated speed, releasing herself from those trammels which have hitherto so greatly retarded her true energies.

THE P. AND O. COMPANY'S FLEET.

The company have ordered the *Mongolia* (now on a voyage to Alexandria) back to Southampton without the usual detour to Marseilles, in order to give her immediate despatch for India. The *Mongolia* is a new screw steamer, of 2,799 tons and 500-horse power; is fast, roomy for passengers, carries her ports well open, and will be a valuable addition to the the Calcutta and Suez line.

The company have provided for the Bombay mail service by transferring the *Golconda* from the Calcutta to the Bombay line. This arrangement will necessitate the Calcutta steamers turning round at Suez for the present.

Two new steamers, the *Geelong* and *Avoca*, are fitting out on the Clyde, intended as a reinforcement for the company's Esatern lines; every exertion is being made to get the former ready for sailing by the end of March, and the latter in all May. The *Geelong* is 1,504 tons, 250-horse power. The *Avoca* 1,284 tons, 250-horse power.

The *Niphon*, 690 tons, 100-horse power, left Southampton for Bombay on the 16th inst. She is principally intended for cargo work, and ultimately to be placed on the local China or Japan lines.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, FEB. 16.

The fact that you mentioned our "new" Cabinet in your "Latest Intelligence," in the *London and China Express* of the 10th February, has, perhaps, given to your readers the conviction that I am a pessimist *pur-sang*, since I said in my last letter, "It will be very difficult for Mr. Fransen van de Putte to form a new Cabinet." Without doubt we had a set of Ministers, with the exception of the Department of Marine, with more celerity than was generally looked for, but the combination leaves much to be desired, except to the *Nieuwe Rotterdamske Courant* and *Handelsblad*.

The Ministry is now constituted as follows:—

J. D. Fransen van de Putte ..	Colonies.
Mr. E. J. J. B. Cremers	Foreign Affairs.
W. J. Blanken	War and Interim Marine.
Mr. J. H. Geertsema, Czn.. ..	Interior.
Mr. J. C. Picke	Justice.
Mr. P. P. van Bosse	Finance.

As to Mr. Van Bosse, his name as a statesman is well known. He has sat in several Cabinets, of every *genre*, and this gives some of the Liberal papers the conviction that he is not the right man in the right place in a Liberal Cabinet. But he is an intellectual and able financier, and perhaps he will be the best support of the Cabinet. As to Messrs. Geertsema and Picke, my opinion is not so favourable. The first, who was notary at Groningen, and for the last two years a member of Parliament, is said to be an able man; but he must discharge the duties of the most eminent leader of the Liberal party, Mr. Thorbecke, and it is feared he will fall beneath that task.

The Cabinet will soon have an opportunity to show its qualities, as Parliament will meet again on the 27th of February to proceed to business.

Much is said about the origin of the last crisis, and perhaps, therefore, the King gave his consent to publish the documents that were exchanged in reference to it. We must believe then, the real cause was the difference of opinion between Mr. Thorbecke and Mr. Van de Putte, about the introduction of the code penal in India.

Rear-Admiral Pels Rycken, it is said, will be our Minister of the War Department.

Dr. R. Labatto, honorary professor of the Polytechnic School at Delft, died some days ago.

Yesterday, a meeting was held in the Crystal Palace of Amsterdam to deliberate on the question of the rinderpest. About 300 persons were present. The following conclusions were unanimously approved:—That the *cordon sanitaire* is a necessity, but that it must be disallowed that beasts attacked within that line should be slaughtered; on the contrary, it is necessary that beyond that line attacked or suspected beasts must be killed. The meeting agreed further, that our law was not sufficient to extirpate the plague; that it is necessary that the Treasury should give compensation in full to those proprietors that lose their beasts, because private insurance companies are not able to meet the task. Within three weeks this meeting will re-assemble again.

The *Tyd* collected 163,000f. in behalf of the Pope; the lists are now closing.

The Peruvian man-of-war *Independenzia* will leave our coast to-morrow in pursuance of a demand made on the commander of that ship. Latterly she was not watched by our man-of-war *Adolf Herzog van Nassau* because it was evident that war had not been declared between Spain and Peru.

COMMERCIAL.

COFFEE.—An important business was done before the auction of the Trading Company in private hands, and chiefly in Padang qualities. The following parcels were sold: 2725 b. Java, ex Edward Dellarie; 1,200 b. Padang, ex Caduceus; 2,150 b. Padang and 1,450 b. Java, ex Veritas; 3,410 b. Java, ex Zephir at 45c.; 2,387 b. Padang, ex Caduceus, at 45½c. to 48c.; 429 b. ex Ida Elizabeth, at 48c.; 2,900 b. Padang, ex Lady of the Lake, at 45½c. Besides the following floating parcels were sold; 1,700 b. Java, ex. Dageraad, and 2.000 b. ex Galilei at 44c. The 85,852 b. Java and Padang which were offered were all sold at ¼, ½, and ¾c. above valuation. Good ord. 45½c. to 46c.

TOBACCO (JAVA LEAVES).—The 2,936 bls. yesterday offered in auction were sold at very firm prices.

COTTON.—A moderate business doing.

SPICES.—There was a good demand for the outward ports, in consequence of the higher prices paid in the London market. A good business was done, at about 5ct. above the last prices. There was much inquiry for Nutmegs No. 1, and all which were offered were sold. Holders now decline to operate without an advance. The quotation for Nutmegs now is 81c. to 82c.; No. 3, 53c. to 54c. There was also much inquiry for Cloves No. 21,865, because there is no stock at the Trading Company, this quality is willingly paid with 27c. Mace without transactions. Cinnamon No. 3, no sales reported. Pepper 22c. to 22½c. in the second hands.

BANCA TIN.—The market is dull; 2,000 slabs were sold at 53¼f.; Billiton, 53f.

INDIGO.—The market is very firm, and again 13 ch. Java were sold at advanced prices. On the 19th 15 ch. Bengal will be sold by auction.

RICE.—Without stock, and consequently without transactions.

DRUGS.—Camphor (Raw China): With much demand at advancing prices. The transactions, however, were unimportant, because holders decline to operate. Cassia Vera, 374 b., ex Veritas, were sold at firm prices. Gum Benzoin, with a moderate business, prices are maintained. Gum Elasticum: The stock has much decreased; several parcels are sold floating; the market is very firm. Cutch, 2,250 kilo., ex Caduceus, were sold at firm prices; Vanila, in auction, were sold 250 kilo.; Bourbon, from 2¾f. to 9½f.; 50 kilo. Java, from 3¼ to 4¼f.

MOTHER O' PEARL SHELLS.—103 pic. Macassar, imported ex Louisa, were sold at prices which are kept secret, but which are supposed to be very firm.

RATTANS.—In much demand at the lower prices.

HIDES.—Several parcels East Indian were sold by inscription at very high prices. viz.: 2,130 Padang Rinder, 2,000 E. I. ex Harvest Home, 2,200 Buffalo ex Wallaroo. The market closes very firm.

TEA.—The market is unaltered, in waiting for the auction of the parcels imported per Yeavering Bell, which, without any doubt, will be sold at very firm prices, because the quality is very fine. The Hydra, from Foo-Chow-Foo, bound for our port, arrived in the Channel with a cargo of 3,999 ¼ chests, 2,485 ½ chests, 254 1-16th chests Congou, and 227 ¼ chests Souchow.

MONEY.—The discount market is rather easier; the Bank directors, however, did not alter the rate. In the open market large amounts may easily be had at 6½ per cent., while at the Bank the lowest rate is ½ per cent. higher. The latest return of the Bank was very favourable.

STOCK MARKET.—There was more activity than last week. Spanish with much inquiry at improved prices; Russian somewhat lower, in consequence of the rumour that a new loan is to be contracted with Hope and Co. Mexican and American bonds firm; Dutch dull. Two-and-Half per Cents., 61½; Three per Cents., 71½; Four per Cents., 95⅜; Trading Company, 146⅞; Rotterdam Bank, 103; Netherlands India Bank, 83; Maatsch. van Adm. en Cyfrente, 94½.

CHANGE.—London, 3 mo., f.11.67; 2 mo., f.11.75; short, f.11.88½; Paris, 3 mo., f.46.50; 2 mo., f.46.70; short, f.47.15; Hambro', 3 mo., f.34.90; 2 mo., f.35.10; short, f.35.30; Berlin, 3 mo., f.170.25; short, f.172.75; Bremen, 3 mo., f.189.40.

PASSENGERS INWARDS.

From JAVA: Per Galilei, Messrs. L. E. Zeegers and A. D. R. van Kesteren; per Den Elshout, Mr. von Staedel and family; per Dageraad, Messrs. H. Stort and C. Hunnius; per Pudsey Dawson, the Driessen family, Miss Andrioli; per Patriarch Sambiri, Mr. C. C. Schol and family; per Gerard Pieter Servatius, Mr. H. C. Boon.

ROTTERDAM, FEBRUARY 23.

The press is still engaged in discussing the question of the degree of statesmanlike qualification possessed by the new Members of the Cabinet. A brisk paper war has been waged between the *Nieuwe Rotterdamsche* and *Arnhemsche Courant*, but the result can be but of little importance, and it is better to wait for facts, which will exhibit themselves as soon as Parliament meets again, which will take place—as I told you in my last—on the 27th inst. So much is certain, that some of the Liberal papers, who are perhaps over-afflicted at the loss of Thorbecke, attack the Cabinet with greater violence than even the *Dagblad*, the organ of the Opposition. It has caused a good deal of sensation that the first Cabinet Counsel was held with the King presiding. While Mr. Thorbecke was Premier, the King never took any part therein. Opinions differ on the meaning of this important fact. Some think that it proves the weakness of the Ministry; others see in it a proof that it is based on the strict principles of the constitution.

I need not say that the Parliamentary battle to be fought will have a decisive character for the Liberal element; that the conflict will be violent there is no doubt at all. Not only is the Colonial question on the order of the day, but the orthodox party (Mr. Groen, C.S.,) seems to do all in its power to feed the fire.

The most important question now is, will Mr. Thorbecke be elected a member of Parliament? He has been brought forward at Groningen, as well as in Zutphen, but it is still doubtful if he will accept the nomination. I hope that he will do so, because Mr. Geertsema, who now fills his place, has given the assurance that Mr. Thorbecke will assist him in his important duties. The ex-Premier is the only man able to neutralise the attacks of the Opposition.

The candidates of the Opposition for the two open seats in the Second Chamber are Messrs. Quintus and Keuchenius—the latter well known in India as President of the Principal Court.

The cattle plague spreads itself more and more, notwithstanding the energetic measures of the Government. The last returns show the following results:—From the 4th to the 10th 1,798 head of cattle were attacked, of which 125 were killed. 372 died, and 330 recovered. Since the outbreak of the plague, 39,658 head were attacked, of which 13,152 died, 8,743 were killed, and 15,297 recovered.

Some years ago beetroot sugar manufacturers were very few here, but it now seems that this branch of industry has taken a wonderful start. Three companies have been established during the past week, with the purpose of erecting manufactories of the kind. Agriculturists are invited by the press to cultivate the root now that they have lost their cattle. The cultivation gives in general better financial results than that of corn, &c.

An important meeting has taken place at this port, to debate the question if it be desirable to abolish sworn brokerships, and to leave every man at liberty to act in that capacity. The motion has taken such hold that it is probable everything will be done to make this branch of trade free.

The subscription in behalf of the Pope rose to an amount of 180,000f., and the lists are now closed.

The beautiful collection of pictures belonging to the late Mr. de Kat, of Dordrecht, amongst which are many by Ary Scheffer, will be sold by auction in the month of March next.

Two young ladies, the Mdlles. Delepierre, from France, have made their appearance as violists. As they are yet but of the age of 10 and 14 years, and in consequence were of too *jeune* a date to have won fame, they were received at first with a good deal of indifference; but after a time everyone was convinced that their abilities surpassed those of the Milanollos and Fernis. I believe that they will pay a visit to your metropolis.

COMMERCIAL.

COFFEE.—There is no change in the market, and the sales include 2000 b. Java ex Henrietta Gerardina Susanna at 43c. and 1192 b. African ex Africa at 39c.

knowledge of that intricate language. No wonder the Austrians,—themselves good linguists, as all civil *employes* of the Government have to pass examinations in the ten languages spoken in the different provinces of the empire—should feel proud of the successful manner in which this young man acquitted himself at his examination, whom they facetiously have named "the Bohemian Mezzofanti," in allusion to the late Cardinal of that name celebrated as the greatest modern linguist. This Mr. Scherzel is said to read, write, and speak correctly upwards of thirty different languages, and is moreover a self-taught genius. It is not yet decided whether he will get the appointment of interpreter or not.

At St. Petersburg some interesting accounts have been received of the quantity of gold obtained by private enterprise in the district beyond Lake Baikal in Eastern Siberia. There are two such establishments situated respectively 120 and 130 wersts north of Nertschinsk, and employing together 1,300 persons, who consumed 1,500 head of cattle and 20,000 poops of corn. For this, however, they obtained 1,280 lbs. of gold, of which 680 lbs. was in the establishment of M. Kulikow and 600 lbs. in that of M. Butschin. These gentlemen are making arrangements to engage a much larger staff of workmen for the ensuing campaign, and, to induce strong and healthy persons to come forward, offer to pay them one-half of their wages for the season in advance. There is a third private gold-washing belonging to a M. Buiwitsch, who employs about 200 workmen, the locality being 60 wersts southward of Nertschinsk.

Digitized by Google

SPICES.—The market remains very firm; for Nutmegs No. 2, 1865, there is much inquiry, and nothing may be had under 76c.; No. 1, 80c., with a trifling quantity disposable. Cloves, No. 2., 1865, with much demand, but holders ask too high prices, and therefore there were no transactions. Mace dull. Pepper without stock in the first hand.

TEA.—The cargo ex Yeavering Bell was sold on the 21st, only 98 lots were bought in. The auction went off as follows:—

909/12	chests	fine Kaisow Congo	sold at ..	110 to	118c.
177/4	„	„ „	„ „ ..	120 „	123c.
101/12	„	finest „	„ „ ..	142 „	143c.
2994/4	„	„	„ „ ..	120 „	180c.
1530/12	„	superfine „	„ „ ..	135 „	181c.
1701/4	„	„	„ „ ..	139 „	180c.
587/4	„	finest „	„ „ ..	130 „	146c.
312/12	„	„	„ „ ..	125 „	127c.
72/4	„	extra superfine Souchon		.. 224 „	227c.
84/4	„	superfine „	„ ..	233 „	238c.
158/4	„	finest „	„ ..	201 „	213c.
127/4	„	superfine flowery Pecco	„ ..	219 „	243c.
70/4	„	finest „	„ ..	160 „	166c.

The prices paid are in average 5c. under valuation. The parcels Java Tea, ex Kortenair, were sold as follows:—10/4 chests Congo sold at 97c., 215/4 chests Souchon sold at 126 to 129c., 176/12 chests Pecco sold at 179 to 186c.

DRUGS.—Camphor very firm, and with several transactions at higher prices; raw Japan is paid with 78c. Cassia Vera: The 600 piculs arrived per Lady of the Lake are offered, but stil unsold.

RATTANS.—2100 bundles, ex Lady of the Lake, were sold at unaltered prices.

HIDES.—The market is still unaltered, but firm. The sales included 2000 Java Reindeer, which are paid with the very high price of 60c.

INDIGO.—The market remained in a favourable condition, and closed very firm in consequence of the position of the London market. Holders decline to operate without an advance, and by this reason only 40 chests were sold.

BANCA TIN.—The market is very dull, and some transactions are made at 53¼f. to 53f.

SUGAR (RAW).—The market is very inactive, only 2500 kr. Java, Nos. 12 to 15, were sold at 1f. under November.

ARRACK.—The market is somewhat more animated; 60 casks ex de Schelde, and 25/1 and 10/2 casks ex Anna Forster were sold at firm prices.

SILK.—The Trading Company announced an auction on the 8th of March, on which will be offered 344 bales raw Japan Silk.

TOBACCO.—In the auction of parcels of Java leaves, which was held to-day, the following marks were sold:—740 bags G P in average a 32 1-5th c., 257 bags S P, C H D at 40 1-5th c., 41 bags C L, D D, at 10½c. The market closes firm, the stock is not very important, and a great deal of it is to be offered in the forthcoming sales in March.

MONEY MARKET.—In consequence of the fact that the Netherlands Bank lowered its rate of discount and fixed it upon 6 proc. for bills and 6½ proc. for acceptances, the Stock Exchange was more active than during the last week. Large business, however, is not done yet, but prices are generally firm. Money may be had in the open market at Bank rate:—Dutch 2½ per cents., 61½; 3 per cents., 71½; 4 per cents., 95½; Trading Company, 146⅝; Central Railway Company (oblig.), 123; Actions do., 30; Rotterdam Bank, 104; Java Bank, 140; Company Exploration of State Railways, 92; Dutch Rhenish Company (shares) 107½.

'CHANGE.—London: 3 mo., f.11.68; 2 mo., f.11.76; short, f.11.89. Paris: 3 mo., f.46.50; 2 mo., f.46.70; short, f.47.20. Antwerp: 3 mo., f.46.50; 2 mo.——; short, f.47.10. Hambro': 3 mo., f.34.87½; 2 mo., f.35.05; short, f.35.20. Bremen: 3 mo., f.189.40. St. Petersburg: 3 mo., f.144.

SHIPPING.—ARRIVALS.—Feb. 16, at Texel, from Batavia: Eudora; from Banjoewangie: Anna. 18, at Brouwershaven, from Batavia: Madura. 19, from Batavia: Twee Cornelissen.

DEPARTURES.—Feb. 19, from Hellevoet, for Japan: Duodecimo. 20, from Brouwershaven, for Batavia: Maria Anna, Lammina Elizabeth, Noord-Brabant, Henriette Elizabeth Susanna; for Samarang: Christina Maria; from Texel, for Padang: Henriette; for Batavia: Jacoba Christina, Tagal, Stad Assen; for Japan: Gloria; for Macassar: Ystroom; for Sourabaya: Sindbad. 21, from Texel, for Batavia: Guede Verwachting.

PASSENGERS INWARD.

From JAVA: Per Madura, Mr. C. F. Nelissen and family; G. J. Grashuis.

PASSENGERS OUTWARD.

For JAVA: Per Jacoba Christina, Mr. van Zyp and family, Mr. J. M. H. G. Theunissen, Mr. C. H. Buelhouwer, Miss C. M. D. Hoen; per Tagal, Messrs. L. Rogge, A. Grevel, J. Bingt, Arnold and family; per Stad Assen, Messrs. P. L. le Comte, Fritz, Breguet, Katwyk and family, Miss C. D. Buddingh; per Sindbad, Messrs. H. Kropveld and family, A. Sperhake and family, P. de Graaff, F. J. H. Duverge, J. C. Romswinkel, E. A. de Braconier, Kannegieter, Woesthoff and family; per Lammina Elizabeth, Mr. W. H. Heytman and family, Miss H. J. Visscher, Mr. Visscher, G. Tinkhof, Messrs. J. and H. Tinkhof, Miss P. van Gelderen, Miss R. M. Biesmeyer and family; per Maria Anna, Miss Fahnholtz, C. M. and A. M. Kleykamp; per Guede Verwachting, Mrs. Blatteman and family.

RUSSIA, GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, FEB. 14.

With reference to the alarming increase of piracy in the Chinese waters, the Consular and Trade Department of the Danish Foreign-office has published the following warning and advice:—"Her Britannic Majesty's Envoy at Copenhagen has called the attention of the Royal Danish Government to the urgent necessity of measures being taken by all the maritime States in common for the suppression of piracy, which has, of late, been increasing to an alarming extent in the China seas, and communicates the fact that all the vessels belonging to the Peninsular and Oriental Steam Navigation Company employed in those waters are now armed with a gun able to fire shells, and are also provided with a sufficient number of rifles and muskets. As it appears that the Chinese pirates have a great dread of shells, a rifled gun of that description, light, and easily moved from one part of the deck to another, is recommended as the best weapon of defence for this purpose."

During the year 1865 the number of vessels that arrived at St. Petersburg (Cronstadt) was 2,022, of which only 97 were under the Russian flag, the remainder belonging to seventeen other nations, among them being 1,068 British. The number of vessels that sailed during the same year was 1,967; nine Russian and six English vessels sailed from Cronstadt to the Amoor, and one Russian to the Russian-American colonies, all with cargoes of Russian produce.

COMMERCIAL.

COFFEE.—The tone of the market is firmer, as large orders had to be executed. The finer qualities are most in request, but inferior command more attention. Sales of the week, 14,000 bags.

SUGAR.—Raw calm, and only small purchases for pressing requirements. Very little was done in refined. In both there is no improvement in prices.

RICE.—Business confined to consumptive demand, without alteration in values.

SPICES.—The transactions have been few and unimportant. No Cassia Lignia arrived by the *Pathfinder*, which has tended to strengthen that market.

TEA.—Some hundred chests of Souchong, Pecco, and gunpowder have been sold this week at full prices both for shipment and local consumption

SPELTER.—A further improvement has taken place, and the following sales were effected:

500	centners	in loco	at 15	marks 12	sch.
8,000	„	Spring delivery	15	„ 10	„
1,500	„	in loco	15	„ 13	„
3,000	„	Spring delivery	15	„ 12	„
3,000	„	„	15	„ 13	„
1,000	„	„	15	„ 14	„

The price now demanded is 16 marks, but as yet no business has been done at that figure.

The money market is easier, and discount has declined to 4 per cent.

HAMBURG, FEB. 23.

I am enabled to confirm all that I wrote you the other day about the Austrian expedition to the Far East. The *Schwarzenberg* has already returned to Pola to be thoroughly overhauled previous to her circumnavigating voyage; the *Archduke Frederick* has just left Kiel, where she has been wintering, and proceeded to Bremerhaven at the mouth of the Weser, where she will go into a dry dock for examination (there being no such accommodation at Kiel) before returning to the Mediterranean. In consideration of the shattered finances of Austria, the expedition will be fitted out with a due regard to economy, and as the two vessels are both in commission and the officers and crews on full pay, Government intends to ask for a grant of only 200,000 florins as the extra expense in this year. In the meantime the authorities are engaged in drawing up a list of presents for the Emperor of Japan, among which one of the principal objects will be an album containing water-colour paintings of the numerous industrial establishments in the Austrian dominions. The cover of the album will be of ebony inlaid with silver and lapis lazuli, and ornamented with coats of arms in enamel and gold. There will also be a rich assortment of warlike arms both offensive and defensive, and above all things specimens of Bohemian and Venetian glass manufactures.

Whilst on this subject I may here state that amongst the shoals of young men who have volunteered and are most anxious to take part in the expedition is one of the name of Wilhelm Scherzel, a native of Beraun, in Bohemia, who has studied law as his profession and lately been admitted to practice as a lawyer of Prague. This young man has, however, such an extraordinary talent for languages that though only twenty-three years of age, he is perfect master, not only of all the European tongues and dialects, but many of the Asiatic ones, including Chinese, Japanese and the Malay, which would render his services particularly useful to the expedition as interpreter. Last week he underwent a voluntary examination at Prague, which was attended by Count Lazansky, the Statthalter of Bohemia, and to which all the professors of languages at the University of Prague, and other linguists from all parts of the empire, were invited, and a numerous public admitted. To the universal astonishment of all present, in whatever language he was addressed he answered with the fluency and correctness of a native, and has thus substantiated his claim to take part in the expedition. An English lady was present who has spent many years in the East, and speaks the Malay as easy as her mother tongue, conversed freely with him in that language, and assured the gentlemen examiners that she was perfectly astonished at his intimate

Digitized by Google

Other parties are "prospecting" on the banks of the Schilka and the Amoor, the confluence of those two rivers being known to abound in gold. Owing to the want of snow this winter the land communication is much impeded, and provisions consequently have become much enhanced in price. Rye flour fetches 1½ roubles per pood, butcher's meat 1 rouble 40 copecks, and butter 7 roubles; firewood costs 2½ roubles per fathom, and the same price is paid for a small cartful of hay. Fresh fish are no longer to be had, and salted omules of the Selenga cost 10 copecks each.

A letter from Kiachta in the *Russian Invalide* gives the following account of the trade there with the Chinese:—"Russian woollen cloth is now much preferred in China to the English and Belgian, for a piece of English cloth containing 30 arskines is considerably lighter than a piece of Russian containing only 25 arskines, which shows that the latter has more consistency and is closer woven. It is more particularly the cloth made at Moscow that is most preferred by the Chinese. The tea trade is active, and our merchants now travel long distances into the interior of China to purchase the article direct of the producers. Kiachta has lately been visited by numerous photographers, who have one and all done a good stroke of business with the Chinese, who are enthusiasts and pay any sum for their portraits. Some of these artists are said to have realised 5,000 roubles in this way, and are now making arrangements for penetrating into the Amoor country in the summer in order to take a series of photograms of the most striking features of that interesting but little known district."

COMMERCIAL.

COFFEE.—A continued and increasing demand has given a further firmness to the market, which was still more improved by the favourable result of the Dutch sales and the Rio telegrams. Sales 22,500 bags.

SUGAR.—In the raw market there was more inclination to buy, as importers have again moderated their demands by full 8 Sch. Bco. per centner. The prices of refined are rather in favour of purchasers. The sales amounted to 35,000 loaves of Hamburg Melis and raffinades for the execution of foreign orders.

RICE.—The business done was trifling, and previous values could with difficulty be supported.

SPICES.—Ginger underwent a slight improvement, and more attention is paid to mace and nutmegs. Pepper is also in better favour. In Cassia Lignea no alteration.

TEA.—Sales continue to be made to a moderate extent, and full prices are easily realised. Considerable direct supplies are expected to arrive shortly by the Asia, Florentin, Aldebaran, Johann Christoph, Woitzlava, and New Ed, which will tend to improve the assortment in this market, stocks being greatly reduced by the uninterrupted deliveries during the winter in consequence of the absence of frost.

SPELTER.—A good deal of business has been done at improved prices, and the market is in a favourable condition. Since last mail the following transactions are reported:—

2,000	centners	.. Spring delivery	..	15 marks	12 sch.
2 000	„	.. do.	..	15 „	14 „
1,000	„	.. loco	..	16 „	—
1,000	„	.. CGH, loco	..	16 „	3 „
500	„	.. BH, loco	..	16 „	4 „
2,000	„	.. WH, loco	..	16 „	4 „
2,500	„	.. Spring delivery	..	15 „	15 „
3,000	„	.. do.	..	16 „	—
3,000	„	.. do.	..	16 „	4 „
1,000	„	.. loco	..	16 „	5 „
1,000	„	.. Spring delivery	..	16 „	1 „

Sellers now demand 16.3 for spring delivery, and 16.6 loco.

DISCOUNT 3¾ per cent. Money more abundant.

SHIPPING.—Sailed: Feb. 17, Peiho, to Nicolayefsk; 19, Manila II., to Shanghai; 20, Jessen, to Nicolayefsk.

Parliamentary Intelligence.

HOUSE OF COMMONS.

BRITISH TROOPS AT HONG KONG AND KOWLOON.

(Feb. 13.) Col. NORTH moved for a return, showing the accommodation for the troops of all arms at Hong Kong and Kowloon at the time of the arrival of the 2nd battalion 9th Regiment and 2nd battalion 11th Regiment, specifying the nature of the accommodation and number of cubic feet allowed per man; also for returns of the mean annual stength, total annual sickness, mortality, and invaliding of the troops of each arm, officers and men, at Hong Kong, up to the year 1855; and of the number of deaths annually on the voyage to England of the troops invalided, in a tabular form, giving the date, corps, mean annual strength, number of sick, deaths, invalided, and died on the passage to England. Agreed to.

THE STRAITS SETTLEMENTS.

(22nd.) Lord STANLEY asked the Secretary of State for the Colonies whether it was intended to transfer the Straits Settlements from the Indian to the Colonial Department, or whether that project had been definitively abandoned.—Mr. CARDWELL said that the project had not been definitively abandoned, but the Government had not been able to settle the conditions on which it was to be carried out. The question of military defence was still under the consideration of the War Department, and, until that had been settled, the question of the charge upon the Imperial Exchequer could not be determined.

THE DUTY ON PEPPER.

(15.) Lord STANLEY presented a petition from the Singapore and Penang Chambers of Commerce in favour of a reduction in the duty on pepper.

FORTIFICATIONS AND BARRACKS AT HONG KONG.

(21st.) Colonel NORTH moved for a detailed statement of all moneys expended upon fortifications, military storehouses and buildings, and upon barracks at Hong Kong and Kowloon, and of moneys paid for hire of godowns or other temporary buildings from 1861 to 1865, both years inclusive.—Agreed to.

NOTICE OF MOTION FOR TO-NIGHT.

LORD STANLEY—To ask the Chancellor of the Exchequer whether his attention has been called to statements made in *The London and China Telegraph* of the 5th inst. in reference to the exchange question in Japan; and to ask him to produce a copy of the report made by Mr. Arbuthnot, of the Treasury, on the operation of the present system of appropriating the profits arising out of the exchange; and whether any sums had been carried to the credit of the public accounts, out of the profit arising from the difference between the current value of the Japanese Ichibou and the rate at which it is supplied to the naval, military, and civil services.

Naval and Military.

The Gresham, Capt. Brayley, lately arrived from Hong Kong, has been engaged to convey the reinforcements to Hong Kong, consisting of about 150 men and six officers.

The approaching departure of Admiral Sir Michael Seymour, G.C.B., Commander-in-Chief at Portsmouth, is looked forward to with much regret, not only by the Government officials and *employés*, but more particularly by the inhabitants of the port, with whom the gallant admiral is exceedingly popular. Sir Michael has, since he took command at Portsmouth, gained the respect of all classes; he has mingled with the people by joining in their civic banquets, and his presence has, at almost every charitable meeting connected with the service or the town, done much to promote the weal of the various admirable institutions of which the seaport boasts. Sir Michael has been a warm friend of the Royal Sailors' Home, the Royal Seamen and Marines' Orphan School, and Female Orphan Home, of the Hospital Penitentiary, and other benevolent establishments. In acknowledgment of Sir Michael's worth, and in appreciation of his character as a public officer, the corporation have passed an appropriate resolution.

By a letter received from Her Majesty's ship Orontes at Hong Kong, it appears that ship arrived there on the 27th of December, 88 days from England, with the naval reliefs for the ships in China; all well. The Orontes had fine weather on the passage out. She was rather overcrowded, no less than 1,150 souls having left England on board. As soon as the Admiral arrived at Hong Kong the Orontes was to commence distributing the ships' crews, receiving in return time-expired men and invalids. She was to leave for England about the end of January, calling at all the ports on the way. She may be expected here towards the end of April. A rumour that several men had been flogged on board the Orontes turns out to be utterly unfounded.

The Salamis despatch vessel, noticed in our last, left Portsmouth, on the 12th inst. calling at Devonport to embark mails for Madeira and the West Coast of Africa, at which ports she is to call.

Monetary and Commercial.

The East Indian Railway Company have announced a new issue of capital to the extent of £1,000,000. A loan is announced by the Oriental Bank Corporation, as agents for the New South Wales Government. The amount is £700,000, in 5 per cent. debentures, redeemable within the next ten years, part of the money being required to pay for railway and other works, and £300,000 to replace a sum paid off in December last.

Seventy guineas has been paid on the B. and B. Company's steamer *Nerbudda*, bound to Bombay from Liverpool last November.

The China Steam Ship and Labuan Coal Company will hold their annual meeting on the 5th March.

An extraordinary general meeting of the Asiatic Banking Corporation is convened for the 7th of March, to consider a proposed increase in the number of directors.

The case of Montgomery Martin and others *versus* the Bank of Hindustan has been heard before the Lords Justices of Appeal, but the decision is reserved.

The Imperial Land Company of Marseilles, with a capital of £1,600,000, bas been launched by the Credit Foncier, the Agra and Masterman's Bank, and the National Bank. The company have a fine field of operations, and, with the vast increase of trade at Marseilles, the improvements proposed are much desired. There will be good property to represent the outlay, and 10 per cent. is guaranteed for the first two years.

Mr. F. W. Lamarchand, lately of the Mercantile Bank, has arranged to proceed to Ceylon in about two months as Manager of the Bank of Hindustan.

A dividend of 9d. in the pound has been announced on the estate of Halliday, Fox, and Co. It appears that the original estimate of 20s.—which at the time we doubted—is not at all likely to be realised. The most correct estimate will be found to be about one-tenth of that.

The meeting of the Scinde, Punjaub, and Delhi Bank Corporation (Limited), fixed to take place this day, is for the purpose of adopting a provisional arrangement entered into by the board of directors for the amalgamation of this bank with the National Bank of India (Limited), on the basis that the shareholders of the Scinde, Punjaub, and Delhi Bank Corporation shall receive shares of the amalgamated bank on an

Digitized by Google

equality with the shareholders of the National Bank of India, to the extent of the assets of the Scinde, Punjaub, and Delhi Bank Corporation. The National Bank of India has a considerable amount of deposits, a paid-up capital of about £500,000, which is intact, and the shares are at a premium in the Indian markets. The dividend paid last year was £6 per cent.

A trial of some commercial importance has just taken place at Marseilles. The Messageries Imperiales Company of France has been condemned by the Tribunal of Commerce to pay the large sum of 500,000f. (£20,000) to the owner of a quantity of silk which was damaged by the bursting of the tube of a boiler in the steamer *Peluse*.

The amount of bullion by the P. and O. Company's steamer *China*, from Southampton on the 20th inst., was—in gold to Galle, £5,000; to Madras, £4,362. In silver, to Alexandria, £815; to Madras, £40,002; to Calcutta, £20,000; to Singapore, £4,900; to Hong Kong, £28,465; to Foo-chow-Foo, £1,946; to Shanghai, £153. Total—in gold, £9,362; in silver, £96,281.

MANCHESTER MARKETS.

Buyers are rather holding back. Quotations are—Grey Shirtings 7 lbs., 14s. 6d. to 15s.; 8¼ lbs., 17s. 6d. to 18s. Cotton Yarn, Nos. 16-24, at 2s. 1d. to 2s. 2d.; Maddapollams, 6s. 6d. to 6s. 3d.; Long Cloths, 17s. to 16s. 6d.; T-cloths, 11s. 6d. to 11s. 3d.; White Spot Shirtings, 19s. 6d. to 19s.; White Brocade ditto, 19s. 9d. to 19s. 3d.; White Damasks, 35s. 3d. nominal.

ARTICLES OF IMPORT.

TEA.—During the past fortnight business has been limited, the demand from the country continuing small, whilst there has not been much doing for export. Deliveries have also been affected by an absurd report as to some further probable reduction of duty, which has now been set at rest by a letter from the Chancellor of the Exchequer. The arrivals have been numerous and the samples freely shown, but importers in many cases are holding for more than the trade are disposed to give, and thus but a moderate proportion has been sold at prices which for the fair to medium kinds show a slight decline. The dusty and broken leaf kinds of congou have met with a ready sale, but prices show a decline of about ¼d. to ½d. per lb. Fair to good common have been in moderate demand at fully previous prices. Fair flavoury kinds, of old import, show no alteration. Those of recent arrival have not been so much in request, and the few sales made show a decline of about 1d. per lb.; the better sorts have met with rather more attention at former prices; fine to finest remain much as before, with a limited amount of sales. Common to fair black-leaf kinds, of old import, continue dull of sale at former prices, those of recent arrival have been sold from 1s. 0½d. to 1s. 3d. per lb., but they are not in much request. The better kinds above 1s. 8d. per lb. remain very firm, the quantity of these out of recent ships being very small. In fine to finest there have been a few taken for export. The new-made Canton kinds have not been so readily taken. In common to fair Oolongs business has been small; fine to finest have been sold at very extreme prices for export. Souchongs have been sold on lower terms. In Flowery Pekoes business remains dull. In Scented Teas the sales made show a considerable decline, especially in fair to good Canton-made Orange Pekoes, the reduction being fully 2d. to 3d. per lb. Capers have also sold about 1d. per lb. lower. Foo-Chow Teas also show a further decline of 1d. per lb. In Uncoloured Japans business has been to a fair extent, there being a moderate demand for export, and prices have recovered about 1d. per lb. In Green Teas there has been a good business done, the demand for export and home consumption together having been sufficient to take off the great bulk of the recent arrivals at very full prices, especially for the better kinds of Young Hyson. Gunpowders have sold steadily at rather better prices. Hysons show no alteration. Canton-made Teas remain dull at the late decline. The public sales of the 20th instant comprised 11,208 packages China Tea, of which 9,631 packages were sold, the whole being offered without reserve.

SILK.—With reference to the silk sales, Messrs. Durant and Co. report as follows:—The periodical public sales are concluded. The quantity offered was 1,400 bales Bengal, 4,000 bales China, 700 bales Japan, and 1,500 bales Canton silk. The whole was allowed to pass without biddings, and the actual business done is even less than usual. In the general market we have a continuation of the inactivity and indisposition to purchase which has existed more or less during the last three months; hence, with the exception of one or two forced sales, transactions are of the most limited character. The deliveries have fallen back to the scale of December. The Circular of Messrs. Jacomb, Hogg and Co. states: No improvement has taken place in the silk market since last mail; business has been on the most limited scale, and prices have exhibited a drooping tendency. The public sales which took place on the 21st and 22nd instant produced no result; but the decline in the Bank rate to 7 per cent., with every prospect of a further reduction to 6 per cent., encourages the hope that we may have more business before long,—and importers generally, looking at the extreme cost of Silk in China and Japan, and the small quantity coming forward, show little disposition to force sales at the moment. Deliveries from 1st to 23rd inclusive:—China, 2,311 bales; Japan, 495; total, 2,806 bales.

COTTON.—The London market was dull and drooping during the whole of last week, with only a moderate amount of business doing; Tinnivelly, being in most request, has only declined ¼d. per lb. During the week there were sales of 2,250 bales Tinnivelly at 14d. to 15⅜d. for middling fair to good; and sales to arrive of 330 bales at 15d. January to November, guaranteed good fair, closing at 14½d. for December. The total stock of cotton in London on the 22nd Feb. was 66,082 bales, against 137,558 last year; in Liverpool, on the 23rd, 418,680 bales, against 577,660 in 1865. The cotton afloat on the 6th January from Ceylon and Tuticorin was—To London, 22,039 bales; and to Liverpool 2,347. At Liverpool the demand has been fair throughout the week, but has been freely met by holders, and, under the influence of advices from America, of increased receipts and fall in prices, some decline has been submitted to from last week's quotations; but the reduction of the Bank rate to 7 per cent. has tended to promote a steadier feeling at the close of the market. East India descriptions continue comparatively neglected, but, owing to the limited supply, prices have only partially declined ¼d. per lb. for fair qualites, and ⅜d. per lb. for middling fair. The following are the official quotations:—Fair Orleans, 20½d.; middling, 18⅞d.; fair Mobile, 19¾d.; middling, 18⅝d.; Uplands, 19¾d.; middling, 18⅝d.

SUGAR.—Increasing firmness has been apparent since our last report, and prices of current home-trade descriptions are on the average 6d. per cent. above those of the 23rd. Of foreign, the only parcel brought to auction consisted of 2,247 bags Clayed Manilla, part superior quality, which sold at relatively moderate prices, dry fine brown and yellow 32s. to 33s., fair to good brown 30s. 6d. to 31s. 6d. common (8s. 2d. duty) at 30s. 3d. By private contract, about 15,000 bags Muscovade Manilla have been sold at 27s. 6d.; and 3,700 bags Clayed at 30s. 3d. to 31s.

COFFEE.—The Market for Colonial sorts has become quiet, and prices in several instances have somewhat receded. At public sale 514 casks, 150 barrels and bags Plantation were disposed of at a decline of about 6d. per cwt., fine ord. to low middling 76s. to 81s. 240 casks, 450 bags Native were partially taken at previous rates, good ordinary 68s. to 68s. 6d., superior 73s. to 73s. 6d. Of 1316 bags Singapore, the sound part was bought in, the damaged (800 bags) selling at from 40s. to 51s. At public sale on Friday the 23rd, 180 casks, 260 barrels and bags Plantation Ceylon, comprised a small portion bright qualities of the new crop, which went off readily at full rates, small 81s. 6d. to 83s., middling 88s. to 91s., fine 96s. 6d. to 102s., the rest, common sorts, was principally bought in; as also 70 casks, 188 bags Native; and 195 bags Singapore.

RICE.—Rather more steadiness is apparent in this market, and the limited business done shows somewhat firmer prices. Including some parcels late last week, the sales are 12,000 bags—Bassein at 11s.; Rangoon, 11s. 3d.; good Nakrenzie, 11s.; and old, 10s. 3d. Considerable transactions are supposed to have taken place for arrival, but particulars are not given. 810 bags Arracan, at public sale, were withdrawn.

CARDAMOMS are about 3d. per lb. dearer: 12 cases Malabar at auction retired; and of 113 bags Madras, three-fourths sold at 4s. 5d. to 5s. 6d. per lb. for middling to fine Aleppy, 3s. 2d. to 3s. 4d. middling long and rather lean, and 3d. to 1s. low, husks, &c.

CAMPHOR is 2s. 6d. per cwt. dearer, in consequence of the continuance of inquiry, and good business has again been done up to £6 5s. per cwt. for Japan, and £6 2s. 6d. China.

CASSIA LIGNEA.—Firm, 400 cases at auction mostly sold at 95s. to

Digitized by Google

100s. per cwt. for good 3rd to 1st pile. No auctions. Buds: Nothing of interest doing.

CINNAMON (CEYLON).—We quote 1st sort 2s. to 2s. 10d. per lb.; superior, 3s. to 3s. 4d.; 2nd, 1s. 9d. to 2s. 9d.; 3rd, 1s. 8d. to 2s. 4d.; 4th and Jungle, 1s. 4d. to 1s. 9d.; limited business at auction and privately, upon the currency of the recent quarterly sales.

COCOA-NUT OIL.—This market has been very quiet, with most limited business. Cochin and Ceylon had each receded 10s. per ton, but recently have become a little more firm: 49 casks Ceylon, 531 casks Sydney, and 19 casks Zanzibar at auction.

DRUGS.—Cubebs: Nothing of any importance doing. Dragon's Blood:—Firm; 15 cases at auction, mostly sold at £6 10s. at £7 10s. per cwt. for middling to fair lump. Galangal Root: Cheaper, owing to abundance; and 2,062 bags at auction, mostly sold at 12s. 6d. to 13s. per cwt. for good. Rhubarb: Has sold irregularly, but without involving any change in quotations. 176 chests recently arrived sold at auction at 9s. 8d. per lb. for good flat and round mixed; 5s. 10d. to 8s. 7d. middling to fair flat; 5s. 9d. to 8s. 4d. round; and 4s. 1d. to 5s. wormy. 38 chests odds and ends retired.

GUMS.—Benjamin: Steady; and of 134 cases Sumatra at auction half sold at £12 to £12 10s. per cwt. for 2nd quality, and £6 10s. middling third. Damar: Continues steady; but of 149 cases at auction a few only sold at 59s. per cwt. for very good picked. Gamboge: Very scarce, and considerably dearer, a single case of good pipe having sold at auction at £20 per cwt.

GUTTA PERCHA.—Quiet; of 30 baskets and 11 tons at auction a small portion only sold at 7d. per lb. for reboiled.

HEMP (MANILA).—Quiet, at the quotation of £43 to £46 per ton; no auctions held, and not any business of consequence doing privately.

HORNS.—Buffalo: Very firm; 45 tons Madras at auction sold at 38s. to 41s. 6d. per cwt. for 2 to 2¼ lbs. average; and 27s. 6d. to 32s. for 1¼ to 1⅛ lb. Deer: Also very firm; 5 tons Madras, and 4 tons Ceylon at auction sold at 59s. 6d. to 60s. 6d. per cwt. for 1⅜ to 1½ lb.; and 50s. to 50s. 6d. for 2 lbs.

INDIA RUBBER.—Has become very quiet in consequence of the great reduction in Para; and 123 packages Singapore, 54 baskets Penang, and 145 baskets Assam, at auction, were all retired.

JAPAN WAX.—Firm, and 694 boxes sold at auction at 78s. 6d. to 87s. 6d. per cwt. for fair to very good saucers.

OILS.—Anniseed: Speculation has gone on, and large business has been done on the spot up to 9s. 9d. per lb. and for arrival 10s., but the market has latterly become flat at 9s. 6d. to 9s. 7d. Cassia is again dearer; business, chiefly speculative, having been done up to 8s. 5d. per lb. on the spot, and 8s. 7½d. for arrival, and the market is still strong. Cinnamon: Firm, of 3 cases at auction, two sold at 3s. to 3s. 3d. per oz. for fair. Citronelle is the turn cheaper; of 134 cases at auction, one-third sold at 3¾d. to 4d. per oz.; 28 cases "Winter's" sold at 4¾d. to 5d. Lemon Grass: Dearer; of 4 cases at auction, three sold at 1s. 4d. to 1s. 6d. per oz., and of 9 cases "Winter's" two sold at 1s. 6d.

PEPPER.—Black: Is again dearer; large business done privately in Sumatra and Penang up to 3½d. per lb. for the former, and 3 5-16d. the latter. 3799 bags Singapore at auction sold at 3⅛d. to 3⅝d., and 4496 bags Penang mostly sold at and after the sales at 3⅛d. to 3¾d. White: Is ¼d. per lb. dearer, with active demand; 119 bags Singapore, and 56 bags Penang at auction sold at 6⅛d. to 6½d. per lb. for fair to good.

SPICES.—Cloves: Steady; auctions confined to 40 bags Zanzibar sold at 3½d. per lb. for middling. 1380 pockets Stalks mostly sold at 2⅝d. Mace: Considerably dearer; 19 cases Penang, and 5 casks Batavia at auction sold at 2s. 9d. to 3s. 1d. per lb. for middling palish; and 1s. 5d. to 2s. 7d. very inferior to good reddish; and equally great prices obtained privately. Nutmegs: Have further risen 2d. to 3d. per lb., very large transactions accompanying the advance; of 105 cases Penang and 17 casks Dutch at auction, three-fourths at 2s. 11d. to 4s. 3d. per lb. for middling to fine bold, and 1s. 2d. to 2s. 5d. ordinary small to fine medium. The market continues very strong.

SAGO.—Rather easier; of 1206 boxes at auction a few only sold at 20s. per cwt. for fair small. Flour: Nothing of any consequence doing.

TAPIOCA.—43 bags good white Penang realised 4d., and 1189 bags middling to good Flour found buyers at 1⅞d. to 2¼d. per lb.

TERRA JAPONICA.—Cutch Pegue: Continues steady; 550 bags at auction sold at 33s. per cwt. for good. Gambier: Has improved a little; no auctions held; moderate transactions have taken place at 21s. 6d. per cwt. for fair block, and 28s. cubes.

TIN (BANCA AND STRAITS).—Rates have fluctuated about £2 per ton, and operations have been large; quotations are now £1 under those of our last, viz.:—Banca, £86 to £88; Straits, £85 to £87.

MISCELLANEOUS.—Blacklead: Steady; and of 694 barrels at auction three-fourths sold at 15s. 3d. per cwt. for fair lump, and 8s. 3d. to 9s. 9d. for dust. Ebony-wood: Firm; 20 tons Ceylon at auction sold at £9 10s. to £9 17s. 6d. per ton. Galls: Very flat; Turkey lower; of 511 bags at auction only 5 bags sold at £7 10s. per cwt.; China quiet; 545 boxes retired; Japan steady; 394 boxes sold at 60s. 6d. to 63s. 6d. for fair to very good. Musk: Has gone back 2s. to 3s. per oz., and 90 caddies Tonquin at auction sold at 26s. to 34s. per oz. for good to fine picked; 21s. 6d. to 23s. 6d. ordinary to middling; and 19s. to 19s. 6d. picking. Rattans: Flat and lower; 26,765 bundles Singapore at auction sold at 2s. 6d. to 4s. 2d. per 100. Sapanwood: Very quiet; 50 tons Manila, and 6 tons Siam at auction, all retired. Mother-o'Pearl Shells: Scarce; no auctions, Manila dearer; small sales at 130s. per cwt. Soy: Quiet; 34 casks at auction retired. Star Anniseeds: Rather lower; of 146 boxes at auction, one-third sold at £7 5s. per cwt. for good. Sticklac, Siam: Flat; 294 cases at auction, all retired. Tortoiseshell; A case of Penang sold at auction at full value, 15s. per lb.; 2 cases Manila retired much above present worth. Vermilion: Scarce and dear; 9 boxes from Hamburg at auction retired at 3s. 9d. per lb.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £7 to £7. 5s.; nail rod, £8. 10s. to £9; hoops, £9. 15s. to £10; sheets, single, £10. 10s. to £10. 15s.; Staffordshire bars, £8. 10s. to £9. 15s.; rails, £7.

STEEL.—Swedish keg, £15. 10s. to £16.

COPPER.—Sheet and Sheathing, £101 to £103 per ton; yellow metal 8¼d. to 9d. per lb.

TIN.—£93 to £95 for block; £94 to £96 for common bars. Tin plates best charcoal, I.C. 34s. to 35s.

LEAD, &c.—English pig, W.B., £22. 5s. to £22. 10s.; shot, patent, £24. 5s.; sheet, £22. 5s. to £22. 10s.; spelter, £24. 5s.; zinc, English sheet, £30; quicksilver, £7. 15s. to £8.

The following is from the Circular of Messrs. French and Smith:—The Metal Market has been very quiet since our monthly circular. The speculation in Scotch Pig Iron continues, and notwithstanding the steady increase in the stock the price has been maintained. Copper: Raw Copper continues firm, but there are scarcely any orders for manufactured. Tin: On the 6th inst. the English Smelters reduced their price £2 per ton. Foreign also fell, and was sold as low as, Banca £86, Straits £85, but it recovered a little, and is firm at our quotations. Tin Plates are very firm. Lead is quiet. Spelter firm at quotations.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton from the 1st January by the P. and O. Company's mail steamers.

FREIGHTS AND CHARTERS.

The recent arrivals have somewhat over-stocked the loading berths for China, but in consequence of the more favourable state of the Money Market, rates in outward freights are still well supported. Our quotations below show some slight change in coal freights, and rates are getting easy.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Shanghai: 40s. weight, 30s. to 35s. meast. To Hong Kong: 40s. weight, 30s. meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Ceylon: 40s. weight, 20s. measurement.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per Keel. For Batavia: £26. 10s. For Hong Kong: £48. For Galle: £40. For Singapore: £42. For Shanghai: £60. From Newport, Cardiff or Swansea, per ton. For Hong Kong: £2. 5s. to £2s. 7s. 6d. For Manila: 35s. to 40s. For Galle: £1. 18s. For Singapore: £1. 15s. For Shanghai: £2. 16s.

The Admiralty have engaged freight in the Yaratilda for the conveyance of 23 tons naval stores, 11 masts, and 50 small spars, 43 tons naval timber, 88 tons (heavy), and 26 tons (light) naval common, 12 tons sails, 3 tons bricks, 54 tons cordage, and 1 ton combustibles, from the River Thames to Hong Kong; and have also accepted the Gresham for the conveyance of troops to Hong Kong.

CASUALTIES.

The Blair Athol, from Shields for Galle, which put into the Downs Jan. 29, has been supplied with an anchor and 120 fathoms of chain in lieu of other lost.

The Patriarch Samhiri, Lion, from Banjoewangie, which arrived at Brouwershaven, Feb. 9., had experienced a gale from N. N. E., during which she sustained damage to hull, sails, and rigging, and, through the shifting of her cargo, became leaky.

The Estafette, Oeplles, from Batavia, which arrived at Texel, Feb. 10, had experienced a heavy gale Jan. 23, during which she lost some of her sails and bulwarks, and was compelled to throw overboard a great quantity of cargo.

The Dunmail, from London for Hong Kong, has been supplied with an anchor and chain, to replace others lost off Margate.

The Celesbes, Teppern, from Shields to Batavia, which put into Cowes, Feb. 10, had lost her sails and part of bulwarks, and has been ordered into harbour for repairs.

The Elshout, Akkerman, from Batavia, which arrived at Texel, Feb. 8, reports that whilst off the harbour she was struck by heavy seas, which filled the cabin with water and washed a man overboard.

The Neeuwland, Pot, arrived at Dordrecht, from Batavia, owing to the lowness of the water, took the ground, and the weather being stormy at the time, the Johan ran into her and carried away part of her bulwarks.

The Boldon Lawn, from London, for Colombo, has put back, having been in collision in the river.

The Dageraad, Duinker, which arrived at Brouwershaven, Feb. 8 from Batavia, had lost both anchors in the roads, and has sailed for Dykwater; assistance has been sent to her.

The Eudora, Barker, arrived at Texel from Batavia Feb. 16, with loss of sails.

The St. Helena, Pille, from Samarang for Rotterdam, which put into Simon's Bay Dec. 2, with foremast sprung, &c., was ready to repair on Jan. 13. About 392 bags of coffee and 18 chests of indigo, damaged, had been sold.

The Pietro Marconi, from New York for Hong Kong, was burnt in lat. 49 S., 62 E.

MISCELLANEOUS.

ST. HELENA.—The mail steamship Roman, which arrived at Plymouth February 15, brings Messrs. Solomon and Moss's Shipping List to January 23. The Yaratilda, 71 days from Macao, for London, touched at St. Helena, 4th Jan.; the Nelson, 96 days from Manila, for London, 11th; the Ensign, 74 days from Shanghai, for London, 13th; the Mantred, 97 days from Foo-chow-Foo, for London, 15th; the Lord Macaulay, 77 days from Foo-chow-Foo, for London, the Simon Hobley, 82 days from Japan, for London, and the St. Dunstan, 86 days from Foo-chow-Foo, for London, 16th; the Selena Jane, 73 days from Hong Kong, for Hamburg, and the Zodiac, 35 days from Batavia, for Falmouth, 17th; the Areta, 163 days from Foo-chow-Foo and 61 days from Batavia, for London, 17th; the Setuan, 86 days from Manila, for Cadiz, the Annie Arenbell, 70 days from Macao, for London, and the Patna, 81 days from Shanghai, for Liverpool, 18th; the Alexandrina, 74 days from Foo-chow-Foo, for London, 21st; the Wynaud, 50 days from Ceylon, for London, 22nd; and the Mandarin, 75 days from Amoy, for New York, 23rd.

Off ASCENSION.—Dec. 29, from Sourabaya, for Amsterdam, Lady Alice.

At TABLE BAY.—Dec. 15, from Hong Kong, Constance.

At MAURITIUS.—Dec. 28, from Yokohama, Bessie Stanton, Cole.

At MAURITIUS.—Jan. 14, from Singapore, Madras, Wupper.

Several bales have been saved from the Singapore, which was wrecked at Formby Jan. 9, on her voyage from Liverpool to Singapore.

THE NEW CLIPPER "JOHN R. WORCESTER."—The ship John R. Worcester, launched last month from the building-yard of the Marine Investment Company on the Clyde, sailed for Shanghai on the 12th inst. She is a composite ship of iron and teak, of 950 tons, builder's measurement. Her model is an improvement on the lines of the Fiery Cross. Altogether the John R. Worcester is a splendid vessel of the clipper class, so built and equipped by her enterprising owner, after whom she has been named as to be a promising competitor for the prize which the lucrative Chida trade so liberally offers. She is commanded by Captain W. Brown, so favourably known in the Australian trade by his many rapid voyages in the clippers Ocean Chief and Golden City. The progress of the John R. Worcester will be watched with considerable interest; and it is hoped that before long she may have an opportunity of testing her excellent qualities in a race with her celebrated rival sisters, the Fiery Cross and Serica. This vessel, we believe, goes to the address of Messrs. Jardine, Matheson, and Co.

Engineer-in-Chief—Monsieur PAUL BORDE, Marseilles (Member of the Conseil General).

Secretary (pro tem.)—ALFRED LOWE, Esq.

Temporary Offices—17 and 18, Cornhill.

The Imperial Land Company of Marseilles (which has been nearly twelve months in course of organisation) is established with a view of purchasing and acquiring land and property in the important city of Marseilles, the re-sale of the same, and the acquisition of concessions and privileges connected with the development and improvements of the City and Port.

In furtherance of these objects, and after a long and careful investigation, various properties have been purchased in the best portions of the city, and where the progress of the improvements gives assurance of profitable results.

The properties which the Company have acquired are as follows:—

1. The Joliette Property, comprising about 2,244,000 square feet of building land, exclusive of streets.

2. The Rue Impériale Property, consisting of about 98,000 square feet.

3. The Catalans Property, consisting of the Hotel, the Imperial Club, baths, houses, and building plots, in all about 2,300,000 square feet.

4. The Prado Property, consisting of building plots of about 246,000 square feet.

It will be seen, on reference to the map, that the Company's purchases comprise the lands to the north of the town as well as those to the south, with a large extent of seaboard, making a total of about 4,900,000 square feet.

Marseilles, both in population and wealth the first maritime city in France, contains a dense population of more than 300,000 souls. During the past year 18,000 vessels, with a tonnage of upwards of 3,000,000 tons, entered and left the harbour. Marseilles commands the commerce of the Mediterranean, engrosses nearly the whole trade with Algeria, and is the packet station for the Peninsular and Oriental Steam Company, the Messageries Impériales, and other steam packet companies trading with all parts of the world. It possesses commodious docks and warehouses, and, by railways, is in direct communication with all parts of France.

The old harbour having been found inadequate for the rapidly expanding commerce of the place, the new harbour of La Joliette, covering an area of sixty-eight acres, was constructed, and is constantly crowded with shipping. It is surrounded by broad quays, with stately buildings on the north side, and a new town is rising rapidly in its immediate vicinity. Since 1860 three other basins have been constructed, named Du Lazaret, d'Arènc, and Napoleon, which doubles the harbour accommodation of Marseilles.

It is well known that his Majesty the Emperor of the French takes deep interest in the welfare and prosperity of Marseilles, and the Directors have strong reasons to believe that his Majesty's gracious and special protection may be depended upon to aid any enterprise having (like the present Company) the object of developing the resources of the city, and accordingly application is intended forthwith to be made by the Directors to obtain the valuable concession for razing the Fort St. Nicholas, and to make the new Catalans Port.

By the construction of the Rue Impériale, which is 80 feet wide, and lined by important buildings, a direct communication has been effected between the Rue Canebière, the Exchange, the Ancien Basin, or old harbour, and the new basins or docks above mentioned. This has caused the demolition of large blocks of houses, densely occupied, which circumstance, together with the previous dificiency of house accommodation, renders the construction of new buildings absolutely necessary for commercial and residential purposes, and causes an eager demand for vacant plots of building land.

In this quarter of the town, where the commercial requirements of the growing population are so great, the Company has secured about 57 acres of freehold building land, exclusive of streets, and this under exceptionally favourable circumstances, both as respects situation and terms of payment.

More than 98,000 square feet of this land are in the Rue Impériale—the finest street in Marseilles. The remainder is situated in the Quartier

Digitized by Google

de la Joliette, commencing at the Port of La Joliette, and extending the whole length of the Docks, the Basin d'Arènc, the Port Napoleon, and terminating at the Basin Radoub. These lands are traversed by streets from 40 to 50 feet wide, in connection with the Rue Impériale, by the Boulevarde Maritime, and are surrounded by an industrious and thriving population.

The land will be handed over to the Company completely levelled, with all the streets and footpaths paved, drainage complete, gas laid on, and provision made for the supply of water to the topmost stories.

As by the conditions of the treaty for the acquisition of the Joliette Estate, it is stipulated that six years should be given, by which time the Estate is to be covered with houses; the option is reserved to the Company for the same period, during which it may elect either to pay the purchase money in one sum, or to make an annual payment of equal instalments, extending over a period of thirty years, with a fixed rate of interest and Sinking Fund.

Before the treaty for this portion of the property was concluded, the purchasers secured the services of Professor Donaldson (late President of the Institute of British Architects) to personally investigate the operations in progress at Marseilles, and the character and value of the sites. A copy of his report accompanies the prospectus.

The Catalans Properties are in the immediate neighbourhood of the marine residence of the Emperor, and command a frontage to the sea of about a mile in length. They are admirably situated both for business premises and private villas.

Many first-class houses are already erected; a magnificent hotel (now open), having 140 rooms; and the Imperial Club (now in course of construction), of noble architectural elevation, surrounded with terrace and gardens, all laid out under the Government plan. There is an extensive bathing establishment, often frequented by more than 5,000 bathers daily.

This district will undergo a radical improvement when Fort St. Nicholas, which separates the Catalan property from the centre of the town, shall have been demolished, a new port constructed, and additional streets made, so as to render complete the facilities for communication between the old and new portions of the town.

The Municipality of the town of Marseilles engage, at their own expense, to lay down gas, make macadamised roads, and ensure a proper water supply for the houses.

There are in this quarter about four miles of streets from 40 to 50 feet in width, which have been recently opened and lighted with gas; and the Boulevard la Corderie (72 feet in width, and lately opened for traffic) forms a continuation of the splendid promenade of the Prado.

The district communicates with the Quai de Rive Neuve, the centre of the old port, and of the commerce of the town, by the Boulevard de l'Empereur. All these important facts furnish assurances of great success, and there can be no doubt that this portion of the Company's properties will be sold at a price which will yield a very large profit.

The Prado Lands are near the Southern Railway Station, in an admirable position, and well adapted for the establishment of warehouses, shops, &c.

With respect to the value and prospects of these properties, a report by Mr. P. Borde, the well-known engineer of Marseiles, accompanies this prospectus, giving ample details thereon.

The total amount of purchases is £3,325,163; of this sum £2,668,640 is payable by instalments spread over various dates, and extending in part to a period of fifty years, and only £656,523 in cash, on taking over the estates, caution money being lodged in the meantime for the due observance of the Company's engagements. It is, therefore, expected that with the aid of the Company's borrowing powers not more than £10 per share will be required on those shares not fully paid up on allotment. Thus, with a comparatively small amount of capital, the Shareholders have the advantage of profit derivable from dealing with a very large extent of property.

As evidence of the value of the purchases, the Directors have the satisfaction to announce that they have already concluded arrangements with an association of builders at Marseilles, to transfer to them one of the properties (the Joliette Property) at a profit of about £600,000, such property and profits to be paid for by annuities and sinking fund over a period of thirty years, with an obligation on the part of the contractors to deposit a sum of four millions of francs (£160,000) as caution money, at fixed periods (the first instalment of which was paid on the execution of the contract), and also to cover the property with buildings within a period of five years, at their own cost.

The Shareholders will have the benefit of this contract, and from October, 1867, will receive the income derivable from this contract, viz., the difference between the annuities to be paid and received by the Company, and this income, joined to the existing revenue from the Catalans estate, as well as to the anticipated profit on further sales during that period, will, it is estimated, not only enable the Directors to continue the payment of the interest at 10 per cent. per annum, but enable them to declare periodical bonuses on the capital called up.

As to the Catalan property, having regard to its important position, the command it has of the seaboard, the facilities it presents for construction of the new port, and its general adaptability for the formation of streets, shops, and private villas, a large and remunerative return may also be anticipated.

On reference to Mr. Borde's Report, it will be seen that when the various improvements which have been suggested have been completed, and the Catalan property fully developed, it is estimated to yield a gross profit of upwards of cent. per cent., and this within a period of three years, although the estimates have been based on the more extended period of five years, and that, when the Fort St. Nicholas is removed, and the new port completed, this profit will be trebled.

As the first payments of annuities and rent under the arrangements entered into with regard to the Joliette property do not commence until the 1st October, 1867, and become payable only in the subsequent half-year—viz., the 1st April, 1868, the Directors have decided to pay interest at the rate of 10 per cent. per annum, for two years, from March, 1866, on the capital called up, and for which four interest warrants will be attached to the share certificates at the time of issue (which will be charged to land purchases account). After that date the revenue from the Joliette lands, the rentals from the other properties, and profits on further sales, will be applicable for dividend or bonuses.

As some shareholders may prefer to pay up the shares in full, rather than have a larger number subject to calls, applications may be made for shares to be fully paid up on allotment. Four half-yearly interest warrants, at the rate of 10 per cent. per annum, will likewise be attached to these share certificates. In the allotment of shares preference will be given to these applications, but the number so allotted will not exceed 30,000 shares, and the Directors reserve to themselves the right in their discretion only to allot 60,000 shares in all on the present allotment.

A portion of the shares will be allotted to applicants who are shareholders in

The Credit Foncier and Mobilier of England (Limited).
The Agra and Masterman's Bank (Limited).
The National Bank.
The National Bank of Liverpool (Limited);
To Applicants from Marseilles and Paris;

and the balance to the other portion of the general public.

Applications for shares may be made in the annexed form, which must be accompanied by the payment of £1 per share deposit, without which no application will be considered. Should a less number of shares be allotted than are applied for, the deposit will, so far as required, be applied towards the payment due on allotment. Should no allotment be made, the amount paid will be at once returned, without deduction.

Copies of the Architect's and Engineer's reports on the lands purchased, and a map, showing their position, accompany the prospectus, which, with forms of applications for shares, may be had of the Brokers and Solicitors; also of the Agra and Masterman's Bank (Limited), 85, Nicholas-lane; of the National Bank, Old Broad-street, London, and their branches; the National Bank of Liverpool, Liverpool; and of the Secretary, at the Offices of the Credit Foncier and Mobilier of England (Limited), 17 and 18, Cornhill.

COPY OF MEMORANDUM OF ASSOCIATION.

1. The name of the Company is "The Imperial Land Company of Marseilles (Limited)."
2. The registered office of the Company is to be in England.
3. The objects for which the Company is established are:—

(1.) The acquisition, by purchase, leasing, or otherwise, of land in and near the city of Marseilles, in the empire of France, and the improvement, by building or otherwise, of land so purchased or acquired.

(2.) The selling, leasing, transferring, or otherwise disposing or mortgaging of the lands, houses, and other buildings and works erected, executed, or otherwise acquired by the Company, in large or small portions or altogether, and either before or after the same shall have been improved by building or otherwise, and on such terms as the Company shall think fit.

(3). The improvement of buildings already erected, either by adding to, enlarging, completing, or altering the same, or by substituting new houses and buildings.

(4). The investing of the capital of the Company in building on, or otherwise improving, or adding to, the marketable value of lands from time to time acquired by the Company, and the making, maintaining, and using all such works as the Company may think necessary or expedient for any of the purposes of the Company.

(5.) The borrowing of money, and the issue of transferable or other bonds or mortgage debentures, or any other securities funded or based upon all or any of the real or personal assets or credit of the Company.

(6.) The transacting and doing of all such matters and things as shall be conducive or incidental to the above objects, or any of them, including the applying for and obtaining the incorporation of the Company in France.

4. The liability of the members is limited.
5. The capital of the Company is £1,600,000, divided into 80,000 shares of £20 each.

PORT OF AMOY.

SHIPOWNERS, AGENTS and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer, and a Blacksmith. Dry Godowns for the reception of vessel's stores, &c., when requiring to discharge them.

Amoy, March, 1865.

THE BANGKOK DOCK COMPANY'S NEW DOCK.

This magnificent Dock is now ready to receive Vessels of any burthen, and the attention of Shipowners, Agents, and Masters is respectfully solicited to the advantages for REPAIRING and SPARRING VESSELS, which no other Dock in the East can offer.

The following description of the Premises is submitted for the information of the public. The dimensions and depth of water being:—

Length ... ... 300 feet.
(To be extended.)
Breadth ... ... 100 ,,
Depth of water ... ... 15 ,,

The Dock is fitted with a Caisson, has a splendid entrance of 120 feet from the River, with a spacious Jetty on each side, where vessels of any size may lay at any state of the tides, to lift Masts, Boilers, &c., with powerful Lifting Shears, which are now in the course of construction.

The Dock is fitted with Steam Pumps of great power, insuring despatch in all states of the tides.

WORKSHOPS.

The Workshops comprise the different departments of Shipwrights, Mast and Block Makers, Blacksmiths, Engineers, Foundry, &c.

The whole being superintended by Europeans, who have had many years' experience in the different branches.

The workmen are the best picked men from Hong Kong and Whampoa.

The Company draws particular attention to the great advantages this Dock offers, being in a Port where the best Teak and other Timber can be had at the cheapest cost.

A Steam Saw Mill is also in connection with the Dock, to insure despatch in work.

The Keel Blocks are four feet in height, and can be taken out or shifted without cutting or causing any expense to ships having to get them removed.

The Company is also prepared to give estimates or enter into Contracts for the Repairs of Wooden or Iron Ships, the Building of New Ships, Steamboats, &c., or any kind of work connected with shipping.

All Material supplied at Market price. Vessels for Docking may lay at the Company's Buoys or Wharf free of charge, until ordered to remove by the Superintendent.

Captains of vessels before leaving the Dock must approve and sign their Dockage Bills.

All communications respecting the docking to be addressed, until further notice, to the undersigned, by whom all Bills will be signed and collected.

HOLLOWAY'S PILLS.—ENFEEBLED EXISTENCE.

This medicine embraces every attribute required in a general and domestic remedy. It overturns the foundations of disease laid by impure air and indigestible food. In obstructions or congestions of the liver, lungs, bowels, or any other organ, these pills are especially serviceable and eminently successful. They should be kept in every family, as they are a medicine without a fault for young persons and those of feeble constitutions. They never cause pain or irritate the most tender bowels or most sensitive nerves. Holloway's Pills are the best known purifiers of the blood, and the best promoters of absorption and secretion, which remove all poisonous and obnoxious particles from both solids and fluids.

DEPOSITS RECEIVED BY

THE CREDIT FONCIER and MOBILIER of ENGLAND (Limited).

CAUTION.

WHEREAS Persons are shipping Wines to India marked with a Crown in imitation of CHILLINGWORTH and SON'S WINES, which are branded with a Crown, they having the appointment of WINE MERCHANTS to HER MAJESTY QUEEN VICTORIA, it is deemed expedient for the protection of dealers and consumers of their superior Wines selected from their extensive and valuable stock expressly for the Indian market, which have been so well known and approved by connoisseurs for the last thirty years for their extreme quality and purity, combining flavour and softness, together with great age, body, delicacy, and bouquet, being more free from acidity or alcohol that any other Wines, to caution all purchasers to ask for

CHILLINGWORTH & SON'S
CROWN SHERRIES AND OTHER WINE

And to be particular in observing that the Cases and Cask-heads are branded with their names at full length; also, on the side of the Corks, inside the bottles, as well as the Crown; and also on the seals, in accordance with the heading of this notice, as a necessary precaution, to ascertain that they are CHILLINGWORTH and SON'S CROWN WINES, in order to prevent a common low class of Wines being improperly foisted on the public, and which are in no way to be compared with those of CHILLINGWORTH and SON'S.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s. 6d.
JOHN GOSNELL and Co., Perfumers to Her Majesty and by Special Appointment to H.R.H. the Princess of Wales, London.

Keating's Cough Lozenges.

JUDGED BY THE IMMENSE DEMAND this Universal Remedy now stands the first in public favour and confidence: this result has been acquired by the test of fifty years' experience. These Lozenges may be found on sale in every British colony, and throughout India and China. They have been esteemed wherever introduced. For COUGHS, ASTHMA, and all affections of the Throat and Chest, they are the most agreeable and efficacious remedy.
Prepared and sold in boxes and tins of various sizes, by THOMAS KEATING, Chemist, &c., 79, St. Paul's Churchyard, London. Sold retail by all druggists and patent medicine vendors in the world.
N.B.—To prevent spurious imitations, please to observe that the words "KEATING'S COUGH LOZENGES" are engraven on the Government Stamp of each Box without which none are genuine.

Batavia & Singapore ...	Ribbleton ...	424	—	,,
Calcutta ...	James Crosfield ...	979	—	,,

For terms of Freight or Passage apply to MCDIARMID, GARENSHIELDS, and Co., Liverpool.

STEAM to CHINA from LIVERPOOL.—The following new screw steamers, built for the trade will be despatched for Mauritius, Penang, Singapore, Hong Kong, and Shanghai:—

Vessel.	Tons register.	Captain.	To sail.
Agamennon ...	1672	Middleton.	On or about Mar. 30.
Ajax	1673	Kidd ...	To follow.
Achilles	1673	Russell ...	To follow.

Cargo taken by special agreement. Has good accommodation for passengers.

Apply to ALFRED HOLT, 1, India-buildings, Liverpool.

INDIA, CHINA, AND AUSTRALIA.

SHAW, LOWTHER, & MAXTON will despatch the following high-classed VESSELS to their respective destinations:—

Ships.	Class.	Destination.	Docks.	Date of sailing
Melbrek ...	A1 14 yrs.	Hong Kong & Whampoa ...	E.I.D.	Mar. 5
Gresham ...	A1 10 yrs.	Ditto	W.I.D.	Mar. 20
Invincible ...	A1 13 yrs.	Ditto	L.D.	To follow.
Dunkeld ...	A1 11 yrs	Shanghai ...	E.I.D.	Mar. 5
Polmaise ...	A1 14 yrs.	Ditto	E.I.D.	To follow.
Lorton ...	A1 14 yrs.	Yokohama & Kanagawa ...	E.I.D.	Mar. 5
Racer ...	A 1 American Lloyd's	Melbourne ...	E.I.D.	Mar. 20
Lady Egidia ...	A1 13 yrs.	Ditto	E.I.D.	Apr. 25

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, E.C.

HONG KONG and WHAMPOA (last shipping day Feb. 28), the magnificent Workington-built clipper ship SCAWFELL, A 1 thirteen years, 886 tons registar, ROBT. THOMSON, Commander; loading in the East India Docks. This splendid ship, so well-known in the China trade, is strongly recommended to shippers of fine goods.

For Freight or Passage apply to GELLATLY, HANKEY, and SEWELL, 27, Leadenhall-street, E C.

FOR HONG KONG and WHAMPOA (with quick despatch), the well-known British-built clipper ship YARATILDA, A 1 fourteen years, 720 tons register, JAMES DONOUGH, Commander; loading in the London Docks. This fine vessel is noted for her rapid passages, and has superior accommodatirn for chief cabin passengers.

TEMPERLEYS, CARTER, and DARKE, 3, White Lion-court, Cornhill, E.C.

FOR SINGAPORE.—With immediate despatch, having the bulk of her cargo engaged, the splendid clipper EASTFIELD, Captain WATTS, 434 tons register; A 1 at Lloyd's for thirteen years; coppered and thoroughly copper-fastened; well known as one of the finest vessels in the West Coast trade, and having always delivered her cargoes in excellent order, cannot be surpassed as a conveyance for fine goods.

For Batavia and Sourabaya, an A 1 or 3-3rds CLIPPER SHIP.

Apply to ORR LE BLANCH and Co., 42 and 43, The Albany, Liverpool.

LINE O PACKETS FROM LIVERPOOL FOR JAVA.

FOR BATAVIA and SOURABAYA, with immediate despatch, having two thirds of her cargo engaged, the splendid Dutch clipper barque CATHARINA, Captain VISMAR; 240 tons register; built in 1864, and classed 3-3rds L 1 1 for nine years; the highest class in French Lloyd's; coppered and thoroughly copper-fastened, and a most eligible conveyance for fine goods. Loads in Prince's Dock.

For BATAVIA and SINGAPORE, an A 1 twelve year Ship.

Apply to NUTTALL and Co., 18, Chapel-street, Liverpool.

WEATHERLEY and MEAD'S LINE of CLIPPERS for JAPAN Direct.

FOR YOKOHAMA (Kanagawa), the splendid clipper barque MINNIE, A 1 twelve years, 407 tons register, DAVID BLACK, Commander; well-known in the China trade, having the greater part of her cargo engaged, will sail with the usual quick despatch of this line.

For Freight or Passage apply to the owners, Messrs. ADAMSON and RONALDSON, 1, Leadenhall-street; or to WEATHERLEY and MEAD, 21, Water-lane, Great Tower-street, E.C.

COLOMBO Direct.—First Ship.—The beautiful clipper BLUE JACKET, A. 1, is now rapidly loading in the London Docks, and will shortly be despatched.

Apply to LIVINGSTON, HOLDING, and BRIGGS, 31. Great St. Helen's, E.C.; or to JOHN C. CAMPBELL, No. 22, Great St. Helens.

N.B. Will be followed by the NEVILLE, A 1, West India Docks.

COLOMBO, Ceylon, direct, the beautiful clipper-ship, LIBERATOR, A 1 for ten years (built under special survey), 445 tons register, Capt. J. ROBERTSON; now loading in the West India Docks. This splendid vessel, having a great portion of her cargo positively engaged and shipping, offers the best opportunity to shippers of fine goods.

For freight or passage apply to F. TALLACK, No. 23, Birchin-lane, Cornhill, E.C.

INSTITUTE OF PAINTERS IN WATER COLOURS,
53, PALL MALL.
HILDEBRANDT EXHIBITION.

China, Japan, and Manila, painted from nature by Edward Hildebrandt, Court Painter to His Majesty the King of Prussia, Member of the Academies of Berlin and Amsterdam. These are the same pictures which were exhibited for the period of eight months with the greatest success in the Gallery des Beaux Arts Paris and before in Berlin, Hamburg, and other continental cities.

Per P. and O. steamer, from Southampton, April 20.—To Ceylon: Mr. J. H. Purdon.

Summary of News from the Far East.

JAPAN.

The papers and correspondence from Japan by this mail appear to have again missed. The dates from Yokohama would be probably up to the 15th January, and will, doubtless, come forward per P. and O. mail, expected on the 16th inst. The Messageries Imperiales will have to alter the present arrangement of one steamer performing the work of the Japan and Shanghai lines.

CHRISTMAS IN YOKOHAMA.

The *Japan Times* has the following interesting account of the way in which this festive season was honoured in Yokohama:—

We cannot pass over the season of Christmas without paying to it the homage which every Englishman feels, and feels the more deeply the farther he is condemned by adverse fate to dwell from those social meetings which show the truth of the saying that "blood is thicker than water," and which compose the real pleasures of Christmas. One cannot taste the real pleasure here. It is somewhat difficult to carry off a Christmas dinner in the East with that gusto which the rite demands. We are at great advantage in Japan, however, over all other English exiles. Japan, its climate, its scenery, its foliage, are all so like England that we may almost cheat ourselves into the belief, when we see the holly, the ivy, and the mistletoe in the old familiar places, that we are at home. We cannot leave the subject without mention of the Christmas decorations of the church, and for the benefit of readers at a distance we will briefly describe them. The building is in the style known to architects as "Carpenter's Gothic," and the bare interior is hideously ugly. Fortunately, the chaplain of the settlement, the Rev. M. B. Bailey, has a pretty taste for architecture, and, with simple and rapidly constructed lines of holly, laurel, box and fir leaves, so contrived to change completely the appearance of his church; here indicating arches which should exist in more permanent material—there concealing with the same means some dreadful ornamental excrescence which never should exist at all—that the whole appearance of the interior has been changed, and a very small exercise of fancy carries back the spectator to some grey old country church at home of the time of Richard II. Japan is singularly rich in evergreens, and its climate, comparatively mild, allows also the introduction into floral decoration of many plants which are rare exotics in England. Thus, while the pillars of Christ Church, Yokohama, are wreathed with our old home friends—the holly, the ivy, and the fir—the plant that carries the passion flower furnishes a beautiful ornament for the pulpit, the bright berries of the *Aucuba Japonica*, and the deep crimson of the camellia relieved against its dark glistening leaves, and the variously coloured chrysanthema fill the font, and the feathery bamboo lightly ornaments the roof. Appropriate texts, in ancient character, red and gold, fill the intervals between the arches, and the memorial tablets are crowned with their yellow wreaths of *immortelles*. A cross, formed of the words "Mercy, Truth, Righteousness and Peace," framed in foliage, relieved by white flowers, hangs over the altar, while the bare west wall is draped most appropriately with the national flags, reminding us that Yokohama is a garrison town and naval station, and the residence of one of Her Majesty's representatives. The Rev. J. C. Parkyn, chaplain of H.M.S. *Pelorus*, assisted Mr. Bailey and his family in dressing the church, and very much of the beautiful effect is due, we are told, not only to his suggestions, but also to his active hands.

CHINA.

HANKOW.

The correspondent of the *Friend of China* writes under date 31st December:—

During the past fortnight trade has been very inactive.

Digitized by Google

Owing to the cash payment system being fully in force, the traders are not yet able to operate for want of the needful. In exports little has been done. On foreign account there have been some heavy shipments of oil. Hemp and Safflower are exported by Chinese principally for coast ports.

The Commercial Bank Corporation has been defrauded by their compradore; rumour has it to the extent of 60,000 taels. The compradore of one Mr. Weiss, an Austrian, has bolted, too, with the proceeds of some 50 piculs of Malacca tin. No trace of him has yet been discovered. The Corporation's compradore has been lodged in the Taotai's yamun.

Our newly-appointed Consular Chaplain has arrived, and commenced his services. On Sunday and Monday he preached appropriate sermons *extempore*.

We had snow on Christmas-day, and through the week rain, frost, and sleet alternately.

Messrs. Dent and Co.'s new steamer *Hirado* arrived on the 24th. She is much admired. Her internal fittings, superintended by Captain Bell, are excellent. Her courteous commander, Captain MacQueen; politely showed visitors all over the vessel. The water is very low. The Chinese say large steamers will not be able to get up when it is at its lowest.

CHIN-KIANG.

A correspondent of the *Recorder* states that a canal is being cut by the Chinese to connect Chin-kiang with Nanking. The canal is also intended for the shelter of native craft from the north winds when the proclamation ordering them to quit the north side shall be enforced; the water being far too deep to admit of their anchoring in tiers, as is generally their custom. The authorities seem to be going to work in real earnest, and have about 2,000 men almost constantly digging. The work, however, cannot be properly completed under two years, although it will be ready for use in about another month. The idea is to connect Nanking with Chin-kiang, which can easily be done by opening out the canal which already exists between these two places. From all accounts, Nanking has a fair prospect of again becoming a flourishing city. The authorities have issued an edict taking off all duties from silks, &c., woven there for five years. Already this has produced an effect, not less than 2,500 silk looms alone having been established there within the last six months. At Chin-kiang also there are said to be some six or seven hundred extra looms at work. The number of junks on the North Bank has also increased in a marvellous degree, even within the last two months they have gone from about six hundred up to nearly two thousand, extending all along the river bank for more than a mile in tiers of 18 to 23 deep. It is true they are principally salt junks, but the effect of their presence is shown by the increase of more than double the quantity of opium and other goods imported. Very few ports indeed have taken so much opium as Chin-kiang, 5,000 piculs within twelve months being a very large quantity.

With the sweets, however, of increasing prosperity in their port, the residents have to take some of the sour in the shape of a greater number of villains than heretofore. The presence of an unquiet element in the population was unmistakably shown by a very daring burglary committed on the premises known as Gentle's Bungalow on the British Concession. About 2 A.M. on the 12th inst. some twenty or more men surrounded the house (which is entirely detached), and having effected an entry by a back door, seized and gagged a "boy," and plundered him of his entire kit of clothes, to the amount of about $300, he being somewhat of an exquisite in his dress. His master, Mr. Geo. Potts (who is at present living in the house), was awoke by the noise of their first entry, and rushed into the "boy's" room to see what was wrong. He was met by eight or ten fellows, who ran at him, but who, on his regaining his bed-room, and taking up a rifle with a bayonet fixed, thought discretion the better part of valour, contenting themselves with throwing chairs, tables, sofas, and everything moveable against him when he tried to approach them. Neither party had any fire arms loaded, and by the above means Mr. Potts was kept employed till (as before stated) they had succeeded in plundering the "boy," which feat accomplished they beat a speedy retreat, having been in the house about twenty minutes, as near as could be judged. They took nothing but Chinese gear away, doubtless fearing recognition through some of the foreign articles, for a gun (fowling piece) and musical box were found dropped in a field close by, and nothing else has been missed. Fortunately, neither Mr. Potts nor any of his servants are hurt; but it is a thousand pities some of the scoundrels were not spoiled for any further misdeeds of a like nature. Mr. Potts had run short of cartridges for his pistol, and, probably for the only time during two years' residence here, it was not loaded and under his pillow.

SHANGHAI.

Some months ago Li Futai memorialised the throne setting forth the miseries which had befallen the junk men, who had, until the arrival of foreign ships and steamers, enjoyed the monopoly of the northern trade. He represented in moving terms the wrongs inflicted on thousands of natives by the diversion of the trade into foreign bottoms, and recommended that the Peking Cabinet should devise some means whereby the position of the junk owners and others interested might be ameliorated. The Tsung-li-yamen, through the Board of War, has now issued a notification setting forth the arguments adduced by Li Futai, and calling upon the merchants to ship in native vessels, while the junk owners are recommended to "try their luck" and not be cast down by the present unpromising aspect of affairs. The notification is addressed to the native residents at the northern ports and Manchuria and to those who frequent those ports for purposes of trade.

An attempt has apparently been made to revive the Coolie Slave trade at Shanghai. It will be remembered (says the *North China Herald*) that some years ago a firm in Shanghai endeavoured to establish this trade, but the attempt led to serious riots, in one of which Mr. Lay, then Inspector General of Customs, was seriously wounded. About the same time the Chinese authorities, with the aid of a steamer chartered for the purpose, seized a coolie-laden vessel which was lying at Wusung. After this the coolie trade disappeared, but we now learn that for two months past there have been agents busily at work endeavouring to re-establish it, under the name of "Emigration." The French treaty sanctions voluntary emigration, but the speculation in which the persons to whom we allude are engaged partakes of none of the characteristics of emigration, properly so called. The French Concession is the centre of the operations which are being carried on. We are informed that the originators of the scheme have rented a large godown in that concession, and fitted it up as a baracoon. It is absurd to assert that such an establishment is intended as a depot for voluntary emigrants. Equally vain is it for the agents who are now carrying out their nefarious designs to assert that the coolies are not sold on arrival at Havanna. This may be literally true, but inasmuch as the contracts are sold to the highest bidder, it is evident that the ultimate effects on the victims must be the same as if each individual coolie were put up to sale as a piece of merchandise. The Chinese authorities have shut their eyes to the manifest tendency of this speculation. They are of course glad to get rid of so many starving unfortunates, for whom, during the miserable months of winter, they are supposed to supply food, but we do earnestly hope that so foul a blot as the establishment of a coolie trade under any name may not fall on the foreign communities at Shanghai.

HONG KONG.

The P. and O. Mail of Nov. 26, as intimated in our last, arrived on the 15th January, and that of Dec. 11, on the 26th. The dates of this mail (French) are now down to the 29th January, or three days beyond the usual date. The P. and O. Mail was to leave on the 1st Feb. There is no news of any importance from the northern ports.

The editorial and general management of the *China Mail*, &c., has been assumed by Mr. N. B. Dennys, who will continue the firm of A. Shortrede and Co. The *Daily Press* editorship and management has been resigned by Mr. Y. J. Murrow. His successor is, however, not well received by his contemporaries, as he is described as possessing the powers of abuse but not the ability of Mr. Murrow.

The Customs authorities at Canton despatched the steamer *Hai-ching* to Hainan to investigate the mutiny on board the *Pride of the Ganges*, bound to Demerara, and reported in our last issue. The steamer put back to Macao, having sprung a leak, but no doubt proceeded again.

The prize of $1,000 for the new City Hall design has been awarded to Mr. Hermitte, the gentleman who executed the design for the cathedral at Canton.

A notice in the *Government Gazette* announces that the notes of the *Commercial Bank Corporation of India and the East* are to be received as a legal tender at the Treasury.

The present mail brings more accounts of piracy on the coast. The first case is that of the Mecklenburg three-masted schooner *Albert Jurss*, Captain Stadtlander, now in harbour,

Digitized by Google

bound from Hong Kong to Chefoo with a few cases of Chinese cargo. While at anchor off Stone Cutter's Island on the 23rd January, at about 9.30 P.M., two boats, each containing about eight or nine men, boarded the vessel from both sides, attacked the man on watch, whom they severely wounded, and having locked the rest of the crew of the schooner in the deck-house where they lived, proceeded to rifle the vessel. Fortunately, however, the mate (who was in the after cabin) heard the noise, and having obtained a revolver, proceeded at once to the deck, the crew, consisting of ten Europeans all told, a Chinese cook and supercargo, having managed to escape from their confinement, via the hatchway, in the roof of their house. The mate fired one shot into the midst of the marauders, whereupon a panic seized them and they made the best of their way back into the boats, leaving in their flight a hat, sword scabbard, and the ramrod of a pistol. The captain was ashore at the time of the assault, but a boat having been despatched from the vessel, the police were quickly communicated with. With the exception of a revolver, a rifle, a fowling-piece, and apologies for two guns, the vessel was entirely without means of resisting an armed force of any pretensions whatever, and it is probably owing simply to the fact that the crew of the *Albert Jurss* were on the alert that no worse consequences ensued.

Another serious case is that of the American schooner *Alma*, which is thus described by Captain Eldredge :—"We sailed from Hong Kong at six o'clock on the morning of the 21st of January. At seven P.M., while off Pooty, we were attacked by three pirate junks, and owing to the wind being very light could not handle the vessel. We fired two guns into the junks, which told with good effect. When the first junk got foul of our stern we could hear the Chinamen groaning from the effects of our guns. We fired seven musket shots at his mast-head, and they threw five stinkpots on board the schooner. I then found myself all alone on the poop, and went to get the starboard boat clear, but could not, and lost her; I then went forward, and found the port boat under the bow, the chief officer and one man being in the boat, and the second officer and one man in the water. I then jumped into the boat. They fired several musket shots at us while we were getting away from the vessel, but did not hit us. We then pulled ashore at Tam Too, the boat being badly broken and half full of water. Two seamen were supposed to have been left on board. At 8 o'clock on the following morning we landed at Stanley but could not see the vessel from the land. We left the boat as we could not sell her there. Walked on to Hong Kong where we arrived at noon. On the 23rd at 6 o'clock found the vessel anchored at the lower part of the harbour in charge of a Chinese pilot. I then took charge of the vessel and found her in a very bad condition, decks badly burnt, and furniture cut to pieces or broken up. Everything of value such as nautical instruments, silverware, &c., &c., had been taken from the cabin. The mate is still very sick from exposure, and the two men that were supposed to have been left on board are still missing."

The French brig *Jeanne et Joseph*, which left Hong Kong on the morning of the 16th Jan. bound for Shanghai, was boarded by pirates on the following day, and everything of value plundered. One man was severely wounded, and two are missing, of the crew of the brig. A gunboat was at once despatched to look after the rascals, but we have at present no tidings of any result.

The following items of shipping news are interesting:—

The British steamer *Undine*, Captain G. D. Pitman, arrived on the 25th Jan., having left Foochow on the 21st, Amoy 22nd, and Swatow 23rd. On her passage down she had strong monsoon with thick weather accompanied by much rain. On the 21st inst. saw steamer *Aden* entering the Min, and on the night of the same day when off Pyramid Point the steamer *Feloong* bound up. The *Shoocy-Leen* arrived at Fuhchau on the 20th. The British ship *Adelina* with teas was towed from thence to sea on the 21st. H.B.M.'s gunboat *Grasshopper* arrived in Amoy from Meichen Sound, where she had been successful in capturing the Macao lorcha No. 7 a piratical craft which Lieut. Morant has long been looking after. It was attempted to tow her down to Amoy, but owing to the boisterous state of the weather it was found impossible, so after removing the crew, which consisted of 18 men, to the gunboat she was destroyed.

The barque *Peiho*, bound from Hong Kong to Melbourne and Sydney, ran upon a reef near Belliton Island on the afternoon of the 11th Dec. last. She was much damaged, having lost her rudder and sustained other injuries in her stern-post and keel. It is feared that she will be unable to proceed on her voyage, no mechanical appliances for repairing her being at hand. Every assistance was rendered by the Dutch authorities. It is probable that another vessel will be chartered at Batavia to take on her passengers and cargo.

The British ship *Fiery Cross* arrived on the 27th Jan., having left the docks on the 12th October; parted from the tug-steamer at the Nore the day following; on the 14th at midnight took her departure from the Isle of Wight. On the 17th, strong south-westerly gales commenced, which continued until the 23rd, when the wind veered to the N.E trades until reaching the Equator, which she passed on the 12th November in long. 24 W. On the 5th, when in lat. 8 N., long. 21 W., passed the British ship *Serica*, from London bound to Shanghai, and experienced moderate S.E. trades; passed the meridian of the Cape of Good Hope on the 3rd Dec. in lat. 43; came through the Straits of Allas on the 4th Jan., Gillolo Passage the 14th, and the Bashee Channel on the 25th. Across the China sea encountered equally unsettled weather, with much fog.

Robberies and attempts at murder continue to be of frequent occurrence, and the colony seems to be infested by an organised gang of ruffians whose violence renders it unsafe for the residents to leave their houses at night without being well armed. On the night of the 25th January a murderous attack was made on two police-sergeants by an armed gang of Chinese scoundrels in the neighbourhood of Shek-dong-dsui, a notorious village situated just beyond the West Point Gas Works, on the road to Pok-fu-lum. The sergeants defended themselves well and wounded two of the miscreants; and the traces of blood enabled them to pursue and eventually capture one of them. The *Evening Mail* says, "It is but a day or two since that we called attention in our columns to the inefficient state of the police force as at present constituted. We do not mean to imply that any inefficiency was manifested on this occasion by the individuals attacked. On the contrary they defended themselves gallantly against odds, and put their assailants to flight. But the conclusion naturally forced on our minds by this attack is that there is an organised band of ruffians in this part of the island whose existence is a disgrace to the force, paid, as is supposed, to keep our roads free from dangers of this description.

The gang of burglars who some time since discovered an ingenious method of entering houses by way of the drains, have lately renewed their operations at several points, but so far without success, having been frustrated in every case. The first and principal point of attack was the Central Bank of Western India, where they nearly succeeded in effecting an entrance. Residents have now to depend almost entirely on their own weapons and personal vigilance for safety.

In a leading article in the *Daily Press*, on the mortality of the 11th Regiment, we find the following paragraph regarding the absence of officers in Japan. It tends to show that the decision of the Home Government on the Exchange question, reported in another part our paper, has not come a moment too soon :—"We do not wish to shield officers who, though appointed to do certain duty in Hong Kong, find it pleasanter,—in various ways,—to pass their summers in Japan. Perhaps the light that may now be thrown on the recommendations which Yokohama possesses as a residence for naval and military men may arouse feeling on the subject, and do something to check the continuance of a system which we have reprobated before now in the strongest terms. Officers of high principle, who may wish very naturally to spend some part of their time while in this part of the world in a country with a climate so attractive as that of Yokohama, ought to be the most eager denouncers of a system which must, while it lasts, tend to throw unkind suspicion on their motives for going north. We foresee coming trouble in connection with this matter, for a spirit of inquiry has been excited, and though it has been put upon the wrong scent, so far as the losses in the garrison are concerned, the route it has taken will lead to singular discoveries." The *Daily Press* attributes the mortality in great measure to the want of proper barrack accommodation and the night duty falling on the European troops through the absence of Indian regiments; and in support of this view asserts that while the men of the 11th were dying off as if they had been stricken with a pestilence, at the gaol there were only two deaths during the whole summer, though the number of Europeans in confinement ranged from a hundred to a hundred and eighty.

An interesting case came under the consideration of the Supreme Court, arising out of the disturbed state of the United

Digitized by Google

States Currency. In this case (Torrey *v.* Logan) the defendant, who is an engineer and machinist, had ordered certain goods to be purchased in the United States by the plaintiff, acting as his agent; and the question at issue was, whether the plaintiff was entitled to payment here in Mexican silver dollars for the amount of the invoice, which was made out in United States currency dollars, or whether he was entitled to the equivalent of the American currency dollars according to the price of gold in New York at the time, viz., two hundred and sixty dollars being equal to one hundred dollars in gold. The case had been already tried before Mr. J. C. Whyte and a special jury in September last, and a verdict given for the plaintiff. Application was now made before Judge Ball for a new trial, on the ground that the verdict was contrary to the evidence. His Lordship granted a new trial.

The *Daily Press* has the following on the police :—

We understand that the Chinese residents in Hong Kong, who intend, as we have already announced, to present a petition to the local government for permission to organise a force of native special constables, held a meeting yesterday and arranged their programme of operations. We are informed that it was decided to present the petition to-day in duplicate, one copy to the Colonial Secretary, the Hon. W. Alexander, and the other to the Registrar-General. The substance of the petition is this. The Chinese residents represent that rumours have reached them to the effect that the roughs of Canton intend to celebrate the approach of the new year by making a descent upon Hong Kong, with the object, as we have already stated, of committing extensive robberies under cover of a conflagration. Rumours to the same effect have indeed been heard in various directions, but the Chinese appear induced to attribute greater importance to them than they are believed by Europeans to possess. One cannot but suppose that the Chinese are most likely to be well informed, and in this case they give evidence of their readiness to "back their opinion" at some personal cost, as their wish is to raise a corps of Chinese watchmen in aid of the ordinary police of the town, and in view of the period of danger supposed to be approaching. We believe that on former occasions some offers of the kind have been put forward, but the proposals hitherto made have always pointed to the establishment of a force which should be entirely under Chinese direction and beyond Government control. No arguments are needed to justify a peremptory refusal on the part of the Government to listen to projects of this nature. Now, however, the Chinese have awakened to the necessity of leaving the control of all organised forces to the Government, and we are informed that their plan is to raise a body of native special constables to be attached to the police force, and to act under the orders of the English authorities. It is on the assumption that this is the plan proposed, that we would express the warmest approval of the design. It is a manifestation of patriotic spirit which ought to be encouraged, even if the fears which have given it birth should turn out to have been chimerical, and in the event of any such movement as that which is threatened, it would add very greatly to the security of the town.

The following notices have appeared :—

We have authorised Mr. August Bauermeister to sign our firm per procuration.—Oxford and Co., Hong Kong, 1st January, 1866.

During the temporary absence of Baron do Cercal and his son from China, Mr. F. A. da Cruz is authorised to sign the name of our firm per procuration.—A. A. de Mello and Co., Macao, 1st December, 1865.

Mr. David Welsh has this day been admitted a partner in our firm. —R. McGregor and Co., Hong Kong, 1st January, 1866.

The interest and responsibility of the late Mr. Robert Freeman in our firm ceased on the 11th October, 1865, and Mr. Frederick Pedder has been this day admitted a partner.—H. D. Brown and Co., Amoy, 1st January, 1866.

Mr. H. Guapp has this day been admitted a partner in our firm.—C. J. Gaupp and Co., Hong Kong, 1st January, 1866.

We have this day admitted Messrs. William Wilson, John Smith and John F. Rose, as partners in our firm.—McEwen and Co., Hong Kong, 2nd January, 1866.

COCHIN-CHINA.

THE French Government is taking active measures to turn to good account the resources of its new dependence in the East. The timber of the forests of Cochin-China and Cambojia is expected to prove one of the most valuable products of those countries; a ship, the *Saint Vincent de Paul*, arrived at Toulon a few days since with a cargo consisting of all the various kinds of wood likely to be of importance for building purposes, railway sleepers, and other uses. The supply is said to be inexhaustible; and if the quality should prove good enough to pay for the long voyage France will have opened up a source of great value.

A few weeks since a letter was received at the Ministry of Marine from the Governor of the Imperial settlement, asking for a powerful steam roller to be used in the making of new roads there; rollers of this kind are now used for all the principal new ways in and near Paris, and they present the great advantage of crushing and consolidating the broken stone at once, and thus enabling the roads to be opened for traffic in a much shorter space of time than was possible under the old system, and should be adopted in every large town; but the principal reason, or at least one of the reasons, given in favour of a steam roller for Cochin-China is that one drawn by horses or bullocks would do little service, for the tigers would attack and devour the cattle, and the drivers would be fortunate if they escaped the fangs of these wild bandits of the forest. The tigers would certainly find a steam roller difficult game to tackle, and, besides, it is presumed that the noise made by the steam engine would cause the creatures to keep a respectful distance, or that, if they should push their inquiries imprudently, the probability is, as George Stephenson said before the committee of the House of Commons, concerning the danger of cows getting on the line, that it would be so much the worse for the tiger. There is another advantage also, namely, that the engineer and stoker, being placed in the middle of the steam-rolling machine, might easily be housed over, and have loop-holes through which they could, in case of extreme necessity, dispense a few effective steel pills. The noise of these rollers, as well as of the steam omnibuses which have been tried lately at Nantes and in Paris, is so great that horses are terrified out of their wits by it, and the use of both amid general traffic is almost entirely given up. If the tiger's nerves prove very strong, the puff and whistle might easily be elevated to a shriek that would probably send the astonished marauders to their lairs with their tails between their legs.

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

GALTON—On the 18th January, at Foochow, the wife of W. P. Galton, of a daughter.

SYMINGTON—On the 28th Feb., at Woolwich, the wife of Captain Symington, of the ship Northfleet, of a son.

MARRIAGES.

BARNES—SMITH.—On the 17th January, at St. John's Cathedral, Hong Kong, Leonard Barnes to Sarah Ann Smith.

RAWLING—WITHERS.—On the 10th Feb., at Stoke Church, Devonport, by the Rev. J. W. St. Aubyn, rector, Samuel Bartlett Rawling, architect, &c., Hong Kong, to Sarah Bathe, second daughter of the late Robert Withers, Esq., of Bath.

DEATHS.

CAREY—On the morning of the 23rd January, at Shanghai, after 15 weeks of intense suffering, Marian, the beloved wife of H. W. Carey, of Hankow, in her 29th year.

GUNAWAY—On the 20th January, at the General Hospital, Hong Kong, George Gunaway, Corporal, R.E., aged 32 years.

KENT—On the 20th January, at the General Hospital, Hong Kong, John Kent, Sergeant, R.E., aged 32 years.

ROACH—On the 19th January, at the General Hospital, Hong Kong, John Roach, Private, 2nd Batt., 11th Regiment, aged 26 years.

RICHARDSON—On the 12th Jan., at Swatow, China, John Walter Richardson, youngest son of the late Thomas Richardson, Esq., W.S., Edinburgh.

TORREY—On the 30th Dec., at Manila, Rollins Torrey, Esq., of Boston, U.S.A., of the firm of Russell and Sturgis.

9th REGIMENT—At Hong Kong, M. Walsh, Private, 2nd Batt.; W. Rutherford, Private, 2nd Batt.; J. Powell, Private, 2nd Batt.

SHIPPING INTELLIGENCE.

ARRIVALS.

At HONG KONG.—From London, January 27, Fiery Cross, Sovereign of India, Dilpussund; from Liverpool, 17, Her Majesty; from Cardiff, 24, John Rennie; from Shields, 17, Lark.

DEPARTURES.

From HONG KONG.—For London, January 18, Agincourt; for Havre, 19, Taffarette; for Bordeaux, 19, Reconaissance.

COMMERCIAL POSTSCRIPT.

The applications for shares in the Imperial Land Company of Marseilles will close this day for London, and to-morrow for the country.

The dollars brought by the West India steamer have been sold, partly for shipment to the East and partly for refining, at 59¼d. per oz., establishing a decline of ⅛d. from the last price. Bar silver is very flat; 60⅛d. is the nominal price, but there is hardly anything doing.

ARRIVALS NOT INCLUDED IN THE TABLES.—March 2, at Brouwershaven, from Batavia, Æolus.

DEPARTURES.—March 2, from Shields for Singapore, Mirella; 4, for Hong Kong, Summer Cloud; 3, from Liverpool for Yokohama, Recife; 6, from London for Cardiff and Ceylon, Hoogley.

CASUALTIES.—The Lucy E. Ashby, from Shanghai for New York, was stranded on the reef in the Pernambuco roadstead, Feb. 12. About 1,300 packages of tea have been saved, but mostly in a damaged state.

SPOKEN.—Sentana (?), Falmouth to Hong Kong, 42 days out, Jan. 21, 19 S., lon. 32; Elizabeth Cushing, Newport to Galle, Jan. 28, 50 N., 7 W.; Benefactor, New York to Hong Kong, Feb. 7, lat. 37, lon. 58.

MISCELLANEOUS.—The Admiralty have invited tenders for the conveyance of 23 tons naval, 11 masts, and 50 small spars; 43 tons naval timber to Hong Kong, and also of 53 tons (principally combustibles) to Trincomalie, both from the River Thames.

DUTCH AGGRESSIONS IN SUMATRA.

(To the Editor of the *London and China Telegraph.*)

SIR,—"In matters of finance and business we have the highest opinion of the honour and integrity of the Dutch nation, and we hope they will not sully their fair fame in acting in this dishonourable manner towards a weak State in the Far East. The day may come when some strong enemy may try to crush them, and how can they expect leniency in Europe when they give none in Sumatra?" These are the concluding lines of an editorial on "Dutch aggressions in Sumatra," which appeared in your issue of 27th November last, and, whilst accepting your compliment as merited and meant, I shall attempt to show that you have hastily and without proof accused the Dutch nation of acting in a dishonourable manner. I wish, as much as possible, to deal with facts, as these, once established, render deductions easy and discussions unnecessary.

In the first place, there is but one independent State in Sumatra, and that is Acheen; no neighbouring State or province of the island is a dependency of that kingdom. This is proved by the book written by Mr. Anderson, who was charged by the Governor of Penang to make treaties with the various chiefs of Sumatra in 1823. It was then acknowledged that all the States on the East Coast, from Siak to Temiang, were dependencies of the former; and, consequently, Mr. Anderson requested and obtained permission from the Sultan of Siak to make treaties with the various chiefs. According to this, it is evident that these provinces were at that period, at any rate, dependencies of Siak. I will now proceed to show the claim Holland has upon the latter State.

In 1745 the Sultan of Johore, who was also Sovereign of Siak, ceded this country to the Dutch East India Company. In 1759 a conspiracy was formed against the Europeans; the fort at Siak was taken by treason, and the whole garrison murdered. In 1761 the country was re-conquered by force of arms, and subsequently Rajah Alam was placed as Sovereign on the throne, the succession to which was assured to his heirs on certain conditions, the principal of which was the acknowledgment of Dutch supremacy. All the succeeding Sultans of Siak have, without a single exception, recognised the Dutch authority, and the Dutch have never abandoned their right to the country. In 1856, in consequence of a serious quarrel between the Sultan of Siak and his elder brother, the former sought assistance from Singapore, and engaged the services of a Mr. Wilson, who armed boats and enlisted men at that port to carry on the war, and who afterwards sought to impose such onerous conditions upon the Sultan that the latter begged the Dutch to interfere. The consequence was that Mr. Wilson retired from Siak, and an assistant resident was stationed there at the express desire of the Sultan, the chiefs, and the people. It was then, however, high time that the prerogatives of the ancient kingdom should be asserted, or similar acts of filibustering (for the Wilson expedition was nothing better) might at any time disturb the peace of the coast, and, therefore, the Dutch gradually, but without the use of coercion, or firing a single shot, extended their influence along the coast, which they had a perfect right to do under the provisions of the treaty of 1824, and the understanding expressed in the supplementary correspondence.

The "dereliction of duty" of the then Governor of the Straits Settlement (1856) is easily accounteds for. He knew that the Dutch possessed rights to Siak, and he also knew that he was not justified, by the Foreign Enlistment Act, to allow an armed force to be recruited and equipped in Singapore for the purpose of invading a country where the Dutch supremacy was recognised, without the knowledge and consent of the Government, either of Holland or of Java. I now come to the assumed rights of Acheen over Delhi, Assahan, &c. Taking advantage of the distracted and weak condition of the Government of Siak, the Acheenese invaded Delhi and some other small States along the coast, among which was Assahan. But all of them threw off all allegiance to Acheen, and Assahan was reconquered by Siak fifteen years ago; it never acknowledged the Acheen flag as its own, neither did the Rajah of Assahan make use of any title which would prove him a dependant of Acheen. How you can reconcile the two statement which appear within five lines of each other in your leader I do not pretend to understand. You first of all call Assahan "a dependency of the ancient kingdom of Acheen," and immediately afterwards speak of "that independence provided (for the Rajah of Assahan) by the convention of 1824." Now, there is not the slightest mention of Assahan in the treaty of that year, nor in the supplementary correspondence, and the mention that is made of Acheen does not authorise the plea that the independence, spoken of in the Dutch note ("de manière que cet état—Acheen—sans rien perdre de son indépendance," &c.) applied to countries which were not under its control, and belonged to another Power. I am aware that some people in the Straits Settlements have been in the custom of pointing their fingers triumphantly at the 9th article of the treaty of 1824, and of asserting that the Dutch have no right to form any other set-

Digitized by Google

tlements on the island of Sumatra besides those then ceded by the British; but such shallow pretentions only prove them ignorant of the first principles of international law, and blind to all principles of justice and "fair play," a word of which the English are especially fond.

Having, I trust, proved that the political position of the Penang petitioners and of your article is not tenable, I will proceed to the commercial, and hope to demonstrate that "the odious system of double duties on all imports and exports" does not exist at Siak, nor anywhere else along the east coast of Sumatra, and that "the mild sway of an enlightened native prince, who, though not recognising the principle of free trade, yet levied a tariff of duties of a more liberal character than any which the Dutch have in their own ports," exists, alas! only in the lively imaginations of your informants, whoever they may be. In the first place, the Dutch did not supersede the Sultan of Siak in 1859. He was allowed to carry on the government of his own country; the duties which are levied there are levied by the Sultan under a tariff, which is as limited as it is liberal, and a copy of which I enclose. The Dutch have never levied a cent of duties on imports and exports at Siak. I now turn to Assahan, under "the mild prince." His tariff of duties (the right of levying which is farmed out to a Chinaman) comprises nearly everything, but there is one article of trade from his port which must enlist the sympathy of all Europeans. Not less than ten thousand slaves were annually exported from Assahan to the native States of the Malay Peninsula, and to the British possessions—Penang, Malacca and Singapore. This is a fact which can be proved, and not contradicted, and it is a slur on the Government of the Straits Settlements not to have discovered and put a stop to a trade which civilisation has, long since, stamped with ignominy.

Finally, what is the value of the trade between Sumatra and the British settlements since the aggressions of the Dutch? Has it increased or diminished? This is, after all, the test upon which the accusations must stand or fall. I extract the accompanying table from the *Straits Times* of the December, and if this does not prove the utter fallacy of the arguments of the Penang memorialists, I am at a loss to know what evidence to adduce. A trade which shows such results—an increase of 15 per cent. in imports and 36 per cent. in exports in four years—cannot be fostered by "monopolies and double duties," and it would be well for the Penang merchants if, before they make such sweeping and unfounded assertions, they would study the lists of imports and exports. You will, I hope, now acknowledge that you have been misled, and that you wrote your attack upon the "dishonourable conduct of the Dutch" under a false impression. I leave it to your sense of fair play to give insertion to this letter, which I would willingly have reduced to more moderate proportions had the importance of the subject discussed enabled me to do so.—I am, Sir, your obedient servant, J. C.

Singapore, Jan. 30, 1866.

NOTE.—The above letter will be noticed in our next issue, 16th, and in the meantime we shall be glad to have the opinions of persons resident in this country on the subject.

H.M.S. *Adventure*, with Admiral King on board, arrived at Hong Kong from Yokohama on the 15th January, having called at some other ports *en route*. We are glad to find that, unlike his predecessor, Admiral King seems able to resist the Ichibou temptations offered by a lengthened sojourn in Japan, and recognises the necessity of visiting the various portions of his station.

Parliamentary Intelligence.

HOUSE OF COMMONS.

THE EXCHANGE QUESTION IN JAPAN.

(Feb. 27th.) Lord STANLEY asked the Chancellor of the Exchequer whether his attention had been called to statements made in the *London and China Telegraph* of the 5th Feb., in reference to the exchange question in Japan; and asked him to produce a copy of the report made by Mr. Arbuthnot, of the Treasury, on the operation of the present system of appropriating the profits arising out of the exchange; and whether any sums had been carried to the credit of the public accounts out of the profit arising from the difference between the current value of the Japanese ichibou and the rate at which it was supplied to the naval, military, and civil services.—The CHANCELLOR of the EXCHEQUER said a literal answer to the noble lord's question was very easily given. His attention had been been called to the statements in the *London and China Telegraph*. There was no objection whatever to produce the reports of Mr. Arbuthnot, and in point of fact it was on those reports that he advised the House to rely for the purpose of obtaining a knowledge of this intricate but interesting question; and he had to state that no sums had been carried to the credit of the public accounts out of the profit arising from the difference between the current value of the Japanese ichibou, and the rate at which it was supplied to the naval, military, and civil services. But he thought he ought to add some words of explanation, because the answer he had given would be no answer at all except to the noble lord and those who had given attention to the subject. By the treaty with Japan there was a stipulation that all foreign coin should pass in that country at its corresponding weight in Japanese coin of the same description. Either from the orders of the Japanese Government, or the prejudice of the people, it was found that the dollars in which our officers were paid did not obtain currency in Japan. They were totally unavailable as an instrument of ordinary exchange for the purposes of subsistence. On the discovery of that fact there was a communication with the Japanese Government, and an arrangement was made by the Japanese Government to the effect that the dollar should stand at a certain fixed value to the ichibou. The effect of that exchange was of very considerable value to the services, because the fixed value was higher than the current rate of exchange. The principle of the exchange was that it should be at a rate that would cover the cost of coining, and be equivalent to the weight of metal, that principle being entirely conformable to the article in the treaty When this great advantage came to the knowledge of the Government at home, the matter was examined by Mr. Arbuthnot, of the Treasury, who, besides his other excellences, was a perfect master of every question connected with the currency. He investigated the matter to the bottom, and in consequence the Treasury made a communication to the Foreign-office, and the general effect of that communication was, that the practice ought to be abandoned. A good deal of correspondence, however, took place on the subject, especially between Mr. Arbuthnot and Sir Rutherford Alcock, before a conclusion was definitively arrived at, but when the Treasury had arrived at a definitive conclusion, the Foreign-office gave effect to it. When that had been done it appeared that the Japanese Government decidedly objected to the arrangement. They represented the matter strongly to Sir Rutherford Alcock, and he on his own responsibility altered the arrangement, so strongly was he impressed with the policy of adhering to it. It became, however, in the course of time known at home, that in October, 1864, Sir Rutherford Alcock had reverted to the system of privileged exchange. After he had done so the matter was again taken in hand by the late Mr. Arbuthnot, who was about to make another report upon it at the time of his death. Amongst the merchants there were two parties, one in favour of the change and the other against it, the Japanese Government being decidedly of the same opinion as the latter. In reference to the statement that the French Government carried the profit to public account, he was not aware that such was the case, and with regard to the Prussian Minister having refused to participate in the exchange, he believed this arose through a quarrel between the Minister and the Japanese Government. At the present moment there seemed to be but two courses open, either to let matters remain as they were, or to let them continue and carry the gain made on the exchanges to the credit of the public account. There was, however, this difficulty—the scale of official salaries had in the first instance been fixed too low, and was now in consequence of the rise of prices found insufficient, and this lucrative system of exchange, which had had an accidental and irregular origin, had prevented a general demand for an increase of salaries. Mr. Arbuthnot thought that the proper course would be to establish a free mint in Japan; but the concurrence of the Japanese Government to such a step was not a thing that could be arranged in a day.

THE NAVY ESTIMATES AND THE FLEET IN CHINA.

(March 1.) Hon. H. G. LIDDELL said before this discussion closed he wished to address one or two remarks to the Government, and particularly to his noble friend, on a totally different subject. His noble friend in his opening speech informed the House that they would be surprised if they knew all the demands which were constantly made on the Admiralty for increased assistance in various parts of the world, and particularly in China and Japan. He heard that statement with great apprehension, and he took this opportunity of expressing an earnest hope that these demands would not be continued. (Hear, hear.) The Committee would be startled to know that our fleet in those parts had mounted up on the 6th of last month to no less than 46 vessels of war. (Hear, hear.) The Committee would see that the question which they were now considering was the question of national expenditure. Now he would simply ask was this gigantic fleet necessary in those seas, because we had treaties of peace and commerce with China and Japan,—very peaceable countries, and a considerable number of years had elapsed since those treaties were signed, and he presumed they contained the ordinary stipulations that security for life and property would be afforded to the nations trading with them. He should be told that the object of this large fleet was to put down piracy which was very rife in those seas. But were we to support this extraordinarily large force in order to relieve China and Japan from the necessity of maintaining the police of their own seas? (Hear, hear.) It was time for us to consider that we were taking upon ourselves a gigantic expense, and taxing the people of this country for doing that which the Chinese and Japanese Governments were bound to do. (Hear.) While a large fleet was being maintained on the coasts of China and Japan, in two other parts of the globe the interests of British subjects were imperilled by the want of men-of-war. The first of those cases was that of the Chilian blockade, where, although the Spanish fleet left Callao on the 17th of September avowedly to blockade Valparaiso, Commodore Hardy, who was in command of the English squadron at Callao, sent none of his vessels to watch over the rights of British subjects. The second case occurred during the recent outbreak in Jamaica, where Governor Eyre was, on the 20th of October, obliged to charter a French steamer to carry troops to Port Morant. Valparaiso was a central naval station, as was also Jamaica, and he thought that some of the vessels now employed in guarding Japanese and Chinese commerce could with great advantage be stationed at either of those places. (Hear, hear.)—Mr. SEELEY (Lincoln) complained of the manner in which the Admiralty accounts were presented. It was very desirable that all the dockyard accounts should be presented in a manner enabling the reader to at once perceive what the expenses at each yard were. The accounts of the various dockyards were, it was true, contained in the Estimates, but there was no one account by perusing which members could understand what proportion the expense of building a ship at one dockyard bore to the expense of building one at another. There should be such an account by which the difference of expense between building ships at public and private dockyards could also be shown. (Hear, hear.) There was another question on which he wished to offer a few remarks. Certain statements with reference to the Admiralty accounts which he had made during last year had been contradicted in a pamphlet issued in June last by the authority of the Lords of the Admiralty. It would occupy the House too long if he entered into any statement on the subject, but he asked the noble lord (Lord C. Paget) to allow the persons who drew up the Admiralty report to confer with his (Mr. Seeley's) secretary, who had drawn up the statement which he had made. If they could not come to an agreement on the points in dispute, the question could then be referred to a professional accountant named by any gentleman on the Treasury Bench. He also asked the noble lord if he continued to buy the same species of anchors as he did last year.—Colonel SYKES (Aberdeen) fully agreed with the hon. member for Northumberland (Mr. Liddell) in the remarks which he had made with reference to the large squadron maintained on the coasts of China and Japan. The fleet on the Chinese and Ja-

Digitized by Google

panese coasts consisted of 47 vessels, 44 of which were armed steamers. He believed that no hon. gentleman present understood what the meaning was of keeping up such an immense naval establishment in that part of the world. The Chinese Government was not hostile—at least not openly hostile—to England; and as to Japan, on a recent occasion three English ships of war, assisted by two or three foreign vessels, succeeded in enforcing the execution of a treaty signed by the Emperor of that country. The coast of China was about 2,000 miles in extent, and was throughout its whole extent infested by pirates. English ships of war could not pursue the pirates' junks into the shallow creeks, and they were therefore almost entirely useless in checking piracy. Besides, it should be remembered that these pirates principally confined themselves to attacking vessels belonging to their own countrymen, and rarely molested an English ship. Some time since an English man-of-war did succeed in capturing a pirate vessel, and brought the crew into Amoy, when the captain delivered them over to the Chinese mandarins. Some of the crew managed to obtain money to bribe the authorities, and the result was that while the rest of the crew were put to death the four men who had bribed the mandarins escaped all punishment. It would appear from this that the effect of keeping up an English fleet on the Chinese coast was only to put money into the pockets of the mandarins. (Hear).

TELEGRAPH AND POSTAL SERVICE TO INDIA.

(Feb. 27th.) Mr. CRAWFORD moved for a Select Committee to inquire into the practical working of the present system of telegraphic and postal communications between this country and the East Indies. After some preliminary remarks on the growth of our commerce with the East Indies, and the consequent importance of rapid communication, to show the defects of the present telegraphic communication, he told some amusing stories of the blunders which had been made in the transmission of messages, some of which were very costly in their consequences to the senders or receivers. He described the routes by which the messages were sent, and ascribed the delays and blunders to that portion of the line which lies between the western frontier of Turkey and Bagdad, surmising that Russian and French jealousies prevented remedies being applied when complaints were made. He sketched out a new route of telegraphic communication by way of the Mediterranean and Egypt, which he believed would be speedier and more reliable, and which, at least, would give the commercial community the advantage of a second route. Passing on to the postal communication, of the defects of which also he gave a minute description, he pointed out that it rested on a contract with the Peninsular and Oriental Company made some 13 years ago, and though that company had, generally speaking, performed its service well, many of its vessels were not quite up to the speed which recent improvements had led us to expect; and, moreover, it had practically speaking, a monopoly of communication in this part of the world. He recommended that when the proper time came the services to Bombay, Calcutta, China, and Australia should be separated, and separate senders invited for each, so that the commercial community might have the advantage of the work being done on the most economical basis.—Mr. HORSFALL seconded the motion, though he inclined to think that the inclusion of the postal system made the inquiry too wide in its scope. He recommended the employment of English signallers, and pointed out the political advantages of an improved telegraphic communication.—Sir C. BRIGHT expressed his disappointment at the comparatively small advantages reaped by the commercial community from a line which had cost so much money and pains to lay. He attributed the failure, not to the Turkish Government, which he believed to be honestly desirous to carry out the convention, but to the local authorities, and criticised the construction and working of the Indian line from Kurrachee to Bombay.—After a few remarks from Mr. MOFFATT in vindication of the enterprise of the Peninsular and Oriental Company, Mr. CHILDERS admitted the importance of the question, but, when fault was found with foreign Governments in whose hands the lines were, they ought to recollect that the working of telegraph lines had not arrived at the same point of perfection in those countries that it had attained in England. However, if Mr. Allan's system proved successful, the shortest route to India would be *via* Brindisi. The French Government had established a well-worked system of postal communication between Marseilles and India. It was desirable to inquire how far this service could be made available, and generally how far the whole service at present in operation could be conducted with greater economy, efficiency, and rapidity. For these reasons the Government had no objection to the motion.—The CHANCELLOR of the EXCHEQUER deprecated any attempt on the part of members of the House to use their position in promoting interests or schemes with which they might be connected, but which were really commercial undertakings, and ought to stand or fall upon their own merits.—The motion was then agreed to.

THE MORTALITY OF TROOPS IN HONG KONG.

Gen. PEEL said there is a small reduction on the consolidated allowances which is accounted for by the withdrawal of a regiment from China. I am afraid that there are very few more of that regiment to withdraw. I am afraid that in consequence of the state of the entire regiment, from a total neglect of all the warnings of medical men, this saving will be effected. As I know my hon. and gallant friend the member for Oxfordshire (Colonel North) has taken this question up, and that it will be fully investigated, I will not try to fix blame upon any one; but nothing that took place during the Crimean war, nor anything that took place on the coast of Africa exceeded the neglect exhibited in this case.—Sir. J. FERGUSSON suggested that to the circumstance of the number of the native Indian troops being limited to 178 was owing in great measure the lamentable mortality which had taken place at Hong Kong. Previous to last year one battalion in Hong Kong was exchanged, and it was generally believed that it had been removed in order to save the expense caused by the maintenance of troops placed side by side with the battalion in the Indian establishment. (Hear, hear.) He believed that on every ground of justice it might be maintained that British troops quartered in Hong Kong should be kept on the Indian establishment. The vicissitudes of the climate of Hong Kong and the inroads which it made on the European constitution being taken into account, it was, he thought, but just and right that Indian pay and allowances should be provided for the troops quartered there, as well as for those stationed in India itself. It was, in his opinion, a disgrace to this country and to that House in which such subjects were discussed, not to protest against a paltry saving by which so great an amount of suffering was inflicted upon troops who never shrunk from their duty, accompanied by a mortality unprecedented except in such campaigns as that in the Crimea. (Hear, hear.) When we heard of British battalions which were a few months ago in the highest state of efficiency and numbering 800 or 900 men being reduced to little more than 100 effective soldiers it could scarcely be denied that there was a degree of disgrace attaching to such a state of things which ought not to be passed slightly over. (Hear, hear.) As to the precise person upon whom blame rested in the matter it would be well, of course, to await the production of papers before discussing that point; but the vote under consideration presented, he thought, a fitting opportunity for asking the noble marquis whether the native troops were withdrawn from Hong Kong in order to reduce the pay and allowances of the officers at the station from the Indian to the ordinary rate of pay, and whether it was proposed to send back the native forces to perform the duties previously discharged by that description of troops. (Hear, hear.)—Colonel NORTH hoped that notwithstanding the appeal of the hon. and gallant general, a debate would not ensue on the subject to which his questions related. (Hear, hear.) It was much too serious a matter to be dealt with in the shape of mere question and answer. (Hear.) He had given notice of a motion on the subject, and as the papers with respect to it would be in the hands of members to-morrow, it was desirable that no further remarks should be made upon it until it was brought regularly with full information before the House. (Hear, hear).—Colonel P. HERBERT concurred in that view, and moved that the Chairman report progress.—The Marquis of HARTINGTON expressed a hope that the hon. and gallant gentleman would not press his amendment, but would allow the votes for the men to be taken. As it was the intention of the hon. and gallant member for Oxfordshire to call attention to the unhappy mortality among the troops stationed at Hong Kong, it was, he thought, desirable that nothing further should be said on the subject that evening.—Sir W. JOLLIFFE thought the case was one of so awful a character that the vote ought to be postponed in order that the discussion might be taken upon it.—Mr. O'REILLY did not see why that discussion should be raised on the present vote more than upon any other vote. He trusted, however, that the noble marquis would not proceed with the vote for pay and allowances that evening, as it involved numerous matters of detail.—Colonel NORTH said he had no hesitation in stating that he should hereafter move for a committee of inquiry into the recent mortality at Hong Kong. He thought it one of the most deplorable cases that had occurred since the Crimean war. Great blame attached to some quarter, and in the interests of the army the matter ought to be thoroughly and minutely sifted. (Hear, hear.)

EXHIBITION OF ORIENTAL PICTURES.—Herr Hildebrandt, a well-known Prussian artist, has lately made an extensive sketching tour in the Far East, and the results of it, in the shape of nearly two hundred water-color drawings, are now being exhibited at the Gallery of the Institute of Painters in Water Colors, in Pall Mall. In the strange and distant worlds of China and Japan, Herr Hildebrandt has travelled, and has given us transcripts of scenery and character which only the pencil of an artist can render. The visitor could not see life on the Thames by taking his stand on London Bridge, or on a pier at Blackwall, more vividly than he may see Canton life on the river as painted by this artist. Whampoa, on the River Canton, is bathed in sunlight, but no feature is obscured or painted away for effect. Peking, so lately a mystery to Europeans, is brought before us—the city itself, its main street, its Circular Street, its quaint house aspect, its out-door life, pagoda, river and ships—with a vividness which satisfies the utmost thirst of the curious. Herr Hildebrandt has exactly the pencil for an explorer of unknown places. He gives us, if we may so speak, the splendour of art without vagueness; he does not imagine pictures; he does not create effects for the walls of an exhibition; he depicts the very aspect of the reality. The visitor to his gallery sees again what he has seen if he has visited the places represented, or what he will see should business, or duty, or pleasure lead him to China and Japan. The bridge, the canal, which you cross to approach the Summer Palace of Peking, which lies over among the low trees, appear on the artist's cardboard in temperate reality, while in another picture the fair sails of the grand ships on the Foo-chow-Foo river float like apparitions on the clear water, while the sun sets with inexpressible loveliness and effects which no mechanical apparatus can render, and very few artists paint. Courts of Law, Temples of the Heavens, Joss Houses, Streets of the Pirates, streets, barges, sing-songs, inhabitants of every style of manner, age, pursuit, and physiological peculiarity, are represented with different degrees of finish, many being, no doubt, caught as it were on the wing, as the artist found them on bank and boat as he passed down the rivers. Japan is depicted with no less variety and interest, and, indeed, some of the best finished and most pleasing pictures in the whole collection are the views of Yedo, Yokohama, and Nagasaki, in which the peculiar characteristics of the scenery are portrayed with admirable fidelity.

PICTURE OF THE SIAMESE AMBASSADORS AT FONTAINEBLEAU.—At the last annual exhibition of paintings in Paris one of the most remarkable pictures was that by Gerome—just elected, by the way, a member of the French Academy of Fine Arts—representing the reception of the Ambassadors or the Kings of Siam by the Emperor and Empress. As regards the Embassy, the painter achieved a great success, in spite of the awkward attitudes and positions of the principal figures, who are on all fours, in a procession which reaches nearly all across the canvas. M. Gerome has caught the expressions of the countenances so happily, and has rendered the dresses so brilliantly, that the group is highly interesting; the face and figure of the boy, son of one of the Ambassadors, are admirable. The Siamese were delighted with the picture, and insisted on having a copy made and sent to Bangkok for the King. The artist has just completed a reduced copy for this purpose, and is said to have been very successful in plagiarising himself. It was a pity not to have done the thing imperially, and made the reproduction of the full size, for no amount of art can give the same bold effect in a diminished space, and boldness more than highly artistic finish would be of importance in the present case. We have no doubt that the representation of the curious and glittering ceremony will cause at least as much sensation at Bangkok as it did in Paris, but we trust that the painter will escape the White Elephant.

LONDON, WEDNESDAY, MARCH 7, 1866.

THE JAPANESE EXCHANGE QUESTION.

IN our Parliamentary intelligence it will be seen that Lord STANLEY has called attention to the statements made in the *London and China Telegraph* of Feb. 5 in reference to the Exchange scandal in Japan. To the uninitiated the reply given by the CHANCELLOR of the EXCHEQUER to Lord STANLEY's question on this subject will doubtless appear highly satisfactory. But although it may have been sufficient for the exigencies of the moment, we are by no means content to accept it as conclusive, and must in fact take exception to several portions of it. Mr. GLADSTONE'S attention *had* been called to the statements in the *London and China Telegraph*, and there was no objection whatever to the production of Mr. ARBUTHNOT'S report. No portion of the profits arising from the Ichibou exchange had as yet been carried to the public accounts, but the whole would be in future. So far, so good. It is at all events satisfactory that the system of appropriation which has developed such evil results as those exposed in our previous articles on the subject is to come to an end, but there are some strange inconsistencies in the "explanation" volunteered by Mr. GLADSTONE as to the origin and past working of the system, which should be pointed out. "It was found," says Mr. GLADSTONE, "that the dollars in which our officers "were paid, did not obtain currency in Japan." Now these dollars in which officers are paid, are the very same dollars as those imported by English and other merchants trading in Japan, both for mercantile and private purposes; and *are* current there, although certainly at a depreciation, the full weight of which is borne by the merchants. To neutralise or counterbalance the loss by this depreciation, both merchants and officials were originally permitted to exchange stipulated sums at the Treasury, at corresponding weights; why should this privilege have been continued as regards officials, when withdrawn from the merchants? Again, the CHANCELLOR of the EXCHEQUER states that "official salaries were in the first "instance fixed too low, and the profits of this exchange "prevented a general demand for an increase." Can we too strongly condemn a system which, while giving avowedly insufficient emoluments to members of our Legation and Consulates in Japan, permits them to eke out their scanty allowances by a perquisite from the Government to which they are accredited? Would it be creditable to the Foreign-office to cut down the pay of our Embassy, say for instance at Vienna, and seek to supply the deficiency by exchange operations?

It is candidly admitted that Mr. ARBUTHNOT denounced the system, and that it ought to have been discontinued; but we are told that Sir RUTHERFORD ALCOCK persisted in continuing it on his own responsibility, for the alleged reason that the Japanese Government strongly opposed any change. That the Government would be likely to insist on supplying their Ichibous to officials at the rate of three per dollar, when they were in eager demand in the money market at a little over two, it is very difficult to believe. One fact in support of this view is that at Nagasaki, where less pressure is exercised on the Government than at Yokohama, only half the usual sum has for some time been exchanged for English ships of war; the local treasury asserting its inability to provide native coin sufficient for the whole. Moreover, Sir RUTHERFORD was not, and could not be compelled by the Japanese Government to accept the exchange. The truth is that the representatives of other treaty Powers were only too ready not only to accept, but to extort any pecuniary advantages they could from the Japanese; and Sir RUTHERFORD, although he could not avoid seeing the iniquity of the system, had not the moral courage to act independently of his colleagues, and strike single-handed at the root of the evil. The French availed themselves of its advantages to the fullest extent, although the profits accruing to the Legation were not shared by its members, but expended on public works. As regards the Americans, the statement of our correspondent "ICHIBOU" that they have exceeded all others in rapacious greed, can, we believe, be amply substantiated. The Russians made no scruple of threatening the native authorities with violent measures if they were not promptly supplied with Ichibous to whatever extent they chose to demand. On one occasion when a Russian squadron entered Nagasaki, and made an enormous requisition for exchange, the authorities declined to comply on the ground that the demand was exorbitant, and they could not find sufficient coin to satisfy it. Whereupon the Russian Admiral sent a message to the Governor—Hartori Nagato-no Kami—a quiet, peace-loving noble, and a friend to foreign intercourse, to the effect that if "the Ichibous were not forthcoming within a given time, he "would send his marines on shore, to help to find them." The result of this persuasive eloquence need hardly be recorded. Such being the disposition of the representatives of other foreign Powers, we can readily understand that the Japanese, being thus compelled to accede to their insatiable demands, thought but little of granting the comparatively moderate requisitions of our own services; while our Minister, being accustomed in all negotiations regarding treaty rights to act in concert with his colleagues, found himself in a minority on this question, and was therefore reluctant to push it to an issue. The CHANCELLOR of the EXCHEQUER lays some stress on the fact of there being two parties among the merchants, one of which approves of the present system. Among *bona fide* merchants, who are entitled to represent the interests of legitimate trade, we will venture to affirm that it has not one single supporter. Mr. ARBUTHNOT'S scheme of a free Mint would, perhaps, if it could be carried out, prove a remedy for all the evils of the much-vexed currency question; but there are many obstacles to be overcome before it can be established. We repeat, however, that as the privilege was swept away from the mercantile community it should have been abolished in *toto*. The whole thing was vicious, and calculated to cause favouritism and dereliction of duty in both services, from admirals and generals downwards.

To recur once again to the subject of official salaries. Granting our diplomatic officers have been underpaid, and that the exchange profits have been an acceptable boon to them, what claim have the naval and military services for any such advantages? The officer on leave, who goes from Hong Kong to Japan either for his health or pleasure, finds himself in a far cheaper country, as well as a far more healthy one. Why should he be entitled to an emolument denied to his brother officers who remain in the expensive as well as sickly climate of Hong Kong? And on the same principle, what need have the admiral and other officers of a man-of-war of an increase in their pay while at anchor in a Japanese port, which is denied them in China? Although an amendment of the system is promised for the future, these questions regarding the past have yet to be answered; and we still seek an explanation of the circumstances under which the "Ichibou Fund" was organised, and the way in which the plunder—for we can call it little else—was shared. On this last point, and it is perhaps the most disgraceful one in the whole question, we have undoubtedly a right to ask for some explanation from the SECRETARY of STATE for War.

PARLIAMENTARY PAPERS ON JAPAN.

The correspondence relating to affairs in Japan promised in the Queen's Speech has now been published, and we proceed to give a resumé of it:—

By the convention of Simonoseki it was left an open question whether that port should be thrown open to foreign trade, or a money indemnity paid to the allied Powers by the Japanese Government. In Letter No. 1 of the present Blue-book, dated January, 1865, Earl Cowley states to Earl Russell that the French Government would prefer the pecuniary indemnity, as M. Drouyn de Lhuys considered the port as of little commercial value; but that the French Government would defer to the majority of the Powers interested. No. 2 is Earl Russell's reply announcing his intention of awaiting Sir Rutherford Alcock's arrival in England before

Digitized by Google

coming to a decision. No. 7, dated March 30, 1865, is from Earl Russell to Sir F. Bruce enquiring as to the opinion of the United States Government. No. 16 is from Mr. Winchester (received 16th June), conveying the decision of the Japanese Government, to the effect that they preferred paying a money indemnity to opening the port. Mr. Winchester alludes to the embarrassed condition of the Tycoon's treasury, and to the propensity of the Government to levy "squeezes" on trade. He expresses an opinion that the protracted payment of an indemnity seems very like hanging a mill-stone for five or six years round the neck of our own commerce, and suggests that the amount might be reduced, and an equivalent obtained in the form of a revision of the tariff or the opening of Hiogo. No. 31, dated 24th July, is Earl Russell's reply to Mr. Winchester, approving his suggestions, and stating that Her Majesty's Government were willing to remit any further payments of the indemnity, provided some substantial advantages were conceded, the principal ones being the opening of Hiogo and the Mikado's assent to the treaties. Every effort ought to be made, says Earl Russell, to induce the representatives of the parties to the Convention of October 1864, to concur with the British Government in preferring the extension of commerce contemplated in the original treaty of August 1858, to the exaction of the indemnity contemplated in the Convention. It is but just that the great Daimios should partake of the benefits of a commerce which is so beneficial to Japan and so profitable to the Tycoon. The next document of any importance bearing on this subject is letter No. 38, from Earl Russell to Sir Harry Parkes, dated 23rd August, 1865. In this letter Earl Russell alludes to the procrastination of the Japanese in paying the indemnity and to the sums expended by them in strengthening their fortifications, &c. Sir Harry Parkes is instructed that Her Majesty's Government would prefer a large and healthy extension of commerce, as stipulated by treaty, to the payment of money indemnities. But, if the Tycoon prefers the payments, those payments must be made at the times stipulated in the Convention. In no case can Her Majesty's Government allow that the Tycoon's Government should spend its resources in ships, cannon, and armaments, while the payments stipulated by the Convention are delayed upon frivolous and dishonest pretexts. No. 57 is from Sir Harry Parkes, dated 12th Sept., 1865, announcing payment of the first instalment of $500,000.

In letter No. 66, dated 30th October, 1865, Sir Harry Parkes announces that he has succeeded in obtaining the consent of the other foreign ministers to the proposal of Her Majesty's Government, namely that two-thirds of the said money should be remitted in return for the prompt opening of the port of Hiogo and city of Osaca, the ratification of the treaties by the Mikado, and the regularisation of the tariff on a basis of 5 per cent. The representatives of the four Powers agreed that as the Tycoon, with four of the five members of the Gorogio, was then at Osaca, it was expedient to proceed to that port to submit these proposals. The option of accepting them or continuing to pay the indemnity would, of course, be still reserved to the Tycoon; but in the event of the latter maintaining his preference for the indemnity, then its payment in quarterly instalments would be punctually exacted. The letter concludes with a description of the naval forces, which it was arranged should accompany the expedition, the day of departure being fixed for the 1st of November. In letter No. 70, dated 1st January, 1866, Lord Clarendon intimates to Sir Harry Parkes the entire approval by Her Majesty's Government of the proposed expedition to Osaca, and of his intentions regarding the indemnity. Nos. 72 and 74 are from Sir Harry Parkes, announcing the arrival of the expedition at Hiogo, and the progress of negotiations. And in No. 77, dated 25th November, Sir Harry Parkes announces the concession of two of the three points required, namely the ratification of the treaties and the revision of the tariff; while the third, namely, the immediate opening of Osaca was still postponed, the Government preferring to continue payment of the indemnity, which they promised to do punctually as regards the remaining instalments. Finally, in despatch No. 81, Lord Clarendon conveys to Sir Harry Parkes the unqualified approval of Her Majesty's Government regarding the entire operations.

With regard to the division or apportionment of the indemnity money among the four Powers, a long series of letters is published. The French Government in the first instance claimed 140,000 dols. as separate compensation for injuries sustained by French steamers being fired upon at Simonoseki; and it was admitted that America and Holland were each entitled to a similar sum, as compensation for the same injuries, thus making an aggregate sum of 420,000 dollars a first charge on the whole indemnity of 3,000,000 dols. which the Japanese Government had undertaken to pay, and payable, rateably, of course, out of the several instalments as they might be received from Japan. With regard to the mode in which the remaining sum of 2,580,000 dols. should be apportioned among the several Powers, there has been some difference of opinion. M. Drouyn de Lhuys suggested that the division should be made according to the proportion the forces of each Power in Japan bore to the aggregate force of the four. The United States' Minister, on the other hand, contended that as the general co-operation of all the four Powers must necessarily have had great and equal weight, if not in the actual operations, at all events in the measures which preceded them, and afterwards in turning the result to good account, it would be fair to look upon the several Powers as contributing in an equal degree to the success of the common cause, and therefore as entitled to share equally in the indemnity which the Japanese Government agreed to pay. By this latter arrangement England of course would be the only loser. Both France and Holland would, under the first-named arrangement, have received much smaller portions, while America, not being represented by a single ship of war, could hardly have claimed any share at all. Her Majesty's Government however concurred in the justice of an equal division, a measure justly characterised by the Ministers of the other Powers as a very liberal one.

CAPT. CROSSMAN, of the Royal Engineers, who proceeds by the next mail to China, goes out, we believe, at the request of the Foreign-office, to superintend the erection of buildings for the Government service in Shanghai and Japan.

Mr. SIDNEY LOCOCK proceeds by the next mail to Japan, as Secretary of Legation.

THE FINANCIAL AND COMMERCIAL POSITION OF THE STRAITS SETTLEMENTS.

The natural position of Singapore, together with the inherent resources of the Straits Settlements, assure for this very important *entrepot* an encouraging if not rapid development. With the augmentation of European commerce in the East, and of the foreign and native coasting trade between India and China and the whole Eastern archipelago, its trade must obtain proportionate development. The revenue for the official year 1864-65 exhibited indeed but a slight increase over that of the previous twelve months, having amounted to Rs. 1,485,385 against Rs. 1,484,282 in 1863-64; but looking to the sources of the revenue, a very considerable increase in the activity of trade is quite consistent with this state of the accounts. The greater proportion of the revenue is derived from excise, which yielded Rs. 850,982, and from stamps which contributed Rs. 188,766. The expenditure rose somewhat beyond that of the previous year, but the balance of accounts shows a surplus of Rs. 168,787. To that surplus the Straits Settlements light dues collected at Indian ports contribute Rs. 30,000. It speaks most favourably for the Government that the largest item in the expenditure should be that of works of internal improvement and public convenience, calculated as these are directly or indirectly to further the permanent interests of the Straits Settlements, the former, indeed, being of an essentially productive character. The Rs. 44,523 charged in the disbursements for the suppression of piracy is of the same character. The Rs. 120,387 disbursed for law and justice actually exceeds the salaries and expenses of all the civil public departments, amounting to Rs. 117,350. The military charge of Rs. 503,650, or a third of the entire revenue, is manifestly a most serious incubus on the advancement of Singapore, requiring, as it does, both for the increase of its land revenue and the development of its trade, the construction of public works on a more rapid scale than existing financial means allow. Yet the Home Government demands, in the event of the transfer of the Straits Settlements, a still heavier military contribution; a sum even beyond the £63,000 fixed by the Imperial Commissioners as sufficient, and which struck us at the time as an exorbitant sum to be paid annually by the Settlements, looking to the strategical value of the position to this country. This excessive claim threatens to defer the transfer of this important possession; the Home Government is unquestionably sensible of the importance of the acquisition, but appears oblivious of those weighty considerations which point to the advisability, on the ground of expediency as well as justice, of not pressing on the resources of the Settlements to such an extent as would exercise a repressive influence on the development of its trade.

The importance of Singapore, in a mercantile view, may be judged from the amount of shipping that entered and cleared in 1865. The arrivals were 1,697 vessels of 780,794 tons; the departures, 1,629 vessels of 576,527 tons. Of the vessels that entered, 860 of 467,635 tons were British; the clearances under our flag being 873 vessels of 208,585 tons. The Dutch, Hamburg, French, and Danish vessels follow in the order of priority, as to number and tonnage of vessels, in which we have placed their names. No less than 93 French vessels entered in 1865, and 82 departed. Only four Russian vessels entered within the year; seventeen showed the Prussian flag, which is in advance of that of the Portuguese. The Siamese vessels that entered were 48, of a tonnage of 16,699. The fact that upwards of one-half of the vessels that entered and upwards of one-half the tonnage is British; and, notwithstanding that Continental nations are pushing their trade in the Far East, we have no doubt that this proportion will continue to be maintained.

The following is a summary of the Revenue and Trade of the Straits Settlements in the official year of 1864-65:—

Receipts in the official year	Rs. 2,137,147
Add Straits light dues, collected at Indian ports	30,000
	Rs. 2,167,147
Total expenditure	2,160,392
Balance	Rs. 6,755
Value of imports	88,763,762
Value of exports	96,937,038
Balance in favour of exports	Rs. 8,173,276
Increase of imports over those of 1863-64 ..	3,558,209.
Increase of exports ditto ..	13,674,319
Arrivals in 1864-65 .. .. 2,651 vessels of	1,007,269 tons.
Clearances ditto .. .. 2,552 do.	790,406 do.
Increase in arrivals as compared with 1863-64 .. .. .. 344 do.	75,273 do.
Increase in departures ditto 184 do.	28,737 do.

PENANG.

The accounts of Penang for 1864-65 show an increase in the permanent sources of revenue, which must be referred to its improving trade. The receipts for 1864 5 reached Rs. 478,800, or Rs. 29,593 above those of 1863-64. The expenditure amounted to Rs. 549,862, exceeding the revenue by Rs. 71,062. The imports, amounting to Rs. 18,048,125, were met by exports valued at Rs. 26,913,634, the former showing an increase over the previous year of Rs. 855,755, and the latter of Rs. 1,224,364. This increase both in revenue, imports and exports, has been realised in face of several disturbing influences, among which the feuds of the Chinese secret societies are prominent. The number of vessels that arrived in the year were 652, of 171,134 tons; the departures 621 vessels of 158,539 tons. Of the former 429 were British, and of the latter 691, representing a still larger proportion in the tonnage, which was 119,764 for entrances and 158,539 for clearances. The Hamburg vessels, of which 31 entered, rank next in amount of vessels, and following these, the Arabian of which no less than 17 vessels entered, of a tonnage of 7,810, the departures being 13 of 6,512 tons. The number of Siamese vessels that entered were 18, but of very light tonnage. French arrivals exhibited a tonnage of 4,600, and American of 3,281.

MALACCA.

The revenue of Malacca for the official year 1864-65 was Rs. 173,062; the expenditure, Rs. 263,932, a deficiency in the former as compared with the previous year of Rs. 1,824, and in the latter of Rs. 31,927, whilst the excess of expenditure was Rs. 90,870. The deficiency in revenue was accompanied by a decrease of Rs. 9,689 in the value of imports, which amounted to Rs. 4,533,160; but exports in the same period, amounting to Rs. 3,683,826, increased in value to the extent of Rs. 87,815. In the year, 302 vessels entered of 55,341 tons, 288 of the number being British. The departures were 302 vessels of 553,400 tons, 288 of these vessels coming under the British flag. The demand made by the British Government on the land-owners, hitherto exempted from assessment, for payment of the same, giving them the option of selling the land, had created some excitement among proprietors, who claim that the agreement by which, in 1828-29, Government bought by means of annuities certain portions of the land, for which the Dutch had charged a small quit rent, implied a release of the proprietors from any demand on the remaining land; and, in fact, no assessment has up to the present time been made.

MORTALITY OF TROOPS AT HONG KONG.

COLONEL NORTH has succeeded in procuring the papers moved for in reference to the troops at Hong Kong, which we shall notice more fully in our next. But we believe that no amount of correspondence will alter the leading mistake of General Guy in being absent from Hong Kong at the time of arrival of the *Tamar* with the reinforcements. It appears that the General was fully aware of the intended despatch of this vessel from England to the Cape, as it is alluded to in his letter of November 12, 1864. It has been stated repeatedly, however, by the officers of the garrison at Hong Kong and by those recently returned from Hong Kong that they did not expect them so soon. This is idle; for with the present means of communication they could be advised in the first instance by the direct mail from this country, and subsequently from the Cape and Singapore, of the despatch of the *Tamar*, and the naval officers on the station could have informed them of her probable arrival at that season of the year. In any case they should not have been landed in Huts or Godowns, nor would they if General Guy had been at his post. The following statement in reference to the mortality of the troops is from the *Pall Mall Gazette*:—

The strength of the 9th regiment, on its arrival at Hong Kong in February, 1865, was 839 non-commissioned officers and men, 47 women, and 77 children. Of these, 48 non-commissioned officers and men, 6 women, and 28 children have died; 139 non-commissioned officers and men, 27 women, and 31 children have been sent home sick, with several orderlies in attendance on them. There remained at the station in January, 1866, only 636 non-commissioned officers and men, 14 women, and 18 children. The 9th also lost two officers, and one was invalided.

On the 31st of May, 1865, the *Tamar* brought from the Cape 25 officers, 702 non-commissioned officers and men of the 11th, with 54 women and 92 children. On their arrival at Hong Kong there was actually no accommodation ready for them. Two companies had to be lodged on board the condemned three-decker *Hercules*, and a few on board the *Princess Charlotte* hulk. The rest were put into sheds at Kowloong, on the mainland, just opposite Hong Kong. Disease and death soon began to appear in their midst. Between the 5th of June and the end of last year 2 officers, 58 non-commissioned officers, 5 women, and 27 children died. 4 officers, 189 non-commissioned officers and men, 22 women, and 35 children have been invalided. Besides this, the 11th has lost all its surgeons; one has died, one is sick, and one is on leave at home.

The hot season in China is returning, and if other European soldiers are sent out to replace the shattered remnant of the 11th regiment, there will inevitably be another tragedy unless special provision be promptly made for their reception. But why should Europeans be employed, at such a risk to health and even life, upon a service which Indian troops could perform not only safely but more efficiently? The cost of the recent mismanagement at Hong Kong has been variously estimated at between £30,000 and £50,000; but that represents only a part of the loss. Good soldiers are not readily replaced, and enlistments are not likely to be encouraged by the news of such a wanton sacrifice of valuable life. It is most important that some member of the Government should give assurance in Parliament that measures are being taken to prevent a repetition of the miserable tragedy of last year. There is another point which demands attention. Cannot some means be devised of keeping British officers in command on Chinese stations from running away to Japan? No doubt the climate and rate of exchange in Japan are very attractive, but the superior officers are setting a very bad example to their subordinates in yielding to such temptations, and some stringent mode must be sought of keeping them at their posts.

THE ICHIBOU EXCHANGE QUESTION.

(To the Editor of *The London and China Telegraph*.)

DEAR SIR,—I am glad to see by the answer of the Chancellor of the Exchequer to Lord Stanley's questions in the House of Commons on the 27th ult. that the remarks made by yourself and correspondents in the *London and China Telegraph* have been brought under the attention of Ministers.

The Chancellor of the Exchequer so far anticipates the production of Mr. Arbuthnot's reports as to inform the country that "that perfect master of every question of finance, having investigated the matter to the very bottom, had made a communication to the Foreign-office, and the general effect of that communication was that *the practice ought to be abandoned.* The Foreign-office desired to give effect to this, but Sir Rutherford Alcock was so strongly impressed with the necessity of adhering to the system of privileged exchange, that on his own responsibility he reverted to it."

Now, Sir, I do not intend to insinuate that Sir Rutherford Alcock is a man to permit his own pecuniary interests to influence his duty as a public servant. There are many who would attribute this to him; I do not. I have had some opportunities of judging, and I believe he has a soul above dollars and cents, ichibous and tempos, £. s. d.; still the question of fact will arise—did or did not Sir Rutherford Alcock himself, and those associated with him in official life, have their incomes supplemented in the manner detailed in my former letter to the extent of 50 per cent. by this recurrence to the system of privileged exchange?—a system which Sir Rutherford Alcock took upon himself to continue, despite Mr. Arbuthnot's report and the Foreign-office resolution founded thereon, that it ought at once to be abandoned. If this question be answered in the affirmative, as I avow it must, the opportunity of scandal of self-interested motives (however unfounded) against the Minister of our country in Japan is proof enough that he did wrong, that the Government did wrong in permitting him to do it, and that that wrong should be immediately abandoned.

The only difficulty in the way of the abandonment of the system is stated by the Chancellor of the Exchequer to be that the official salaries, in the first instance fixed very low, are now in consequence of the rise of prices found insufficient, and the lucrative system of exchange has prevented a general demand for an increase of salaries. True, Japan is a somewhat expensive place to live in. True, our ministers, our consuls, indeed, all our civil officials, receive salaries which would only enable them to live decently in their respective positions in places where the cost of living is at the minimum. They are all shamefully underpaid, but we are told they are kept from importuning for increase of pay by this arrangement of exchange with the Japanese Government. In other words, British Government officials receive their inducement to continue their services in Japan by a contribution from the Japanese Government of 6s. in every pound of their pay. Can anything be more to the disparagement of the honour of our country in the eyes of the Japanese than that we should enforce ourselves upon them, and yet that our public servants, placed there to protect our interests, derive a considerable portion of their income by the shuffling of the Japanese currency? The change proposed by the Chancellor of the Exchequer I presume to mean this: That the officials shall receive the benefit of the exchange as heretofore, but shall account for and hand it over to their Government, which will recoup it to them in the shape of advance of pay which they must then have, but hitherto have not importuned for. This will appear to the Japanese like an unworthy shuffle; it will not satisfy one of the many serious and admittedly well-founded objections which have been made to the system. But, I would ask, are there not other alternatives? may not the terms of the treaty in respect to the exchange, if enforced or accepted at all, be enforced for all alike? or, failing this, may they not be waived for all, and England, with what grace it may, even tardily follow the lead of Prussia and pay the salaries of its own officers without such extraneous aid?

What, I would just further ask, has become of the charge which has been made and repeated, that, amongst other abuses of which this system has been the parent, £1 per diem has been exchanged for the non-commissioned officers and men stationed in Japan; that they have received the benefit of the exchange on the amount of their pay—one shilling only—and the remainder carried to a fund in which officers have shared in proportion to their rank? I trust when next Lord Stanley reverts to this "interesting but intricate" subject, he will ask if the attention of the War-office authorities has been called to this branch of it.—Yours faithfully,

London, 1st March, 1866. ICHIBOU.

THE HONG KONG GAS COMPANY AND THE CEYLON GAS COMPANY.

The following, from the *Ceylon Times*, shows that the Hong Kong Company are about to obtain the contract for lighting Colombo, and we presume a share of the advantage will be accorded to the shareholders which may serve as a recompense against the delay in their dividends alluded to in our last:—

A company is shortly to be established on the joint-stock principle, to be called the Ceylon Gas and Water Company, and its proposals for supplying Colombo were laid before the Municipal Council on Monday last. Its original promoter was Mr. J. J. Grinlinton, who furnished the Hong Kong Gas Company with data of our requirements in these respects and other information on the subject; and they, having been eminently successful in their operations hitherto, will float the new company in London, a number of shares being reserved for allotment here, and a good local direction appointed. Mr. Grinlinton has been obliged, however, to give up all active connection with the project, in consequence of his official position, and he has therefore handed the papers over to Mr. Robert Dawson, who in conjunction with Mr. J. White, the other local director, is proceeding vigorously with the necessary preliminaries.

The following is Mr. Dawson's statement:—

A Company has been inaugerated in London under the auspices of the Hong Kong and China Gas Company, Limited, and under the same London directors, represented here for the present by J. T. White, Esq., and R. Dawson, Esq., as local directors.

This company is prepared to enter into negotiations at once with the Colombo Municipal Council to supply Colombo with gas and water, on terms which, I trust, the Municipality will find deserving of attention; and on behalf of the company I beg to state that I am ready to enter into negotiations whenever the Municipal Council may be ready to receive the company's proposals. It has been estimated that the ultimate cost of the works for supplying the town adequately with gas will be £50,000.

The company will be prepared to erect 500 public lampposts at an estimated cost of £5 5s. each, equal to £2,625 (the cost in Hong Kong being £5 10s. per lamp), or to charge the Municipality interest at the rate of 6 per cent. on an outlay of say £3,000, equal to £180 per year; to keep the whole 500 lamps lighted, and cleaned and repaired at a charge of 13s. 6d. per month, equal to £4,050 per year (the charge in Hong Kong is $3,30, or 13s. 9d.)—the price to be subject to reduction on supplying gas to private consumers to any considerable extent, or on the company's declaring a dividend of ten per cent. or upwards for two consecutive years;—the lamps to be lighted 10 hours per night, to consume 3 cubic feet per hour, equal to 30 cubic feet per night, equal to 900 cubic feet per month.

All Government and Municipal buildings to be supplied at the same rate as that charged for public lights—viz., 15s. per 1,000 cubic feet, being an equivalent to the charge of 13s. 6d. per lamp.

Private consumers to pay 18s. 9d. per 1,000 cubic feet (the Hong Kong rate), the charge being subject to reduction, under the same conditions as the public lights.

If the Municipality should decide on erecting a greater number of public lights than 500, a reduction in price will be made as follows: 550 lamps at 13s. each, 600 ditto at 12s. 9d. each, 650 ditto at 12s. 6d. each. But if, on the other hand, the Municipal Council should decide on a less number of lights, a proportionate increase in charge will be made.

CONCESSIONS.

The company to have exclusive permission to open up streets and to lay mains for the space of 3 years, with full authority for carrying on necessary operations for the construction and repair of the works (the materials for which to be admitted duty free), and assistance in procuring an eligible site on moderate terms.

If the above mentioned rates and concessions be granted, the company will undertake to erect the works and public lamps, lay the mains and maintain the same.

To supply the town adequately with gas at all times, the gas to be of a quality equal to that made from good Newcastle coal.

With regard to the water supply, the estimated cost of supplying the town adequately with good water is £75,000, but circumstances might arise to increase the expenditure to £80,000.

If the corporation will undertake to pay the company 6 per cent. per annum on an expenditure not exceeding £80,000, equal to £4,800 a year, the company will undertake to conduct water into the town and fort, and along all the principal thoroughfares, according to plans to be approved by the Municipal Council, to erect public taps or pumps at convenient distances along all the principal thoroughfares for the use of the inhabitants, and to enable the streets to be watered. The pipes to be laid so as to admit of flushing main sewers at night. The water to be analysed, and if filtration be necessary, filtering basins to be formed.

Public and private dwellings to be supplied with water at fixed rates to the occupiers. Public baths to be erected when required, should sufficient inducement offer, and water to be supplied for the irrigation of Paddy lands and Owitte fields, the cultivators paying a moderate charge for the same.

The company to have exclusive permission to open up streets, to lay mains, construct canals, reservoirs and filtering basins for the space of 3 years, with full authority for carrying on all necessary operations for the construction and repair of the works (the materials for which to be admitted duty free), and assistance in procuring eligible sites for reservoirs, basins, &c., on moderate terms.

Maps and plans are in course of preparation, and surveys and levels are now being taken which will, with the permission of the Municipal Council, be laid before them at an early date, and I shall be happy to answer any questions and to afford all the information in my power.

I think it right here to state that the plans and designs for the two great works which I have now the honour to introduce have been handed over to me by Mr. Grinlinton, to whose unaided exertions all that has been hitherto done is due, and to whose influence is also due the very liberal proposals of the company now offering to treat with his Municipality; but although Mr. Grinlinton has ceased to be the representative of the company, I am happy to say he has consented to give our engineers the benefit of his advice and assistance whenever needed.

Shipping Intelligence.

LOADING.

At LONDON.—For Yokohama: Lorton, Eleanor, Minnie. For Shanghai: Dunkeld, Polmaise, Dartmouth. For Shanghai and Hankow: Aurora Australis. For Hong Kong and Canton: Melbrek, Ellen Rodger, Art Union, Gresham, Yaratilda, Banian. For Singapore: St. Andrew's Castle, Florence Nightingale. For Batavia and Sourabaya: Peter Rohland. For Colombo: Blue Jacket, Neville, Liberator. For Simon's Bay and Trincomalee: Brothers.

At LIVERPOOL.—For Yokohama: Recife. For Hong Kong and Canton: Veronica. For Hong Kong: Adelia Carlton. For Singapore: Henry Ellis, Chili, Eastfield, Patriot King. For Batavia and Sourabaya: Triton. For Batavia and Singapore: Ribbleton. For Manila: Espana. For Galle: Susan Pardew, Queen of England, W. G. Russell, Henrietta. For Ceylon: Gaucho.

At GLASGOW.—For Singapore: Edinburgh Castle. For Batavia Samarang, and Sourabaya: Betty. For Colombo: Swanley.

SPOKEN.

DORDRECHT, for Batavia, 15 Jan., 3 N., 25 W.
GEORGIA, Cardiff to Shanghai, 25 Dec., off Geeby Isle.
BLACK SWAN, London to Hong Kong, 2 Jan., 20 S., 28 W.
LUCONIA, Rotterdam to Singapore, 3 Jan., 20 S.
FLYING SPUR, London to Shanghai, 28 S., 21 W.
CALDBECK, Singapore to London, 21 Feb., 44 N., 16 W.
JACOBUS, Java to Rotterdam, 6 Feb., 31 N., 36 W.
PALESTINE, London to Colombo, 25 days out, 3 N., 22 W.
NORTHFLEET, London to Hong Kong, 21 Jan., 1 S., 27 W.

FREIGHTS AND CHARTERS.

In outward freights for vessels loading on the different berths we have continued firmness to report, but coal freights are somewhat easier, although vessels are not readily obtainable at the lower rates now ruling. In homeward charters there is nothing doing.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Shanghai: 40s. weight, 30s. to 35s. meast. To Hong Kong: 40s. weight, 30s. meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Ceylon: 40s. weight, 20s. measurement.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per Keel. For Hong Kong: £45. For Galle: £40. For Singapore: £40. For Shanghai: £55. From Newport, Cardiff or Swansea, per ton. For Hong Kong: £2s. 8s. For Manila: 35s. to 40s. For Galle: £2. For Singapore: 36s. to 37s. For Shanghai: £2. 16s. For Batavia: £1. 15s.

THE CREDIT FONCIER AND MOBILIER OF ENGLAND (LIMITED),

IN CONJUNCTION WITH

THE AGRA AND MASTERMAN'S BANK (LIMITED), AND THE NATIONAL BANK,

WILL RECEIVE APPLICATIONS FOR THE CAPITAL OF THE

IMPERIAL LAND COMPANY OF MARSEILLES

(LIMITED).

CAPITAL £1,600,000, IN 80,000 SHARES OF £20 EACH.

Deposit on Application £1 per Share, on Allotment £4 per Share.

IT IS NOT ANTICIPATED THAT MORE THAN £5 PER SHARE WILL BE REQUIRED IN ADDITION.

Interest at the rate of Ten per Cent. per Annum will be paid for the first Two years, for which Interest Warrants, payable half-yearly, will be attached to the Share Certificates. After the Two years the profit income on re-sales of Land already effected, and profit on further sales will be applicable for distribution as dividend or bonus.

Engineer-in-Chief—Monsieur PAUL BORDE, Marseilles (Member of the Conseil General).

Secretary (pro tem.)—ALFRED LOWE, Esq.

Temporary Offices—17 and 18, Cornhill.

OBJECTS OF THE COMPANY.

The Imperial Land Company of Marseilles (which has been nearly twelve months in course of organisation) is established with a view of purchasing and acquiring land and property in the important city of Marseilles, the re-sale of the same, and the acquisition of concessions and privileges connected with the development and improvements of the City and Port.

In furtherance of these objects, and after a long and careful investigation, various properties have been purchased in the best portions of the city, and where the progress of the improvements gives assurance of profitable results.

PROPERTIES ACQUIRED.

The properties which the Company have acquired are as follows:—

1. The Joliette Property, comprising about 2,244,000 square feet of building land, exclusive of streets.
2. The Rue Impériale Property, consisting of about 98,000 square feet.
3. The Catalans Property, consisting of the Hotel, the Imperial Club, baths, houses, and building plots, in all about 2,300,000 square feet.
4. The Prado Property, consisting of building plots of about 264,000 square feet.

It will be seen, on reference to the map, that the Company's purchases comprise the lands to the north of the town as well as those to the south, with a large extent of seaboard, making a total of about 4,900,000 square feet.

MARSEILLES, PROGRESS OF.

Marseilles, both in population and wealth the first maritime city in France, contains a dense population of more than 300,000 souls. During the past year 18,000 vessels, with a tonnage of upwards of 3,000,000 tons, entered and left the harbour. Marseilles commands the commerce of the Mediterranean, engrosses nearly the whole trade with Algeria, and is the packet station for the Peninsular and Oriental Steam Company, the Messageries Impériales, and other steam packet companies trading with all parts of the world. It possesses commodious docks and warehouses, and, by railways, is in direct communication with all parts of France.

The old harbour having been found inadequate for the rapidly expanding commerce of the place, the new harbour of La Joliette, covering an area of sixty-eight acres, was constructed, and is constantly crowded with shipping. It is surrounded by broad quays, with stately buildings on the north side, and a new town is rising rapidly in its immediate vicinity. Since 1860 three other basins have been constructed, named Du Lazaret, d'Arène, and Napoleon, which will double the harbour accommodation of Marseilles.

THE EMPEROR'S INTEREST IN MARSEILLES.

It is well known that his Majesty the Emperor of the French takes deep interest in the welfare and prosperity of Marseilles, and the Directors have strong reasons to believe that his Majesty's gracious and special protection may be depended upon to aid any enterprise having (like the present Company) the object of developing the resources of the city, and accordingly application is intended forthwith to be made by the Directors to obtain the valuable concession for razing the Fort St. Nicholas and to make the new Catalans Port.

RUE IMPERIALE.

By the construction of the Rue Impériale, which is 80 feet wide, and lined by important buildings, a direct communication has been effected between the Rue Canebière, the Exchange, the Ancien Basin, or old harbour, and the new basins or docks above mentioned. This has caused the demolition of large blocks of houses, densely occupied, which circumstance, together with the previous dificiency of house accommodation, renders the construction of new buildings absolutely necessary for commercial and residential purposes, and causes an eager demand for vacant plots of building land.

JOLIETTE PROPERTY ACQUIRED.

In this quarter of the town, where the commercial requirements of the growing population are so great, the Company has secured about 57 acres of freehold building land, exclusive of streets, and this under exceptionally favourable circumstances, both as respects situation and terms of payment.

RUE IMPERIALE. PROPERTY ACQUIRED.

More than 98,000 square feet of this land are in the Rue Impériale—the finest street in Marseilles. The remainder is situated in the Quartier de la Joliette, commencing at the Port of La Joliette, and extending the whole length of the Docks, the Basin d'Arène, the Port Napoleon, and terminating at the Basin Radoub. These lands are traversed by streets from 40 to 50 feet wide, in connection with the Rue Impériale, by the Boulevarde Maritime, and are surrounded by an industrious and thriving population.

TERM OF PURCHASE.

The land will be handed over to the Company completely levelled, with all the streets and footpaths paved, drainage complete, gas laid on, and provision made for the supply of water to the topmost stories.

As by the conditions of the treaty for the acquisition of the Joliette Estate, it is stipulated that six years should be given, by which time the Estate is to be covered with houses, the option is reserved to the Company for the same period, during which it may elect either to pay the purchase-money in one sum, or to make an annual payment of equal instalments, extending over a period of thirty years, with a fixed rate of interest and Sinking Fund.

PROFESSOR DONALDSON'S REPORT.

Before the treaty for this portion of the property was concluded, the purchasers secured the services of Professor Donaldson (late President of the Institute of British Architects) to personally investigate the operations in progress at Marseilles, and the character and value of the sites. A copy of his report accompanies the prospectus.

Digitized by Google

CATALANS PROPERTY ACQUIRED.

The Catalans Properties are in the immediate neighbourhood of the marine residence of the Emperor, and command a frontage to the sea of about a mile in length. They are admirably situated both for business premises and private villas.

BUILDINGS NOW ON CATALANS ESTATE.

Many first-class houses are already erected; a magnificent hotel (now open), having 140 rooms; and the Imperial Club (now in course of construction), of noble architectural elevation, surrounded with terrace and gardens, all laid out under the Government plan. There is an extensive bathing establishment, often frequented by more than 5,000 bathers daily.

This district will undergo a radical improvement when Fort St. Nicholas, which separates the Catalan property from the centre of the town, shall have been demolished, a new port constructed, and additional streets made, so as to render complete the facilities for communication between the old and new portions of the town.

The Municipality of the town of Marseilles engage, at their own expense, to lay down gas, make macadamised roads, and ensure a proper water supply for the houses.

There are in this quarter about four miles of streets from 40 to 50 feet in width, which have been recently opened and lighted with gas; and the Boulevard la Corderie (72 feet in width, and lately opened for traffic) forms a continuation of the splendid promenade of the Prado.

The district communicates with the Quai de Rive Neuve, the centre of the old port, and of the commerce of the town, by the Boulevarde de l'Empereur. All these important facts furnish assurances of great success, and there can be no doubt that this portion of the Company's properties will be sold at a price which will yield a very large profit.

THE PRADO PROPERTY.

The Prado Lands are near the Southern Railway Station, in an admirable position, and well adapted for the establishment of warehouses, shops, &c.

With respect to the value and prospects of these properties, a report by Mr. P. Borde, the well-known engineer of Marseilles, accompanies this prospectus, giving ample details thereon.

AMOUNT AND PERIOD OF PAYMENTS.

The total amount of purchases is £3,325,163; of this sum £2,668,640 is payable by instalments spread over various dates, and extending in part to a period of fifty years, and only £656,523 in cash, on taking over the estates, caution money being lodged in the meantime for the due observance of the Company's engagements. It is, therefore, expected that with the aid of the Company's borrowing powers not more than £10 per share will be required on those shares not fully paid up on allotment. Thus, with a comparatively small amount of capital, the Shareholders have the advantage of profit derivable from dealing with a very large extent of property.

JOLIETTE PROPERTY RE-SOLD.

As evidence of the value of the purchases, the Directors have the satisfaction to announce that they have already concluded arrangements with an association of builders at Marseilles, to transfer to them one of the properties (the Joliette Property) at a profit of about £600,000, such property and profits to be paid for by annuities and sinking fund over a period of thirty years, with option on their part to pay for the whole at any time during five years, with an obligation on the part of the contractors to deposit a sum of four millions of francs (£160,000) as caution money, at fixed periods (the first instalment of which was paid on the execution of the contract), and also to cover the property with buildings within a period of five years, at their own cost.

The Shareholders will have the benefit of this contract, and from October, 1867, will receive the income derivable from this contract, viz., the difference between the annuities to be paid and received by the Company, and this income, joined to the existing revenue from the Catalans estate, as well as to the anticipated profit on further sales during that period, will, it is estimated, not only enable the Directors to continue the payment of the interest at 10 per cent. per annum, but enable them to declare periodical bonuses on the capital called up.

As to the Catalan property, having regard to its important position, the command it has of the seaboard, the facilities it presents for construction of the new port, and its general adaptability for the formation of streets, shops, and private villas, a large and remunerative return may also be anticipated.

ESTIMATED PROFIT ON CATALAN PROPERTY.

On reference to Mr. Borde's Report, it will be seen that when the various improvements which have been suggested have been completed, and the Catalan property fully developed, it is estimated to yield a gross profit of upwards of cent. per cent., and this within a period of three years, although the estimates have been based on the more extended period of five years, and that, when the Fort St. Nicholas is removed, and the new port completed, this profit will be trebled.

MINIMUM INTEREST, TEN PER CENT.

As the first payments of annuities and rent under the arrangements entered into with regard to the Joliette property do not commence until the 1st October, 1867, and become payable only in the subsequent half-year—viz., the 1st April, 1868, the Directors have decided to pay interest at the rate of 10 per cent. per annum, for two years, from March, 1866, on the capital called up, and for which four interest warrants will be attached to the share certificates at the time of issue (which will be charged to land purchases account). After that date the revenue from the Joliette lands, the rentals from the other properties, and profits on further sales, will be applicable for dividend or bonuses.

PAYMENT OF SHARES IN FULL ALLOWED.

As some shareholders may prefer to pay up the shares in full, rather than have a larger number subject to calls, applications may be made for shares to be fully paid up on allotment. Four half-yearly interest warrants, at the rate of 10 per cent. per annum, will likewise be attached to these share certificates. In the allotment of shares preference will be given to these applications, but the number so allotted will not exceed 30,000 shares, and the Directors reserve to themselves the right in their discretion only to allot 60,000 shares in all on the present allotment.

A portion of the shares will be allotted to applicants who are shareholders in

The Credit Foncier and Mobilier of England (Limited).
The Agra and Masterman's Bank (Limited).
The National Bank.
The National Bank of Liverpool (Limited);
To Applicants from Marseilles and Paris;

and the balance to the other portion of the general public.

Applications for shares may be made in the annexed form, which must be accompanied by the payment of £1 per share deposit, without which no application will be considered. Should a less number of shares be allotted than are applied for, the deposit will, so far as required, be applied towards the payment due on allotment. Should no allotment be made, the amount paid will be at once returned, without deduction.

Copies of the Architect's and Engineer's reports on the lands purchased, and a map, showing their position, accompany the prospectus, which, with forms of applications for shares, may be had of the Brokers and Solicitors; also of the Agra and Masterman's Bank (Limited), 35, Nicholas-lane; of the National Bank, Old Broad-street, London, and their branches; the National Bank of Liverpool, Liverpool; and of the Secretary, at the Offices of the Credit Foncier and Mobilier of England (Limited), Nos. 17 and 18, Cornhill.

COPY OF MEMORANDUM OF ASSOCIATION.

1. The name of the Company is "The Imperial Land Company of Marseilles (Limited)."
2. The registered office of the Company is to be in England.
3. The objects for which the Company is established are:—

(1.) The acquisition, by purchase, leasing, or otherwise, of land in and near the city of Marseilles, in the empire of France, and the improvement, by building or otherwise, of land so purchased or acquired.

(2.) The selling, leasing, transferring, or otherwise disposing or mortgaging of the lands, houses, and other buildings and works erected, executed, or otherwise acquired by the Company, in large or small portions or altogether, and either before or after the same shall have been improved by building or otherwise, and on such terms as the Company shall think fit.

(3). The improvement of buildings already erected, either by adding to, enlarging completing, or altering the same, or by substituting new houses and buildings.

(4). The investing of the capital of the Company in building on, or othewise improving, or adding to, the marketable value of lands from time to time acquired by the Company, and the making, maintaining, and using all such works as the Company may think necessary or expedient for any of the purposes of the Company.

(5.) The borrowing of money, and the issue of transferable or other bonds or mortgage debentures, or any other securities founded or based upon all or any of the real or personal assets or credit of the Company.

(6.) The transacting and doing of all such matters and things as shall be conducive or incidental to the above objects, or any of them, including the applying for and obtaining the incorporation of the Company in France.

4. The liability of the members is limited.
5. The capital of the Company is £1,600,000, divided into 80,000 shares of £20 each.

PORT OF AMOY.

SHIPOWNERS, AGENTS and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer, and a Blacksmith. Dry Godowns for the reception of vessel's stores, &c., when requiring to discharge them.

Amoy, March, 1865.

THE BANGKOK DOCK COMPANY'S NEW DOCK.

This magnificent Dock is now ready to receive Vessels of any burthen, and the attention of Shipowners, Agents, and Masters is respectfully solicited to the advantages for REPAIRING and SPARRING VESSELS, which no other Dock in the East can offer.

The following description of the Premises is submitted for the information of the public. The dimensions and depth of water being:—

Length ... ... 300 feet.
(To be extended.)
Breadth ... ... 100 ,,
Depth of water ... ... 15 ,,

The Dock is fitted with a Caisson, has a splendid entrance of 120 feet from the River, with a spacious Jetty on each side, where vessels of any size may lay at any state of the tides, to lift Masts, Boilers, &c., with powerful Lifting Shears, which are now in the course of construction.

The Dock is fitted with Steam Pumps of great power, insuring despatch in all states of the tides.

WORKSHOPS.

The Workshops comprise the different departments of Shipwrights, Mast and Block Makers, Blacksmiths, Engineers, Foundry, &c.

The whole being superintended by Europeans, who have had many years' experience in the different branches.

The workmen are the best picked men from Hong Kong and Whampoa.

The Company draws particular attention to the great advantages this Dock offers, being in a Port where the best Teak and other Timber can be had at the cheapest cost.

A Steam Saw Mill is also in connection with the Dock, to insure despatch in work.

The Keel Blocks are four feet in height, and can be taken out or shifted without cutting or causing any expense to ships having to get them removed.

The Company is also prepared to give estimates or enter into Contracts for the Repairs of Wooden or Iron Ships, the Building of New Ships, Steamboats, &c., or any kind of work connected with shipping.

All Material supplied at Market price. Vessels for Docking may lay at the Company's Buoys or Wharf free of charge, until ordered to remove by the Superintendent.

Captains of vessels before leaving the Dock must approve and sign their Dockage Bills.

All communications respecting the docking to be addressed, until further notice, to the undersigned, by whom all Bills will be signed and collected.

HOLLOWAY'S PILLS.—THE READY REMEDY.—When winter sets in the human constitution undergoes many trials, from some of which disease will spring, unless the blood repelled from the surface of the body find organs capable of receiving it, and secretions adapted to consume it. This preservative power is admirably displayed by proper doses of Holloway's Pills, which relieve the liver, kidneys, and bowels from undue congestion, by immediately augmenting their secretions, and so diverting any surplus quantity of blood from a situation where its continued presence must be mischievous. With these Pills, and an attentive perusal of their accompanying "directions," neither great judgment nor much experience is required to conduct even the delicate through the trying time of winter.

DEPOSITS RECEIVED BY

THE CREDIT FONCIER and MOBILIER of ENGLAND (Limited).

RATES for MONEY on DEPOSIT.—This Company receives money on Deposit, in sums of £10 and upwards, at the undermentioned rates, from this day until further notice, viz.:

By Special Appointment
TO HER MAJESTY QUEEN VICTORIA.
BRANDS ON CASES AND CASKS.
FROM CHILLINGWORTH & SON, WINE MERCHANTS, TO HER MAJESTY, LONDON.
Seal on Corks.
Brand on side of Corks.
CHILLINGWORTH & SON, LONDON.
Brand on end of Casks.

CAUTION.

WHEREAS Persons are shipping Wines to India marked with a Crown in imitation of CHILLINGWORTH and SON'S WINES, which are branded with a Crown, they having the appointment of WINE MERCHANTS to HER MAJESTY QUEEN VICTORIA, it is deemed expedient for the protection of dealers and consumers of their superior Wines selected from their extensive and valuable stock expressly for the Indian market, which have been so well known and approved by connoisseurs for the last thirty years for their extreme quality and purity, combining flavour and softness, together with great age, body, delicacy, and bouquet, being more free from acidity or alcohol that any other Wines, to caution all purchasers to ask for

CHILLINGWORTH & SON'S
CROWN SHERRIES AND OTHER WINE

And to be particular in observing that the Cases and Cask-heads are branded with their names at full length; also, on the side of the Corks, inside the bottles, as well as the Crown; and also on the seals, in accordance with the heading of this notice, as a necessary precaution, to ascertain that they are CHILLINGWORTH and SON'S CROWN WINES, in order to prevent a common low class of Wines being improperly foisted on the public, and which are in no way to be compared with those of CHILLINGWORTH and SON'S.

Wholesale Agents:—Bombay, Messrs. Hormarjee Bomanjee and Co.; Madras, Messrs. Parry and Co.; Calcutta, Messrs. Gordon, Stuart, and Co.; Kurrachee, Messrs. Hormarjee Bomanjee and Co.; Colombo, Messrs. BOYVEAU LAFFECTEUR'S ROB.

The only one authorised and adopted in France, Belgium, Austria and Russia.

THIS Vegetable Syrup, prepared and guaranteed genuine by the signature of Dr. GIRAUDEAU DE ST. GERVAIS, is very superior to the purifying syrups. It effects a radical cure, without mercury, in all affections of the skin, scurf, scrofula, &c., and symptoms arising from the acrid state of the humours. The Rob is especially valuable in diseases which have resisted the effect of mercury or iodide of potash. The general entrepot of 12, RUE RICHER, PARIS.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s. 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty and by Special Appointment to H.R.H. the Princess of Wales, London.

Keating's Cough Lozenges.

JUDGED BY THE IMMENSE DEMAND this Universal Remedy now stands the first in public favour and confidence: this result has been acquired by the test of fifty years' experience. These Lozenges may be found on sale in every British colony, throughout India and China. They have been esteemed wherever introduced. For COUGHS, ASTHMA, and all affections of the Throat and Chest, they are the most agreeable and efficacious remedy.

Prepared and sold in boxes and tins of various sizes, by THOMAS KEATING, Chemist, &c., 79, St. Paul's Churchyard, London. Sold retail by all druggists and patent medicine vendors in the world.

N.B.—To prevent spurious imitations, please to observe that the words "KEATING'S COUGH LOZENGES." are engraven on the Government Stamp of each Box without which none are genuine.

The next mail, with dates from Hong Kong to 15th Feb., is expected on the 29th. Telegrams of this mail were published in our last.

The "Emeu," with the outward mail of the 10th February, put back to Galle on the 10th of March, having lost the key of her screw; the French mail of the 17th Feb. (due at Galle on the 13th inst.), would, however, take on the mails. The Company's agent at Galle had telegraphed to Bombay for a steamer to be sent on, which would probably reach there on the 17th, and convey the passengers and cargo to Singapore and China. The "Emeu" was to proceed to Bombay and there make good the defect—a work of a few hours only.

List of Passengers.

PASSENGERS INWARD.

By this mail, per P. and O. Company's steamer, China, arrived at Marseilles Mar. 14.—From Shanghai: Messrs. Hill and Lloyd. From Hong Kong: Lieut. Clayton, R.N., Messrs. Brown and Lay, and two 2nd class passengers.

Per P. and O. Steamer, from Southampton, April 20.—To Ceylon: Mr. J. H. Purdon.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

From Yokohama the latest intelligence reaches to the 18th Jan., down to which date we have received files of the *Japan Herald*. On the 4th Jan. the English mail of 10th Nov. was received, and the French mail arrived out on the 14th, conveying also telegrams from London to the 1st December.

Political events had not been numerous, though two are noteworthy and interesting. The Envoy of his Majesty the King of Belgium had been to Yedo with the view of feeling his way towards a treaty; and a leading member of the Gorogio had visited Yokohama, with several high officials. He took occasion (says the *Herald*) to congratulate the foreign Ministers on the removal of all the old restraint that had existed before the ratification of the treaties—and even admitted how very difficult had been the position of the Tycoon and his Government as standing between the foreigners and the Mikado; unable in some sort to tell either party the exact truth with regard to the other. But the most extraordinary circumstance connected with this event was its finale; and we can hardly class it among secondary affairs, indicating as it does the remarkable change in feeling in the Japanese mind towards foreigners. Matsudaira Hokino Kami, the member of the Gorogio spoken of, acknowledged that until the Ministers went to Hiogo he had never met a European. He is an elderly man, and one of the most polished even of the Japanese nobles. Before leaving for Yedo he asked Mr. Macdonald to drive him in his carriage to Kawasaki, as he would prefer that mode of transit to returning in the steamer. Mr. Macdonald having courteously assented, the steamer was despatched to Yedo, and Matsudairo, with four others, mounted the vehicle. The Legation guard under Captain Applin, and a number of his own guards, accompanied them, and the whole route along the Tokaido presented a most extraordinary scene of excitement, the surprise of all grades being unbounded. This is really one of the most remarkable *coups* we have yet known in Japanese and foreign intercourse. The pleasure exhibited by all was extreme, and at Kawasaki they did not leave without the warmest expressions of kindly regard on both sides.

Sir Harry Parkes visited Yedo for a few days, returning on the 11th January. In Yedo all is quiet, and there is no particular news respecting the movements of the Tycoon, or of those whose doings most interest foreigners. His Excellency the French Minister is a severe sufferer from acute rheumatism, and quite unable to leave his house.

The second instalment of the indemnity money had been received at the Oriental Bank.

The mail steamer which arrived on January 4th brought the new Consul, F. G. Myburgh, Esq., who immediately entered upon his duties. The *Herald* says:—"In seeing Mr. Flowers resume his office of Vice-Consul we cannot withhold the expression of the general feeling of the community that, since he has officiated

Digitized by Google

as British Consul in Yokohama, he has acted with such singleness of purpose, and shown so much anxiety to do all in his power for the advantage of Her Majesty's subjects here, as to win the confidence of his countrymen; whilst the whole community, Japanese and Europeans, has known that uprightness directed the proceedings in the British Consulate. A large meed of praise must also be accorded to Mr. Fletcher, who now delivers up the reins of the Vice-Consular office, for the intelligence, energy, and affability with which he has held them."

The Chamber of Commerce held a meeting on the 2nd January, at which it was determined to appoint a paid secretary, the salary to be $600 per annum.

A meeting had been held at the house of H. Turner, Esq., of the members of the Mounted Volunteer Corps, at which a committee was appointed and preliminary rules adopted. There were already 37 members enrolled.

The Rifle Association had met to contend for the subscription challenge cup. This was the first competition for the said prize, which is raised by 14 subscriptions of $5 each, and will become the property of the first member who wins it three times. The only rifles allowed are the Swiss and the Government patterns; the distances, 200, 500, and 700 yards; five shots at each range. The first holdership was gained by a score of 30 points, from an Enfield rifle, in the hands of a gentleman who then made his first appearance in the Y. R. A.

A performance had been given at the Olympic by the officers of H.M.S. *Princess Royal*. The "Practical Man" and "The Thumping Legacy" were the pieces selected. His Excellency the British Minister and Lady Parkes honoured the occasion with their presence. The performance was very excellent throughout, the actors without exception being far beyond the average of amateurs in ability. The proceeds were to be given to a charity.

Several gentlemen had succeeded in getting a small paddy field lent to them, for the purpose of making a skating ground this season. Their endeavour appears to have been to obtain a large space that might have been available for all, but this they could not manage.

The following is a translation of a letter sent by the high officers of the Yasheetchee of Satsuma at Kioto to the Mikado, with reference to the opening of Hiogo:—"Although we do not know exactly the motives which have brought into the harbour of Hiogo the ships of the barbarians, still we have been confidentially informed that, after a conference held between these same barbarians and Abe Boungono Kami, Matsmai Idzou no Kami, it has been agreed that Hiogo should be open, and satisfaction given to their demands within these ten days, and that on this occasion the Tycoon would come up to Kioto. Now, your Majesty is well aware that Hiogo (is) in the vicinity of your sacred residence and a very important port in the Insland Sea. We are, for this reason, far from thinking that your Majesty will for a moment entertain the idea of allowing the opening of Hiogo. Since the American came and trampled on our land, the resolution of your Majesty has been immutable. That we all well know and admire more than any other one of your subjects. We dare to say that we do not entertain serious anxieties on this subject. Still, it might happen that the statements made to your Majesty should move your heart, and in exacting from you concessions, put your empire in a danger and in an opprobrium unknown until our days, and which a thousand years would not repair. Nothing less than the submission or the rebellion of the hearts of the people is at stake and regrettable concessions would be the origin of immense calamities. We therefore humbly request your Majesty to convoke at once all the Daimios; and, after having taken their advice, to cause the majesty of your empire to shine once for all. However, such a measure would take time, and it might happen that these barbarians should fatigue your Majesty with their obstinate resolutions. Should they dare to act lightly, it would be the duty of your Majesty to decree their expulsion. In such a contingency, although our infirm Yasheetchee has but very few hands at present, according to the instructions of Chiowri Taiiou o Soumi no Kami (Chimatsi Sabouro') we offer to form the advance guard, and, by fighting to death, we would endeavour to show our gratitude for all the favours with which we have been blessed in the empire of your Majesty. May your Majesty deign to receive our request, and forgive its intrusiveness. The high officers of the Yasheetchee of Satsuma."

With regard to the opening of Osaka, the *Japan Herald* has the following:—

"Hiogo is to be opened in January, 1868. We regard this now as a fact—the rider, "earlier if possible," being of very infinitesimal value. The advantages of its being opened at this time will be viewed very differently by different people; but for all practical purposes, we think it is better as it is. The treaties being sanctioned, the trade will be done, and it will pass through the hands of the merchants of Nagasaki and Yokohama principally; if the trade increases as materially as we expect, other houses will start here, of those who intended making Hiogo or Osaka their head-quarters in the event of the opening, whilst those already established here will do all the increased business they otherwise would without increasing their expenses. It is, then, we say, better as it is. The opening of the port in 1868, at a definite period, and that not too early, puts every one on an equal footing; whilst the particular circumstances of Yokohama are immensely improved thereby. It is expected that in 1867 the American mail steamers between San Francisco and Hong Kong will call here, and when the railway across the American continent is complete, a very large proportion of the home passenger traffic from China will pass through; and, having the geographical advantage of being the first port of call from America and the last on the return voyage, we shall have all the benefit of earliest advices from Europe and America, and the latest from China; so that we shall be in the most favoured position for governing our transactions in both directions. By the time, then, that the port of Hiogo actually is thrown open to foreigners, we shall be in a settled and firm position, and have become the general *entrepot*. It is undoubtedly a great cause of congratulation to all merchants established here, that events took the course they did in the Inland Sea. The opening of Hiogo and Osaka without the ratification of the treaties would have been of very little use. Those who chose to proceed thither would carry their lives in their hands to an infinitely greater extent than was ever the case in Yokohama. But the ratification gives most of the advantages of the opening of the port, without any of the concomitant evils."

[Telegraphic advices from Japan are only down to the date brought by this mail, and convey no later intelligence than that above recorded.]

NAGASAKI.

A correspondent gives the following description of the Christmas festivities at this port:—In the morning a paper-hunt was got up much to the astonishment of the natives, who could not imagine the reason which induced the staid and sober foreign merchants to dress themselves in red coats, and scour the country after pieces of paper. All passed off well, and without any accident worth mentioning. Several dinner parties were of course given in the evening, but the public dinner at the "Bellevue Hotel" was said to have been the most triumphant success. The Russian band was in attendance, and the guests kept up the fun until a very late hour. On Friday, the 27th December, Captain Leckie and the officers of H.M.S. *Leopard* gave a ball on board. Notwithstanding torrents of rain which fell during the day, the ship had, with infinite pains, been kept perfectly dry. The quarter deck was transformed into a ball-room, and was most tastefully decorated with flags and evergreens. Messrs. Glover and Co. celebrated New Year's night by a ball, and again on the 6th January (the Russian Christmas Day) one of their godowns was the scene of a brilliant ball given in compliment to the Russian officers. H.I.R.M.'s ship *Variag* left for Hakodadi on the 10th January.

Freights continue dull. For Hong Kong, $2 to $3; for Shanghai, $3; for London, £2 10s. to £3; for New York, £2 18s. to £3.

CHINA.

HANKOW.

The following, from the correspondent of the *Record*, explains the telegrams published in advance of this mail. Later news is telegraphed, which will be found in another column:—

Alarming intelligence has been brought from Hankow by the steamer *Fire Queen*, which left on the 21st January. At that date a large rebel force was within thirty miles of the city, and one of the leading Imperialist generals had turned over to the insurgents' side. The Taoutai of Hankow was in great trepidation, and had applied for assistance to all the foreign Consuls. An urgent despatch conveyed by the *Fire Queen* to Captain Tucker, R.N., of Her Majesty's gunboat *Algerine*, at Kiukiang, calling upon him to proceed to Hankow, was at once complied with, that vessel leaving under steam and sail. The

Digitized by Google

presence of the French gunboat *Fardif* would doubtless provide for the safety of the foreign residents until the *Algerine* arrived. Refugees were flocking into the foreign settlement from all sides, and were noticed on the river banks for many miles below Hankow. The *Hankow Times* has an article urging the establishment of a volunteer force.

SHANGHAI.

The P. and O. mail of 27th November (overdue) arrived out on the 24th January. The dates are now down to the morning of the 26th.

The following items are from the *North China Herald*:—

"We are happy to be able to announce the arrival of the French Opera Company, which has been so long expected. The company landed on the 16th Jan. from the French barque *Le Leon*, and opened their season on Monday last with Donizetti's opera "La Favorite." Favourable criticisms on the merits of some of the principal singers have already appeared in the local press. At 12 o'clock midnight of the 12th, just as the last visitors were leaving the Lyceum Theatre, after a highly successful performance by the Shanghai Rangers, many were startled by the report of a cannon followed by several rockets, and the sudden illumination of the sky. The commotion was caused by the Russian man-of-war, the officers and men of which thus celebrated the opening of the new year, January 1st, O.S. Immediately after the gun was discharged the *America* was wrapped in blue fire, which blazed on her yards, rigging, and paddle-boxes. The sight was an excessively pretty one, and amply rewarded those who ran through the snow from the theatre door to discover the cause of the excitement.

"A general meeting of the Shanghai Volunteers was held on the 11th Jan. to discuss the question of whether the corps should be disbanded, as well as other topics of considerable interest. The position of the Infantry battalion was forcibly depicted by Sir Edmund Hornby, and his appeal to the members and to the community should have a good effect. It was universally agreed that the corps should be sustained, and the following gentlemen were elected as officers for the current year:—

Sir Edmund Hornby	Commandant
J. Markham, Esq.	Captain, S.M.R.
J. Smith „	Lieutenant „
— George „	Cornet „
P. Maclean „	Captain, S.V.C.
J. J. Cann „	Lieutenant „
E. St. Croix „	Ensign „
C. Alabaster „	Secretary
— Maccall „	Treasurer
Rev. C. H. Butcher	Chaplain
Dr. Parker	Surgeon

"It was proposed and carried that the strength of the Infantry should for the present be lowered to one company. As to Mr. Webb's claims, it was proposed and carried that a letter should be written to him, stating the desire of the corps to discharge the debt, but stating that for the present there are no means at its disposal; at the same time offering to hand over the rifle butts and main guard, and pay rent for the use of them.

"The *Rajah of Cochin*, which cleared on the 8th January for London, was detained under somewhat strange circumstances. Some weeks ago the captain of H.I.R.M.S. *America* requested the master of the *Rajah of Cochin* to haul down his distinguishing flag, which bore a remarkable resemblance to the Russian ensign. This the master refused to do until he received an order from Captain Boyes, of H.M.S. *Barossa*, when he lowered it without further difficulty. However, when proceeding down the river, he seized the moment when he was passing the Russian man-of-war to fire two guns and hoist the obnoxious flag. The joke, however, cost him somewhat dear, for a boat put off from the *Barossa* and brought the *Rajah of Cochin* to off the first point, where she lay until the 14th.

"The accounts which have been received during the past fortnight respecting the movements of the rebels are to the effect that the Nienfei are now in the vicinity of the Grand Canal, about 300 li north of the Yangtsze River, and have been pushing their way steadily southwards, it being affirmed that the Imperialist forces have met with severe reverses.

"Business during the past fortnight has been generally limited both in imports and exports, the most notable feature being a resumption to a moderate extent of shipments of cotton to Liverpool, consequent upon the rise in the home market. In manufactures, though a large speculative demand has existed both on the spot and to arrive among foreigners, inquiry has not been active on the part of the natives, consequent upon the approach of the holidays. We have to note a rise of 1.5 to 2.0 tls. in 8 lb. 4 grey shirtings. In woollens little inquiry, but prices maintained.

"A small steamer, measuring 60 feet in length and 14 feet in breadth, has been constructed by the Chinese Government, without European assistance, and has made a successful trial trip on the river.

"Stephens, Garde and Watt, the three prisoners charged with the murder of Macdonald at Hankow, on the 1st October, were tried at the Supreme Court before Sir Edmund Hornby and a jury. The evidence against Watt was, at the opening of the case, stated by the Counsel for the Crown to be defective, and he was therefore released and appeared as a witness. The whole of the evidence, which was mainly circumstantial, was strongly against the prisoners, but there was a link wanting to make it sufficiently clear to give a conviction. The jury found the prisoners "Not Guilty" as charged, but expressed their abhorrence and disgust at the conduct of the prisoners and of several of the witnesses. They also recorded their opinion that some reform was needed in the system of licensing grog shops."

A correspondent of the *North China Herald* writes from Soochow:—

"Recent advices inform us that Lieutenant-Acting Futai whose resignation we announced in our last issue, has been directed to continue the discharge of his duties, and make such domestic arrangements short of leaving his post as the emergencies of his situation may require. Robberies have lately become of frequent occurrence in the provincial capital. A few nights ago about 100 thieves made an entrance into a large Yamên through a hole dug through a wall at the back, and completely gutted the premises. They got in so quietly that the inmates, who were all fast asleep, were bound and gagged before any alarm could be given. It was discovered that the robbers were soldiers belonging to the camp of Li, Tung-ling of Kiang-su, and that their leader was a mandarin with a glass button and black feather, one of the officers attached to the camp. This man had formerly been a rebel chief, and enjoyed the implicit confidence of the Chung Wang. The civil authorities were very backward in interfering when they discovered that the robbers were attached to the command of so high an official as Liu, but he quickly settled the matter by decapitating the mandarin, and, we believe, disbanding the soldiers."

Judgment was given by the U.S. Consul in the case of Thos. Hunt and Co. *v.* J. B. Parks, arising out of a claim for certain machinery supplied by the plaintiffs for the steamer *Hercules*. The decision was for the plaintiffs, with costs.

The German Club Concordia was formally inaugurated on Wednesday evening, 10th January, in the presence of about seventy members and several guests. The chair was occupied by Mr. Tettenborn, President.

The Chairman in opening the proceedings, said:—Gentlemen, I have this evening the satisfaction of welcoming you within the walls of our new club. Look round you in every corner of the building, and I trust that you will find that the work which we have done is a credit to us. Your task it will now be to give vitality, and I trust a long continued vitality, to this institution. My sincere desire is that these walls may for years to come be witnesses of rational enjoyment and cheerfulness, and that from to-night the whole building may be transformed into a temple of German faithfulness, German manliness, and German hospitality. (Loud cheers.) The minutes of the last preliminary meeting were then read and approved, and the statutes were passed. The house rules were also submitted, and after some discussion passed in the form in which they had been laid before the meeting. It was then proposed, seconded, and carried unanimously:—"That the permanent committee, consisting of Messrs. Tettenborn, Ohl, Hubener, Fierz and Siegfried, enter upon the discharge of their duties, and that the thanks of the meeting be given to the provisional committee who now retire." A large attendance of gentlemen of all nations kept up the convivialities of the ceremony during the evening.

In addition to the repeated complaints of passengers against the P. and O. Company, the one of non-delivery of parcels is now revived with considerable emphasis. The articles sent by this route pay a high freight for quick delivery, and it is a hard case to have them left behind *en route*.

At a meeting of subscribers to the British Episcopal Church, the plans prepared by Mr. Gilbert Scott, and enlarged by Mr. Kidner, were unanimously approved. The following statement was made by Mr. Cuthbertson, the Treasurer:—

Digitized by Google

"The old church of Shanghai, in which Mr. Hobson preached and many of us worshipped, was taken down in the year 1862, and it was not until June, 1863, that the trustees were instructed to apply to Mr. Gilbert Scott for a new design, which, it was hoped, would be a model of modern ecclesiastical architecture. Whether we might not have done better by consulting a gentleman of less reputation but with more time at his command than Mr. Scott evidently has, it is needless now to inquire; it is sufficient to say that those instructions were at once carried out. Mr. Scott was written to, the main conditions laid down being that he should prepare plans of a church to accommodate 800 at a cost of £20,000, and let us have them at as early a date as possible. Unfortunately, reference had to be made to Shanghai for information as to the materials that could be obtained, the cost of labour, and sundry other matters; and it was not until the 1st of November, 1864, that the plans reached us. Instead of a church with 800 sittings, we found that Mr. Scott had only provided for 460, and the lowest estimate that could be obtained was, exclusive of the spire, 75,000 tls. Seeing the absolute necessity of some considerable alteration, Mr. Kidner was employed by the trustees to enlarge the general plan so as to give the requisite accommodation; and his drawings, with the necessary explanations, were laid before a meeting held on 4th February, 1865, the minutes of which are now before us. At that meeting the amended plans were agreed to, and the trustees authorised to begin operations when a further sum of 2,000 taels had been subscribed. Notwithstanding this resolution the trustees felt that in a matter of so much importance unanimity was not only desirable but indispensable, and with a view to remove objections which had been strongly urged, they decided to refer the plans to Mr. Scott for his approval. Mr. Scott has expressed himself fully satisfied with all Mr. Kidner has done, and consequently we are now justified in saying that the design of our new church is in point of fact as thoroughly a work of Mr. Scott's as if the alterations had been entirely his own. We propose to bring the foundation of the spire only to the level of the ground line, leaving its erection in accordance with Mr. Scott's design to the residents of future years, unless the amount of subscriptions received should greatly exceed our expectations. For a vaulted brick roof, involving large expense and considerable difficulty of construction, we have substituted one of timber, keeping however to the original lines, and for Singapore wood we propose using ordinary piles and American timber for the roof and fittings, while the arches, as shown in the drawings, can be of brick throughout instead of granite. These modifications, not affecting the comfort or accommodation of the church, and perhaps rather improving the general appearance, have enabled us to bring down the estimates to 55,000 tls."

HONG KONG.

The dates by the present mail are up to the 1st Feb., or three days later than received per French mail, and published in our issue of the 7th inst. Business was quiet, owing to the Chinese New Year holidays and the approaching races.

The piratical attacks noticed in the telegrams published in the daily papers (in advance of to-day's mail) were recorded in our issue of the 7th inst.

(FROM A CORRESPONDENT.)

JANUARY 30, 1866.

The most notable event of the fortnight here has been the complete change effected in the journalistic arrangements of the colony, by which a marked improvement in the local press has been produced. In the first place, the *Daily Press*, which has for years been noted for its scurrility and extravagance under the editorship and proprietary of Mr. Y. J. Murrow, whose object throughout his career seems to have been that of outdoing even the wildest eccentricities of the *New York Herald*, has passed into the hands of a gentleman lately connected with one of the London penny dailies, and has at once altered in the tone of its articles, whilst the general conduct of the paper exhibits also a marked degree of ability. On the other hand, the weekly *China Mail* and the *Evening Mail*, the late editor and proprietor of which, Mr. Kemp, died a month or two ago, have passed under the management of Mr. N. B. Dennys, who has left Her Majesty's Consular Service to enter upon an editorial career, and who is considered likely to succeed in infusing new life into the long-established concern of which he has taken charge. The *China Mail* has for many years borne the reputation of being the best conducted paper in this part of the world, but owing to the illness and decease of its late editor it has become sadly in want of new and capable management. A want that has long existed in the press of Hong Kong has been an acquaintance with the Chinese language and a proper insight into the habits and institutions of the people. This will now doubtless be obviated by the circumstance that Mr. Dennys has spent some years in the study of Chinese, whilst his recent intercourse with the official classes will be of great service to him in estimating the nature of current public events. It is not alone the press of Hong Kong that has laboured under the reproach of Egyptian darkness in respect to all matters concerning the Chinese, who stand in the ratio of 120 to 1 of the population of the island. So far as any adaptation in the system of Government to the special requirements of such a population is concerned, one might conceive that the theory on which it is based had been formed by persons ignorant of the existence of any but Europeans in Hong Kong. Although we are within ten minutes, sail of the Chinese coast and six hours' steam (costing ten cents for the trip) of the city of Canton, not a single restriction is placed upon the ingress of the lowest classes of natives, notwithstanding the acknowledged fact that the colony affords an asylum to the most desperate robbers and pirates of the coast; and the consequence is that every afternoon the two opposition steamers from Canton disgorge each their hundreds of villanous-looking native passengers, arriving here without visible occupation or means of support, whilst the same steamers similarly carry away in the morning crowds of returning adventurers, on their way back to Canton, enriched with the fruits of the robberies perpetrated nightly, or of the petty thefts occurring in the principal thoroughfares almost every hour of the day. The police force which is supposed to cope with this criminal multitude consists, as to its constables, of slouching Bombay natives, scarcely one of whom understands more than a dozen words of English, whilst none understand Chinese; and, as respects the sergeants and inspectors, chiefly of discharged sailors and other low-class Europeans, whose ridiculously low pay of $12 to $15 per month is constantly adduced in extenuation of their negligence and accessibility to bribes. The evil in this respect has been complained of for years, but no steps seem to have been taken to seek a remedy; but a mortifying occurrence which has taken place within the last few days will perhaps hasten a much-needed change, more especially if Sir Richard MacDonnell proves on arrival as painstaking and earnest an administrator as described to be. The Chinese shopkeepers and other respectable native residents have presented a petition to the Colonial authorities setting forth that, in view of the outrages and depredations to be expected at the season of Chinese New Year, now close at hand, and of the well-known inefficiency of the Colonial police, they are anxious to organise a temporary force of armed watchmen at their own expense, and requesting permission to that effect. What answer has been returned is not yet known, but the Government will probably refuse its consent. The efficiency of its own arrangements may be gauged by the fact that two European vessels have within the last ten days been attacked and plundered by pirates within a mile or two of the island, whilst a third was actually boarded the other night when at anchor in the harbour, and only saved from pillage by the courage and address of the mate.

The Chinese authorities of the mainland have not yet succeeded in tracing any of the ringleaders in the late lamentable affair of the *Pride of the Ganges*. A mandarin was appointed to proceed to Hainan, where the coolies landed, and endeavour to secure the mutineers, but the naval authorities here refused to detach a gunboat for the purpose of conveying him to the spot, whilst a small steamer belonging to the Canton Customs which was thereupon despatched with him was obliged to put back in distress. Orders have, however, gone down overland to the local officials, requiring them to use every effort for the capture of the mutineers. It is ascertained that only some twenty to thirty of the three hundred coolies on board took any active part in the rising, the remainder either passively looking on or assisting under compulsion and threats; and there are strong reasons for supposing that the ringleaders went on board the ship in the guise of emigrants with the deliberate purpose of effecting a rising as soon as they should get to sea, with the belief, no doubt, that a large sum of money must be carried on board. The lamentable lack of precaution against possible dangers of this kind which the captain, though duly warned before sailing, seems to have manifested, made the mutiny an easy task, and led to his unhappy end. A court of inquiry on this subject has concluded its sittings, but its finding has not yet been made pub-

Digitized by Google

lic ; and the same court has also been engaged in investigating the circumstances attending the despatch of a shipload of coolies to Dutch Guiana early last year, among whom an appalling mortality took place. The agent for this enterprise is a German ex-missionary, the Rev. W. Lobscheid, who has abandoned the cause of proselytism for this and other dubious undertakings, among which is the editing of a Chinese newspaper partaking largely of the tone of the journal lately conducted by Mr. Murrow, who, indeed, was also the founder of the Chinese paper. It appears that the large mortality on board the vessel referred to took place among a batch of coolies rejected from the barracoons at Macao as unfit for Havanna or the Chinchas, and who were thereupon brought to Hong Kong by the crimps who had in the first place sought their market at Macao. This fact indicates a considerable laxity in the conduct of the emigration inspection here. The employment of crimps, indeed, under the euphonious designation of "brokers," cannot be sufficiently reprobated, and was one of the proceedings most energetically forbidden by Mr. Parkes, when remodelling the system of emigration in force at Canton.

It is rumoured that the foreign Ministers at Peking have drawn up, conjointly with the Chinese Government, a new code of regulations for coolie emigration, to come into effect during the ensuing year. So long, however, as kidnapping can flourish unchecked at Macao, restrictions at the Chinese ports will be of little use.

The remnant of the rebels who, owing to the miserable incapacity of the Imperial commanders, made their way back into this province two or three months ago, after having once been driven out of it, are still in possession of the city of Kia-ying-chow, about 80 miles inland from Swatow, and are reported to have equipped a fleet of fighting boats as if with the design of descending the river Han towards Chaou-chow-Foo, the city whose inhabitants, the most turbulent in China, have so long successfully resisted the entry of H.M.'s Consul to the place. The Chinese Government itself would, I fancy, be rather pleased than otherwise if these unruly subjects should get a toning down at the hands of the rebels.

The first general meeting of the shareholders in the Hong Kong and Shanghai Banking Company is to take place early in February, when a dividend of about six per cent. for the period (nine months) during which the bank has been working will probably be declared.

STRAITS OF MALACCA.

SINGAPORE.

The French mail of Dec. 17 has arrived out, and the P. and O. mail of Dec. 27 arrived on Jan. 30. The following summary of news is from the *Straits Times* of Feb. 8 :—

In our issue of the 18th it was stated that all the steamers of the Bombay and China Merchant Steam Navigation Company had been offered for sale at Bombay, and would ply no longer between that port, the Straits, and China ; we now learn that, by the *Behar*, which arrived yesterday, advices have been received here to the effect that the company had liquidated all its claims, and that the steamer *John Bright* would leave Bombay for Singapore and China on the 25th instant.

In our issue of 3rd January we referred to an article in the *Java Gazette* of 15th December (our translation of which, however, does not convey quite a correct impression), of the transfer of Mr. H. O. Robinson's mail contract, for the Eastern Archipelago, to the Netherlands India Steam Navigation Company. We stated that the contract had been declared null and void, but those are merely the legal terms of stating that the contract no longer stood in Mr. Robinson's name, he having transferred it to the Netherlands India Steam Navigation Company, of which company he is the largest shareholder, and the managing director in London. Mr. Fraser, a co-director in London, is the chief agent and representative of the company in Netherlands India.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

DEANE—On the 23rd January, at Singapore, the wife of Captain T. S. Deane, of a daughter.

FITZROY—On the 22nd January, at Shanghai, the wife of George H. Fitzroy of a daughter.

POHL—On the 1st Mar., at Hamburg, the wife of Gustav Pohl, Esq. (Messrs. Stevens and Pohl), of a daughter.

RYRIE—On the 31st January, at Hong Kong, the wife of P. Ryrie, Esq., of a daughter.

STACE—On the 6th Mar., at his residence, Portswood Lawn, Southampton, the wife of E. K. Stace, Esq., of a son.

SEVERS—On the 6th Mar., at 24, Kensington-gardens-square, the wife of Henry H. Severs, Esq., of a daughter.

SMALE—On the 12th March, at 18, Chalcot-terrace, Regent's Park-road, the wife of J. Jackson Smale, Esq. (late of Hong Kong), of Lincoln's-inn, barrister-at-law, of a son.

MARRIAGE.

MACKAY—FRASER.—On the 1st March, at Abersky, near Inverness, by the Rev. Dr. McLauchlan, Edinburgh, George Mackay, Esq., Shanghai, to Fanny Leech, only surviving daughter of Hugh Fraser, Esq.

DEATHS.

CAREY—On the 23rd January, at Shanghai, after 15 weeks of intense suffering, Marian, the beloved wife of Henry Wm. Carey, of Hankow, in her 29th year.

DENNIS—On the 8th Mar., at Norbury House, Reigate-hill, the residence of her sister, Mrs. Tucker, Anne, third daughter of the late John Dennis, Esq., of Rose-hill, Dorking.

HAY—On the 9th Feb., at his residence, Ford Hall, near Sunderland, Durham, William Hay, Esq., aged 52.

HOW—On the 4th March, at Gordon House, Turnham-green, Thomas How, Esq., in the seventy-ninth year of his age.

KOSABURO—On the 26th Feb., Yamazaki Kosaburo, a native of Japan of the Retinue of Prince Negato, aged 22.

MOTTLEY—On the 12th March, at Hastings, Herbert Mottley, aged 23, second son of the late Dr. Mottley, of Shanghai, China.

RAWSTHORNE—On the 5th Mar., on board the ship John Lidgett, off Gravesend, on her homeward voyage from China, Edward, fifth son of the late Thomas Rawsthorne, Esq., formerly of Heysham Hall, Lancashire, aged 28.

ROBERTS—On the 31st December, at Chefoo, Thomas Roberts, Tidewaiter H.I.M.'s Customs, aged 44.

TORREY—On the 30th Dec., at Manila, Rollins Torrey, Esq., of Boston, U.S.A., of the firm of Russell and Sturgis.

TOGGENBURGHER—On the 23rd January, at the Mission House, West Point, Hong Kong, the Rev. John Ulrich Toggenburgher, of the Basel Evangelical Mission.

WATSON—On the 31st January, at Hong Kong, Mrs. Watson, the wife of the proprietor of the Stagg Inn, Queen's-road Central, who fell from the top verandah of the building, and was instantly killed.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—CANTON.—A very limited business has been done during the past fortnight, the demand for Canton Gunpowders having suddenly ceased, and the teamen holding other kinds with extreme firmness, with a great scarcity of all desirable tea. Country Congous: No transactions are reported, and the offers made were withdrawn immediately after the departure of the last mail, and, unless holders lower their ideas considerably, there is but little prospect of the stock being sold this season. Country Greens: Only one chop of these descriptions has arrived, for which 54 tls. proportion is asked, and the only offer reported is 45 tls., which has been refused. The stock on the market consists of 6 chops country Congou, 550 half-chests country Greens, and a quantity of Canton teas in a variety of stages of preparation.

FOOCHOW.—The few parcels of Congous coming forward have been taken at full prices, and a large proportion of the small stock on hand consists of mixed lots of refined Foochow and Amoy Teas. During the fortnight the sales have been 4,000 chests at the following prices:—Dust and broken leaf kinds, 7½ to 13 tls.; Ordinary Common, 14 to 17 tls.; Good Common, 17 to 20 tls.; Fair Flavory, 20 to 23½ tls. There were no sales of Kysow kinds or of Souchong. About 2,100 half-chests of Oolong were disposed of, common to fair cargo at 8 to 10 tls., and fine at 23 to 28½ tls. About 140 chests of Flowery Pekoe were sold at common to medium 25 tls. No sales for the finest kinds; 720 boxes of scented Teas were disposed of at 21 tls.

SHANGHAI.—Black Teas: Transactions have been confined to the purchase of three small chops of Oonams and Ningchows and four local packed Congous, prices for which may be quoted fully equal to previous rates. About 1,500 chests have just arrived from the river ports, and there are one or two parcels of leaf now being made up and packed on spot. Settlements have been 2,100 chests Oonam at 21½ to 23½ tls., Ningchow at 23 to 27¾ tls., and Shanghai packed 18¼ to 20¾ tls. Re-shipments have been 1,100 chests, and the stock consists of 1,500 chests as above. Total shipments from 1st June (including Hankow re-shipments) 264,800 chests, against 376,200 chests at same date last year. Green Teas: There has been rather less inquiry for these descriptions, the mail news both from England and America being not so encouraging as of late; prices, however, show no material change, holders continuing firm, as the stock both at this and Kiukiang is now much reduced. Further supplies from the country, it is expected, will not exceed 30,000 packages. Settlements have been 12,600 half-chests Fychow and Moyune at 34¾ to 52 taels, and 1,300 half-chests Pingsuey at 41 taels. Reshipments amount to 5,600 half-chests, and the stock is estimated at 14,000 half-chests Fychow and Moyune, and 2,500 half-chests local packed Fychows. Total shipments from 1st June, 235,600 half-chests, against 162,900 half-chests at same date last year.

YOKOHAMA.—A large amount of business has been transacted in the Tea market, and the entire settlements have been for America, consisting of Good Medium and Fine kinds; in other descriptions we do not hear of any purchases having been made. Prices have again advanced and show a further rise of about $1 to $2 for Good Medium to Fine kinds, other

Digitized by Google

classes are unaltered. Of the total export for the season (about 5,375,000) the quantity exported to the United States direct was 4,485,000, the remainder to England.

RAW SILK.—The quantity of silk going to Europe by this opportunity is, 70 bales for Marseilles, and 640 for Southampton. The M. I. steamer Donnai took 365 bales for Marseilles and 330 for London.

CANTON.—A fair amount of business has been done considering the lateness in the season, and with one exception of 45 bales Tsatlee all purchases have been made for India. Stocks both here and in the country are getting very small, and for which even higher than present quotations are asked. The settlements of the fortnight have been 115 piculs of silk, 50 piculs of pierced cocoons and 200 bales of silk waste. Loongkong, No. 1, $630 to 640 per picul. No. 2, $75 per picul.

SHANGHAI.—Since the last report a limited business has been done in China Silk, the smallness of stocks, and the increasing value of the finer classes, preventing purchases, seeing that at such high cost no favourable result can be expected. Settlements since the departure of the last mail amount to about 600 bales. Prices have advanced about 5 to 10 tls. on Tsatlees and in one instance an advance of 40 tls. per picul has been paid on chop Haineens, though the ordinary classes are not quoted more than 10 tls. higher. The following are the latest quotations:—Tsatlees: Chops No. 3, 620 tls. per picul.

YOKOHAMA.—Soon after the arrival of the mail, business commenced amongst a few buyers, and from the desire evinced to secure fine parcels of Silk, there has been more than the usual average of rejections: these qualities are very scarce, and as soon as they arrive, find buyers very soon at $920 to 940 per picul. The total business for the fortnight may be estimated at from 550 to 600 bales, bringing our export up to say 8,000 bales, against 9,300 bales same time last year. Arrivals have about kept pace with settlements, and there are now from 1,000 to 1,500 Japanese bales on offer, all sorts included. Rather more Oshiu Silk has come down lately, for the fine descriptions of which very high rates are asked. It is not too much to say, that the greater portion of the whole stock is composed of inferior classes of Silk.

DRUGS, &c.—MACAO.—Cassia Lignea: No supplies have come to hand during the past fortnight, and the market is quite bare; we quote nominally $18 50. Cassia Buds: The demand for this article seems to have fallen off entirely, and although dealers have reduced the price to $43, no sales have been effected; as holders seem anxious to realise, a further decline is probable. Cassia Oil: The stock has been increased by a fresh supply to 45 piculs and consequently prices are somewhat easier, but as there is no inquiry whatever for this article, owing to the unfavourable news from the home markets as regards the same, in all probability the price will most likely still decline. At present dealers ask $185 per picul. Star Anniseed: Large arrivals have occasioned prices to decline $1 per picul. The sales amount to 800 piculs at prices varying from $21 to 21.50, according to quality. As the stock is rather heavy and estimated at 1,500 piculs, still lower rates are expected to rule for the future. Star Anniseed Oil: For a parcel of 5 piculs lately arrived, dealers asked the exorbitant price of $205, but have since reduced it to $196, however, without finding a buyer. China Galls: None have to come to market as yet, and we continue to quote nominal $14 per picul. China Root: Our market has been supplied with 500 piculs, and found buyers at the high rate of $3.50 per picul. Galangal: 500 piculs changed hands at $1.75 per picul, leaving 1,300 piculs on the market, offered at the same price. Vermilion: $34 per box of 900 packages, and $38 per box of 1,000 packages.

CHINA IMPORTS.

HONG KONG.

COTTON YARN.—Sales comprise 38 bales of No. 16 to 24, and 10 bales of No. 40. Grey Shirtings: Sales include 3,700 pieces of partially damaged goods sold at public auction. American Drills, &c.: None here. Quotations nominal. White Spotted and Dyed Shirtings: No sales to report. Damasks: No clearances. Chintzes: A slight demand for assorted chintzes.

LONG ELLS show a further decline in price. Sales include about 1,000 pieces "to arrive." Camlets: The slight demand which existed for shipment to Japan has subsided, and camlets are again neglected. Lastings and Blankets: No sales.

METALS.—Iron: A good demand continues for Nail Rod Iron. Of Round and Hoop Iron and wire there are no sales to report. Prices are unchanged. Lead: Has advanced steadily, in consequence of a strong demand, and the very limited shipments on the way from Europe. In Canton 500 piculs have found buyers at an advance of 10 cents on last quotations. Tin: Sales include 174 slabs Malacca Tin. Tin Plates: Show an improvement in prices, while clearances are considerably over last fortnight's. Quicksilver: 100 flasks have found buyers in Canton, besides the sales reported in the margin.

COALS.—HONG KONG.—During the fortnight about 7,000 tons of Welsh, and 4,000 tons of English of the September shipments have arrived, which has had a somewhat depressing effect on the market. We quote English and Welsh $13 to $13½ nominal. Australian inquired for at $12 SHANGHAI.—Receipts have been of English, 1691 tons; Welsh, 515 tons; American, 740 tons; Australian 762 tons; Formosa, 600 tons; Japan, 200 tons; in all, 4508 tons. Prices of English and Welsh Coals have been well maintained, and sales of all afloat have been made at tls. 10.5.0 for the former, and 11.2.5 tls. to 11.5.0 for the latter. American coals show a considerable decline, the demand for that description being very limited now, and the Resolute's cargo of 740 tons was sold at 11 tls. per ton. Sydney coals continue in favour, and one cargo has been sold at tls. 9.5 Japan and Formosa coals are in fair request at 7 tls. for the former, and 6 to 7 tls. per ton for the latter. We quote: American Anthracites, tls. 11 (66s. 11d.); English, tls. 10.5 (63s. 10d.); Welsh, tls. 11.2.5 to 11.5.0 (68s. 5d. to 70s.); Sydney, tls. 9 to 9.5 (54s. 9d. to 57s. 9d.); Newcastle (N.S.W.), tls. 9 (54s. 9d.) per ton of 2,240 lbs. from ship's side.

COTTON.—HONG KONG.—During the last fortnight the activity of this market has been increased by higher quotations from home, but the prices named in the last report are still ruling, as the stocks are large. A few parcels of good Bengal and China were sold at $22.75 to 24.50 and $26 to 29. The approach of the China new year has tended as usual to diminish sales. The high quotations from England have induced some shippers to make consignments to London. The latest quotations are—Bengal, $22 to 24, and China, $26 to 28. The stocks are estimated at about 30,000 bales Bengal and 15,000 bags China.

CANTON.—The market advanced one tael early in the fortnight, when a moderate business was done, but as buyers held off, the advance was lost, and the quotations are the same as those given last mail. The sales reported are—300 bags Shanghai at 18 to 19½ tls., 300 bags Ningpo at 20 to 21½ tls., 1600 bags Shantung and Tientsin at 18 to 20 tls., and 1500 bales Bengal at 15 to 17½ tls. The stock consists of 1500 bags Native staple and 800 bales Bengal.

SHANGHAI.—The late advice of a further rise in the home market has had the effect of inducing some moderate shipments to be made to Liverpool. The market is firm at 10 to 20 tls. per picul.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—From London: Jan. 4, Scinda; 5, Maravi; 14, Chanticleer.

At SHANGHAI.—From London: Jan. 7, James Shepherd. From Sunderland: Seawfell: 16, Alma. From Newcastle: 14, Edgar Ross. From Cardiff: 16, Geo. Canning. From New York: 8, Resolute.

At HONG KONG.—From London: Jan. 27, Fiery Cross, Sovereign of India, Dilpussund. From Liverpool: 17, Her Majesty; 29, Stuart Wortley. From Cardiff: 24, John Rennie; 29, Alane, David, Europa; 30, Maury, St. Croix. From Sunderland: 29, Lennox Castle. From Swansea: 29, Fort Regent, John Milton. From Hamburg: 21, Cary and Jane.

At MANILA.—None.

At SINGAPORE.—From Sunderland: Jan. 31, Jurgen Bruhn. From Swansea: 24, Charlotte. From Rotterdam: 22, Mary Goddard. From Hamburg: Feb. 6, Fromm. From Lisbon: 2, Venus.

At PENANG,—From London: Feb. 3, Bride. From Lisbon: Jan. 18, Carmentin.

DEPARTURES.

From YOKOHAMA.—For London: Jan. 16, Cleveland. For New York: Dec. 30, Flatworth; Jan. 13, Valetta; 16, Monkchester.

From SHANGHAI.—For London: Jan. 10, Rajah [of Cochin; 14, Petchelee; 21, Peter Denny. For New York: 21, Anglo Saxon (via Foochow); 22, Horatio; 23, Grasmere.

From HONG KONG and CANTON.—For London: 18, Agincourt; 24, Victoria (via Macao). For Hamburg: 12, Uranus. For Havre: 19, Taffarette. For Bordeaux: 20, Reconnaisance. For New York: 28, Hugo and Otto.

From MACAO.—For London: Jan. 22, Mountain Ash.

From MANILA.—For Cork: Jan. 19, Trebizond. For Boston: 16, Goethe.

From SINGAPORE.—For London: Jan 21, County of Ayr; 27, William Simpson. For Liverpool: Feb. 6, Roslin Castle. For Falmouth: Jan. 22, Aguste and Miline; 31, Fred. Warren; Feb. 1, Cheefoo. For Bordeaux: Mobely. For New York: 3, Ortelius; 6, Friz and Anton.

From PENANG.—None.

LOADING.

At NAGASAKI.—For London: Chanticleer.

At YOKOHAMA.—For New York: Louisa Braginton.

At SHANGHAI.—For Liverpool: Aerolite, Empress. For New York: Hotspur, Catalpa.

At FOOCHOW.—For London: Adelina. For New York: Buena Vista.

At AMOY.—For New York: Marco Polo, Amaranth.

At HONG KONG and CANTON.—For London: Queen of the Age. For New York: Peep o'Day, Dan, Eastward Ho.

At MANILA.—For Liverpool: Feliz. For Falmouth: Cinco Hermanos, Ferozepore. For Hamburg (*via* Iloilo): Voladora. For New York: Santee, Endeavour. For Boston: 20, Mindora, Dorchester, Bengal, Sacramento.

At SINGAPORE.—For London: Nancy Bryson, Como Golconda. For New York: Appellina. For Boston: Borneo.

At PENANG.—For London: Kinnaird. For Boston: Agnes.

VESSELS PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA, &c.—Jan. 11, John Watt, Cardiff to Singapore.

From CHINA, &c., to ENGLAND and CONTINENT.—Jan. 9, Cupella, Batavia to Europe; 10, Affghan ditto; 13. Moulin, Menado to London; 14, Latona, Singapore to London; Hermeline, Singapore to Falmouth; Assyrian, Foochow to London; 15, Monsoon, Manila to London; 16, Albuera, Foochow to London; James Russell, Macao to London; 17, Cambalu, Foochow to London; St. Luis, Saigon to France; Nordcap, Zebu to Cork; 21, Los Nidales, Zebu to Queenstown.

From CHINA, &c., to UNITED STATES.—Jan. 13, Memento, Shanghai to New York; 16, Chinesenen, Singapore to New York; 17, Gem of the Ocean, Canton to New York; 19, Formosa, Amoy to New York; 21, Antelope, Hong Kong to New York.

FREIGHTS AND CHARTERS.

YOKOHAMA.—To London: Cotton and Tea, £2 to £2 10s. per ton.

SHANGHAI.—To London and Liverpool: The vessels on the berth are loading at £2 to £2 5s. per ton of 50 cubic feet; there is an improved demand for tonnage, and freights have a tendency to rise.

HONG KONG and CANTON.—Home freights remain unaltered: from the Burmah Ports, £3; open charters are still obtainable. For London, the Victoria and Queen of the Age have a full cargo engaged, the latter at £2 10s. per ton, at which rate the Emilie has taken the berth to load a general cargo. According to the circular of Geo. Holmes, the estimated number and tonnage of disengaged vessels in Hong Kong is 41, representing 21,755 tons.

Digitized by Google

MANILA.—The Cinco Hermanos has been taken up for Falmouth, to discharge in the United Kingdom, at £2 17s. 6d. per ton for unclayed sugar. The Feliz loads for Liverpool with about 500 tons unclayed sugar, at £2 15s. Tonnage is in limited supply, and rates will probably advance further as produce becomes more abundant.

SINGAPORE.—To London: £2 per ton dead weight, £2 10s. light freight. To New York: £2 5s. dead weight, and £3 light freight.

PENANG.—There have been no available vessels arriving; a chartered vessel for London, the *Kinnaird* at £2. 2s 6d. to £2 12s. 6d. has arrived and about completed her dead weight, still seeking light freight, of which it is almost impossible to get any quantity. Should the demand for tonnage to the rice ports continue, rather higher rates may be expected.

ARRIVALS REPORTED BY TELEGRAPH.

At SHANGHAI.—Jan. 31, Serica, from London; no date, Sir W. F. Williams, Maiden Queen, Lansdowne, and Antipodes, from London.

At HONG KONG.—Feb. 1.—Taitsing, from London.

COMMERCIAL POSTSCRIPT.

THE P. and O. Company's tender for the Mauritius mail service has been declined. It is believed that the Postmaster-General has accepted the tender of the Union Company to run a line between Galle and Mauritius, which will lengthen the time of transit about ten days. The only direct mail is therefore that carried by the French Company.

The report of the Agra and Masterman's Bank (Limited) has been issued preparatory to the meeting. The audited accounts for the year ended 31st December last show that after making ample provision for bad and doubtful debts, the available surplus is £250,254. Out of this sum the directors have paid two half-yearly dividends, at the rate of 10 per cent. per annum, adding on each occasion a bonus of 15s. per share, thus making the total distribution for the year 16 per cent., free of income-tax, on the increased capital of one million and a-half sterling. The balance, £10,254, is carried forward to profit and loss account for the current year. The directors have to announce that during last session an Act of Parliament was obtained for enabling the bank to divide the original shares of £100 each into two shares of £50 each. The subdivision has been carried out, and the capital of the bank now consists of 60,000 shares of £50 each, of which £25 per share have been paid up. A branch of the bank has been opened in Paris, under the management of an influential local board, and they are glad to state that the results from the commencement have been satisfactory.

ARRIVALS NOT INCLUDED IN THE TABLES.—March 14, at Falmouth' from Maulmain, Storm King; 15, from Batavia, Zodiac; Feb. 23, at Havana, from Macao, Arizona; 27, at New York, from Amoy, Esmeralda; March 15, at London, from Canton, Annie Archbell; at Deal, from Shanghai, Whitehall; Feb. 28, at New York, from Amoy, Wild Gazelle; March 16, at Falmouth, from Batavia, Lady Alice; off the Start, from China, Chrysolite; at Deal, from Foo-chow-foo, Merse; 15, Lord Macaulay; from China and New York, Glenaros; off Queenstown, from Ceylon, Victoria Cross; at Falmouth, from Singapore, Maggie.

DEPARTURES.—March 13, from Cardiff for Hong Kong, William Mitchell; from Liverpool for Singapore, Chili.

LAID ON.—At Liverpool: For Bangkok, Emmannuel. For Singapore, Hermann Doctor. For Galle, Anna Maria. At London: For Hong Kong and Canton, Invincible.

CASUALTIES.

The Douglas (s.), Baker, from Aberdeen for Hong Kong, put into Gibraltar, March, with her shaft broken. The P. and O. Company's steamer from Southampton on the 20th inst. will take her a new one.

The Landbouw, Sissingh, from Pasaroeang to Amsterdam, which put into Mauritius 26th January leaky, had also broken her pump and sustained other damage; the whole cargo would probably not require to be discharged, but 1042 bags of coffee were found to be damaged, and 550 of them have since been sold.

The Anna Bok, from Pasaroeang to Amsterdam, which put into Mauritius 27th January leaky, and with other damage, was discharging, having pumped up sugar and coffee.

SPOKEN.

HORSA, Shanghai to Liverpool, March 2, 49 N., 40 W.

THE P. & O. COMPANY'S FLEET.

The *Mongolia*, 2,798 tons and 500-horse power, will leave Southampton for Calcutta to take up the Suez line on the 21st instant. Captain Babot will take the command to Calcutta, but Captain Stewart, R.N.R., will proceed overland to take permanent command.

The *Surat* (no commander yet appointed), screw steamer 2,596 tons, 500-horse power, is to be launched by Messrs. Day and Co., builders of ships and engines, of Northam, Southampton, on the 17th instant. She is intended for the general Indian Mail service either on this side or the other, but will probably make two or three voyages on the home side at first.

The *Geelong*, noticed in a previous issue, will leave Dumbarton soon for Southampton and India. The *Avoca* will be launched this week and be sent round to Southampton.

STOCKS OF TEA.

(To the Editor of *The London and China Telegraph.*)

SIR,—The estimated stock of tea in bond, on the 31st December last, was variously stated in the brokers' circulars at from 80 to 86 millions of pounds. The Government return the actual stock on that date at (*Economist*, March 3, page 254) 95,542,271 lbs. I think you should bring this discrepancy to the notice of your subscribers in China, that they may bear it in mind when offering for the new teas. They generally take their statistics from brokers' circulars.—I am, Sir, your obedient servant,

London, March 15, 1866. IMPORTER.

THE "FIERY CROSS" AND "SERICA."

(To the Editor of *The London and China Telegraph.*)

SIR,—In your issue of 7th inst. I find it reported that on November 5th the *Fiery Cross* "passed" the *Serica*. The latter vessel, however, reached Shanghai on January 31st, being 110 days from the Downs. The *Taitsing*, belonging to the same owner, arrived at Hong Kong on February 1st, being 96 days, having left the Downs October 28th. The *Fiery Cross*, according to the dates given by you, was 106 days from the Downs to Hong Kong. I enclose my card.—Yours faithfully,

Reading, March 9, 1866. S.

LAUNCH OF THE "COUNTESS OF KINTORE."—From the building-yard of Mr. William Duthie, junr., at Aberdeen, a fine clipper ship of the following dimensions was launched:—Length, 182 feet 6 inches; breadth, 31 feet 5 inches; depth, 19 feet 4 inches. She measures 736 70-100 tons N.N. measure, and 852 25-94 tons O. measure. She is classed nine years A 1 at Lloyd's. After being named the *Countess of Kintore* by Miss Duthie, daughter of the builder, she glided very beautifully into her future element. This vessel is the property of John Cook, Esq. She will be principally engaged in the colonial and China trades, and is to be commanded by Captain Catto, late of the ship *Beautiful Star*, of Aberdeen.

MISSIONARIES AT PEKING.

According to the last accounts from the Rev. Joseph Edkins, it appears that the premises lately held by him from the British Legation have had to be surrendered for the accommodation of Sir R. Alcock. A native temple has, however, been purchased, and the good cause progresses. Mr. Edkins thus reports to the London Missionary Society the possession:—

"On the 11th Sept. the hospital was opened for patients. We took the opportunity of commencing the public preaching of the word of life. The chapel is a large hall, where till now sat, dimly seen by the light entering through darkened doors, the principal idols of the temple. The building is lofty and substantial, and faces the street. Benches are placed to accommodate 200, and there is standing room for 200 more. The subject of the addresses given to the crowd at the opening service was the object of the hospital. The merciful character of the Saviour as the healer of the bodies and souls of men was exhibited, and an invitation was given to the sick to come for healing, and to all to hear the message of salvation proclaimed through Jesus Christ. Prayer was offered for the first time to the true God in this idol hall, where for many long years the worship of the god of fire has been conducted.

"Seventy or eighty patients attended the hospital daily. Mr. Dudgeon (who succeeded Dr. Lockhart) is much interested in the number and variety of new cases. Both in the medical and evangelistic department our work has received a new impulse in advance. Up to the present time there has been a lack of opportunity in this, the eastern part of the city, for the five baptised men whom I have in training to become preachers, for the exercise of their gifts. But there is no longer this want. They take turns in addressing the numerous audiences who assemble.

"Each Sunday thirty, forty, or fifty women find their way there, belonging, in many cases, to very respectable families, Chinese and Manchu. At this time of year, when the chinaaster is in blossom, the school-room presents a very gay appearance. Besides pots of these flowers, which the schoolmaster takes care to have placed there, almost every woman has one or more inserted in the large knot into which they bind their hair on the crown of the head. Mrs. Edkins has recently established a girls' school in the same street; and the girls, 9 in number, appear at the Sabbath service with their teacher, an elderly Christian, a bachelor of arts, who was baptized last year, and who also assists in the instruction of the women's congregation. Unhappily, the lack of education prevents women from becoming readily acquainted with the doctrines of Christianity. Their faculties have not been quickened by scholastic training, and hence the acquirement of the knowledge necessary to their becoming Christians is a laborious task. But we are much gratified by the frequency of the attendance of many of them, and the interest with which they listen.

"A third priest has made his appearance, also a Buddhist. He has been an interested hearer in the hospital chapel for several days. He has decided to offer his temple, with its revenue of £10 a year, to the Mission. He wishes to put off the priest's garb, and, assuming the usual Chinese costume, become a Christian. The temple is extensive, and is distant eighty miles from Peking, close by the West Imperial Cemetery."

HANKOW.

The Rev. Dr. Mullens thus reports to Dr. Tidman, the President of the London Missionary Society:—

"I left Shanghai with Mr. Muirhead on Saturday, November 4th, three days after my arrival from Peking, and, after a most pleasant trip up the great River Yang-tse, reached Hankow on the morning of the following Tuesday. We left Hankow the next Friday evening, and, as the English mail was shortly expected with Mrs. John, on her return from England, Mr. John accompanied us. We travelled both ways by the same steamer, the *Po-yang*, belonging to Messrs Oliphant and Company, and had a free passage both ways. Mr. John had the same down; and a few weeks ago Dr. Legge in his visit received the same favour. Mr. John tells me that, on repeated occasions during the last three years, Messrs. Oliphant have given the same privilege to himself and others, and have thereby saved the Society a large sum of money. You will see this in a moment when I tell you that the lowest charge is 100 taels (£33) for a return trip for each person; so that we four have been saved, within a few weeks, 350 taels, or nearly £120.

"In going up the Yang-tse I felt somewhat disappointed at the scantiness of the population, and the smallness and poverty of the towns upon its banks. This impression was somewhat removed on my return, when I saw them for the second time. I then noticed that there were large cities, like Nanking and Wu-hu, not treaty ports, with a considerable population and growing trade, and that Kiu-kiang, one of those ports, is also once more prospering. Still it is true that all the country on the south of the river for many miles inland was fearfully desolated by the rebels; towns and cities burned by the dozen, and the people killed by slaughter, pestilence, and starvation by *millions!* Nanking and Chin-kiang bear the marks of that desolation now; both cities have been completely ruined, and so has been Soochow, nearer to Shanghai, across the country. I could not help fearing, therefore, as we drew nearer our destination, that my once lofty views of Hankow and its neighbour cities would receive a rude shock, and that, after all, I should be disappointed. But it was not so. On the morning of our arrival we all went over to Wu-chang, and, as I stood on the top of the hill in the centre of that city, and beheld the three walled cities and the river beneath me, I could not help feeling that neither in India nor in China had I ever before looked on such a noble sphere for missionary labour. Wu-chang is the governing city, and has a large population, including many families of most respectable standing and influence. Hankow is the great mart for trade; the most busy, crowded, active, wealthy place I have seen. Its chief streets and bazaars are full of handsome shops, with abundance of valuable goods, and its smaller streets are close-packed, and also full of people. Recently a city wall has been erected all along the west side, away from the river, between Hanyang and Hankow, just above the banks of the small tributary river, the Han. There we could see the length of Hankow, and the closeness with which its houses are packed together. Its present population must be 700,000 to 800,000.

"The Mission is placed at the north end of the native town, just off the English settlement. The Mission Chapel is in the centre of the city, just off one of the great streets; it is an excellent building, the very thing for a bazaar chapel, and has a catechist's house and boys' school-room behind it. I had the pleasure of hearing both Mr. Muirhead and Mr. John (the resident missionary) preach to a crowded congregation. In Wu-chang again, not far from the north gate, is another chapel, also well built, with rooms for a missionary's visit, a catechist's house, and school."

TIEN-TSIN.

During a journey into the interior the Rev. W. N. Hall, and the Rev. Jonathan Lees and Mrs. Lees report as follows:—

"At a village through which we passed we had a most interesting scene, illustrating plainly how much more accessible are the rural population than the inhabitants of cities like Tien-tsin. It is one of the hundred incidents which have occurred recently, and which are rapidly modifying our views of the best way of prosecuting mission work. Stopping for a moment beneath some shady trees, we had in five minutes a group around us such as we have never yet seen at our own station. There the women are inaccessible: here they crowded round, and were as ready to chat as the men; mothers with their little ones, young girls, and bright-looking lads. It brought back many a happy hour of the past. 'Why,' we said, 'we could get a Sunday school directly here; and these mothers, how easy to win their hearts.' I took one bonnie bairnie, some twelve months old, into my arms. What if it did boast no clothing except a small cloth pad upon its stomach? It was creditably clean, and crowed merrily as one tossed it in the air. It was pleasant to find the women catching up and repeating our words. I told them of Jesus, and of His love for little children, and sufferings for all. We were sorry to leave them. There are hundreds of just such villages, and these are the people whom many at home, judging merely from the exceptional incidents of the war, look upon as semi-savages.

"Sunday, May 21st.—Fearing the heat, we resolved to go out early, and were thus able to do something in preaching, as well as to get a fair idea of the locality. Within a few yards of the inn was one of those strange pictures one has associated from childhood with heathen lands. It was the first time I had seen this. A sort of booth had been erected of masts and poles, and beneath it was a substantial wooden box, which I had at first some little difficulty in understanding. The box was some seven feet high, the bottom part (built of brick) four feet wide each way, and the upper part three feet. The two broad ribs of wood which supported the two corners had mottoes, as had the piece which connected them at the top. The roof was covered in with matting. In the centre of the front was another rib of wood, and just behind a little slide door, like that used in the ticket-office of a railway station. Two other such doors were at either end; one on the left hand at the bottom, and one midway on the right side. But the most extraordinary thing about it was that the whole frame was studded with huge iron nails, each some six inches long. The points of these nails were all directed inward, so that the inside was one bristling surface of spikes. The heads of the nails were of different sizes. My surprise was not lessened on finding a man inside, nor by learning that he had already been boxed up thus for two months. I went to the side-door, and got a chat with him. He could not lie down. He had a narrow form to sit upon, and in front was a small piece of wood on which he might rest his arms. He is supposed neither to eat, drink, nor sleep, and is under a vow not to leave this voluntary prison until sufficient money has been raised to build a new temple. The nails are given to donors, the larger-headed ones falling to the largest giver. They are valued at sums varying from £5 to £15. Under each is a slip of paper stating its value, and attached to the box is a board having a placard informing the people of the object of this meritorious work, and exhorting them to help. When any one promises to take a nail, his name, with the amount given, is written and posted up on this board, and when he brings the money he takes away the precious nail as a memento.

"The priest said the nails were 500 in number, and worth 1,500 taels (or over £500). As yet only three had been purchased, so that the poor fellow may perhaps die here; and I dare say it would suit his brother priests that he should. Unwashed and unshaven, he looked very wretched. At some four yards' distance from the box was a large bell suspended, and a piece of wood hanging from the roof of the shed served for a clapper, which was pulled by the man from within the box by a cord, and kept going night and day. In front of the box stood a small earthern altar, and on it an image of the god, with the incense pot and all its accompaniments before it. An old priest stood in front, muttering perpetually the sacred name of Buddha, 'Omi-ta-fa,' 'Omi-ta-fa,' and striving to excite the sympathy of passers-by. A large crowd gathered while I was asking these questions, and, thoroughly roused, it was easy to speak. The confusion of the old priest was something comical. At first he tried to make it out that the heaven and hell I spoke of were just those which Buddhism describes; but when he found that fail, he relapsed into moody silence, or contented himself by a growled assent to certain remarks. He looked as though he could eat me for exposing his rascally deceptions. But the people have not the respect for these things they once had. Many know how hollow are the pretensions of the priesthood, and laugh at their falsehood, even while still bowing to the olden shrines."

CHINA STEAMSHIP AND LABUAN COAL COMPANY (LIMITED).

The first annual meeting of shareholders was held on Monday, the 5th March, at the London Tavern. The following directors were present:—JOHN HICKIE, Esq., (in the chair), Sir J. D. H. Elphinstone, Bart., Harry Borradaile, Esq., The Hon. F. C. Drummond, Wm. Miller, Esq., M.P., and Major Sinclair.

The CHAIRMAN said it was proposed to adjourn the meeting to the 30th of April, because they had been unable to get the requisite accounts from India and China, and the financial statement would, therefore, be made at the adjourned meeting. As to the past and present condition of the company, the most important item was the coal mining in Labuan, whose mines contained large quantities of steam coal. From the outset the directors, knowing this, were convinced that the prejudice, arising partly from ignorance and partly from interested motives, against Labuan coal would die away, and that the coals would ultimately be estimated at their real value. Since the formation of the company one or two discoveries had been made which had increased the value of the property. The small coals could be manufactured into patent fuel, which was in great demand in the East, and which, unlike coal, did not deteriorate from exposure to weather, and it had been found upon careful analysis that the coals contained a large quantity of petroleum, which led them to expect great success in the manufacture of oil. Negotiations had been entered into with the Government with the view of securing extended privileges in Labuan, and a lease was about to be executed, giving the company an entire control of the valuable timber with which the island abounded. The great hindrance to the prosperity of the Labuan mines was the difficulty in obtaining labour from China, Singapore, and other places, and in managing the coolies when they did come. Hitherto there had been no inducements offered to labourers to bring their wives and families, but the agreement with the Government, which gave the company several thousands of acres of land in connection with a line of contemplated railway, would enable provision to be made for the ample accommodation of the labourers and their families. Independently of what might be obtained from the coals, the company possessed some exceedingly valuable springs of petroleum. But there was sufficient in the steam coal alone to yield the shareholders the prospect of a handsome dividend When it was known that every ounce of coal could be utilised, and that with plenty of labour coals could be produced at about 9s. or 10s. per ton, and that coals of no better quality had been selling in China at 45s., 50s., and even 60s. per ton, it was evident that if the coals could be sent to China at moderate freights nothing could prevent a large profit. It was stated in the prospectus that a railway was about to be constructed in Labuan for the convenience of shipping coals from the mines, instead of the present port, where during the monsoons no shipments could be effected. The line had not been constructed, because it was thought better to wait until the island had been surveyed, and until it could be shown that sufficient quantities of coals were being raised to justify the outlay. By the last mail the surveyor's report arrived, stating that the survey of the line was all but completed, and that his most sanguine expectations had been realised as to the facility with which the line could be constructed. The mines had been almost wholly developed by Mr. Sinclair, who would address the meeting, and it was calculated to inspire every confidence to know that that gentleman, who from personal experience knew the resources and capabilities of the island, had agreed to go out again for a period of from three to five years, and to take his family with him. At present the company's fleet was not the best adapted to the India and China trade; but if three or four steamers were built, capable of carrying good cargoes, and not possessing too many superfluous decorations, and if a trade were commenced, either from Hong Kong to Bombay, or from Suez to Hong Kong, there was no company, however highly subsidised it might be, that could compete with them. (Hear, hear.)

Mr. SINCLAIR said that having served under the late company for three years in Labuan, and from the investigations he had made, he had not the

Digitized by Google

slightest doubt that the entire island contained coal. One shaft had been sunk to a depth of 45 fathoms, and seams had been met with of the following thicknesses:—1 foot 1 in., 4 feet 6 in., 2 feet 9 in., 3 feet 9 in., and 12 feet. The surface all over the island gave indications of coal beneath, and in the jungle outcrops were frequently found. The coal was generally clean; the difficulty in working was not great; the proportion of water met with was very small; and the island indeed possessed the most favourable conditions the coal miner might desire. One drawback was that the shafts were soft, and consequently not easily to be supported, but (as the chairman had stated) the great difficulty was to obtain labour. While he was there he had several importations of Chinese, and coolies from Bombay, and he also employed the Malays on the island. The latter, although not hard-working men, were much better coal cutters than the others. The Chinese were paid large advances before they left home, and they worked with a bad feeling when they found this had to be repaid out of their wages. Some difficulty was also experienced in getting them to go down into the pits. The labourers from Bombay were beautifully formed, strong men, but they were like children to manage. The cost of the actual sinking was very slight. In reply to questions from various parts of the room, Mr. Sinclair further stated that the angle at which the coal was worked was about 1 in 33; that no explosive gases had been met with in the working; that two mines were being worked; that the objection to using coal-cutting machines was that they must employ skilled Europeans, who were always difficult to manage over the line; and that during the last year of his residence in Labuan coals were being raised at the rate of 20,000 tons a year, two-thirds being good steam coals.

The CHAIRMAN mentioned, as an illustration of the rapid manner in which the Labuan coals had risen in public estimation, that two years ago the coals which had since sold at 43s. per ton, only sold at 20s. at Singapore.

Mr. PRICE (the manager) said:—I dare say there may be some persons present who are not conversant with the origin of this amalgamated company—I mean as to the manner in which the China and Japan Steam Company came to be amalgamated with the Labuan Coal Company. On the ratification of the Elgin treaty in 1861 the China and Japan Steam Packet Company was started. When that treaty was concluded a great many Chinese ports, of which we before did not know anything, were thrown open to commerce. The steam vessels of the company were therefore constructed for the exigencies of the expected trade of these ports. Any one, however, who is conversant with Chinese trade knows of what a fluctuating character the trade there has been for some years. It is owing to this that many ports which three years ago were in the enjoyment of large trade are now almost entirely deserted, and that other ports are now those which are most frequented. This, I would observe, is the reason why one or two of our vessels have become unavailable. They were adapted, by their construction, to certain ports, whereas trade has been transferred to other ports up river, for the navigation of which they are not fitted. The directors of the China and Japan Steam Company on looking to their acccunts found, as every steamship owner in the East must do, that the most serious item was coal. It was then they met and conversed with the directors of the Labuan Coal Company, whom they found in a position the converse of their own. They had the coals, but they wanted the shipping facilities to transfer them from Labuan to a favourable market. The result was the formation of this company, and a more legitimate enterprise was never brought out in the City of London. It has occurred to your directors that, in order to utilize the Labuan mines, it is desirable to concentrate the operations of the steamers so as to bring Labuan into the centre of the lines. Therefore it was stated the directors contemplated running a line of steamers between India and China. I took a great deal of trouble while in the East in making inquiries with respect to these trades, and I have put before the directors some most valuable information. I have likewise brought them offers from an organisation of individuals representing most powerful commercial interests there. I believe these can be brought to bear, and that they will be ultimately amalgamated with this company. Your directors are quite alive to these advantages, and before many weeks—probably before two months elapse—these negotiations will, I hope, be satisfactorily concluded. When we are in a position to run our steamers from Bombay on the one hand, and from Hong Kong on the other, Labuan will become the centre of our operations. If you reflect on the position with which I started, you will see the advantage which we shall derive from this. At the present moment, Welch coals are selling at Singapore at 15 dollars a ton; but suppose it less. The average price for the last four years has varied from 47s. 6d. per ton to 52s. 6d. per ton; or take them at 50s. a ton, which is the mean between 47s. 6d. and 52s. 6d. Now, this company can coal its steamers in Singapore at less than 25s. per ton. If, then, you come to take the mean, you have at once a profit of 25s. per ton; and thus, in running your steamers you have an advantage to that extent over every other company or individual who has steamers running up the Chinese seas. That is an advantage which is better than any postal subsidy you could get. A subsidy, in fact, trammels you, and you are the servants of the Government. Let any gentleman refer to the price current and he will see that what I state is perfectly correct. Now, a vessel of adequate power would consume on the voyage between Bombay and Hong Kong 400 tons of coal, and on the return 400 tons, in all 800 tons (or call it in the total 750 tons), so that there you have on the double voyage an absolute profit of upwards of £900, on a voyage of two-and-a-half months, which nobody can take from you. This is surely satisfactory. One of the oldest captains in the service of the P. and O. company, in speaking to me on the matter, to use his own words, said, "I can conceive no position for coal mines in the East more happily situated than the mines of Labuan. The question is, have you the coals?" I think, from what you have heard from Mr. Sinclair, you may safely conclude you have. The history of the coal fields of Labuan is very well ascertained, and indeed it is thought by some politicians, though I don't agree with them, that there is a dereliction of duty on the part of the Government in letting us have the monopoly of the Labuan collieries, whereas they ought to work them themselves for the use of the Admiralty on so important a station. You have, too, on the coast of Borneo exclusive mining rights over a distance of 150 miles on the sea coast. These are secured to you under treaty ratified by the Government of this country, and therefore not very likely to be taken from you. These rights are worth a good round sum of money, and we have, I can tell you, been offered a large sum of money for them, but we have no intention of parting with them, although we do not yet purpose to work them, and our reason for it is just the same as that which influences a solicitor who, having an important case in court, retains a leading counsel, knowing that although he cannot secure his attendance, he, at all events, prevents him appearing on the opposite side. It is just the same with your directors in regard to using the mining rights in Borneo. They are not prepared to work them now, but they wish to take care no one else shall. We are on good terms with the Sultan of Borneo, and we desire to remain so. When I returned from the East the directors did me the honour to ask me to assume the management of the company, for which honour I have to thank them. I know, however, that in accepting the appointment I take upon myself a post of great responsibility, and one not unattended by considerable anxiety.

Sir J. ELPHINSTONE, the deputy chairman, dwelt at some length upon the hopes of prosperity in the future, and he incidentally mentioned that the island was seven miles long and five miles broad. The Victoria Harbour, with which the new line was to communicate, he described as the most remarkable in the East, and so commodious that the *Cornwallis* (74 guns), drawing 24 feet of water, was able to lie close in and communicate with the shore by the ordinary gangway. In trying to get assistance from the Government they had unfortunately to deal with the three antagonistic departments—the Colonial-office, the Admiralty, and the Foreign-office, the result being that until recently no assistance whatever could be procured. Experiments had lately been made in this country on the coal, which was found to contain a large quantity of both lubricating and burning oil, which would be very profitable when brought into proper working.

Mr. N. CROUCH said he felt disappointed as a shareholder in having to wait twelve months for a statement of accounts, and looked upon the chairman's speech as being made up of so many "ifs" that it came really to nothing. He wished to know what had been realized according to the prospectus, and what the ships were doing at the present time?

Mr. MILLER, M.P., in answer to Mr. Crouch's questions, urged that the lack of success was not attributable to the board, and that the difficulties in the way ought to have secured to the directors the sympathies of the shareholders instead of blame.

Other shareholders briefly addressed the meeting, the majority, while acknowledging past non-success, expressing a hope and belief that under Mr. Sinclair's management prosperity would attend the working of the mines.

A vote of thanks having been given to the chairman, the meeting was adjourned to the 30th of April, to receive the directors' report and the balance-sheet. During the proceedings 10 specimens of wood, growing in Labuan, and samples of oil extracted from the coals, were laid upon the table for inspection.

THE ARMY ESTIMATES.

These Estimates for the service of the year 1866-67 show a total in amount of £14,095,000, which is a net decrease of £253,447. Before extracting the items that have special reference to Ceylon and the Far East, we will mention that the Secretary of State for War receives £5,000 per annum, and the Parliamentary, Permanent, and Assistant Under-Secretaries £1,500 each, and, in addition, there is a Military Assistant with £600 per annum. The Permanent Under-Secretary and Military Assistant get also the full pay, unattached pay, or half-pay of their respective military ranks. The Field Marshal Commanding-in-Chief has £4,432; the Military Secretary, £2,243; the Adjutant-General, £1,877; and the Quartermaster-General the same—all these sums include allowance for forage.

The establishment of the Ceylon Rifle Regiment is set down at 51 officers, 123 non-commissioned officers, and 1,200 rank and file, the pay, allowances, and charges for whom make an amount of £37,175, which is £599 more than last year. The various items of this charge are as follows:—Pay, £32,899; additional for Brevet rank and length of service, £538; good conduct pay, £2,900; command pay, £54; non-effective allowance to Field Officers, contingent allowance to Captains, and special allowances to Quartermasters, £638; allowances to officers Instructors of Musketry, and to officers and non-commissioned officers Instructors in Gunnery, £45; Agency, including allowance to the Agents for postage and stationery, £31; Regimental postage, stationery, &c., £70. The pay of each rank *per diem* is as follows:—Lieutenant-Colonel, 17s.; Majors, 16s.; Captains, 11s. 7d.; Lieutenants, 6s. 6d.; Ensigns, 5s. 3d.; Paymaster, 17s. 6d.; Adjutant, 12s. 6d.; Quartermaster, 9s.; Surgeon, 15s.; Assistant-Surgeons, 10s.; Sergeant-Major, 3s. 8d.; Sergeant-Major (Native Company), 1s. 11d.; Quartermaster-Sergeant, 2s. 9d.; Subadars, 3s.; Jemadars, 2s. 1d.; Paymaster's Clerk, 2s.; Sergeant Tailor, 1s. 5d.; Armourer Sergeant, 5s.; Hospital Sergeant, 1s. 5d.; Orderly-room Clerk, 1s. 11d.; Company Sergeants, 1s. 8d.; Sergeant Instructor of Musketry, 3s.; Sergeants, 1s. 5d.; Bugle Major, 2s.; Buglers, 11½d.; Bandmaster, 3s. 2d.; Corporals, 1s. 0½d.; Privates, 11d.; Boys, 5½d.

Under the head of Consolidated Allowances, a sum of £30,000 appears as to be paid to the Officers at Ceylon, and the same to the Officers in China—being £750 more than last year for Ceylon, and £10,000 less for China. An incidental entry in the vote for the "Clothing Establishments, &c.," informs us that the Foreign-office contributes £95 for the clothing of the Legation Guard in China.

The vote for Fortifications and Military Store Buildings records that the estimate for erecting a Trial Hut at Kowloon is £7,435, the amount already voted for it being £6,600; the gross sum already expended up to the 31st December, 1865, was £2,446, and the vote required for the present year is £3,000. By a note we learn that the increase over the original estimate is due to the cost of extensive excavations being now included therein, which it had hitherto been believed would have been made at the expense of the Colonial Government.

One addition to the "Rewards for Distinguished Services" is a grant of £40 per annum to Captain John Sweeny, who "served throughout the

Digitized by Google

China Expedition of 1840-43 (Medal), including the capture of Chusan; attack on Chuenpee; destruction of the Bocca Tigris Forts; storm and capture of the heights above Canton, of Amoy, Chusan, Chinhae, Ningpo, and repulse of the night attack; capture of the enemy's entrenched camp on the heights of Segoan, of Chapoo, Woosung, Shanghai, and Chinkiangfoo, and the landing before Nanking. Also at the siege and fall of Sebastopol in 1855 (Medal and Clasp, and Turkish Medal)."

The "Detail of the Charge for the General Staff, Clerks, and Others," sets against Ceylon £1,558, the items being—1 Major-General, £692; 1 Deputy-Adjutant-General, £347; 1 Deputy-Assistant Quartermaster-General, £173; 1 Assistant Military Secretary, £173; 1 Aide-de-Camp, £173. Under this head China figures for £1,654, composed thus—1 Major-General, £692; 1 Deputy-Assistant Adjutant-General, £173; 1 Deputy-Assistant Quartermaster-General, £173; 1 Assistant Military Secretary, £173; 2 Commandants, £183; 1 Aide-de-Camp, £173; 1 Town and Fort Adjutant, £87. Then, in addition, China has 10 subordinates costing £397, and a charge of £205 for postage, office expenses, &c.

The Detail of the Regimental Establishments fixes the strength of the 2nd Battalion of the 11th Regiment at 44 officers, 82 non-commissioned officers, and 840 rank and file; the 2nd Battalion of the 20th numbers 45 officers, 84 non-commissioned officers, and 800 rank and file; and the 2nd battalion of the 25th 45 officers, 84 non-commissioned officers, and 950 rank and file. The Gun Lascars at Hong Kong are 88, consisting of 1 Havildar-Major, at the rate of 2s. 3d. per diem.; 2 havildars at 1s. 4d.; 1 bugler at 11d.; 4 naicks at 1s.; and 80 privates at 11d.; additional pay, £10; contingent allowance to Officer of Artillery in charge of company, £36—Total, £1,564.

The Commissariat Department charges China for the year with—1 Deputy-Commissary-General, £730; 3 Assistant-Commissaries-General, £870; 4 Deputy-Assistant Commissaries-General, £821; 13 subordinates, £602; postage and travelling expenses, £173; 13 clerks and 11 tradesmen and labourers, £235; civil labourers, 26, £634, including extra labour.

The Detail of the charge for Provisions, Forage, and Transport, and the amount of deductions on account of rations from the pay of officers and men, debits China with a net cost, after deducting stoppages, of £17,300—which is less than last year by £8,709; forage stands for £930—£260 less than last year. The charge for Commissariat Transport is £2,910, of which the "hired transport" swallows £2,360, the Transport Establishment consisting of 28 boatmen, who are paid by £550. From this Commissariat Transport £70 is to be deducted for Vote 14, leaving a net amount of £2,840.

In the charge of Barrack Department, clerks' contingencies, wages, &c., China reckons for—1 Barrack-clerk, £250; 1 barrack-sergeant, £91; contingencies, £11; 7 labourers, with wages of £171; and 6 caretakers, with £92; and extra and miscellaneous labour is set down in addition at £400.

The Chaplains' Department is light as regards Ceylon, where there is but a single item under the head, for one officiating clergyman at £50. China is more liberally treated. There we have one Chaplain of the Fourth Class at £228; 1 chapel-clerk or orderly at £9; travelling, postage, and contingent expenses, £6; three officiating clergymen also receive £298.

The Medical Department charges Ceylon with a total Staff Pay of £2,911, with an extra of £55 for 3 compounders of medicine. The staff consists of 1 Deputy-Inspector-General £602; 2 Staff Surgeons-Major or Staff Surgeons, £548; 8 Staff Assistant Surgeons, £1,597; and 1 dispenser, £164. China has a Total Staff Pay against it of £1,926, with an extra of 3 subordinates of £143; contingent expenses, £10; and 3 compounders of medicines at £55. The Staff Pay consists of one Deputy Inspector-General at £703; 1 staff surgeon or surgeon-major at £329; 4 staff assistant surgeons at £730; and 1 dispenser at £164.

The Purveyors' Department furnishes a Deputy Purveyor for Ceylon at £210; and 1 subordinate at £12; at a cost for travelling and for office expenses of £3. The gross cost of the Diets is £3,301, from which deduct stoppages £956, and the net is £2,345. Wages, inclusive of extra labour, are set down at £180; washing and repairing bedding, £160; and miscellaneous expenses, £28. The total Staff Pay for China is £730, answering to the services of 1 Purveyor at £274; 2 deputy purveyors at £210; and 2 purveyors' clerks at £216. Then, in addition, there is 1 subordinate at £15; travelling and office expenses £21. The gross cost of Diets is estimated at £7,172, from which stoppages to the amount of £2,338 are to be deducted, leaving net £4,834. The wages, inclusive of extra labour, is entered at £365; washing and repairing bedding, £101; rents, £1,320; fuel and light, £709; miscellaneous, £75.

The Military Store Department appears against Ceylon for a total Staff Pay of £1,378, disbursed to 1 Assistant Superintendent of stores at £351, and to 4 deputy-assistant superintendents of stores, £1,027. In addition 3 temporary clerks or subordinates receive £118; postage, office, and travelling expenses figure for £30. There is a total of wages of £1,185, divided among 4 foremen, master artificers, &c., £189; 4 artificers, £116; 17 labourers, boys, and extra labourers, £240; and temporary and miscellaneous labour, £640. The total Staff Pay for China under this vote is £1,861, viz.:—1 Deputy Superintendent of Stores, £156; 1 Assistant Superintendent of Stores, £301; 6 Deputy Assistant Superintendents of Stores, £1,104. Then we have a charge for 5 temporary clerks or subordinates, £392; servants' allowances, £82. There is also a total of £3,658 wages, paid to 13 foremen, master artificers, &c., £1,172; 21 artificers, £743; 89 labourers, boys, and extra labourers, £1,243; and temporary and miscellaneous labour, £500.

The Royal Engineer Department, which is the Vote 11 referred to before, employs in Ceylon 5 temporary clerks at £239, which is the total Staff Pay, the only other item being £105 for travelling and contingent expenses. China is answerable for a total Staff Pay of £1,052, divided among 2 clerks of works, 2nd class, at £190; 1 clerk of 3rd class, £170; 1 clerk of 3rd class, or military clerk, £170; and 2 temporary clerks, £222. Then there are extras, of 3 storekeepers, &c., and care-takers of War Department Property, £65; and travelling and contingent expenses, £22.

[An abstract of the Navy Estimates for 1866-67, dissected on a similar plan, as regards the items referring to the Far East, will appear in our next number.]

CIVIL SERVICE ESTIMATES.

The Estimates for the Civil Service for the year ending the 31st March, 1867, have been laid before Parliament. The expenditure in connection with China and the Far East consists of the following items. The entire vote for "Services in China, Japan, and Siam," is £126,978, which is £24,006 more than last year; but one-third of the net charge on account of the Diplomatic and Consular Service in China is repaid to the Exchequer from Indian Revenues.

CHINA.

PEKING.—Envoy and Chief Superintendent of Trade, £6,000. Last year the sum was £8,000, but the Envoy was Minister Plenipotentiary. Secretary of Legation, and Chinese Secretary, £1,200; Second Secretary, £500; do. £400; Assistant and Accountant, £500; Surgeon, £200; Assistant Chinese Secretary, £600; 10 Student Interpreters, £2,200; Chinese Writers or Linguists, £250. Special allowances to Colonial Officers at Hong Kong for services rendered to Superintendency, viz.:—The Surveyor-General, £200; the Colonial Auditor, £500; Assistant, £300. Last year the Attorney-General had £250, but that payment is dropped in the present Estimate.

CANTON.—Consul, £1,600; Vice-Consul at Whampoa, £750; Interpreter, £700; First-Class Assistant, £400; Second-Class Assistant, £350; Chinese Writers or Linguists, £180.

SWATOW.—Consul, £800; Interpreter, £500; First-Class Assistant, £400; Chinese Writers or Linguists, £100.

AMOY.—Consul, £900; Interpreter, £500; First-Class Assistant, £400; Chinese Writers or Linguists, £125.

FOO-CHOW.—Consul, £1,000; Interpreter, £500; First Class Assistant, £400; Second Class Assistant, £300; Chinese Writers or Linguists £100.

TAIWAN.—Consul, £800; Vice-consul at Tamsuy, £600; Third-Class Assistant, £300; Chinese Writers or Linguists, £100. The Vice-consul at Tamsuy is a new appointment, but on the other hand an Interpreter disappears from the estimate, with a salary of £400.

NINGPO.—Consul, £800; Interpreter, £400; Second Class Assistant, £350; Chinese Writers or Linguists, £100.

SHANGHAI.—Consul, £1,500; Vice-consul, £750; Second Vice-consul, £750; Interpreter, £700; Second Interpreter, £500; First-Class Assistant, £400; Second-Class Assistant, £350; Third-Class Assistant, £300; First Linguist, £300; Second Linguist, £300; Third Linguist, £200; Writers, £120.

CHIN-KIANG.—Consul, £900; Interpreter, £400; Third-Class Assistant, £300; Chinese Writers or Linguists, £100.

KIU-KIANG.—Consul, £900; Interpreter, £400; Third-Class Assistant, £300; Chinese Writers or Linguists, £100.

HANKOW.—Consul, £1,300; Interpreter, £500; Second-Class Assistant, £350; Third-Class Assistant, £300; Chinese Writers or Linguists, £100.

TANG-CHOW.—Vice-consul, £750; Third-Class Assistant, £300; Chinese Writers or Linguists, £100.

TIEN-TSIN.—Consul, £900; Vice-consul at Taku, £500; Interpreter, £400; Third-Class Assistant, £300; Chinese Writers or Linguists, £100.

NEWCHWANG.—Consul, £1,300; First-Class Assistant, £400; Chinese Writers or Linguists, £100.

These salaries amount to £43,725, £2,050 less than last year.

Contingencies, £15,000; allowance for passages for Consular officers and Student Interpreters, £1,000; buildings required at several of the Consular stations, £20,000; temporary allowances at Shanghai, £1,350; ditto at Hankow, £550; pay of Legation Guard and Escort at Peking, £857 15s.

These extras amount to £37,759 15s., and were last year only £25,757 15s. The vote for Buildings at the Consular Stations swallows up the reductions, and creates an excess.

The Contingent Expenses are:—1, wages for public servants, such as porters, coolies, watchmen, gaolers, boatmen, police; 2, printing, stationery, postage, messages; 3, rent of ground for consular buildings, repairs, and insurance; 4, office expenses; 5, chapels and chaplains; 6, outfit to Consuls and Vice-Consuls; 7, journeys on public service; 8, allowances to St. Paul's College, Hong Kong, with a view to promoting the study of the Chinese language; 9, petty and miscellaneous expenses.

The fees, fines, and other casual receipts are now paid into the Exchequer. They were formerly returned, and applied in aid of the Contingent Expenses. The amount of these receipts in 1864-5 was £6,713. The gross receipts for the rent or from the sale of Government lands at the Consular ports are also now credited to the Exchequer.

JAPAN.

YEDO.—Envoy Extraordinary and Minister Plenipotentiary and Consul-General, £3,000; Secretary of Legation, £800; Interpreter and Japanese Secretary, £700; Assistant and Accountant, £450; Assistant and Medical Officer, £500; two Interpreters for Japanese language, £400 each, £800; Second-class Assistant, £350; three Student Interpreters, at £200 a year each, £600. Last year the Assistant and Accountant received £472 10s.

KANAGAWA.—Consul, £1,000; Vice-Consul, £500; Dutch Interpreter, £400; Second-class Assistant, £350; Assistant, £300.

NAGASAKI.—Consul, £1,000; Dutch Interpreter, £400; Second-class Assistant, £350; Third-class Assistant, £300.

HAKODADI.—Consul, £800; Interpreter, £500; Third-Class Assistant, £300. Total for Salaries £13,400.

Contingencies, £3,500; Buildings required at certain Stations, £7,000; Rent of Houses occupied by Her Majesty's Legation, £3,000; On account of Extra Pay and Expenses of Legation Guard, £1,000; Outfit Money of Her Majesty's Minister, £1,000; Ditto of Secretary of Legation, £300; Compensation to Consular Officers for Losses sustained by fire at Hakodadi, £3,070; Allowances for Passages for Consular Officers and Student Interpreters, £500; These extras amount to £19,370,

Digitized by Google

though last year they were only £5,100. The 2nd, 3rd, 5th, 6th, and 7th items are quite new. An allowance of £100 to the Attorney-General at Hong Kong disappears from the Estimate.

JUDICIAL ESTABLISHMENT FOR CHINA AND JAPAN.—Judge, £3,500; Deputy Judge (£1,000, increasing by £50 a year to £1,200), £1,050; Law Clerk (£600, increasing by £25 a year to £750), £625; Allowances for House-rent, until houses are provided, £2,350. Total, £7,525.

SIAM.

Consul, £1,200; Interpreter, £500; First Assistant, £400; Medical Attendant, £400; Two Student Interpreters, at £200 a year each, £400. Total for salaries, £2,900; Contingencies, £1,300. This last item is £100 more than last year.

LABUAN.

Governor, £800; Government Secretary, £300; Treasurer and Police Magistrate, £500; Surgeon, £500; Chaplain, 350; Surveyor General, £300; Harbour Master, £300; Gaoler, £175; Establishments for the foregoing Officers, £980; Contingent Expenses of Justice, Police, and Gaols, £1,815; Roads, Works, and Buildings, £810; Miscellaneous, £226; Loss by Exchange on the Bills drawn by the Governor upon the Paymaster General, between July, 1864, and May, 1865, £383; Total, £7,439; Deduct Estimated Local Revenue, £3,121; Balance in hand, £674;—£3,795. Net Vote, £3,644.

This Estimate amounted last year to £4,641. The following are the changes:—Decrease: Establishments, £5; Works and Buildings, £1,140; Miscellaneous, £109; Loss by Exchange, £308;—£1,562. Increase: Police and Gaols, £64; Decreased Local Revenue, and Balances in hand, £501;—£565. Net Decrease, £997.

CONSULS ABROAD.

Borneo: Brunei, Consul-General, £300; Sarawak, Consul, £500. Netherlands: Batavia, Consul, £200. Spain: Manila, Consul, £1,000, with allowance for office expenses, £150; Vice-Consul, £300; Sual, Vice-Consul, £400; Iloilo, Vice-Consul, £400.

SPECIAL MISSIONS, OUTFITS, &c.

CONVEYANCE, &c.—Sir R. Alcock, Minister to Japan, expenses of journey from Suez to Shanghai, £519; M. Le Maire, of French navy, from Shanghai to Yokohama, on board H.M.S. *Leopard*, £3 12s.

PASSAGE ALLOWANCES, ON APPOINTMENT OR RETIREMENT.—Sir R. G. MacDonnell, Governor of Hong Kong, £1,500; Sir H. Robinson, Governor of Ceylon, £493 14s. 3d.

LIGHT-HOUSES ABROAD.—Ceylon: Little Basses Rocks Light-ship, £2,500; Little Basses Rocks spare Light-ship, £12,000.

PENSIONS FOR SERVICES IN THE COLONIES.

HONG KONG.—Alexander Lena, late clerk in the Registration-office, £100; R. Rienaecker, Colonial Treasurer, £162 10s.; G. A. Trotter, Clerk to Chief Justice, £65.

LABUAN.—H. W. Parr, Harbour-master, £50.

SUPERANNUATION ALLOWANCES.—Sir John Bowring, Plen potentiary and Chief Superintendent of Trade, China, £1,333 6s. 8d.; Edward Elmslie, Secretary and Treasurer, Canton, £200; Patrick Hague, Vice-Consul, Ningpo, £193; F. C. Macgregor, Consul, Canton, £1,200; George Morrison, Consul, Nagasaki, £360; Horace Oakley, First Assistant, Consulate, Canton, £90; T. R. Colledge, Surgeon, Canton, £400; Richard B. Jackson, Consul, Foo-chow-Foo, £600, A. R. Johnston, Secretary and Registrar Superintending, China, £600.

MALTA AND ALEXANDRIA TELEGRAPH.

The Government pays three-fifths of the salary and expenses of the Government Superintendent of the above telegraph, amounting to £500. The total payments to the Government in respect to the receipts of the Malta and Alexandria Telegraph for the period from the opening of the line in November 1861 to 13th May, 1865 (when a new arrangement was entered into between the Government and the lessees of the line), will be £68,718 12s. 10d.; of which £41,231 3s. 7d. will have been paid to the Exchequer, £27,487 9s. 3d. to Indian Revenues.

KEW GARDENS.

The Estimates contain a report from Dr. J. D. Hooker, which mentions that a small collection of Japan plants has been got together and placed in a conspicuous position in a frame near the Heath-house (No. 14). From Ceylon ripe seeds of Cinchona officinalis have been sent to Kew by the able and energetic Director of the Royal Botanic Gardens. "These have been transmitted at once to Jamaica and Trinidad, whilst others have been sent by Mr. Thwaites to the Mauritius, Cape of Good Hope, Queensland, and elsewhere. As the first fruits of introduction of the Cinchona into our Eastern possessions, this event marks an epoch in the history of the drug, and reflects great credit on the energetic manager of the plantations. By the same officer we are informed of the success of many ornamental and useful plants sent to him from Kew, and their distribution all over the island. In return we continue to receive from him most valuable collections of economic plants, ferns, and orchids."

The report continues:—

"The most important plants distributed from the Royal Gardens have been cinchona seeds and plants to various colonies, &c., and the ipecacuanha to Trinidad, Ceylon, and Calcutta. A most important introduction has been the calumba root from the Mauritius, a plant which it is proposed to cultivate in Ceylon and the West Indies, some eminent druggists having reported to us that the supply from East Africa is both scanty and bad; and that, owing to the condition of labour, &c., on the African coast, there is no prospect of an improvement. Various applications for seeds of the best kinds of tobacco having been received, especially from Western Australia, through the kindness of Colonel Scott, R. E., we procured from Captain Smith, resident at the Court of Persia, an ample supply of fresh seed of the best Shiraz tobacco, which has been distributed to 30 or 40 colonies, &c. Gardeners trained in the Royal Gardens have been selected by the late Director to fill the following important posts:—The Curatorship of the Royal Botanic Gardens at Calcutta, under Dr. Anderson; An assistant Conservatorship of cinchona forests at Darjeeling, under the same officer."

mentioned that Signor Beccari has been spending a considerable t me at Kew preparing for a botanical exploration of Borneo.

TEA TABLES.

Tables Showing the Cost of Tea as laid down in London, with all Charges on Purchase and Sale and Price per Pound at the Several Exchange Rates. London: William Brown and Co., 40 and 41, Old Broad-street.—This most compendious and useful manual is designed for the use of importers of tea from Foochow, and is calculated to expedite as well as to give precision in trade calculations. Both the invoice and account sales charges are analysed at the outset, and the percentage to be allowed for each item set down. Thus we have under invoice charges inspecting brokerage, estimated at ½ per cent.; commission, if on returns, 2½ per cent., if otherwise, 3 per cent.; insurance charges from 2½ to 3 per cent. according to season, which, combined with other charges, constitutes an average of 3 per cent, the total thus far approximating to 6½ per cent., to which must be added variable loss in weight, say 2¾ per cent. Account sale charges are represented by brokerage 1 per cent., commission 2½, insurance from fire and other charges, ¼, an estimated total under this head of 3¾ per cent., and which added to the invoice charges make an aggregate of 13 per cent. on cost. A very simple form, illustrated by example, is given, for working out calculations by aid of the accompanying tables, under every variation of price, and at the several exchanges varying from 3s. 9d. to 7s. 6d. per dollar, that calculation of course including dock management, rates, rent, &c., say eight-tenths of a penny per pound avoirdupois, and addition of freight, which is given in the tables at the several rates of from £3 to £10 per ton according to the rate of exchange to which each table applies. The decimal arrangement of pence per pound of tea, in reference to the number of taels per picul at the sought for rate of exchange, all charges being included except the freight at foot, which is to be added, is the prime feature of this very useful publication.

DIVORCE CASE.—DOW *v.* DOW AND MACANN.—This was a petition by James Dow, Esq., Shanghai, for a dissolution of his marriage with Mary Dow, on the ground of her adultery with John Macann. The marriage took place in England in May, 1851, the petitioner being then about 24 years of age, and the respondent a little younger. He was a merchant, and she was the daughter of Mr. Maclean, who was also a merchant. In August, 1851, Mr. Dow went to Shanghai, where his business was carried on. Mrs. Dow, being then pregnant, was obliged to remain in England, but in about two years she joined him at Shanghai. They lived very happily together, and he was a kind and affectionate husband, and they had five children, of whom three are still living. In 1860 they were both in England, and they started together for China. When they arrived at Marseilles her health gave way and she was obliged to return. Mr. Dow proceeded to China, and has never since cohabited with her. He had settled £600 a year on her, and besides this, had made up her income during the separation to about £2,000 a year. At Birkenhead she became acquainted with the co-respondent, and he went to live in Mrs. Dow's house, against the wishes and notwithstanding the remonstrances of her parents. She afterwards took a house at Rhyl for a short time, and then removed to Melbourne-house, at Surbiton, in Surrey, and continued to receive the visits of Macann at both those places. Macann was in pecuniary difficulties, and it appeared that the furniture of the house in which she resided at Rhyl was seized for his debts. Mr. Dow wrote home to announce that he should arrive in England in November, 1864, and on the 22nd of November Mrs. Dow left Surbiton with her maid servant, taking her jewels and a good deal of luggage with her, and stated that she was going to Paris or Lyons to meet him. She went, however, to Brussels with Macann, and they afterwards lived together for some time as husband and wife at Brussels, passing as Mr. and Mrs. Anderson, and when she left she was about to be delivered of a child. There was no defence. The Judge-Ordinary said there could be no doubt about the facts of the case, and there was no trace of any short-coming on the part of the petitioner. The jury found a verdict for the petitioner on all the issues.—Decree *nisi*, with costs against the co respondent.

THE HEALTH OF THE ROYAL NAVY.—A Blue-book of eighty-five pages has been issued, containing a statistical abstract, drawn up by order of the Admiralty, with a view of affording the latest information on the health of the navy. The average number of cases of disease per man was 1·3 for the whole force, the average for the seven years being 1·5. So far as experience at present justifies an opinion, the ironclad vessels are likely to prove at least as healthy as others. Indeed, in the present returns they are not only below the average septennial ratio as regards sickness, but below the mean ratio of the period. Considerably more than one-third of the deaths were attributable to injuries or drowning. On the different stations the ratios of deaths per 1,000 from disease alone were as follow:—On the home station, 6·2; Mediterranean, 4·4; North American and West Indies 12·9, 6·3 of this being referable to yellow fever; South-east Coast of Africa, 5·5; Pacific, 5·1; West Coast of Africa, 19·5; East Indies and Cape of Good Hope, 13·6; China, 20·4; and Australia, 6·1. The China station continues to be the worst of all.

MAJOR-GENERAL REEVES, C.B.—The death is announced of Major-General George Marmaduke Reeves, late Colonel Commanding Her Majesty's 99th (or Lanarkshire) Regiment of Foot. The deceased entered the army as ensign in 1824. He served throughout the campaign of 1860 in the north of China, commanded the 4th Brigade at the action of Sinho, the taking of Tang-Ku, and the storming of the nearest Taku fort, when he was wounded severely in three places and slightly in two, but he did not quit the field until all the remaining north forts had surrendered. He commanded the advance from Tien-tsin, and the 4th brigade in the actions of the 18th and 21st of September, and the surrender of Peking. He was C.B., had medals and clasps, and a distinguished service pension.

YAMAZUKI KOSABURO.—We regret to announce the death of a young Japanese officer who came to this country last year for educational purposes. Yamazuki Kosaburo was a native of the province of Nagato, and belonged to the retinue of the Daimio of that name. His death, at the age of 22 years, was caused by consumption. His remains were interred at Woking, the funeral being attended by Professor Williamson and twelve Japanese students of the University College.

LONDON, FRIDAY, MARCH 16, 1866.

THE NIENFEI REBELLION.

THIS insurrection, which but a short time since seemed to be only an insignificant movement confined to one or two of the northern provinces of China, would appear to have suddenly assumed very dangerous proportions, and to be likely, in fact, to take the place of the Taiping rebellion as a permanent disturber of the peace of that unhappy country. A late telegram from Hong Kong, dated the 15th of February, states that Hankow was then threatened by a force of these insurgents, who had already fired some villages in the vicinity of that city, and that the foreign residents were preparing for an attack. This looks ominous. Hitherto the Nienfei have avoided coming into collision with us, and have not directly interfered with our trade; consequently we have had no right to adopt any course with regard to them except one of strict neutrality. But should they now commence a series of raids upon our settlements it will be necessary to take more active measures, and perhaps to clear a radius round any consular ports they may approach too closely. We should have thought less of this news had Shanghai been the place threatened, that "model settlement" being by this time pretty well used to take care of itself. It is easily protected by land forces, and is conveniently situated to receive succour from ships of war, when necessary; besides which the volunteer force, which has already done such good service, although at present somewhat inert (probably from sheer want of any incentive to action), would doubtless spring up with renewed vigour should any emergency arise. But Hankow possesses none of these advantages. Having never yet been the scene of any such contests as those which have often threatened Shanghai with destruction, the foreign settlement is not likely to be well adapted for defence; its situation is less favourable also for protection from afloat, and the volunteer force organised by Major BRINE, although doubtless prepared to do good service in case of need, has not had that experience of actual warfare which has on more than one occasion fallen to the lot of the Shanghai corps. Under these circumstances it is greatly to be feared that a sudden attack on Hankow by an overwhelming force of these bandits would meet with but a feeble resistance, and we wait with much anxiety for further details regarding this untoward event.

PARLIAMENTARY PAPERS RELATING TO THE MORTALITY OF TROOPS AT HONG KONG.

THE correspondence and returns on this subject moved for in the House of Commons by Colonel NORTH, have been printed in a parliamentary blue-book. With the view of accounting for the entire absence of suitable accommodation for the troops on their arrival, it has been repeatedly stated by officers of the garrison at Hong Kong that they came unexpectedly. The utter futility of this excuse as regards the 2nd battalion of the 9th Regiment is proved by the very first letter of the series, in which Major-General GUY, writing from Hong Kong in November, 1864, alludes to the reinforcements then on the way in the *Tamar*, and states that he expects her arrival about February, the very month in which she did arrive. Having landed these troops, the steamer *Tamar* was despatched to the Cape for the 2nd battalion of the 11th Regiment, and Major-General GUY must have known that in the ordinary course of events she would return about the end of May or early in June. And yet at the time of her arrival, not only Major-General GUY, but the principal medical officer and two staff surgeons were taking their ease in Japan! No preparation whatever had been made for the troops, and they were landed at Kowloong during the worst period of a sickly season, in the worst part of an unhealthy settlement, and provided with the worst possible accommodation. No great amount of penetration is needed to discern the causes of the frightful mortality which followed. During the absence from his post of Dr. DICK, the principal medical officer, his work was done and his responsibilities borne by Mr. GEORGE SAUNDERS, surgeon of the 9th Regiment; and this gentleman in his letters briefly attributes the excessive sickness to four causes:—First, to the occupation of the unhealthy peninsula of Kowloong; secondly, to insufficient barrack and hospital accommodation; thirdly, to the harassing night duty exacted from the men; and, fourthly, to intemperance and want of indoor employment.

All medical authorities who have had experience in Hong Kong and Kowloong agree that the soil, composed as it is chiefly of disintegrated granite, emits most unwholesome exhalations when freshly turned over or disturbed; and that not only foreigners but natives constantly suffer from fevers and cholera when exposed to them. The huts at Kowloong were, it seems, in close proximity to a new road which was being excavated, and their inmates of course felt the full effects of these deadly miasmata. As regards the barrack and hospital accommodation, Mr. SAUNDERS in one case pointed out to the COMMANDANT that 375 men were crowded together in a building which gave each man 275 cubic feet less space than the minimum required by the regulations, that cholera was already prevalent, and unless this were at once remedied an enormous mortality must ensue; the result of this representation being that *seventy more men* were put into the building! Mr. SAUNDERS' application being meanwhile "referred to Dr. DICK, in Japan." Over and over again Mr. SAUNDERS insisted that the men should be allowed six nights a week in bed, instead of only three or four—but the destroying system was remorselessly enforced, while the question was "left for the consideration of the Adjutant-General." Drink had doubtless its share in the work of death; but can we wonder if the men, harassed by excessive night-duty, idle and uncared for during the day, and enfeebled by disease, took to drinking as a means of alleviating their misery? Really, it seems doubtful whether the whole force—men, women, and children—would not have been annihilated altogether without the care and exertions of Mr. SAUNDERS. Uninviting as this sickening tale of horror is, the credit of the service demands a thorough investigation into all its repulsive details; and we observe with satisfaction that Colonel NORTH has announced his intention of moving for a committee of inquiry into the subject. Perhaps this may elicit a reply which is at present wanting, to the question so pointedly asked by the DIRECTOR GENERAL of the MEDICAL DEPARTMENT—*Why* were the principal medical officer and two staff surgeons all in Japan at one time, when their presence was so urgently needed in Hong Kong?

(THE TIMES.)

Such a mortality as lately befell the 11th Regiment at Hong Kong could not be passed over without public inquiry. It may be that in the services of other countries, and, indeed, in our own service in days past, little would be thought of such a waste of life. The soldier, some people may still think, takes his chance of death, whether it is to come on the battle-field, in the sinking transport, or in the pestilential barrack. But the nation knows its duties, and, indeed, its interests, better than to allow even a few score men to perish by any cause that may be prevented. At a time when recruits cannot be found in sufficient numbers to keep up the army at its full strength, and when every tale of neglect or ill-treatment has its effect in discouraging the military spirit, it is, above all things, necessary the soldier in every part of the world should know that he will have only the unavoidable dangers of the service against him. So long as such incidents as produced the mortality in the 11th Regiment occur this confidence can hardly be felt by any recruit. It is clear that a body of men were landed in the island of Hong Kong at the worst season of the year; that no sufficient preparations were made for them; that they were soon prostrated by disease, and that a large number of them perished, while the remainder were almost wholly incapacitated for service.

A Parliamentary Return on the subject is now published. The facts, as they have been already related, are as follows:—At the beginning of last year the European force at Hong Kong numbered 1,204 souls. The garrison was principally made up of a battalion of the 9th Regt., but there was also a detachment of the 11th and some artillery and engineers. As early as January of last year we find Major-General Guy addressing the War-office on the sickness prevailing among a part of the troops. His despatch relates to the unhealthiness of the peninsula of Kowloon, and it appears that the 99th Regt. had suffered in health from being removed to that place. A long medical report accompanies this despatch, and shows

Digitized by Google

that the authorities were well aware that troops brought to Southern China, and placed under the conditions which affect the soldier in that climate, are in much danger. Deputy Inspector-General Dick, indeed, writes to the medical department on the 27th of January (page 17) that the 99th has continued to suffer from having been placed at Kowloon; "that its efficiency is not only greatly impaired, but that its general health is so deteriorated by disease and exposure to the malarious influences of the station as to render it, in my opinion, perfectly unfit for general service; and, though the mortality has not been very considerable, I have no doubt it will be found necessary to invalid a large portion of the regiment within the next two or three years." Such was the effect of an ill-chosen station on a body of British troops sent so many thousand miles. Within a few months they were stricken down and rendered useless. Dr. Dick goes on to say:—"Experience has shown that the health of European troops cannot be maintained in this colony unless they are well housed in stone or brick buildings, and not even then without the aid of every practicable sanitary precaution. I very much fear, therefore, that if a second European regiment is sent to Hong Kong before proper provision is made for its reception the measure will defeat its object, and that should a force be required for any emergency, after a residence of one hot season in the colony, one of the regimentss will be totally inefficient." General Guy subsequently sends a medical report by Dr. Dick, dated the 29th of March, and accompanies it by a remark that "many of the duties which soldiers are called upon to perform in this climate should be done by native troops, with a view to preserve, as far as possible, the health and efficiency of British soldiers, and at the same time diminsh the great expense attendant on replacing the casualties in a regiment of the line in such a country as China."

We have given these extracts to show how well aware were the medical officers at Hong Kong of the unhealthiness of the service on their station. Soon after these despatches the 2nd Battalion of the 11th Regiment was sent from the Cape of Good Hope. It arrived at Hong Kong on the 28th of May, which, as General Guy declares in his despatch describing the sickness which followed, is "the worst season for Europeans to encounter the climate of Southern China." The arrival of these troops brought up the total numbers of the garrison to 2,079, including officers and men of all ranks, together with women and children. We do not take these numbers from the recently published papers, but from returns that have been some time before the public. The battalion, it appears, arrived before preparations were made to receive it. General Guy gives as one of the causes of the sickness. "The arrival of the battalion a month earlier than was expected, and the unavoidable necessity of placing a portion of the corps at Kowloon, until the buildings which were in course of preparation were ready for the reception of the troops." Even when the buildings were ready, they were admitted by the General to have been unfitted for the purpose. Here we have, in the first place, this new body of men sent to Kowloon, which months before had been condemned as being most unhealthy, and as having destroyed the efficiency of the 99th Regiment; and, furthermore, when the 11th were to be delivered from Kowloon, they would only be lodged in buildings "in all respects inferior to regular barracks." General Guy concludes by requesting Lord de Grey's attention to the "often expressed opinion of the medical officers who have served in China that the presence of a native battalion for the performance of garrison duty during the invariably unhealthy summer season at Hong Kong is absolutely essential for the preservation of the lives and health of the European troops." The papers published show that at various times during the hot season of last year remonstrances were made by the senior medical officer against the overcrowding of the barracks and hospital, and the overwork which prevented the men of this unhappy 11th Regiment having more than from one to three nights in bed, and the 9th Regiment only three and one-third. On the 28th July Mr. Saunders, the senior medical officer, points out to the commandant that in one place "375 men occupy barracks which only give each man about 725 cubic feet, being 275 cubic feet less than the regulations allow for this climate as the *minimum* space." He also states that two men had died the day before of cholera, and expresses his conviction that "by overcrowding the men at this, the most unhealthy, period of the year nothing short of considerable mortality can be expected."

All this correspondence is well worthy of attention, and no one who reads it can wonder that the most fatal sickness fell upon the troops. Of officers it is stated that four died and five were invalided; of men 95 died and 202 were invalided; of women, nine died and 38 were invalided. Not less than 88 children died, while 45 are registered as invalided. Out of 2,000 souls 196 died and 290 were invalided in eight months. The fault must be divided between those who sent the troops to Hong Kong and those who neglected to make proper provision for them. It was, perhaps, a peculiarly unhealthy season in one of the most unhealthy places in the world, and the civil residents are said to have had much sickness among them; but no one who reads the despatches can doubt that these troops did not receive the care which should attend the soldier in a tropical climate. It is needless to dwell on the folly as well as inhumanity of thus dealing with our hardly-raised recruits. The efforts of military reformers at home cannot be better directed than to punish such a waste of valuable lives as is here exposed.

TELEGRAPHIC COMMUNICATION WITH INDIA.

We are glad that a select committee of the Commons is about to be appointed to inquire into the working of the telegraphic communication with India. By a reference to our Parliamentary intelligence it will be seen that Mr. Crawford has moved for this. The necessity for possessing prompt means of intercourse with our Eastern marts renders the question as to the means of improving the efficiency of the telegraphic service of the first importance. It is felt, and strongly felt in the City, that an end must be put to the delays in transmission which our merchants hitherto have had to bear, in addition to having their telegrams frequently rendered wholly unintelligible. The inquiry will fall short of any useful purpose if it confines itself to mere management, or the possibility of improving the existing route. It is all very well for Sir Charles Bright to charge delays of weeks on the wretched system and inferiority of the lines through Turkey; this must be allowed its weight, but it is not the whole of the evil. It may be fairly doubted whether full advantage has been taken of the later scientific improvements. The difficulty will lie in selecting members acquainted with telegraphic science, and at the same time not coming under the category of those on whom the Chancellor of the Exchequer pronounced an anathema, members who use their position in promoting interests or schemes with which they are connected, but which are really commercial undertakings, and ought to stand or rise on their own merits.

The members of the committee are, we hear, to include:—Mr. Crawford, Lord Stanley, Mr. Childers, Lord R. Montagu, Mr. Stansfeld, Admiral Seymour, Mr. Ayrton, Mr. Turner, Sir H. Rawlinson, Mr. Baillie, Mr. Weguelin, Sir C. Bright, Mr. Laird, Mr. Oliphant, and Mr. Schreiber.

PROJECTED MANILA RAILWAY.

IT has been we believe asserted that the scheme of a railway from Manila to the Lake of Laguna, an estimated distance of five and a half miles, if carried directly through the gorges of the intervening hills, had so far received official sanction, after a report made to the Captain-General, that the Government had offered a guarantee to the line of seven per cent. from the date of its operation. So far as we can judge, this is but an assumption, for neither the Spanish Embassy at London nor the Consulate has any knowledge of such a guarantee. That the sanction of the Home Government has been accorded does not appear from any notice issued up to this time in the Imperial *Gazette* of Madrid, though we might readily assume that, in accordance with the tardiness of Spanish officialism, the notice of the endorsement of the scheme had been delayed, did any other circumstance confirm it. This is only too apparent from the character of the "flying survey" on which the GOVERNOR-GENERAL is reported to have formed his judgment, a report which gives evidence of the embryo character of the scheme in the remark that "some circumspection" will be requisite with regard to "the choice of gradients, curves "and cuttings." Not to speak of the necessity that exists at Manila for the re-erection of the public buildings, it is certain that the Home Government has no surplus funds for colonial improvement; all that the Captains-General of Manila and Cuba can spare is in urgent request at Madrid. As the China public are to have the privilege, according to the same statement, to subscribe for shares, it is as well we should caution them to scrutinise very closely any project brought forward. It is new to us that the leisurely community of Manila, already provided with good river communication with Laguna, should be so intensely interested, as the statement would lead one to suppose, in providing means for the construction of the railway; for it is represented as started for mercantile interests purely. As to those interests, it is evident that a far more advantageous line —one that would give an immense impulse to the prosperity of Manila—might be constructed to Panpanga, affording ready means of delivering the great staple, sugar, now brought to the port by tedious routes.

If Manila merchants are ready to give financial aid to the former, how is it they are silent as to the latter? We are satisfied that the English houses at Manila would not be willing to have their capital locked up in a railway enterprise. The increased activity latterly given to trade necessitates more than ever a ready command of money, and with the opportunities presented of turning it over and over again, it is impossible to discover how even an assured dividend of seven per cent. per annum would present any tangible attractions. This is equally true of native and foreign firms resident at Manila; and our view is further borne out by the high rate of interest at which money rules. We are afraid we must treat the whole as a *canard*, though we are not unaware of previous surveys that have been made, and of railway concessions in the hands of English engineers. The term of twenty years which they are said to spend in Spain in discussing a needed project before entering on its execution may be fairly reduced in favour of the Manila community by ten years. Were the information true we see no chance, in the present condition of the Spanish Treasury, for giving confidence to capital. Then, what is the value of a seven per cent. Spanish guarantee? The potency of a seven per cent. share dividend would, we allow, be all prevailing with European capitalists offered by a Government able and willing to fulfil its obligations, provided the per-

Digitized by Google

centage of payment extended, in this case, not only to *estimated* but *actual* disbursements in construction, and that it further covered the cost of working and maintenance, in the event of the outlay on those accounts exceeding current receipts. It is evident that the payment of seven per cent., either on paid up capital or actual cost, does not necessarily involve a return to shareholders that can properly be called a dividend, the guarantee being liable to be sunk in accruing obligations, where the traffic is not such as to promise any very large return. This would inevitably be the case for years to come with a Manila and Laguna Railway. We can easily conceive various potent reasons for the Manila Government desiring the construction of the railway. Ready and easy access to the interior, if not a first necessity, would yet be of obvious and permanent advantage, political and financial. But looking at the project as a purely mercantile speculation, we must pronounce against it if the guarantee be not so extended as to cover all liability. No doubt the community of Manila would find their advantage in being supplied promptly with edibles from the great natural storehouse lying behind the intervening hills, and our friends returning home from China would gladly avail themselves of the aid of steam to visit the lake and bay; but neither the rice nor other grain available for transport—cereals ill calculated to pay heavy freightage—would make the Manila and Laguna a paying line. The local Government no doubt must take the initiative, but railway construction in Manila can only be undertaken under more favourable auspices than are obtainable at present.

MR. ERIC R. T. FARQUHAR, the newly-appointed second Secretary of Legation at Peking, proceeds by the mail of 26th March. Mr. Richard Connolly, at present in the Embassy at Paris, has also been appointed a second Secretary at Peking. Mr. Randall Callander, the Consul at Manila, will probably proceed to his post next month.

THE Board of Trade have published the account of the wreck and plunder of the *Abeona* at Formosa in October last. The particulars have been already given by us.

COCHIN-CHINA AND THE FRENCH LEGISLATURE.

In the debate on the Address in the Corps Legislatif, Cochin-China came in for a certain amount of attention. The following Amendment was proposed by M. Taillefer and seven other deputies:—"Sire,—You speak to us of Algeria and the hopes which you found upon her; allow us, in our turn, to speak of a colony whose prospects are revealing themselves daily, namely, Cochin-China. We think, Sire, that it would be useful to explore Camboge as far as China, in order to establish commercial relations with the centre of the latter country. We desire to see agriculture encouraged in Cochin-China. In order to hasten assimilation and to introduce the mother tongue into that country, we desire to see the Government encourage education and the substitution of Roman characters for those of China."

M. Taillefer, who stated that he spoke from information obtained by one of his family who had visited all parts of Cochin-China, said that under the Annamite Government property was ill protected, while under the French regime the rights of property became absolute; that the taxes, which, under the former, were often charged over and over again, were under the latter fixed and moderate. He said that rice, of which the export was prohibited, was only worth two francs under the Annamite Government, fetched under the French seven francs in the husk and twelve when husked. Situated, as it were, in the centre of a Mediterranean surrounded by two hundred millions of consumers, Cochin-China had a grand future before it. The speaker also hinted at its importance in a military as well as in a geographic, agricultural, and commercial sense. He dwelt upon the importance of improving the River Camboge, to enable Cochin-China to find an easy outlet for her produce, and to become the natural entrepot of China. To protect her from attacks nothing more was required, he said, than to establish dams on the Arroyos. Another proposal was the establishment of powerful Cornish engines for irrigating the rice fields, and thus procuring two crops of the grain a year. The cost of production, he declared to be as follows per hectare (2½ acres):—

Seed and prepartion of land	f.25.00
Labour	22.50
Maintenance of sluices	3.25
Transplanting	10.50
Weeding	4.50
Reaping	32.00
Thrashing and winnowing	37.50
Total	f.135.25
Tax...	13.75
	f.149.00

The hectare produced 50 hectolitres of rice (22½ gallons to the hectolitre), in the husk, which at f.6.25 gave f.312.50. Those who cultivated their own lands could make 76 per cent. on their capital, while those who farmed it out might gain 63 per cent. A model rice farm for the cultivation of rice would cost f.240,000 (£9,600) to establish, and would yield, after the first year, f.500,000 (£20,000) per annum. M. Taillefer declared that Cochin-China might eventually export from fifteen to twenty hectolitres of rice, worth 150 to 200 millions of francs.

As regarded education, M. Taillefer declared that the success of the French schools had been great, and that while it required twenty years to become an average scholar with the use of the Chinese characters, two or three years would suffice with the aid of the Roman alphabet. We cannot help remarking that this appreciation is quite incompatible with the views of M.M. Stanislas, Julien, and many other Chinese scholars, who declare the Chinese language to present few real difficulties; it is strange if the Cochin-Chinese idiom should be so much more difficult. "Let France, then," said M. Taillefer in conclusion, "make some sacrifices for a colony of which the future was already revealed. France had once the opportunity of founding an empire in the Indies; let her not miss the second which presents itself to her!"

The Government resisted the introduction of the amendment in the following short speech from the mouth of M. Granier de Cassagnac:—"The various measures which have been alluded to are already in a great measure in process of realisation. The principles which relate to education and agriculture are indicated and detailed in the exposition of the state of the empire. As regards the exploration of Cochin-China an expedition is already ordered and even organised."

The amendment was then put and rejected.

SILK AND SILKWORMS IN FRANCE.

The silkworm breeders and the dealers in silkworms' eggs were terrified a week or so since by the premature appearance of a number of the little living black threads which the unusual warmth of the weather had caused to break through their fragile prisons. This circumstance assumed special gravity, from the fact of the arrival at Marseilles of a large quantity of seed from Japan just at that inauspicious moment. The Government immediately despatched competent persons to give their aid in case it was required, and M. Leon de Rosny, the professor of Japanese, is gone to transcribe and translate the marks on the cards, in order to aid the authorities in guarding, as far as possible, against deception either here or elsewhere. Fortunately the temperature has fallen again, and the wind and rain are at present not favourable to further hatching.

A decree was issued on the 3rd of the present month authorising the sale of silkworms' eggs by public auction in the town of Marseilles.

The raw silk market remains in the same quiescent state that it did a month ago; the quantities taken by the manufacturers at Lyons during the past three weeks were respectively—39.525, 39.415 and 35,120 kilogrammes, the first of these weeks showing a diminution as regards that which preceded it of 6,695 kilogs.

A considerable number of looms are standing still, and speculation is almost entirely absent, but the holders instead of exhibiting any inclination towards a reduction are firmer than ever in their demand, and the tendency is towards a rise.

The reason of this is evident; the demand for silks for exportation is great, and the stocks are being diminished so rapidly that the manufacturers will be compelled before long to be filling their warehouses again. They cannot wait for the next crop of silk, which it is expected will be much larger this year than it has been for some time, in consequence not only of the large imports of raw silk from the East generally, but also from the immense quantity of eggs sent home from Japan to supply the breeders here. A journal in the silk interest sums up the state of affairs at the present moment in the following quaint terms:—"Producers and consumers are perfectly in accord, each looking out for an opportunity of surprising the other." They are in fact simply waiting to see what China will do for or against them.

THE HONG KONG DOLLAR.

(To the Editor of the *London and China Telegraph.*)

SIR,—I learn with some surprise from your description of the Hong Kong dollar that the exterior rim is not milled. If the surface is left plain, no impediment is presented to the operations of the Chinese debaser, who will inevitably cut the coin in two, scoop out some of the metal, insert some base alloy, and surround the fissure with a thin film of silver to hide temporarily the cheat. The result will be that the dollar will be mercilessly cut by money dealers and local traders, and thus the utility of the Hong Kong Mint very seriously impaired. I trust this matter will be looked to. I understand from an article that appeared some time since in the *London and China Telegraph* that Captain Kinder was in favour of lettering the outer edge by machinery in such a way as to defy mere manual imitation. As the coin, though struck, has not been issued, it is desirable that the attention of the Mint and Treasury authorities should be directed to this important point.—Yours, &c., BULLIONIST.

March 5, 1866.

Parliamentary Intelligence.

HOUSE OF COMMONS.

THE CONSUL AT BANGKOK.

(March 6th.) Mr. WYLD (Bodmin) asked the Under Secretary of State for Foreign Affairs whether Mr. Knox, Her Majesty's Consul at Bangkok, had returned to his post; why he quitted it; and if any one was left in charge at the consulate during the absence of Mr. Knox.—Mr. LAYARD said that Mr. Knox, Her Majesty's Consul at Bangkok, had returned to his post, which he had quitted in consequence of very important affairs connected with British interests. The Government entirely approved his proceedings. In his absence he had left an officer of great ability and experience, perfectly competent to manage affairs, in charge of the consulate.

THE FORCES IN HONG KONG.

(8th.) In reply to Colonel NORTH, the Marquis of HARTINGTON stated that the forces in China had not yet been reduced, but they would shortly be, as one regiment had been ordered home.

Digitized by Google

NATIVE TROOPS IN CHINA.

(9th.) Colonel NORTH asked the Secretary of State for War whether, in conformity with reiterated recommendations of the Army Medical Department and military authorities, the Government had determsned on the employment of native troops in China.—The Marquis of HARTINGTON said it was intended that native troops should relieve certain regiments stationed at Hong Kong. No doubt, however, he would have another opportunity of explaining what were the arrangements contemplated respecting the employment of native troops in China, and therefore the House would excuse him for not entering further into the subject at present.

THE NAVY IN CHINA.

(9th.) Mr. MOFFATT rose to ask the Secretary of the Admiralty how it was that on the naval station at Hong Kong the salaries were £5,000 and the wages £5,000 a year. There were there 35 ships, many of them scarcely seaworthy. From the proportion of wages to the total vote it appeared that a little economy might be applied. He should like to know whether the 35 ships in harbour or afloat in the China seas were really seaworthy, or whether they were kept there as a formality, and officers were employed to little purpose.—Lord C. PAGET, in reply, said that at the time of the Chinese war a large number of gunboats were sent out; and on its termination, as a considerable expense would have been entailed by the voyage home, it was resolved that a certain number should be retained at Hong Kong, and there used for whatever purpose they were most suitable.

Literature.

—o—

Etudes sur la Chine Contemporaine; by MAURICE IRISSON. 8vo. Paris.

M. Irisson, the author of this study of China, was private secretary and interpreter to General Montauban during the campaign of 1860; and, having lived for some time amongst the Chinese and speaking their language, his opinion respecting themselves, their government, habits and customs are deserving of attention. The Studies occupy little more than two hundred pages, under the following heads:—Race, Language, Family, Society, Agriculture, Industry, Commerce, Arts, Science, and Politics.

The plan of M Irisson's work is simple, but at the same time philosophical. He says that before studying the Chinese in their private and public life it appeared to him indispensable to consider their physical, intellectual, and moral constitution, in the organisation which is peculiar to their race and distinguishes it from all others. We must not, he adds, measure the Chinese by the standard of our own cerebral conformation, but with reference to the faculties, more or less harmonious, which together form the Chinese character, never losing sight of the strong or the weak points of that character. "One has no right," says M. Irisson, "with justice, to expect more from a race than the legitimate developments which belong to its peculiar organisation." He therefore commences logically with the study of the Chinese as a race, and of their language and intellectual condition, subjects which he treats with the firmness of one well accustomed to anthropological and linguistic studies, and at the same time in very simple and lucid language. The general conclusions which M. Irisson draws respecting the Chinese character are as follows:—"A very marked predominance of the instincts over the sentiments and the intelligence; a predominance of the intellectual faculties, in the mass, over the sentiments, or regulating powers; and the habitual submission of the intelligence to the demands of the instincts without efficient control from the moral sentiments."

M. Irisson's study of the language of the Chinese is peculiarly simple and clear, and like M. Sanislas Julien, he pronounces it very simple and easy of attainment as regards speaking, and not very difficult even to write. He tells his readers not to be frightened at the array of thirty-three thousand characters in the Chinese dictionary, for "two-thirds of these, at least, are entirely obsolete, and of the eight or nine thousand characters indispensable to a man of letters there are scarcely two thousand which can be considered necessary for the ordinary purposes of life."

He gives interesting information, in a concise form, respecting the sepulchral towers, where children are buried, and about which so much has been said and written, concerning the intense filial devotion and respect for ancestry which mark so strongly the Chinese people, their ancestral chambers, and habits respecting the dead; the social distinctions, the condition of the people as regards wealth and enjoyment; the corporations of merchants, and the arrangements amongst all classes for mutual aid.

He is not at all an unfavourable critic of Chinese institutions, but he speaks of the administration of justice in anything but favourable terms. The "nobles of the eight grades," to use his own expression for the official and literary magnates, cannot be brought to justice without the special permission of the Emperor; but the case is very different for the three classes of the people. For all, he says, there is the greatest freedom with respect to accusation, but no one enjoys the liberty of defence for the simple reason that there is no defence, and that there are no defenders—no advocates in China. Of the penal code he says: "It is very severe, and inflicts corporal punishment of every degree. The stick is used upon all occasions, not only alone, but also as the prelude or accompaniment of more serious punishment. But the magistrates are ready to admit extenuating circumstances, and even the executioner is accustomed to diminish the number of strokes of the bamboo ordered by the sentence. Banishment, whether temporary or perpetual, is always accompanied by the bastinado, and is more common than the punishment of death by the sword or by strangulation. But the capital punishment is often applied to offences which we deem too trifling; thus, not only the slave who strikes his master, and the son who assaults his father, mother, grandfather or grandmother, and, which is more terrible still, the son who uses insulting language to his parents and grand parents, are condemned to death. Happily, however, the sentence is more frequently pronounced than carried into execution; so much so that, in that immense country, the executions do not amount to twelve hundred in the year."

When treating of the agriculture of the Chinese M. Irisson condemns without measure, but most rationally, the use of the villanous rice spirits and the interdiction against making wine. In the eyes of a Frenchman, and of most sensible men, a country like China which, M. Irisson says, produces the finest grapes in the world and does not make wine, but consumes coarse spirits, wittily labelled by our author *Eaux de mort*, has no excuse but that of antiquated laws and makeshift legislation. M. Irisson, like all observant writers about China and the Chinese, dwells upon the great industry and imitative ability of the people and the extraordinary absence of machinery and of all that results from the application of the principles of science to the ordinary wants of life and the increase of commerce; but he admits, with justice, that unless effected in the most gradual manner the industrial system of the West could not be introduced into China without causing great suffering to her immense population. "It is difficult," he says, "to picture to one's self the terrible consequences of a system which would condemn to idleness and misery so many millions of workmen of a race whose instincts and faculties demand constant labour." The excellence of the roads in China call forth M. Irisson's unqualified admiration. He says:—"No country in the world is better provided with great, wide and easy roads than China, and military posts are generally established along them; no country is better supplied in all directions with vast lines of streams, navigable rivers, and canals, all communicating one with the other. In the mountainous districts if you do not find those grand roads eighty or ninety feet wide which are to be found elsewhere, there are ways easy of access for the formation of which enormous rocks have been blasted, hills levelled, and mountains pared away. The people of the country are accustomed to these shelves, winding along the faces of the mountains, and to the bridges thrown daringly from one peak to another. All along the roads the towns and villages are so frequent that nothing can be more easy than the stages. Not only are all these grand roads and ways clearly laid down in maps and itineraries, but they are also supplied with wooden towers erected at intervals of about a mile, and on which the traveller may read the names of the localities as well as the direction and distances of the various roads."

The neglect of the coal deposits of China strikes M. Irisson as one of the grand errors of commerce:—"The captains of our steamers go to a long distance for what almost lies under their hands. They draw a little coal from Japan, but that trade is far from being cultivated as it might be. That they do not go to Fu-ku-yama or Ozaca, where the deposits of coal are inexhaustible, one can understand; first, because of the many difficulties imposed by the Japanese Government, and, secondly, on account of the difficult navigation of the inland sea, especially for heavily laden merchant vessels. Many Japanese vessels, although conducted by able pilots, are lost there, and the only way to avoid the many dangers of these seas is to travel in a steamer of small draught, and that during the day only. At the approach of dusk the native pilot, whom you are compelled to take on board, lets go the anchor, and would not lift it again before daybreak for ten times the amount of his fee. If coal is to be got in Japan why not go to the Isle of Sai-kai-do, the port of Nagasaki being very secure and the nearest to China, and a company for obtaining and transporting the coal might easily found there a prosperous business. But why draw this indispensable combustible from Japan, Manila, or even from the Isle of Lucon, when it would be so easy to get it from the interior of China itself? Nowhere is manual labour cheaper than in that country; nowhere could such able workmen be found at such low rates of wages. The convenience and cost of conveyance by river and canal is nowhere so cheap as in China; and the deposits of coal are abundant. The province of Kiang-si, for instance, is a source of inexhaustible wealth in this respect, and is, moreover, near to the European settlements, so that the transport would not be onerous, and the people of that part of China enter easily into our commercial habits. The strata of coal are also rich and abundant in the provinces of Nau-son and Sse-tchouen." This is an important subject, and our friends in China will doubtless know whether financial or other questions stand in the way of M. Irisson's suggestions.

The chapter relating to art gives the author the opportunity of exemplifying the deficiency of the faculty of poesy, or ideality, in the Chinese brain; while doing justice to the wonderful ability of that people, who, he says, have all the powers of realization with which the Creator endows the human soul for the use of genius, the talent of imitation, the sense of form in the highest degree, delicate perception of colour, facility of execution and talent for construction—all, in fact, that is indispensable for the reproduction of the real, the visible and the tangible. "If they are not artists in an ideal sense, they are as regards plastic reproduction, the artists of the world of realities, the masters of imitation." In the fifth and sixth century of our era, that is to say, twelve hundred years ago or more, painting was very flourishing in China; but in that, as in the manufacture of porcelain and bronzes and the art of enamelling, the Chinese artists and workmen have lost many of their old secrets and much of their former ability.

Speaking of music, M. Irisson gives an instance of unconscious plagiarism of no common kind:—"More than a thousand years before the Thracian bard, the Chinese musician Koue[i] said to Chun: 'When I strike the harmonious stones of my instrument (*king*) the animals surround me and tremble with delight.'" Who would have thought that the beautiful hyperbole applied to Apollo, like the famous story of Aladin, had its origin in China!

The book contains an interesting chapter on the sciences, or rather the want of science, of the Chinese, and another on the policy of the government and the prospects of the future; but we have already exceeded our limits, and must finish by recommending these useful and interesting studies of the Central Flowery Land and its inhabitants to all who are interested in the subject.

ENTOMBMENT OF THE LATE EMPEROR OF CHINA.

An account (from which the following is abridged) of the placing of the remains of the late Emperor of China in the magnificent tomb prepared to receive them, already described in the *London and China Telegraph*, appears in the official *Moniteur* of Paris.

On the 5th of November the young Emperor of China conducted the ashes of his father, who died three years ago, to the tomb prepared for them. Great preparations had been made for the ceremony, and the day was only fixed after "the Minister of Rites and the Bureau of Mathe-

Digitized by Google

matics had declared it to be propitious." The writer says that in spite of an *invitation* addressed to foreigners "*not* to leave their houses between the fifth and thirteenth of November, when the Son of Heaven would traverse the streets of his capital," he installed himself on the night before the ceremony in a small shop where, perched upon a scaffolding of chairs and tables behind a closed *jalousie*, he quietly awaited the arrival of the Imperial *cortege*. The middle of the road was carefully repaired for the procession, and all circulation thereon interdicted. The shops were generally decorated with red scarves over the doors.

At seven in the morning appeared groups of horsemen, followed by long files of vehicles and camels laden with baggage, which continued for several hours almost without interruption. About midday an estafette carrying a lance, of which the pole was covered with tiger skin, passed at full gallop; four others followed at intervals of about three quarters of an hour. When the last of these had passed the police cleared the sides of the streets, and forced the people either to enter the houses or the lateral alleys, of which the entrances were concealed by curtains or mats; the few who tried to evade the order were soon brought to their senses by the lash of a heavy whip, which completed the clearance "as if by enchantment," says the writer—the whip enchantment is a new kind of necromancy!

A fifth messenger appeared. The guards ranged themselves along the sides of the central portion of the road, and a dead silence prevailed everywhere, the guards watching the windows of the houses to see that no one was acting the part of Peeping Tom of Coventry. Presently appeared the first horsemen of the Imperial escort, marching in slow time; the police now seemed petrified into statues; the new arrivals were the officers of the palace, dressed in red silk robes embroidered with rosettes in gold; next followed other horsemen leading the eight horses of the Emperor, small Tartar steeds covered with rich yellow housings; then a hundred archers of the Imperial Guard, their bows hanging at their saddle-bows and their quivers full of arrows. A little behind these rode a horseman richly dressed, one of the Imperial Princes who commanded the procession, and who advanced with great dignity in the midst of a numerous staff of military and civil Mandarins in picturesque and varied costumes. Then came the Emperor himself, in a palanquin (sedan-chair, the writer calls it), covered with cloth of gold, and carried by sixteen men dressed in red silk richly embroidered, and wearing caps with white buttons. In spite of the rain, which fell without cessation, the sides of the palanquin were not closed, and this and another fortunate circumstance enabled the writer and his companions to have a good view of the Emperor. The Western Church, the Tong-tang, has its principal facade on the street in question—neither the name of which nor that of the city itself being, in accordance with the curious want of attention to such points so characteristic of French writers, never once mentioned throughout the narration—and over the door is a cross (the church being, we presume, Catholic, though not so stated), and as this ornament is rare in China the young Emperor rose from the cushions on which he had reclined and leaned out of the palanquin to look at the curious decoration; at the same moment there was a slight halt in the march of the *cortege* and Peeping Tom had a capital look at the forbidden fruit. He says that the young Emperor has the figure and appearance of his actual age, namely, ten years—the same as that of the Prince Imperial of France; that his face is regular and handsome, his complexion very white, his eyes black and extremely bright, and his expression "not at all Chinese, very gentle, and, on the whole, rather agreeable." His Majesty was very simply dressed: wore a yellow silk robe with an overcoat of blue cloth and a black velvet cap surmounted by a red silk rosette or button. Prince Kong followed the Emperor in a covered carriage, and after the Prince came a hundred horsemen, including many Mandarins of rank, and lastly several vehicles supposed to contain some of the most precious articles belonging to the Emperor. During the passage of the Imperial palanquin the guards all turned away their faces, as it is not etiquette in China to regard the countenance of majesty.

A report was spread that the two Empresses would also pass along the route, and about five o'clock in the afternoon the shops were suddenly closed, the street cleared again, five estafettes passed at long intervals as in the case of the Emperor's approach, and the first horsemen of the escort of the Empresses presently appeared. The escort was similar to that of his Majesty; after the archers of the body guard, the officials and servants of the Palace and a considerable gathering of Mandarins, came the two yellow palanquins, each with its sixteen bearers in red and gold. In the first was the Empress Tzengan, the legitimate wife of the late Emperor; in the second his other wife, Tze-shi, mother of the reigning monarch. Unfortunately, the light began to fade, and Peeping Tom could only catch a glimpse of the Imperial ladies. He says—"The two Princesses appear to be each about thirty years of age; the first was very simply attired, the head uncovered, and the hair dressed *a la mode Chinoise*, while the coifure of the second was *a la Tartare*—not in the sense of cooked eels or other well known *plats*, but with the hair arranged in large *coques*, or bows, decorated with jewels, and presenting a very *recherche* appearance. The two Imperial palanquins were followed by a number of vehicles containing the princesses, and ladies of the Court, but—alas! alas!—the blinds were closed, and the coming shadow of the black mantle of night with the rain completed the eclipse."

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, MARCH 8.

The first sitting of the Second Chamber of the States-General, which met on the 27th Feb., was important. The Minister of Finance, Mr. Van Bosse—who took the place of Mr. Thorbecke—immediately communicated the programme of the Cabinet, the quintessence of which was, that the Ministry would be a Thorbecke Cabinet, without Thorbecke; that the policy of that statesman would be continued both in the mother country as in the colonies. Mr. Pické, Minister of Justice, was severely attacked by Count van Zuylen, one of the most eminent members of the anti-revolutionist or orthodox party, because he had already announced by circular, that his first act would be to separate the Church and the State, as was prescribed by the Constitution.

The colonial question will be early brought forward, and, as Mr. v. d. Putte said, the Culture Bill will come into discussion immediately after the Easter recess, and it is still generally thought, as before, that it will pass, with some amendments.

Mr. Thorbecke was on the 1st of this month elected for Groningen and Zutphen. It is very desirable that he should accept one of these seats, but his decision is not yet known.

The Budget of the Financial Department, which could not be discussed on account of Mr. Betz' resignation, will be brought forward by Mr. van Bosse within a few days. The previous report of the sections show that the late crisis will be again debated, notwithstanding it is impossible to say anything new thereon. Perhaps something may be said as to the future Minister of the Marine Department. It is generally believed that Captain-Lieutenant Jansen will accept that post. The rumour that Mr. Blusse would fill it is a *canard*.

The Rotterdam Bank has issued a prospectus for augmenting the capital by 10,000,000f., divided in 40,000 shares of 250f. each. The shares are now quoted 4 per cent. above par. The dividend over the last year is supposed to be f.9.70.

The reorganisation of the laws of our companies (limited) is under discussion, and it is thought that the Minister of Justice will introduce a Bill based upon the English Companies' Act of 1862.

The Opposition papers are still mooting the question whether our King has given a promise to the King of the Belgians to hand over one of our colonies. The most absurd stories are spread about the matter; of course not one word of them is, or can be, true.

The last mail brought us the news that Messrs. Reynst and Vinju had distributed a circular about the regular and periodic steam communication between Java and Australia. They have made several improvements to the first plan, and now propose to open a monthly service between Batavia, Melbourne, and Sydney, *vice versa*; a monthly service between Batavia, Sourabaya, Timor Taepang, Timor Delhi, *via* Cape York, to Brisbane, *vice versa*; a monthly service from Timor Taepang for Adam Bay, *vice versa*; a monthly service from Timor Taepang for Macassar, in communication with the steam lines of W. Cores de Vries (whose steamers are now bought by the Rotterdam house, Besier and Jonkheim). The capital now wanted amounts to £500,000, divided in 5,000 shares. This circular confirms what I stated in my last letter, viz., that our Government has not yet granted the subsidy which these gentlemen have asked. It is now the question whether the Australian and Java traders will support sufficiently this undertaking; so much is certain, that the press does what is possible to demonstrate its necessity and its advantages for both countries.

COMMERCIAL.

COFFEE.—The Trading Company announced its second monthly sale, which will be held on the 27th inst., and on which occasion will be offered 84,824 bags. The market remains unalterably firm; the actual stock of the Trading Company being reduced to 447,238 bags, against 667,961 bags in 1865. The private transactions consisted in 667 bags Java ex Verden, 2,738 bags ex do., 6,800 bags Padang ex Franklin, at 45 to 48 cents.; 3,500 bags Java ex Zephir, at 45¼ to 46 cent.; and 4,300 bags Padang ex Brouwershaven, at 45 to 47½ cents. The general stock consisted only of 508.000 bags, against 716,400 in 1865.

SUGAR.—The market is very firm in consequence of the inquiry for Russia. The transactions were of much importance, and comprised 8,000 kranjangs Java, which were paid with ¼f. to ½f. under November prices. Holders decline now to operate at this quotation. The unsold stock was, on the 1st inst., of the Trading Company, 131,974 mats and 3,539 bags, of which will be offered on the 21st in auction 70,300 mats and 3,539 bags. The private stock in the first hand amounted to 15,530 kranjangs.

TEA.—The market is very animated. The cargo per Hydra, direct from Foochow, arrived here last week, and will be sold on the 23rd inst., in public sale. This cargo consists of 3,996/4, 2,485/12, and 254/16 chests Congou, and 227/4 chests Souchong. The valuation of the brokers is not yet known.

TOBACCO.—Java leaves: The market is dull, and there are no transactions to report. The stock amounts to 4,537 bales Java, and 2,443 bales Manila.

TIN.—The market is very dull. In the last month the price declined from 56f. to 53f. Banca at the sale and new conditions is offered at 51½f., which is about the same as 53f. old conditions. It now becomes a matter of the utmost importance to form a just view of the future of tin, so as to decide what ought to be given for the Banca at the coming sale; and it must be remembered that it is not only the quantity put up by the Trading Company which will be available, but also the balance of 76,000 slabs left over from last year's sale. The Trading Company has made important alterations in their conditions of sale. They no longer allow 1 per cent. draft and 2 per cent. discount as formerly. They still allow general buyers 1½ per cent. discount for cash and give two months prompt, but they also give the privilege of taking 3½ months' credit to some approved houses in lieu of 1½ per cent. discount and 2 months prompt. The warrants on the prompt day will be made out in lots of 100 slabs instead of 500 heretofore. It is therefore necessary under the new conditions that buyers in Dutch currency should not lose sight of this disadvantage of 3 per cent. compared with the terms of former years. The unsold stock on the 1st amounted to 146,853 slabs, against 132,246 slabs in 1865.

SHIPPING.—ARRIVALS.—Feb. 26, at Texel, from Batavia, Matheran; 27, at Brouwershaven, from Foo-chow-Foo (last from Scilly), Hydra; from Menado, Sliedrecht.

DEPARTURES.—Feb. 27, from Texel, for Batavia, Ymuiden; March 1, from Hellevoet, for Batavia, Catharina Maria; March 2, from Brouwershaven, for Batavia, Æolus; 5, from Texel, for Samarang, Gebroeders.

RUSSIA AND THE AMOOR.

According to reliable information, it is expected that the King of Prussia will pay a visit to the Czar on the 28th of April, when the Emperor and Empress of Russia will celebrate the 25th anniversary of their marriage.

An Imperial decree has been promulgated, ordering the issue of a lottery loan, to be taken up in the interior, of the amount of 100,000,000 roubles, bearing interest at 5 per cent.; and an Imperial ukase, permitting Jews who have received a diploma at a Russian or a Polish university to enter the public service in Poland, with the enjoyment of the rights and privileges connected with the office of public functionaries.

The Russians are devoting their serious attention to Eastern affairs. The *Invalid* has had an article, and promises to return to the subject, with a view of showing how it happened that the Russians advanced from the Volga to the Syr-Daria. It states that the Russians found their merchants had little hope of deriving any benefit from the trade with Taschkend so long as the latter was exposed to the attacks of two such powerful enemies as Khokand and Bokhara; and when it came to their knowledge that the Emir of Bokhara, taking advantage of the dissensions which prevailed in Tashkend, and of the weakness of the Khan of Khokand, was preparing to seize the rich booty he had so long coveted, the Russian army moved forward and took possession of the city. To have incorporated Taschkend with the empire would simply have been to expose the frontier to the constant incursions of the Khokanese and Bokharians, and the continual border conflicts would probably have necessitated an extension of the frontier; but as, on the other hand, to remain passive would have been to allow the Emir to take possession of Taschkend, it was resolved that the Russian frontier should remain unchanged, and that Taschkend should be an independent power placed between the empire and the turbulent hordes whom it was thought advisable to keep at a distance. This plan was the more easy of execution as the inhabitants of Taschkend are a peaceful race, not addicted to pillage like their unruly neighbours, but inclined to commercial and agricultural pursuits. The present occupation is considered necessary in order to prevent the incursions of hostile neighbours, to secure the supplies necessary for the sustenance of the inhabitants of the town and of the Russian garrison, and enable the former quietly to deliberate upon the form of government they think proper to adopt; and it will be continued till the Bokharians and Khokanese acknowledge the inviolability of the Taschkend territory, and until the Russians have secured the navigation of the Syr-Daria. This interval will give the people of Taschkend time to become accustomed to the management of their own affairs, to settle the question of the frontier, and to establish the commercial relations with the protecting Power on a solid basis.

The *Voice* has called attention to the *Revue des Deux Mondes* upon the progress of Russia in Eastern Asia. The French writer exposes the ambitious views of the Czar's Government, and points to the danger of a new Sebastopol being established at Hakodadi. But while expressing the apprehension that the Russians may become undisputed masters of the sea of Japan, he finds some consolation in the fact that the vast province on the Amour, ceded to Russia by the Chinese, will prove a worthless acquisition. A St. Petersburg correspondent writes—There are certainly good grounds for the opinion which the writer expresses as to the Amour territory. The country possesses no elements of prosperity; it has neither the advantage of a genial climate nor a fertile soil. The town of Nicolaevsk, with a population of 5,500 inhabitants, of whom nearly half are soldiers, is cut off from all communication with the rest of the world for four months in the year, as the last summer post usually leaves on the 15th September, and the winter roads are not established till the beginning of December; and there is the same interruption in the spring, as the port is rarely free from ice before the beginning of June. In the bay in which the town is situated there are only six or seven feet of water, and the roadstead is extremely inconvenient from the prevalence of fogs and north and north-easterly winds as long as the navigation remains open. The average number of vessels entering the port during the summer, including those chartered by the Government, is not more than eight or nine, and so difficult is the navigation at the mouth of the river that six ships were wrecked between 1854 and 1861. The vicinity to China and Japan seems to give the settlement a great superiority in a commercial point of view; but this advantage is completely neutralised by the want of communication with the interior of the country. Indeed, up to the present time the supplies have been sent from other parts of Russia, and grain is carried nearly all round the world to feed the garrison and the inhabitants of the town. Some accounts speak favourably of the land to the south of the town; but it is only inhabited by Chinese fugitives, who are driven out of their country by the severity and the exactions of the Government officials. In 1863 two thousand of these men crossed the Chinese frontier, and are now wandering about these wild solitudes, preferring this vagabond life to settling down to agriculture. They are not likely to become useful members of society, and it is difficult to see where settlers are to come from, as Russia has not a redundant population either in Europe or in Asia. In the event of a maritime war, the possession of the Amour would offer certain advantages to Russia, but they are purchased at a heavy rate; for the settlement is a very costly one: and as to any commercial advantages, they will probably, for many years to come, be entirely monopolised by the Americans.

Naval and Military.

The reinforcements for Hong Kong, to leave in the Gresham about the 25th, are as follows:—

Royal Artillery, 13 men; 2nd Batt. 9th Regiment, 3 officers, 37 men; 2nd Batt. 20th Regiment, 2 officers, 51 men; Military Store and Barack Department, 4 men: Medical Staff, 1 officer; total, 6 officers, 105 men.

It is stated that Captain H.R.H. Prince Alfred has expressed a desire to be appointed to the command of H.M.S. Galatea. The Galatea is a frigate mounting 26 guns, of 3,227 tons, 800-horse power, with a crew of 700 men, a very proud and responsible command for a young man only twenty-two years of age.

If the Navy Estimates can be passed through the House before Easter, Lord Clarence Paget will hoist his flag on the 1st of April. The Hon. T. G. Baring has been named as the future Secretary of the Admiralty. There will be in his case no need of any re-election.

The loss of his seat in Parliament by Mr. Fenwick will, in all probability, lead to his resignation of the post he now holds of one of the members of the Board of Admiralty. Mr. Gladstone, junior, M.P. for Chester, if his re-election could be regarded as certain, has been mentioned, among others, as likely to be the successor to Mr. Fenwick.

20TH REGIMENT.—Sergeant-Major A. Rule, 2nd battalion, has been granted a pension of 2s. 6d. per diem. This distinguished non-commissioned officer served upwards of 21 years in the corps, and for the last nine years held the post of sergeant-major. He received three silver medals and four clasps and the order of the Legion of Honour. The following is an extract from regimental orders, dated Yokohama, Japan, 23rd August, 1865:—"Regimental Sergeant-Major A. Rule being about to proceed to England in order to be discharged on completion of service, the Commanding officer cannot allow Sergeant-Major Rule to leave the battalion without expressing his regret at the loss of so excellent a non-commissioned officer. The exemplary conduct and high character of Sergeant-Major Rule, and his abilities as a soldier, have at all times earned for him the respect and esteem of his superiors, and should form a subject of emulation amongst the non-commissioned officers who are now rising in the battalion."

WAR-OFFICE, PALL MALL, FEB. 27.—Royal Regiment of Artillery: Colonel, Major-General, with the rank of Colonel-Commandant, Sir Archdale Wilson, Bart., K.C.B., to be colonel-commandant, vice Lieut.-General G. E. Gowan, C.B.; Lieutenant-Colonel and Brevet-Colonel Edward Kaye to be colonel, vice Sir A. Wilson; Lieutenant-Colonel Thomas Brougham to be colonel, vice George Henry Swinley, promoted to the rank of major-general; Captain and Brevet-Major Thomas Edward Kennion to be lieutenant-colonel, vice Brevet-Colonel Kaye; Captain and Brevet-Major Alfred Light to be lieutenant-colonel, vice Brougham; Captain and Brevet-Major George Colclough to be lieutenant-colonel, vice Brevet-Colonel Frederick John Travers; Captain and Brevet-Major Thomas Walter Milward to be lieutenant-colonel; Captain and Brevet Lieutenant-Colonel Henry Lowther Chermside to be lieut.-colonel, vice Leopold Grimston Paget; Second Captain Thomas Netherton Harward to be captain; Second Captain and Brevet-Major Andrew Hugh Bogle to be captain, vice Brevet-Major Kennion; Second Captain Francis Hastings McLeod to be captain, vice Brevet-Major Light; Captain and Brevet-Major Henry Jervis White Jervis, from the supernumerary list, to be captain, vice Brevet-Major Colclough; Second Captain and Brevet-Major Christopher Charles Teesdale, C.B., to be captain, vice Brevet-Lieutenant Chermside; Lieutenant Edward Hart Dyke to be second captain, vice George Charles Depree, transferred to the Bengal Staff Corps; Lieutenant James Ronald Macleay to be second captain, vice Brevet-Major Bogle; Lieutenant Richard Swanne Robinson to be second captain, vice McLeod; Lieutenant Francis Sadlier Stoney to be second captain, vice Brevet-Major Teesdale; Second Captain George Rennie Manderson to be adjutant, vice Brevet-Major Bogle.—Royal Engineers: Major-General Thomas Foster to be colonel-commandant, vice Lieutenant-General John Savage, deceased; Lieutenant-Colonel and Brevet-Colonel William George Hamley to be colonel, vice C. E. Wilkinson, promoted to the rank of major-general; Captain and Brevet-Colonel Horace William Montague to be lieut.-colonel, vice Brevet-Colonel Hamley; Second Captain and Brevet-Major James Bevan Edwards to be captain, vice Brevet-Colonel Montague; Lieutenant George Edward Langham Somerset Sandford to be second captain, vice Brevet-Major Edwards. Brevet: The following promotions to take place consequent on the death, on the 7th February, of Lieutenant-General Henry John Savage, Royal Engineers, viz.:—Major-General Thomas Foster, Royal Engineers, to be lieutenant general; Colonel Charles Edmund Wilkinson, Royal Engineers, to be major-general; Captain and Brevet-Major Frederick Wells, 1st Foot, to be lieutenant-colonel; Capt. William Lovelace Dumaresq, Royal Artillery, to be major.

WAR-OFFICE, MARCH 3.—10th Foot: Lieutenant Spencer Edward Orr to be captain, without purchase, vice W. H. P. Gordon Bluett, seconded on appointment as District Inspector of Musketry in India. 11th Foot: Gentleman Cadet Charles Stewart Grant Baxter, from the Royal Military College, to be ensign, without purchase, vice Ford, transferred to the 7th Foot.

WAR-OFFICE, MARCH 9.—25th Foot: Quartermaster Sergeant Timothy Geoghegan, from the 89th Foot, to be quartermaster, vice Christopher Kettyles, deceased. Brevet: Captain W. Crossman, Royal Engineers, to have the local rank of Major in China and Japan while employed on particular service in those countries.

The Commissariat: Deputy-Assistant Commissary-General Robinson, lately returned from China, has joined at Aldershot.

The Military Store Department at Shanghai has been broken up, and the Assistant Superintendent of Stores and Deputy have been sent to Hong Kong. The Gun Wharf Stores have been ordered to be turned over to the Naval Storekeeper at Shanghai, Mr. Chown, Paymaster Royal Navy.

H.M.S. Manila and Cockchafer were to be paid off and be re-commissioned at Shanghai, under the supervision of Admiral King. The Princess Royal and Pelorus were at Yokohama; H.M.S. Leopard at Nagasaki; Osprey under orders to Osaka.

Monetary and Commercial.

The £350,000 bills on India were allotted, to Calcutta £232,300, to Madras £17,700, and to Bombay £100,000. The minimum price was, as before, 1s. 11½d. on Calcutta and Madras, and 1s. 11¾d. on Bombay. Tenders on Calcutta and Madras at 1s. 11¾d., will receive about 39 per cent., and on Bombay at 2s. 0¼d., about 72 per cent. Above those prices in full. These terms indicate a further diminution in the demand for means of remittance to the East.

The directors of the Agra and Masterman's Bank (Limited)

Digitized by Google

have declared a dividend at the rate of 10 per cent. per annum (£1 5s. per share) for the half-year ended 31st December last, together with a bonus of 15s. per share, free of income-tax, and payable on the 8th of March, being a distribution to the shareholders at the rate of 16 per cent. per annum.

A *pro forma* meeting of the China Steamship and Labuan Coal Company (Limited) took place on the 5th, and, after a full exposition as to the prospects of the undertaking, it was decided to adjourn till the 30th of April, to allow time for the receipt of accounts from the East. A report will be found in another column.

At an extraordinary general meeting of shareholders of the Asiatic Banking Corporation, held on the 7th, Mr. Sylvester Douglas Birch, B.S.C., late Accountant-General at Bombay, and Mr. Michael Hugh Scott, of the firm of Ritchie, Stewart, and Co. of Bombay, were elected directors.

We are glad to find that the custom adopted by masters of vessels signing bills of lading, "in dispute, if on board to be delivered," has been again affirmed in a case tried by Justice Byles, who said—"The master had signed the bill of lading, and he must be bound by it, unless the jury should find that there had been no default on his part. For the defendant it was averred that only 65 bales were shipped, and that all that were put on board were delivered. But, to relieve the master, it must be shown that the loss, or misrepresentation, was wholly caused by the act of the shipper." The jury, who were practical men, took the latter view.

The report of the directors of the Ceylon Coffee Estates Company (Limited), adopted at the second ordinary general meeting, was of a favourable character. The following are extracts:—

The profit and loss account shows that the crop of 1864-65, embracing the company's operations for the first year, left a net profit (after paying the guaranteed dividend of 10 per cent.) of £5,274 7s. 6d.; which sum, in conformity to the articles of association, has been placed to a reserve fund. Fresh funds are necessary to push forward with energy the operations of the company. The directors have resolved that the sum of £40,000 should be raised on debentures to bear interest at the rate of 8 per cent. per annum.

The Board of Trade returns for the month and year ending 31st December were not issued till the 27th February, and the delay in their publication is, in a note, stated to have taken place, according to annual practice, in order to afford time for the making up of the landing accounts of all cargoes properly appertaining to the trade of the year 1865. The declared value of our exports for the month of December was 24 per cent. in excess of the same month of 1864, and 5 per cent. in excess of December, 1863. These returns complete the series for the year 1865, and present an unprecedented total of exports during the twelve months of £165,862,402, being nearly 3¼ per cent. over the large aggregate of the preceding year (£160,449,053), and more than 13 per cent. over that of 1863 (£146,602,342). Our shipments of cotton manufactures during the twelve months were 2¼ per cent. in value and 15 per cent. in quantity over 1864, and 17 per cent. in value and 17½ per cent. in quantity over 1863. In the value of our exports of woollen manufactures during the past year, compared with 1864, there has been an increase of 8 per cent.; in linen manufactures, 12 per cent.; in haberdashery, 5 per cent.; in hardwares, 5 per cent.; in earthenware, 1½ per cent.; and in iron 1 per cent. Copper figures for a diminution of 20 per cent., and silk manufactures 4 per cent. The trade with the Far East is represented in these returns by the figures following:—

EXPORTS TO CHINA AND HONG KONG.

	For the Year ended 31st December. 1863.	1864.	1865.
Cotton yarn	2,251,154	1,961,813	976,208 lbs.
Cotton manufactures	46,454,793	73,526,512	126,368,443 yds.
Worsted stuffs	9,440,811	14,481,435	16,901,383 ,,
Woollen and worsted cloths	295,883	311,331	261,171 ,,
Lead	14,580	7,822	2,230 tons
	Value for the Year ended 31st December.		
Cotton yarn	£239,251	£241,942	£94,256
Cotton manufactures	1,162,505	2,007,880	2,786,306
Worsted stuffs	651,121	979,408	1,258,963
Woollen and worsted cloths	295,883	311,331	261,171
Lead	310,541	170,364	47,243

The Cotton Manufactures exported to other ports and countries in the Far East during the past year, and the two years preceding, were in quantity and value as follows:—

	Quantity for the Year ended 31st December. 1863.	1864.	1865.
Ceylon	22,222,523	12,654,484	15,575,021 yds.
Singapore	29,060,076	24,908,432	43,217,710 ,,
Java	16,165,927	20,708,210	31,319,329 ,,
Philippine Islands	14,231,397	19,905,245	28,662,008 ,,
	Value for the Year ended 31st December.		
Ceylon	£569,642	£413,914	£383,826
Singapore	701,618	652,747	919,066
Java	411,389	556,644	699,655
Philippine Islands	351,091	544,257	695,109

Of Cotton Yarn the quantity forwarded to Singapore during last year was 1,297,300 lbs., against 1,172,718 lbs. in 1864, and 1,991,936 lbs. in 1863; the value for the three years having been respectively £125,081, £130,990, and £213,231. The export of Cotton Yarn to Ceylon during the year 1865 was 335,400 lbs., and the value £34,941.

IMPORTS.

The Import of Raw Cotton from China and British India is shown in these returns to have been—

	Quantity for the Year ended 31st December. 1863.	1864.	1865.
British India	3,878,757	4,522,566	3,981,675 cwts
China	275,503	769,259	320,141 ,,
All parts	5,978,422	7,975,935	8,731,949 ,,
	Value for the Eleven Months ended 30th November.		
British India	£25,749,991	£32,357,460	£20,743,176
China	1,775,154	5,698,849	1,559,252
All parts	43,193,372	66,991,418	49,294,092

Of Unrefined Sugar the quantity imported from Java and the Philippine Islands in the month of December last was 15,362 cwt. of the 3rd quality, and 14,184 cwt. of the 4th quality. For the past and two preceding years the return is thus given:—

	Quantity for the Year ended 31st December. 1863.	1864.	1865.
Of all qualities (cwts.)	838,238	358,488	583,910
	Value for the Eleven Months ended 30th November.		
Of all qualities	£697,437	£324,959	£549,782

Of Hemp the imports from the Philippine Islands give these figures:—

	1863.	1864.	1865.
Quantity to 31st Dec. (cwts.)	312,871	183,943	194,846
Value to 30th November	£333,458	£276,191	£300,516

Ceylon delivered to us 12,507,815 lbs. of Coffee in the month of December last, and the quantity and value for the three years is represented as follows:—

	1863.	1864.	1865.
Quantity to 31st Dec. (lbs.)	79,793,201	69,011,290	90,455,468
Value to 30th November	£2,421,570	£2,204,486	£2,682,809

The Declared Value of British and Irish Produce and Manufactures exported from the United Kingdom to the ports and countries of the Far East, for the entire of 1865 and the two preceding years, is furnished by these returns. We include Egypt in our abstract, as the considerable amount of merchandise that goes out to India and the East *via* Suez will be debited to that country:—

To	Exports during the Year ended 31st December. 1863.	1864.	1865.
Egypt	£4,406,295	£6,051,680	£5,985,087
China (exclusive of Hong Kong)	2,416,705	3,092,611	3,609,301
Hong Kong	1,473,222	1,618,867	1,561,851
Singapore and Eastern Straits	1,486,774	1,181,680	1,442,459
Ceylon	1,075,927	826,333	685,308
Netherlands India (Java, &c.)	650,424	796,850	928,642
Philippine Islands	556,863	765,719	945,624
Japan	108,897	627,383	1,520,895
Siam	11,984	15,130	36,943

Digitized by Google

The amount of bullion by the P. and O. Company's steame *Syria*, from Southampton on the 4th inst, was—in gold to Madras, £2,941. In silver, to Calcutta, £50,450; to Singapore, £22,450; to Hong Kong, £2,580 Total—in gold, £2,941; in silver, £75,480.

MANCHESTER MARKETS.

The market has gained strength since the dispatch of last mail, and prices are generally dearer, with sales to some extent for future delivery. Orders have been offered and declined at the full rates accepted a few days since. Grey Shirtings, 7 lb., 14s. 9d. to 15s.; 8 lb. 4 oz., 18s.; Cotton Yarn, Nos. 16 to 24, 2s. 2d. to 2s. 3d.

ARTICLES OF IMPORT.

TEA.—We are still without any activity to report in our market, there being no general improvement in the home demand, whilst that for export still continues only moderate. Importers generally, however, continue to give support to the market by not pressing sales; the accounts from China being such as to lead to the belief that the total supply for the season will be much within our requirement. Thus prices show but little alteration, although the tendency has been rather in favour of buyers. The dusty and broken-leaf kinds of Congou have remained firm at previous prices, but few being on offer. Fair to good common have been in steady demand for export at fully former prices. Fair flavoury kinds of old import have been sold at public sale without alteration in prices. Those of new season are neglected, but holders are generally firm. Good qualities remain much as before. In fine to finest scarcely any business has been done. Common to fair black-leaf kinds, both of old and new import, continue dull of sale, at from 1s. to 1s. 3d. per lb. A few parcels of clean quality have been taken for export, owing to the scarcity of good common flavoury kinds. Good to fine kinds show no material change; but they are firmly maintained. In finest transactions have been few, and prices are rather uncertain. The sales of new-make Canton kind have been very small. Now that the medium Kaisow kinds are ruling at moderate prices; the demand for new-make has lessened, and prices are somewhat nominal. In Oolongs there has been but little done, the demand for export having subsided. In Souchongs there is no variation of importance. Flowery Pekoes remain without improvement. In Scented Teas a fair amount of business has been done at or about the decline last quoted. Common kinds of Caper have sold relatively high. There has been a fair demand for uncoloured Japans at fully previous prices. In Green Teas there has not been a large business, although the demand for export has been to a fair extent, and prices generally show but little alteration; commoner kinds are, however, rather difficult of sale. Canton Gunpowders have sold in public sale at a further decline of ½d. per lb.; the prices now again ruling from 10½d. to 11d. per lb. for fair quality. The stock in the United Kingdom on the 28th ult. was estimated at 94,500,000 lbs., against 112,600,000 lbs. last year; and the quantity afloat at 35,823,570 lbs., against 25,529,630 lbs.

SILK.—Messrs. Durant and Co.'s Circular states that the stocks in the hands of consumers must be very light, but all seem to be acting upon a fixed determination so to keep them till some definite impression can be formed as to the coming crop. A little activity of demand for manufactured goods would, no doubt, modify this materially, but for the time all remains quiet, and the deliveries which were favourable in January have fallen back to the most moderate scale. Messrs. Jacomb and Hogg state: The silk market, inactive for so long past, seems now to have fallen into a state of complete stagnation. As we approach nearer the new crop buyers become more and more nervous, and although we can make but little alteration in our quotations, sales could only be effected at a considerable reduction from the present nominal market rates. Some importers are still content to remain passive, in the hopes that the result of the European crop, when known, may be such as to turn the current of the market; and, in the meantime it would certainly be premature to force sales at any great decline in prices Deliveries from the 1st to the 8th of March inclusive: China, 736 bales; Japan, 275 bales. Messrs. Kilburn, Kershaw, and Co. state: The smallest possible business has been done in silk; from abroad orders are of the most trifling description, and the home consumers buy in the same hand-to-mouth way; yet, with such drawbacks to business, prices are upheld by importers, who, guided by statistics from the East and known stocks at home, decline as a rule to offer their silk at any important reduction from the quotations with which the year opened. The deliveries of silk during February also show to what an extent consumption has suddenly declined, by a total of 3 959 bales (of China, Bengal, and Japan) against 6,193 bales in January. To effect sales of China or Japan necessitates giving way 1s. to 1s. 6d. from quotations, but little silk is thus offered.

COTTON.—There has been an active demand on the spot throughout the past week, and prices are generally ¼d. higher. 2,585 bales Tennivelly sold at 14¾d. to 15¾d. barely good fair to good. Sales to arrive, 1,230 bales Tennivelly, at 14¼d. to 15d., March to December, guaranteed good fair, closing at 15d. for December. Middling Orleans is quoted at Liverpool at 19¼d., and fair Dhollerah at 16½d. per lb.

SUGAR.—Sales have latterly become difficult to effect even at easier prices, which now show a pretty general decline of 6d. per cwt.

COFFEE.—Prices rather in favour of the buyer. Low middling to good middling Plantation sold at 80s. to 80s. 6n.; yesterday, the 9th, 50 casks, 1,900 bags native all sold, common, 60s. to 63s. 6d.; good to real good ordinary, 67s. 6d. to 69s.; 86 bags Manila and 75 bags Singapore were withdrawn. Manila, fine ord. quality, sold during the week at 71s.

RICE.—An active demand has prevailed within the last two or three days, chiefly for soft grain kinds, and large sales have been made privately at fully 3d. advance. Yesterday, of 1,138 bags Madagascar, in auction, only the damaged portion (600 bags) was sold, first class at 15s. 6d. For arrival, a cargo of Rangoon has been sold at 11s. Continental terms, one on landed terms at 11s. if Nakrenzie, 11s. 3d. Bassein, or 11s. 6d. Rangoon, and another, Nakrenzie, is supposed to have been sold at 10s. 6d. Continental terms.

CARDAMOMS.—Firm, but inactive; 20 cases Malabar and 5 bags Madras at auction retired.

CAMPHOR.—Very firm, with good inquiry at 2s. 6d. per cwt. advance; business since our last moderate, but there are buyers at the extreme quotations of £6 2s. 6d. to £6 7s. 6d.

CASSIA LIGNEA.—Very firm; of 1,000 cases at auction half sold at 94s. to 100s. per cwt. for 3rd to 1st pile.

CINNAMON (CEYLON).—We quote 1st sort 2s. to 2s. 10d. per lb.; superior, 3s. to 3s. 4d.; 2nd, 1s. 9d. to 2s. 9d.; 3rd, 1s. 8d. to 2s. 4d.; 4th and Jungle, 1s. 4d. to 1s. 9d.; market steady, and 558 bales at auction mostly sold at the previous currency.

COCOA-NUT OIL.—This market has been very firm at quite the previous value, and Ceylon has brought rather improved terms; business moderate; 77 casks Cochin and 218 casks Ceylon at auction.

DRUGS.—Nothing of importance doing in either Cubebs, Dragon's Blood, or Galangal Root. Rhubarb: Firm, with some inquiry, but nothing of any consequence doing.

GUMS.—Benjamin: Nothing of interest doing. Damer: Firm; 130 casks at auction mostly sold at 54s. 6d. to 59s. per cwt. for fair to very good picked, and 44s. to 45s. 6d. sorts. Gamboge: Very scarce, nothing doing.

GUTTA PERCHA.—Quiet; of 157 packages and 5 tons at auction, one-fourth sold at 6d. to 6½d. per lb. for ordinary reboiled; moderate business done privately upon similar terms.

HEMP (MANILA).—Firm, but quiet, with moderate business on fully former terms.

HIDES.—East India have been selling at from last sale prices to ¼d. per lb. advance. On the 1st 600 Batavia buffalo were offered and sold at 6d. per lb.

HORNS.—Buffalo: Remain very firm; 9 tons Madras at auction sold at 40s. to 40s. 6d. per cwt. for 2 lbs. average. Deer: Also very firm, and in small supply, but nothing doing.

JAPAN WAX.—Firm, but quiet; 43 boxes at auction retired.

OILS.—Anniseed: Has been quiet, at the previous value, and without buyers, but inquiry at a reduction; business unimportant. Cassia: Firm, with moderate business upon former terms. Citronelle: Firm, with buyers, at the higher quotation of 3¼d. for good; 9 cases at auction sold at 4d. per oz., with one case at 4¼d.

TERRA JAPONICA.—Cutch, Pegue: Dearer; 207 cases fine at auction sold at 32s. per cwt. Gambier: Firm, with fair trade upon fully former terms.

TIN.—Market has been flat, with very limited transactions at £86 cash for Banca, and for Straits £84 to £85 cash, and £86 prompt; not showing any material change in value.

TOBACCO.—Manila Cheroots and Segars: A good inquiry exists for both descriptions of eligible weights; prices of the former are rather lower Manila Tobacco is without change. Japan: A small importation of 160 bales will be offered at public sale during the month. Java: Good sound descriptions on demand; the bulk of the stock consists of sorts quite unsuitable to our manufacturers' requirements. Quotations: Java, 5½d. to 13d.; Manila, 6d. to 3s.; Japan, 4½d. to 8d.; Manila Cheroots 6s. 9d. to 7s.

PEPPER.—Black: Is again nearly ⅛d. per lb. dearer: large business done privately in Sumatra and Penang. 623 bags Singapore at auction sold at 3½d. to 3⅝d. White: Is also again ⅛d. per lb. dearer, with actlve demand; of 65 bags Singapore, and 323 bags Penang at auction, about one-third sold at 6¼d to 6½d. per lb. for middling to fair, and similar prices obtained privately.

SPICES.—Cloves: Steady; only 10 bags Zanzibar at auction, sold at 3½d. per lb. for fair, and similar rates obtained privately; 152 bags stalks sold at 2⅝d. Mace: Has further materially risen in value; 36 cases Penang, 5 cases Sincapore, and 4 cases Batavia at auction, mostly sold at 3s. 2d. to 3s. 6d. per lb. for middling to fair palish, and 1s. 6d. to 2s. 9d. very inferior to good reddish. Nutmegs are again 1d. to 2d. per lb. dearer, with extensive operations, chiefly speculative; 97 cases Penang at auction, mostly sold at 4s. per lb. for good bold, and 1s. 5d. to 2s. 4d. ordinary small to good medium.

SAGO.—Flat: of 600 packages at auction, one-fourth sold at 18s. 6d. to 19s. per cwt. for middling pinky small. Flour: No auctions held; moderate business accomplished privately at very full prices.

TAPIOCA.—190 boxes Penang rarely taken, good white at 4d. per lb., 156 boxes Pearl sold steadily, fair 26s., good 27s. per cwt.

MISCELLANEOUS.—Blacklead: Steady; 21 barrels at auction mostly sold at 7s. to 17s. 9d. per cwt. for low to very good lump, and 7s. 6d. to 9s. dust. Ebony Wood: Only 8 tons Ceylon at auction, and that retired. Galls: China 5s. per cwt. dearer, sales having been effected at 70s. per cwt.; Japan inquired after. Rattans: Flat; 5,116 bundles Penang sold at auction at 2s. 9d. to 3s. 6d. per 100, and private sales made upon corresponding terms. Sticklac (Siam): Dearer; of 247 cases at auction three-fourths sold at 53s. 6d. to 55s. 6d. per cwt. for good bold, and 28s. 6d. very woody.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £7 to £7. 5s.; nail rod, £8. 10s. to £9; hoops, £9. 15s. to £10; sheets, single, £10. 10s. to £10. 15s.; Staffordshire bars, £8. 10s. to £9. 15s.; rails, £7.

STEEL.—Swedish keg, £15. 10s. to £16.

COPPER.—Sheet and Sheathing, £101 to £103 per ton; yellow metal 8¼d. to 9d. per lb.

TIN.—£91 for block; £92 for common bars. Tin plates, best charcoal, I.C. 34s. to 35s.

LEAD, &c.—English pig, W.B., £22. 5s. to £22. 10s.; shot, patent, £24; sheet, £22; spelter, £24. 5s. to £24. 15s.; zinc, English sheet, £30; quicksilver, £7. 15s. to £8.

The following is from the circular of Messrs. French and Smith:—The Metal Market during the past month has been by no means a satisfactory one, as notwithstanding the generally low prices, buyers do not care to operate at all freely. Although money looks to be getting easier, so many schemes seem waiting only for a little more ease that a permanently low state of money seems very doubtful. Iron: Welsh and Staffordshire continue steady. The speculation in Scotch Pig Iron continues, and the price advanced to between 78s. and 79s. for Warrants, but is 77s. 6d. to day. Copper: early last month we had good inquiry for raw; but later the demand was inactive, which we think is to be attributed to the absence of orders for manufactured from India. As to the prospect of Chilian supplies, it is difficult to form any opinion; but it would appear probable in any case some considerable falling off will be experienced. Tin: the official quotation of English was reduced on the 2nd ult. 5s. per cwt., and again on the 5th 2s., and to-day a further reduction of 4s. per cwt. is announced. At present it does not appear there is any diminution of the production in Cornwall. Foreign has been very flat, and sales of Straits are reported as low as 84s., but for fine quality the price is 85s. to 85s. 6d. buyers. Banca 86s. 6d. The announcement of the Dutch sale of Banca to take place in Holland has been made for the 22nd inst. at Rotterdam. The quantity to be offered is 111,800 slabs, and to be sold in lots of 100 slabs each. The Dutch Company have also altered their discounts, and it is said have also altered their terms so as to give a preference to certain houses in Holland. The quantity of Straits Tin afloat for Europe is about 1,187 tons against 1,318 in 1865, and 757 tons in 1864. Lead: The transactions have not been very extensive, although orders for China are more plentiful. The shipments for New York continue, but the last advices show a little weakness, which is attributed to some rather heavy imports from Spain. The stocks here, however, are light.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton from the 1st January by the P. and O. Company's mail steamers.

FREIGHTS AND CHARTERS.

In outward freights for vessels loading on the different berths we have continued firmness to report, but coal freights are somewhat easier, although vessels are not readily obtainable at the lower rates now ruling. In homeward charters there is nothing doing.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Shanghai: 40s. weight, 30s. to 35s. meast. To Hong Kong: 40s. weight, 30s. meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Ceylon: 40s. weight, 20s. measurement.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per Keel. For Hong Kong: £45. For Galle: £40. For Singapore: £40. For Shanghai: £55. From Newport, Cardiff or Swansea, per ton. For Hong Kong: £2s. 8s. For Manila: 35s. to 40s. For Galle: £2. For Singapore: 36s. to 37s. For Shanghai: £2. 16s. For Batavia: £1. 15s.

CASUALTIES.

The West Wind, Blandford, from Cardiff for Shanghai, put into Lisbon March 5, with a trifling leak forward.

The Anna, Bock, from Batavia for Amsterdam, put into Mauritius, Jan. 26, making much water and with loss of foretopmast, jibboom, &c. The Lucy, E. Ashby, from Shanghai to New York, was stranded on the reef in the Pernambuco roadstead, Feb. 12. About 1,300 packages of tea have been saved, but mostly in a damaged state.

MISCELLANEOUS.

At MAURITIUS.—Jan. 26, from Banjowangie for Amsterdam, Landbouw, Sissingh, making water; from Batavia, for Amsterdam, Anna, Bock (with damage); 31, from Singapore, Jeanne Meyer Loesenitz.

OFFICES—1, Royal Exchange-buildings.

PROSPECTUS.

The Directors invite applications for the unissued shares in this Company, numbering 5,000, for the purposes hereinafter mentioned.

Mr. Reuter, by his personal influence on the Continent, has obtained, and has handed over to this Company, a concession from the Hanoverian Government, giving an exclusive right for thirty years to lay down and work submarine telegraph cables between the English and Hanoverian Coasts, and the same exclusive right to lay land wires to certain important places in Germany, besides other contingent advantages of a very valuable character.

Official statistics in the possession of the Directors show that the number of messages passing between England and Germany in the four years ending 1864 had increased 130 per cent., and in the last two years alone 80 per cent.; and it is matter of notoriety that the existing lines are unable to convey messages with the expedition which is above all things desirable in telegraphy.

The Directors are in a position to state that under the concession obtained, and the arrangements they have concluded for working it, they will be able to transmit messages from England to the places named below within a few minutes from the time of despatch.

Arrangements have been made with the well-known contractors, the Telegraph Construction and Maintenance Company, for constructing and laying down the requisite cable, by which the actual cost of all the work to be done has been accurately determined.

The Electric and International Telegraph Company have agreed to an arrangement by which the use of a certain number of wires is to be ceded to them for a term of five years, that Company guaranteeing the transmission over the Hanoverian cable of the whole of the messages collected at their different stations in the United Kingdom, for Hanover, Bremen, Hamburg, Schleswig Holstein, Denmark, Sweden, Norway, &c., and further guaranteeing a minimum amount of business which, under the conditions of the concession, and under normal circumstances, will produce a minimum annual revenue equal to 15 per cent. on the total amount of capital required.

The agreements, concessions, and other data on which this estimate is based, having been placed in the hands of the well-known accountants, Messrs. Quilter, Ball, and Co., their certificate of the correctness thereof is annexed.

No. 3, Moorgate-street, Feb. 23, 1866.

Sir,—Having perused and considered the documents mentioned in the subjoined note relating to the subject of the proposed submarine telegraph between England and Hanover, we are enabled, from the data therein contained, and other information supplied to us, to state the following facts and conclusions respecting the profit results of e undertaking.

The requisite amount of capital will be £150,000; that is to say, £130,175 for manufacturing and laying down the cable, leaving the sum of £19,825 to provide for contingencies and working capital.

Estimating the revenue to be derived under the agreement with the Telegraph Company upon the basis of the minimum number of messages guaranteed to be forwarded by that Company, we find, after paying or reserving to the Company their proportion of the net receipts, that the net profit will amount to at least 15 per cent. per annum on the total amount of the capital required, namely, £150,000.

Having regard, however, to the probability that the actual traffic of the cable will greatly exceed the secured minimum, there is reasonable ground for expecting that the actual rate of profit will considerably exceed 15 per cent. per annum.

We remain, Sir, yours faithfully,
QUILTER, BALL and CO.

To Julius Reuter, Esq.

Note of documents referred to:—

1. Translation of concession granted by the King of Hanover to Mr. Julius Reuter.
2. Copy of agreement with the Electric Telegraph Company.
3. Specification for the manufacture of the cable from Cromer to Norderney, by Messrs. Forde, Fleeming, and Jenkin.
4. Contract with the Telegraph Construction and Maintenance Company for the manufacture and laying of the cable in terms of the foregoing specification.

It will thus be seen that the Directors have indicated only the minimum of profit virtually guaranteed to the shareholders; and that there is every reason to anticipate from the rapidly increasing extension of the traffic that this amount will be largely exceeded.

This minimum is, moreover, entirely exclusive and independent of the continually increasing profits of the business purchased from Mr. Reuter, which will be very considerably augmented by the use of the wire retained by the Company for the purposes of that business.

The durability of cables in shallow waters such as the North Sea, where the Company's cable will be laid, is proved by experience. They are as safe, and can be repaired almost as easily as land wires. The existing cables to Holland have been laid several years, and that between Dover and Calais 15 years, and they continue at the present time in good working order.

The cable will probably be ready for the transmission of messages by the end of August next.

The Telegraph Construction and Maintenance Company have taken one-fourth of the amount of their contract in shares of the Company, but the contract with them is based upon a bona fide cash price, the lowest obtainable in the market for first-rate work, they considering the investment safe and profitable, and looking to the future profits of the concern for remuneration.

There is no promotion money, nor any commission paid for obtaining the concession, Mr. Reuter having handed it over to the Company gratis.

Application for shares to be made in the annexed form, accompanied by a deposit of £1 per share. Should no allotment be made the amount will be returned without deduction.

Prospectuses, with forms of application for shares, may be obtained at the offices of the Company, of the Brokers, or of the Solicitors.

FORM OF APPLICATION FOR SHARES.
(To be left with the Bankers.)

No. ——

To the Directors of Reuter's Telegram Company (Limited).

GENTLEMEN,—Having paid to your credit with the Agra and Masterman's Bank the sum of £ , being the deposit of £1 per Share on Shares in the above Company, I request that you will allot me Shares of £25 each in Reuter's Telegram Company (Limited), and I hereby agree to accept the same, or any smaller number which you may allot to me, and I request you to place my name on the Register of Members in respect of the Shares allotted to me.

ASIATIC BANKING CORPORATION,

Incorporated by Royal Charter.

Authorised Capital, £3,000,000. Paid-up Capital, £500,000. Reserve Fund, £175,000.

Head Office, No. 4, Lombard-street.

BOARD OF DIRECTORS.

F. BOYKETT, Esq., Chairman, (Messrs. Timothy Wiggin and Co).
J. A. RUSSELL, Esq., Deputy Chairman (Messrs. Grey and Coles, and Grey and Co. Bombay).
S. D. BIRCH, Esq. (late Accountant-General, Bombay, and President of the Bank of Bombay).
T. CARDWELL, Esq. (Messrs. Thomas Cardwell and Co., and Cardwell, Parsons and Co., Bombay).
C. A. FEARON, Esq. (Messrs. Fearon and Co., late of Messrs. Augustine Heard and Co., China).
W. MAITLAND, Esq. (Messrs. M'Killop, Stewart and Co., Calcutta).
M. H. SCOTT, Esq. (Messrs. Finlay, Campbell, and Co., London, and Messrs. Ritchie, Steuart, and Co., Bombay).

Agencies and Branches are established at Bombay, Calcutta, Madras, Singapore, Penang, Ceylon, Hong Kong, Shanghai, and Melbourne.

The Corporation grant Drafts, collect and negotiate Bills of Exchange, payable at the above places, issue Letters of Credit and Circular notes, and conduct every description of Banking business connected with the East.

They effect the purchase and sale of Indian Securities, the receipt of Pay, Dividends, &c., and undertake the safe custody of securities.

They also receive Deposits, bearing interest, for fixed periods.

Rates of interest and Exchange may be ascertained at the Head Office.

By order of the Board,
F. W. LAWRENCE,
Acting General Manager.

PORT OF AMOY.

SHIPOWNERS, AGENTS and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer, and a Blacksmith. Dry Godowns for the reception of vessel's stores, &c., when requiring to discharge them.

Amoy, March, 1865.

HOLLOWAY'S PILLS.—Chest and Stomach Complaints.—The source and centre of almost every ailment is impurity of the blood; dislodge this poison and disease departs. Holloway's Pills possess the inestimable power of thoroughly cleansing each component part of the blood, and rendering this fluid fit to perform its important functions. They cope most successfully with chest diseases, stomach complaints, liver disorders, and many other maladies which were once the besetting dangers of mankind at certain seasons, in town and country. The directions for use enabled every one to regulate the operation of these Pills with the greatest nicety. Chronic invalids, nervous sufferers, and all whom other treatment has hitherto failed to relieve, are respectfully invited to try Holloway's celebrated medicine, which will strengthen and probably cure them.

Deposits received, subject to ten days' notice, on the usual terms, and for fixed periods at rates subject to special agreement.

Drafts issued, and Bills negotiated, payable in India, China, &c. Circular Notes and Letters of Credit, payable throughout Europe, are also issued for the convenience of Travellers per Overland Route.

The purchase and sale of Indian and other Securities, and the safe custody of the same, undertaken. Dividends, Pay, Pensions, Interest, or other moneys realised, and the registry of Indian Government Loan Notes effected, so that the interest may be paid in England.

Every other description of Banking and Agency business in connection with India, China, &c., conducted on the most favourable terms.

JOHN OUSELEY, General Manager.

IMPORTANT ANNOUNCEMENT

JOSEPH GILLOTT,

METALLIC PEN MAKER TO THE QUEEN

BEGS to inform the Commercial World Scholastic Institutions, and the Public generally that by a novel application of his unrivalled Machinery for making Steel Pens, he has introduced a NEW SERIES of his useful productions which, for EXCELLENCE OF TEMPER, QUALITY OF MATERIAL, and above all, CHEAPNESS IN PRICE, must ensure universal approbation, and defy competition.

Each Pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with label outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition J. G. has introduced his WARRANTED SCHOOL and PUBLIC PENS, which are especially adapted to their use, being of different degrees of flexibility, and with fine medium, and broad points, suitable for the various kinds of Writing taught in Schools.

Sold Retail by all Stationers and Booksellers. Merchants and Wholesale Dealers can be supplied at the Works, Graham-street, Birmingham; at 91, John-street, New York and at 37, Gracechurch-street London

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 19, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s. 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty and by Special Appointment to H.R.H. the Princess of Wales, London.

Keating's Cough Lozenges.
JUDGED BY THE IMMENSE DEMAND this Universal Remedy now stands the first in public favour and confidence: this result has been acquired by the test of fifty years' experience. These Lozenges may be found on sale in every British colony, and throughout India and China. They have been esteemed wherever introduced. For COUGHS, ASTHMA, and all affections of the Throat and Chest, they are the most agreeable and efficacious remedy.

Prepared and sold in boxes and tins of various sizes, by THOMAS KEATING, Chemist, &c., 79, St. Paul's Churchyard, London. Sold retail by all druggists and patent medicine vendors in the world.

N.B.—To prevent spurious imitations, please to observe that the words "KEATING'S COUGH LOZENGES," are engraven on the Government Stamp of each Box without which none are genuine.

UPPER MARSH, LAMBETH, LONDON, S.

PEACOCK & BUCHAN'S COMPOSITION FOR IRON SHIPS

THIS is now established as the best and cheapest Composition known for keeping the Bottoms of Iron Ships CLEAN and free from Corrosion or GALVANIC ACTION. Apply to the Manufacturers direct, at SOUTHAMPTON, or to their accredited Agents at all the principal sea ports of the world.

From Captain John Ralph Engledue, Managing Director of the Thames Iron Works Ship Building, Engineering, and Dry Dock Company, Orchard-yard, Blackwall:—

"The Thames Iron Works, Ship Building, Engineering, and Dry Dock Company (Limited),
"Orchard-yard, Blackwall, E., September, 26th, 1865.

"Messrs. Peacock and Buchan.

"Gentlemen,—I shall at all times have much pleasure in bearing testimony as to the value and superiority of your Compositions for Ships' bottoms.

"I have used the No. 2 extensively for the last fifteen years, more particularly on the bottoms of the iron ships belonging to the Peninsular and Oriental Steam Navigation Company, and in every instance successfully. It is easily applied, economical, keeps the bottom CLEAN, and also has the property of preserving the iron.

"I visited, in dock, an iron SAILING vessel, called the 'Chile,' a few weeks since, and found her bottom perfectly clean, which had been coated with your Composition for upwards of twelve months, having made a voyage to New Zealand and back, and in salt water the whole time.

"I have also used your No. 1 Composition for the bottoms of wooden ships, coppered, and found it most advantageous, making the copper last double the usual time, and then only taken off to recaulk.

"I have at various times tried preparations of copper on iron ships, and in every case found the iron and rivets damaged.—I am, Gentlemen, yours faithfully,

"(Signed) J. R. ENGLEDUE."

"Egyptian Navigation Company, Azeeziah Mussriah, 61, Mark-lane, 7th July, 1865.

"Messrs. Peacock and Buchan, 39, Upper East Smithfield.

"Dear Sirs,—I have received orders to send to Egypt three tons of your patent Composition for ships' bottoms, same as supplied me in July, 1864. I now wish to know the soonest time you could have this packed and ready for shipment, as there is one of the Company's steamers leaving London about the end of next week. Please reply by return, and state price.—I remain, yours obediently,

(Signed) D. ABDUL HAMID BEY,
"L. FRICKEN."

Bottled Ales and Wines, &c.

"NO BUYERS for the BEST BRANDS, unless RE-PACKED," in consequence of repeated BREAKAGE.—Melbourne Journal of Commerce, Nov. 16. Heating and Breakage entirely prevented, and 15 per cent. saved in Freight of Cases by using SEYMER'S BOTTLE PACKINGS AND COOLERS.

Price 7½d. per doz. Bottlers contracting for large quantities effect so great a saving in labour, &c., that they can supply them at one-fourth less in price to Shippers, who will find it most profitable to order their goods to be so packed in future. In use by all the leading London houses.—T. WHITEHEAD, 37, EASTCHEAP, E.C. Sole Manufacturer.

WIGGINS, TEAPE, AND CO.,

Per P. and O. steamer, from Marseilles, May 5.—To Singapore via Bombay: Mr. C. Grey McClelland.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

From this port we have dates to the 31st January. The outward mail of 27th November had arrived. The following items are from the *Japan Herald*:—

We have again to report a period of comparative inactivity in public affairs. The consideration of the tariff has occupied much of the time both of diplomatists and merchants. The Chamber of Commerce has had one well attended meeting, at which the subject was discussed, and the feeling of the majority was against making the open ports free ports—and in favour of fixed duties payable by importers.

At the meeting of the Chamber it was resolved, that the statistics of all exports should be made up from 1st July in each year. Under present arrangements, silk and cotton are made up from that date, and tea from 1st June. It will be far more useful that all be from the 1st July.

On the 24th of January the troops in garrison, assisted by a strong body of men from H.B.M.'s vessel in harbour, were exercised in a series of operations, and repulse of an enemy representing the reception. At nine A.M. the combined forces assembled in the barrack square on the Bluff, for general parade, and marched for Homoco, the village supposed to be threatened with attack. On their way thither, about half way, a reserve was posted, the main body taking possession of the low wooded heights, which project like a cape or peninsula into the cultivated plain which lies between it and the beach village above named. Two fieldpieces were also placed on the heights, one on each flank of the main body, advantage being taken both with these and the troops of positions most effectually commanding the beach itself and the intervening plain. Whilst these arrangements were being made a strong body of skirmishers was thrown out—of R. M. Artillery from the left, and of the 20th Regiment from the right flank,—who were soon lost amongst the trees and shrubs of the village, quickly announcing the supposed approach of the enemy, by a lively fusilade, which was soon followed by the appearance of some, and finally of all, contesting every point of advantage, until, being driven from their last cover, at sound of trumpet, they fled streaming over the heavy rice fields to their respective flanks, the enemy being now supposed to be in full view. Then for the first time spoke the cannon, and as at a signal, a most animated fire broke out from the whole hill side, which lasted for several minutes, and was an exceedingly beautiful spectacle. This being with justice considered sufficient to check the ardour of the invader, the 20th and the blue jackets of the *Princess Royal* were ordered to charge. The arrangements were admirably managed there was no observable hitch. Colonel Brown commanded in chief, Colonel Cobb acting as Brigadier, Captain Jones, of the *Princess Royal*, had charge of

Digitized by Google

the Naval Brigade, Captain Egan commanded the 1st Battalion, and Captain Rochford the 2nd of the 20th Regiment. Sir Harry and Lady Parkes and suite were on the ground, and many of the ladies and residents of Yokohama also enjoyed the scene, which the great beauty of the day, and the judgment shown in choice of position, rendered one not to be soon forgotten. At the conclusion of the affair, the forces held a general pic-nic in the wooded hills, a refreshment well earned by their previous exertions.

On the 23rd January the corvette *Fusi Yama*, the first of the war vessels ordered by the Japanese Government to be built in America, arrived at this port. She is a ship of about 1,000 tons, with an armament of 12 guns—consisting of 49 in. Dahlgrens, four brass howitzers, three 30 lb. Parrot guns, and one 100 lb. Parrot. Her engines are by Murphy and Co., of the Fulton Works, New York.

On the 27th January, H.I.M.'s ship *Duplcix* left for Nagasaki, she had on board as a passenger, Marcus Flowers Esq., lately Acting British Consul in Yokohama. He remains in Nagasaki in a similar position pending the arrival of Captain Vyse.

The *Japan Times* gives an account of an extensive fire at Yedo, in which thirty lives were lost and about 30,000 houses destroyed.

CHINA.

PEKING.

Dates are down to about the middle of January.

Private letters furnish a few items of Court gossip. Wen Seang has left on a visit to his native city, Moukdon, with the avowed purpose of bringing his mother to share his new home. His venerable parent has, it appears, been lately left alone in the world by the premature death of her daughter-in-law who had heroically devoted herself to the task of soothing the old lady's declining years. The real reason of Wen Seang's departure is, however, in all probability, the disturbed state of Mongolia. He left Peking on the 2nd, escorted by a large body of ordinary native soldiers and 200 of the disciplined troops.

Two men have been added to the foreign board. One was many years ago Futai of Fukien, but was disgraced for writing a book on the nature and customs of foreigners, in which much reliable information was given. He has since then remained in retirement, but his recall to public life is a very significant proof of the present tendency of thought in the minds of the members of the Government.

Amateur theatricals were got up at the British Legation, when "Slasher and Crasher" and "Whitebait at Greenwich" were presented to a well-filled house. As the whole thing was started principally for the amusement of the ladies resident in Peking, much disappointment was felt at the refusal of the missionaries and their families to encourage any such pastime.

National anniversaries are not neglected at the capital. St. Andrew's-day was celebrated in Peking by a dinner at H.B.M.'s Legation, twelve gentlemen sitting down to an excellent dinner under the shelter of the flag which is the emblem of the happy union existing under the British Crown. The room was most tastefully decorated, being hung with flags, banners, &c., the cross of the Saint and the Red Lion rampant figuring prominently on the walls. Mr. Munro Fraser, of the Consular service, late of the Highland Rifle Regiment, occupied the chair, and Mr. Murray the vice-chair. After ample justice had been done to the good things under which the table groaned, the cloth was removed, and the health of "The Queen" given with due honour. The Chairman then proposed "The Lord of the Isles, H.R.H. the Prince of Wales." The next toast was that of "The Navy, Army, and Volunteers. The Chairman said in the presence of so many Britons in such a remote place as Peking in winter, it was almost superfluous to sing the praises of the Army and Navy for, but for them, such a thing as a St. Andrew's dinner in the city of the ruler of the sun and moon could surely never have come to pass. Mr. Mann, in returning thanks for the army, mentioned that a Scotch General, a Scotch Admiral, and a Scotch Ambassador had contributed to the opening of Peking, and paid a tribute to the achievement of Colonel Gordon in suppressing the Taiping rebellion. Several other toast were proposed and duly responded to.

NEWCHWANG.

On the 4th December the following notification, calling a meeting of the residents, was issued by Mr. Meadows, H.B.M. Consul :—

"The undersigned begs to inform the foreign community of this port that the Commandant of the district called on him yesterday and made a communication to the following effect : A body of upwards of 1,000 robbers or rebels has, for som months past, infested the northern and north-eastern portion of this province, and has there inflicted a series of severe defeats on the Imperial forces sent out against them. Recently they have taken the city of Hing-king, on which occasion the chief civilian and second military officers of the city, with a number of the soldiers, were slain. Afterwards, a detached body about 300 strong entered the city of Fung-hwang, situated about 150 miles to the east of this port; and this body has since advanced in this direction, being six days ago at a place about 100 miles off. The Commandant, while professing to hold it not very likely that these robbers would advance on Ying-tsze, declared at the same time that such a move was by no means impossible, and intimated that the foreigners would do well to hold themselves prepared. Under these circumstances the undersigned thinks it desirable that the foreign community should meet to consult on such measures of defence and co-operation as may be best suited to their position and means; and he accordingly hereby calls a meeting for to-morrow at 11 A.M., at the court-room of this consulate."

The meeting was attended by Mr. Huntington, Vice-Consul for the United States, France, and Sweden, Mr. S. Schottler, Consul for Prussia and other German States, and by all the other male residents of the port who have remained for the winter. There were about forty, all counted.

The latest accounts represent the danger as imminent, and much dissatisfaction is expressed that Mr. Wade, the Acting Minister at Peking, had refused the Consul's application for firearms.

HANKOW.

The present mail brings intelligence from this port to the 29th January, with full details of the movement on that city by the Nienfei as well as of a threatened attack by a large body of disaffected "braves." The *Hankow Times* gives the following particulars :—

On the 20th January the British and French Consuls were suddenly visited by the Taoutai in persons, and informed that a body of braves numbering some 6,000 strong had revolted at Sung-poo, a town about 80 miles off, and were intending to make a descent on Hankow forthwith. The Taoutai entreated the Consuls to take instant measures both for the protection of the foreign settlement and the aid of the Chinese troops in the defence of the Wall. The night passed by in quiet, but with the following morning came rumours of advance on the part of the braves, which induced the Consuls to meet and concert measures for meeting the emergency. The Viceroy of Woochang also considered the position of affairs so grave that he moved a large body of troops and gunboats across the river to take up their stations on the outer line of defence. On Monday, the 22nd, there was a talk of compromise, the Viceroy having (it was reported) sent offers of pay to the disaffected braves, who were no less than eighteen months in arrears! and demanded 200,000 taels. Whether the offer was accepted or not is uncertain, but the braves certainly stopped their march at the Cheh-kow, a stream about twelve miles distant. These events naturally gave rise to serious apprehensions on the part of the foreign residents, which were strengthened by the entire absence of any naval protection. Hardly had they realised their escape from the first danger, before a second appeared in the approach of the Nienfei, who were emboldened by the disaffection of the braves. On the 23rd they burnt Hwang-pe, a town to the north-east of Hankow, and shortly afterwards the larger town of Yang-lo was seen to be in flames; the rebels then took up a position encircling Hankow from North to East at a distance of 12 to 15 miles. By the following day the French gunboat *Turdif* and H.M. gunboat *Algerine* had arrived, and the Volunteer Corps hastily re-organised. Guns were landed from the steamers, and such other means of defence adopted as were available. Meanwhile the panic in the native city led to a complete exodus, all non-combatants fleeing from it to take refuge on the other side of the river. On the 27th a reconnoitring party from the *Algerine* visited Yang-lo, which town they found partly destroyed; but the Nienfei had fallen back to a greater distance, and the natives complained more of outrages committed by the braves than of the rebels. On their way the reconnoitring party intercepted a band of these rascals who were carrying off a number of women and girls, doubtless for the sake of extorting a ransom; these were recaptured and liberated. The braves were said to be encamped in two bodies, an advanced and smaller body at Le-k'a-ke, and the other, or main camp, at Sin-chow. Their

Digitized by Google

exact force could not be ascertained, but the villagers asserted that they were known to be without matchlocks, guns, or ammunition, and that their only arms were lances and swords. The main body, the villagers reported, had not been near them, but they were daily visited by small mounted parties of from four to eight men, who carried off all the sycee, women, and clothing, they took a fancy to. The Mandarins, although close at hand with gunboats and troops, had, they declared, done nothing for their protection. The reconnoitring party had no time to penetrate further, so returned to the gunboat.

While the troops were thus driven to revolt and plunder by withholding their pay, it is said that the treasury of Hankow contained at least a million of taels, the claim of the braves being less than a third of that sum. The Governor-General had issued orders for the payment of this money, or so much of it as is usually given (for Chinese troops never receive or expect to receive more than a third of their pay, though, of course, the public accounts are charged with the whole); yet, notwithstanding these orders, the treasurer refused payment, alleging that his coffers were empty. Ching Ta Keih, the leader of the braves, after much weeping before the Governor-General, and praying either to be supplied with their pay, or be himself executed at once, actually received from the treasurer an order for 20,000 taels, payable after China New Year.

Private letters dated the 3rd February state that the Nienfei had again advanced to within six miles of Hankow, and that a battle had been fought in which they had defeated the Imperialist forces. At the same time the panic had been in some measure allayed by a rumour that the braves had been pacified by a payment, and would return to their allegiance. Meanwhile the steamers report that for a hundred miles below Hankow the banks of the river were crowded with refugees who had escaped from captured towns and villages in the interior.

We have here given an outline of the alarming story which has caused so much apprehension for the safety of our settlement at Hankow. On closer inspection of the details it appears, however, that the cause of alarm has been unnecessarily exaggerated. The panic was certainly not unnatural; the populous city of Hankow being left without a single soldier for its protection, the garrison at Wuchang existing almost exclusively on paper, and the few troops that were actually within the city being unpaid, undrilled, and ill-officered, it was but natural for the peaceable inhabitants to endeavour to save what they could from the anticipated wreck. The insurgents, who did not perhaps, number more than a few thousand men, were magnified by their fears into 40,000; business was completely suspended, and every preparation was made to escape on the first approach of the Nienfei. The latter probably, in as great a state of terror, would retire to the mountains when they had taken advantage of the revolt of the braves, and satisfied their immediate wants. And as regards the braves themselves, there was little fear that the pay due to them would be long withheld when they adopted such formidable measures to redress their wrongs. It will be seen that our Hong Kong correspondent considers that the importance of the affair has been considerably over-rated; and in this view he is fully borne out by the late telegrams. These, as our readers are already aware, announce that the excitement had subsided and that the rebel leader had been captured and shot; while as no mention is made of the revolted braves we may reasonably suppose that their claims have been satisfied.

The following notification was issued on the 21st January :—

The undersigned have been informed by the Chinese authorities that a large body of braves have revolted at Sungpoo, a place distant about 40 to 50 miles from Hankow, and that there is every probability that these men will march upon Hankow within the next two or three days, the undersigned have been entreated in consequence to concert measures for the defence of the settlement in co-operation with the local authorities, They therefore deem it necessary to make known the danger to the community, and to notify that they are at this moment occupied in concerting plans with the commanders of their Majesties' gunboats, for the protection of as much of the foreign quarter as can be brought within the influence of the limited means of defence at disposal.

As a preliminary measure the undersigned give notice that in the event of the disaffected troops approaching so near to the walls to occasion imminent danger a signal of two heavy guns, discharged in quick succession, will be fired from one of the gunboats, whereupon it is requested that all persons will immediately repair armed to the Club, and endeavours will then be made to organise them into a provisional force of co-operation for the common good. At the same signal all ladies and children should be conveyed to the British Consulate, where their safety will be duly cared for.

The undersigned are likewise making arrangements for having four or six pieces of artillery placed at their disposal for mounting at the most available points of defence, and any persons who care to volunteer for serving the pieces are invited to send in their names at once, so that they may be somewhat drilled to the use thereof as quickly as possible.

It is earnestly hoped that what danger there may be may disappear in the course of the week, either in consequence of the precautionary measures now being adopted, or of some compromise being entered into between the authorities and the braves, or of their finding it to their interest to move in some other direction. But meanwhile it is indisputable that some precautionary measures need to be taken, and should the event prove that they are not called for by the present emergency, they will be of service in case of future alarms from the Nienfei, who are likewise reported to be not very far distant.—P. DABRY, French Consul, W. H. MEDHURST, H.M. Consul.

CHIN-KIANG.

From this port we glean the following scraps. The Chinese military guard, originated by Her Majesty's Acting Consul after the attack on a house in the English concession, still continues to patrol the foreign quarter every night, and no further attempts at burglary have been made there, though it is said many robberies, some on an exceedingly audacious scale, are committed in the native city. This is tolerably common throughout China at this season, and no particular significance need be attached to it. The somewhat extensive settlement on the opposite bank is filled with riff-raff, who will stick at nothing to get money wherewith to enjoy themselves at New Year time, and doubtless many of them find their way to the Chin-kiang side. The local officials are working away perseveringly at the creek, which they are endeavouring to open to the west of the foreign settlement, as an anchorage for junks and other small craft. They are apparently concentrating their energies on the work this winter, as no attempt has as yet been made to clear out the branch of the Grand Canal which skirts the west walls of the city. We understand that the Catholic missionaries are thinking of forming an establishment at Chin-kiang at an early date. Everything is excessively dull, as is to be expected in such a place at this time of the year. Weather fine, but cold.

SHANGHAI.

The dates are down to the morning of the 9th. The P. and O. mail of 10th December arrived out on the 31st of January, and the French mail of 17th on the 6th February.

The following details of the imprisonment of the members of the French Municipal Council is from the *North China Herald*. No doubt the next mail will bring us the result of the meeting of the 9th February, by which we can better judge of the meaning of this extraordinary affair.

In the case of the Members of the Provisional Commission *versus* the Members of the late French Municipal Council, petition to enforce the delivery by the defendants of certain accounts and documents necessary to the well-being of the Municipality, which was opened on the 26th ult., before M. le Vcte. Brenier de Montmorand, and Messrs. Phillippe and Maignan, Assessors, the defendants protested against the legality of the proceedings on the following grounds :—

1. Because the names and residences of the plaintiffs were not mentioned in the summons.
2. Because the Consul General and one of the assessors were interested parties.
3. Because by French law all disputes between Consuls and their nationals must be decided in France.

The objections having been put in writing, the Court retired to deliberate upon them, and after a long consultation returned and declared their intention to decline to entertain the protest of the defendants. The defendants having refused to answer before a tribunal which they believed to be incompetent, the proceedings were resumed. Mr. Ortmans read the correspondence which took place between the provisional commission and Mr. Schmidt, late treasurer, relative to the delivery of the documents in his possession which are absolutely indispensable to the working of the settlement, inasmuch as the accounts rendered by the Chinese, principally in the matter of the new bund, cannot be audited, and the Chinese refuse to work until their claims are settled. The defendants having refused to reply, the Consul General announced that judgment would be given in eight days. Accordingly, on the 2nd February, judgment was delivered to the following effect :—Messrs. Meynard, Schmidt and Baron were ordered to give up to the Provisional Committee all documents and accounts in their possession bearing on the interests of the French Concession, and these documents, &c., when so delivered were to be verified by Mr. Ortmans. This was to be done within 24 hours, under pain of forcible possession being taken of the papers in dispute. The question of damages incurred through the detention of these papers was allowed to remain in abeyance subject to the decision of arbitrators to be subsequently selected. Meanwhile Messrs. Meynard, Schmidt and Baron were required to give joint personal security to the amount of 100,000 francs

Digitized by Google

for the fulfilment of the decree, failing which they were to be arrested and imprisoned. Further the Court inflicted a fine of 500 francs with costs, subject to increase by the Home Government, should it be deemed advisable by it to pursue the matter as a criminal action. On the delivery of the judgment, M. Meynard, in the name of himself and his colleagues, voluntarily surrendered himself a prisoner, and with Messrs. Schmidt and Baron was removed to the Municipal prison, where they remained until the 6th Feb. On that day they signified their readiness to give the security required, and were released. A meeting has been summoned for the 9th, when the members of the late Council will submit their accounts to the Consul General and to such of the longest established merchants as may be interested in the matter.

A meeting of land renters was held at Hankow, when Messrs. Hutchison, Ballance, and Higson were elected to the office of municipal councillors for the ensuing year.

The following notices have appeared :—

I have this day established myself as a general merchant and commission agent at this port, under the firm of Arch. Campbell and Co. ARCH. CAMPBELL. Shanghai, Jan. 8.,1866.

I have established myself at this port as merchant and commission agent, under the firm of William Remé and Co. WILLIAM REMÉ. Shanghai, Feb. 1, 1866.

SWATOW.

A Swatow circular, dated the 7th February, says that the disturbances in the interior previously reported continued up to the 6th of the month, on which day news was received that the insurgents had been defeated. This, it was conjectured, would probably have the effect of strengthening the demand for cotton and cotton goods, but rice will probably not be so firm as it has lately been, should the troops that have been employed in checking these robbers be soon disbanded, supplying them having aided materially in keeping up the price of this article.

HONG KONG.

The P. and O. mails of 26th Dec. arrived out on the 7th Feb. The dates are now down to the 15th Feb.

The following accounts form the piracy items by this mail :—On the 2nd February the Hamburg schooner *Chin Chin* left for Tientsin, and had got so far on her passage as to have been able to beat out through the Lye-moon Pass, where she had only light winds, so that at 7 P.M. on the 3rd she had only got off Pootoy. She then saw a heavily armed junk, that had been in company some time before, tack and stand towards her ; thinking it rather suspicious she at once cleared for action, and, when the junk got within range, commenced firing on her with her three guns ; many shots struck the junk, but she still continued to gain on the schooner, and at last, after about half an hour's firing, the junk boarded her, throwing stinkpots, &c., about the deck. The captain then finding he could no longer resist such superior odds, ordered all his crew to follow him and take to the foretop out of the way ; all did so except one man, who got frightened, and jumped overboard with a life-buoy to save himself ; when the pirates commenced firing on them in the top, wounding one man. They ordered them to come down and point out three boxes of treasure they knew were on board, which of course captain and crew declined doing. They then commenced to ransack the vessel, taking or destroying nearly everything of value, and after remaining on board nearly three hours, and having satisfied themselves with all they wanted in the shape of eatables and drinkables, they took their departure. The captain then shaped his course for Hong Kong, where he arrived on the 4th. Another schooner for whom we have fears is the *Johann Anton*, which left the same time as the *Chin Chin*, but from her being a faster sailer we trust she may have escaped these pests, who seem almost inclined to come and take ships out of the harbour itself, and from under the eyes of our gunboats which are lying there.

The *Nuevo Lepanto*, going over to Macao, was captured on the 5th Feb. ; crew escaped. On the 2nd Messrs. Lane, Crawford, and Co.'s water-boat was attacked while at anchor off the Mint, but the pirates were beaten off.

The *Opossum* gunboat arrived at Macao this morning, having returned from a visit to a pirate village called Paksui. She there fell in with fifteen piratical junks, to which she gave chase. They made towards the shore, and the crew escaped, the junks, guns, &c., being captured and entirely destroyed. She also dismantled the fort at Paksui, and burnt the village. During the conduct of this operation forty mandarin junks were in sight, who offered no assistance whatever to Lieut. St. John ; but on his having completed his work they gallantly advanced, and their crews took whatever had escaped the attention of the *Opossum's* crew.

While endeavouring to set fire to one of the junks a train laid by the pirates blew up, and we regret to say that the gunner and a boy were seriously injured and a private marine and two seamen were also hurt. Mr. Thomas, the gunner, is hardly expected to recover.

The census of Hong Kong at 31st December, 1865, was :—

Europeans and Americans	2,034
Goa, Manila, Indian, and others of mixed blood ..	1,645
Aliens, chiefly seamen and temporary residents ..	150
Chinese in employ of Europeans, &c., ...	6,836
Chinese residing in Victoria	73,803
Chinese residing in villages and Kowloon	11,371
Boat population in Victoria	19,153
Boat population other than Victoria	7,732
Vagrants	2,000
Prisoners	780
	125,504

The screw transport *Orontes* is to leave Hong Kong with invalids and time-expired soldiers and sailors on the 17th Feb., calling at Singapore, Mauritius, the Cape, Ascension, and Madeira, and expected to arrive at Portsmouth in May.

It is reported that orders had been received from the War Office to send the remains of the 11th Regt. to Japan, and the 20th Regt. to Calcutta. From Amoy we learn that H. M. Consul, accompanied by an officer from the *Scylla*, had gone in person to demand the surrender of a Singapore Chinese—a British subject—who had been seized by the native authorities. Mr. Pedder's well known character for determination had its effect, and after a good deal of finessing the man was given up.

The Hong Kong athletic sports came off on the race course on the 10th February. The prizes were well contested, and the whole affair was spirited and successful. The band of the Hong Kong volunteers was in attendance.

On the 7th February a review took place at Canton of the Chinese and Tartar troops which have been drilled as infantry and artillery for upwards of three years past by British officers. About 400 picked men of the Tartar garrison have been instructed in the Artillery exercise, and some 600 of the Chinese force have been drilled in the use of the musket and in simple infantry manœuvres. The inspection took place, at the especial desire of the Governor General, who manifests a strong interest in the efficiency of these troops. They were drawn up under the command respectively of Lieut. Stewart, R.A., and Lieut. Dunn, H.M.'s 9th Regiment, who have continued the work of instruction which was commenced and carried on until the beginning of last year by Lieut. Ellaby, R.A., and several officers of the 99th Regiment. The Tartar Artillery at once attracted attention by their superior size and more soldierly bearing, no less than by the diversity of their uniforms. The Chinese troops, on the other hand, might at a distance be mistaken for Sepoys, their dress consisting of red jackets turned up with white, with light leggings worn knicknerbocker fashion. Their head-dress is the ordinary conical bamboo hat, which is perhaps as light and sensible a covering as could be devised. The higher officials occupied seats of honour together with Her Majesty's Consul, D. B. Robertson, Esq., C.B., and Mr. Mayers, H.M.'s Acting Vice-Consul. A general salute having been given by the troops in line, a march past succeeded, after which some artillery manœuvres were executed by the battery, comprising six field-pieces and served by some seventy officers and men. Thirty rounds of solid shot were next fired at a range of five hundred yards, with an accuracy which surprised all spectators. The firing was succeeded by some infantry evolutions, the most prominent among which were forming square and throwing out skirmishers. The latter manœuvre attracted the special attention of the Chinese magnates, who were also much impressed with the bayonet exercise.

The first ordinary general meeting of the Hong Kong and Shanghai Banking Company was held on the 15th February ; the Hon. F. Chomley in the chair. The report presented by the directors showed that during the eight months in which active operations had been carried on, a net profit amounting to $225,056 had been realised. Out of this it was proposed to declare a dividend at the rate of 8 per cent., which would absorb $133,200, and to carry $33,300 to the reserve fund, which would leave a balance of $12,281 to be carried forward to the

Digitized by Google

next half-year. The report further recommended an increase of capital, the business of the Bank having increased to such an extent as to necessitate it. Not being able to register the Company as a "limited" one under the local ordinance, the directors had applied to Government for a charter, and had received a reply to the effect that such would be acceded on the basis as the charter of the Asiatic Banking Corporation. The Report was unanimously adopted, and the meeting concluded with the usual votes of thanks.

The following items were omitted from our last :—

The rivalry between Messrs. Russell and Co. (American) and the Hong Kong and Canton Steam Company (British) continues. It appears that the Consul at Canton has obtained the privilege for the company of calling at Chun-pee to land passengers and cargo.

The finding in the case of the mutiny on board the coolie ship *Pride of the Ganges* has been published. Full details of the affair were given in our issue of the 27th ultimo, and it will be remembered that the Court adjourned without giving any decision. In reviewing the evidence the Court expresses surprise that the insubordination among the passengers while at Whampoa was not made known to the Consul. It is of opinion that the rice supplied to the coolies was of inferior quality, and suggests that in all coolie ships the crew should be quartered aft, and the Chinese not allowed access to the quarter deck. We do not see any notice of the customs' steamer *Hai-ching* starting again for Hainan to seek information regarding the coolies.

A meeting of the Legislative Council was held on the 22nd January. Present :—

His Excellency the Acting Governor, the Acting Chief Justice, the Acting Attorney-General, the Acting Colonial Secretary, the Colonial Treasurer, the Auditor-General, the Hon. Thomas Sutherland, the Hon. Francis Chomley, the Hon. the Judge of the Summary Jurisdiction Court, the Hon. James Whittal.

His Excellency the Acting Governor said that certain ordinances that had been past last year by the Council had been sent to the Home Government for ratification, and a reply had been received from the Secretary of State for the Colonies, pointing out that in some of the clauses enacted the Legislative Council of this Colony had exceeded its powers; and expressing a wish that the errors might be amended in order to permit of him (the Secretary of the Colonies) laying the above named ordinances before the Queen for her approval. The despatch of the Secretary for the Colonies pointed out that it was not competent for the local Legislature to give a criminal character to acts which were not considered criminal in the jurisprudence of the mother country. The word "elsewhere" was also objected to as part of the ordinance for the punishment of bigamy; the local Legislature having only to deal with offences committed within its own jurisdiction. In regard to this question the Secretary for the Colonies referred to a correspondence between the Home Government and the Governor of New Brunswick, as embodying the views of the Home Government upon that subject. The Secretary of State approves of the extension of the punishment of flogging, and of solitary confinement to certain offences; but recommends that in no case shall the number of strokes administered at one time exceed forty, and that the solitary confinement shall not exceed one month at a time or three months within the year. An ordinance therefore to amend the 4th, 5th and 7th of 1865 had been drafted, expunging such clauses as had been found objectionable by the Colonial Secretary; and his Excellency the Acting Governor now moved that such draft be read a first time. The motion was passed unanimously.

After some inaudible remarks made by the Auditor General and the Acting Chief Justice,

The Colonial Treasurer asked if any communication had been received from the Home Government relative to the limited liability ordinance? His Excellency said he believed that there had not; but that subject was not before the Council, and that the hon. member was not in order in introducing it.

The Colonial Treasurer said that he was not aware that he was out of order; and asked if there had been any communication received from the Home Government on the subject of the rendition of certain Chinese subjects?

His Excellency said the Council had been convened for a special purpose and foreign matter could not be introduced. It belonged to the Governor to initiate motions.

The Colonial Treasurer said that he had not introduced any motion' and was not aware that in asking a question he was going against the standing orders. Before the Council adjourned he would beg to ask, as a matter of great public interest, whether the standard of weight and purity for the new dollar had been fixed, and if so at what? His Excellency said that all those particulars were to be found in the printed correspondence. The Colonial Treasurer said that it did not appear from the printed correspondence what the weight and standard of purity of the new dollar was to be. He had asked the question, and could not reply to it.

His Excellency said that he was under the impression that the standard had been fixed at 10 per cent. alloy, and that he had already answered questions to that effect, thinking that the matter had been already settled. His Excellency further remarked that he was anxious that the draft of the amended ordinance should be forwarded home by the next mail; and this day week having been fixed for the second reading, the Council then adjourned.

The British ship *Agincourt* has been despatched to England with a further instalment, consisting of about 150 invalids, from the unfortunate 9th and 11th Regiments. The following, from the *Daily Press*, is a compact history of the gross mismanagement which has caused the mortality now engaging the attention of members of Parliament and others.

It appears that the 2nd battalion 9th Regiment landed here, in February last, some 839 non-commissioned officers and men, forty-seven women, and seventy-seven children. The last official return of the strength of the same regiment gives but 636 non-commissioned officers and men, fourteen women, and eighteen children, which are accounted for as follows :—

	Men.	Women.	Children.
Deaths	48	6	28
Invalided and sent home	155	27	31
Total	203	33	59

Leaving such a falling off to speak for itself, let us look at the 2nd battalion of the 11th Regiment, which only landed here in May last with 705 non-commissioned officers and men, 54 women, and 92 children, since which we find that, deducting the two companies sent up to Japan, including 150 men, five women and eight children, they have lost through deaths and invaliding :—

	Men.	Women.	Children.
Deaths	59	4	25
Invalided or sent home	189	22	35
Total	248	26	60

In other words, that regiment has lost forty-two per cent. of its entire number in less than nine months in the colony!

The Royal Artillery and Engineers have also suffered, but little, in comparison with the rest, as they are almost all exempted from night duty. The general total of losses in this garrison may be estimated from two returns, one dated 1st June 1865, number of effective men 1,778—sick 93; 1st January 1866, number of effective men 1,093—sick 218. Showing thus a decrease in the effective of men 685—to which must be added those invalids who have since departed in the *Agincourt*, viz. : 132 non-commissioned officers and men besides women and children.

Perhaps Mr. Gladstone forgot for the moment that Her Majesty's service is not limited to the duties of the household brigade, and that the British army has work to do outside the railings of St. James's Park. A servant should always be worthy of his hire, and to enable a man to live out here he requires a certain amount of comfort which would be considered unnecessary in many other places. Merchants find themselves actually obliged to pay their clerks at a higher rate than the country pays a colonel of thirty years' standing.

(FROM A CORRESPONDENT.)

HONG KONG, Feb. 14, 1866.

We are on the verge here of the Chinese New Year's holidays, and already business is well-nigh suspended and the air is sulphurous with the discharge of fire-crackers and artillery, in which, with a strange license our native population is allowed to indulge to the inconvenience and irritation of European ears and noses. One of the many strong points of resemblance between Yankees and Chinese is the fondness for noisy fireworks. The only national holiday that could surpass in inanity and unmeaningness the Chinese saturnalia at the New Year is the celebration of the Fourth of July in New York. As usual, and perhaps even more than usual, Hong Kong has been inundated with bad characters from Canton, and robberies are of hourly occurrence. The latest event of the kind reported is the abstraction of some brass machinery from the Mint, the loss of which will, it is said, seriously delay the commencement of coining operations. It is a pity that Her Majesty's Government, in place of occupying their philosophic minds with schemes for the revision of the Chinese penal code, as regards the punishment of pirates who may be captured and handed over to their own authorities, do not devote a little investigation to the method of securing safety for life and property to residents in this colony. Failing any efficiency in the present police system, the respectable portion of the Chinese inhabitants have recently applied for and obtained permission to maintain a body of native constables at their own expense.

I hear from Canton that one of the coolie emigrants of the *Pride of the Ganges*, the mutiny on board which I mentioned in my last, has been found by the authorities and examined as to the particulars of the affair. His statement has not yet been made public, but I learn that it implicates barely twenty-five of the coolies (out of 300) in the lamentable affair by which the captain and overseer lost their lives. Six ringleaders are mentioned as having originated the rising, having gone about among the remaining coolies, already discontented with the inferior quality of rice served out to them, and stated that a large quantity of dollars were on board, and enlisted volunteers for the scheme of taking the ship. The small body who were induced to put their names down for the attempt appear to have thoroughly intimidated the rest, who looked on passively, Chinese-like, and doubtless took part in the plunder of the vessel after the bolder spirits had initiated the undertaking. This only throws a stronger light on the utter lack of caution

Digitized by Google

prevailing on the unfortunate captain's part. So small a body of mutineers would never have ventured upon the murderous outrage they committed had they not had every reason to feel confident of success. On the whole, however, it is remarkable that not a single disaster of any kind but this has attended the operations of the Emigration Agency at Canton, which has despatched since 1859 some 9,000 Chinese coolies to Demerara, with perfect safety and success. Apart from the high character of the managing agents, the regulations originally devised by the allied commissioners during the occupation of the city, and subsequently continued by the Chinese authorities, preclude any irregularity in the engagement of emigrants. This, of course, must be understood by the British Emigration Agency. The Franco-Spanish houses opened last year at Canton under the violent pressure of the French Consul are the subjects of very ugly stories.

News, apparently somewhat highly coloured, reaches us from Hankow with reference to an alleged mutiny of Imperial braves on account of arrears of pay, and also to the near approach of an army of Nienfei. Experience has however shown that, as a rule, these paroxysms of panic usually end in the payment of the mutinying troops, and in the retirement of the Nienfei hosts, which, as a rule, are mere aggregations of highwaymen bands, armed only with swords and spears, and quite incapable of making an impression on walled places, however weakly defended.

In the Canton Province rebel matters still continue much as they were at the date of my last. The band under the K'ang Wang still occupy the city of Kia-ying-chow, around which the Imperial troops are supposed to be gradually closing. The Governor of the province is about to proceed to the spot, taking with him some of the troops which have been drilled by British officers at Canton. Led only by native commanders, however, it is not likely that these troops will perform many prodigies.

SIAM.

The following Royal proclamation has been issued at Siam, from which it would seem likely that the office of Second King will not be continued :—

Whereas since the Anno Christi 1851. There were two Kings exalted in Siam; one was the Supreme, the other being his Subordinate. The foreigners called and addressed the former "First King," or "Major King," or "Senior King of Siam," and sometimes "Supreme King of Siam," but certain parties or individuals called and addressed him invariably as the "King of Siam," but they called and addressed the latter sometimes the "Vice King," sometimes "Minor King," and sometimes "Junior King," but generally called and addressed "the Second King of Siam," during the last 15 years, and whereas now the latter was deceased on the 7th January, Anno Christi 1866. There is only the former remaining, one King of Siam governing and presiding over both departments of the Royal duties of Siam as sole Ruler.

It is now proclaimed there, that the aforesaid remaining sole King of Siam shall not be called and addressed the "First King," or "Major King," or Senior King." Moreover, he shall be called and addressed invariably, "the King of Siam or Supreme King of Siam," without respect to the other as his Second or Minor or Junior, as there is none yet exalted in place of the Subordinate King just deceased.

STRAITS OF MALACCA.

SINGAPORE.

Dates are down to the 22nd Feb. The P. and O. steamer with the mails of 10th Jan. arrived on the 12th Feb., and the French mail of the 17th on the 21st Feb.

Colonel Cavenagh, the Governor, still continues at Malacca, but is expected to return in the course of a week or ten days. Sir Richard McCausland, recorder, will leave this for Malacca in a few days, to hold his last session at that place; in the meantime, a demonstration of some significance has been raised at Singapore in favour of the retiring Judge, and it has been resolved to commemorate his long and able services in a public way. A deputation for this purpose waited upon Sir Richard two days ago, and it was resolved that the demonstration should have effect in a public dinner.

The M.I. steamer *Capitole*, Captain Champenois, from Marseilles, has arrived. She is intended to supply the place of the M.I. steamer *Hydaspe*, on the Batavia line. H. M.'s steamer *Coquette*, Commander Roe, from Siam, returned to Singapore on the 14th February.

The following items were shut out of our last :—

The forty-seventh anniversary of the foundation of the settlement was passed over two days ago. In 1819, on the 6th February, Sir Stamford Raffles first obtained a footing on the island, and since then its material prosperity has been gradually progressive. How much of this prosperity has been due to its marvellously advantageous geographical position, and how much to the nature of its past government, it is at present impossible to say. It is not unlikely, however, from all we can learn, that ere long we shall have it in our power to compare the old system with a new one, and thus determine whether the expressed desire of the English residents to obtain a separation from the Government of India has been justified or not. By last mail, news of a more than ordinarily definite nature was received, that the Imperial Government had decided upon the transfer of the settlement to the Colonial Office. This change has been long anticipated and long desired, and we think that it will tend very much to continue, if not to hasten, the progress of our prosperity. The patriarchal and non-representative form of government under which the island has up to the present time remained, though well suited to its earlier development, is not calculated to further it beyond a certain point, and this has already been felt, to the extent that the transfer will be welcomed by all who interest themselves in its political concerns.

The Governor left for Malacca two days ago upon his annual visit; the precise duration of his absence is not known. The Recorder, with the Court establishment, proceeds to Malacca in a few days, to conduct the first Criminal Session of the year there.

The first Australian mail by way of Torres Straits reached this by the Batavia mail steamer on the 6th, and will be conveyed to England by the present opportunity. Great success is expected of this line.

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

BOYD—On the 23rd January, at Amoy, the wife of T. B. Boyd, Esq., of a daughter.
BAPTISTA—On the 23rd March, at 76, Lansdown-road, Notting-hill, London, the wife of J. S. Baptista, of Foochow, of a daughter.
CHOPARD—On the 18th Feb., at Singapore, Mrs. H. D. Chopard, of a son.
FISHER—On the 20th March, at Chatham, the wife of Lieut.-Colonel Fisher, C.B., Royal Engineers, of a son.
GILFILLAN—On the 30th January, at Shanghai, the wife of James Gilfillan, Esq., of a daughter.
GOODWIN—On the 7th February, at Shanghai, the wife of Charles Wycliffe Goodwin, Esq., Assistant Judge of H.B.M. Supreme Court for China and Japan, of a daughter.
HANCE—On the 4th February, at Whampoa, the wife of Dr. H. F. Hance, H.B.M. Vice-Consul, of a son.
HANCOCK—On the 2nd February, at Hong Kong, the wife of Alfred Hancock, Esq., of a son.
JACKSON—On the 3rd February, at Ningpo, the wife of T. W. Jackson, Esq., of a son.
MACKENZIE—On the 21st March, at 69, Chepstow-place, Bayswater, the wife of Samuel Mackenzie, Esq., of a son.
SCRYMGEOUR—On the 15th Feb., at Grange-road Bungalow, Singapore, the wife of John S. Scrymgeour, Esq., of a son.
SMITH—On the 16th Feb., at Duncarn, Bukit Timah-road, Singapore, the wife of G. Smith, Esq., of a son.

MARRIAGES.

ALLAN—SCOTT.—On the 30th January, at St. George's Church, Penang, by the Rev. James Mackay, B.D., John Allan, Esq., to Lucy Margaret, daughter of George Scott, Esq., of Ayer Rajah.
BOWRING—FURLONGER.—On the 24th March, at the Church of the Holy Trinity, Paddington, by the Rev. Thomas Watson, vicar of East Farleigh, Kent, John Charles Bowring, Esq., of Larkbeare, Devon, to Mary, eldest daughter of Charles John Furlonger, Esq., of 75, Gloucester-terrace, Hyde-park. No cards.
EARL—ANTHONY.—On the 3rd February, at St. George's Church, Penang, by the Rev James Mackay, B.D., Alfred H. Earl, Esq., to Sarah, daughter of A. A. Anthony Esq., of Clove Hall.
KERSHAW—GREENWOOD.—On the 17th March, after banns, at Willesden Church, by the Rev. J. C. Wharton, vicar, assisted by the Rev. J. Kirkman, of St. John's Chapel, Hampstead, John, youngest son of William Kershaw, Esq., of Efra Lodge, Brixton, to Louisa, eldest daughter of William Greenwood, Esq., of Heathfield Lodge, Willesden, and 109, Fenchurch-street, E.C.

DEATHS.

BETHAM—On the 8th Feb., at sea, John Edward, only son of Captain Betham, commanding s.s. *John Bright*, aged 5 months.
COOPS—On the 7th February, at the Civil Hospital, Hong Kong, C. Coops, seaman unemployed.
JEPSON—On the 4th February, at the General Hospital, Hong Kong, Samuel Jepson, gunner, Royal Artillery, of fracture of the skull, aged 31 years.
RYRIE—On the 5th February, at Hong Kong, Edith Anne Mary, wife of P. Ryrie, Esq., aged 24 years.
RYRIE—On the 31st January, at Hong Kong, a few hours after birth, the infant daughter of Mr. and Mrs. P. Ryrie.

COMMERCIAL REPORTS.

CHINA EXPORTS.

TEA.—CANTON.—The market has been very dull, and no very important transactions have taken place. The stock of country congous, however, has been disposed of. The six chops were settled early in the fortnight at Taels 22 to 23½. The crop of Country Greens have been taken for America at Taels 44½. Canton made teas have been neglected.

FOOCHOW.—The only settlements reported since our last are: Congou, 711 chests 2.086 hf.-chests at Tls. 8.5 to 22.5. Oolong.—Inferior to common cargo, 800 hf.-chests at Tls. 9.8 to 17. Scented.—Medium kinds, 2220 boxes at Tls. 20 to 23.5.

AMOY.—Congou: Only a few hundred half-chests have come forward. Settlements are 413 half-chests at $11 to $15 per picul for every box to rather common. Oolongs: Supplies have been small and the business has been confined to the settlement of 2325 half-chests and 379 boxes, very common; Ankoi to fair cargo Ningyong, at $13 to $27 per picul, which shows a decline of about $1 per picul on previous rates.

SHANGHAI.—Black.—Small stocks are being taken up very slowly, at prices which show no alteration from former quotations. The season is now almost closed, there being but a small quantity left unsold on the market, and but very few parcels still to come forward from Hankow and Kiukiang. Green: During the last fortnight the market has been very flat, only two chops having been settled. Holders are still, however, firm, although stocks are heavy, in anticipation of a more favorable market at the conclusion of the Chinese holidays. Quotations are unaltered. Settlements for the fortnight,—5722 hf.-chests. Re-shipments on owners' account 2150 hf.-chests.

HANKOW.—The shipments since last mail have been 520 chests, the only purchase being a small chop common Oonahm. Quotations were: Oonams, common 15.5.0 taels to 16.2.5. taels.

KIUKIANG.—Black Teas: Arrivals amount to about 1500 packages, which have been taken off the market at a further advance of 0.5.0 taels to 1 tael. No stock now remains. Seven chops Ningchow have been settled during the fortnight at 22.5 taels to 23 taels. Quotations were: Ningchows, common to fair, 22.5. taels to 23 taels. Green Teas: During the past fortnight there has been but little doing, only one small parcel having been bought. Receipts have been moderate, and although the advices received have been unfavourable to descriptions, holders are firm in their demands, and no change can be quoted. One chop has been settled at 30 taels.

YOKOHAMA.—The large amount of business noticed in the last report has been followed by a quieter tone, owing to the fact of most of the orders having been fulfilled by the *Cadiz*, which brought the English mail of the 26th November, with telegrams to the 6th December. Advices were received that the New York market had declined materially and the high prices in London were only feebly maintained; since then only a moderate amount of business has been done, at a decline of about $5 per picul from the extreme rates; again for the American market. Supplies are falling off and stocks are reduced, but the Japanese new year is coming near, and money being scarce amongst the native merchants no rise in prices is expected.

RAW SILK.—The quantity of silk by this mail is as follows:—911 bales and 23 cases for Southampton, and 189 bales for Marseilles.

CANTON.—Only 20 bales are reported as having been settled for Europe during the fortnight, the greater portion of settlements having been effected by Parsee firms for India at prices equal to those paid last mail. Loong-kong, No. 1, $630 to 640 per picul.

SHANGHAI.—Business in China Silk has been but very trifling since the last report, barely 500 bales having been settled. Prices may be quoted in some instances about Tls. 15 lower, but the concession has only been made by those holders who required to realise their Silk previous to the Chinese New Year. Settlements for the past fortnight, 1000 bales; stock, 1000 bales; total settlements since 1st January, Chinas 1000, Japans 1444, 2444 bales; Tsatlees, Chops No. 1, Tls. 650 to 655 per picul; Taysaams, Chops No. 1, Tls. 530 to 540 per picul; Taysaams, Chops No. 3, Tls. 460 to 470 per picul.

YOKOHAMA.—The business in this staple for the fortnight since the last report has been most remarkable for the difficulty that buyers have experienced in finding suitable parcels of Silk to supply their wants, the returns to the dealers having been more numerous than ever for inferiority to muster, and this circumstance must seem to afford convincing proof that the supply of good hanks, at least, is nearly exhausted. The buying has again been confined to few houses, and the total business for the fortnight is but small. Settlements for the fortnight may be put down at about 600 bales, making the export to date 8600 bales, against 9800 bales last season. The arrival of the 27th November mail from England has not had any appreciable effect on the market, but if anything the feeling is rather quieter. Prices for really fine parcels may be said to be fully maintained, but for medium and ordinary Mybash they rule somewhat irregular, according to the capacity of the buyer to take a quantity or not; the approach of the new year and the desire on the part of the natives to close up accounts may induce a concession on a parcel here and there, but, considering the small business doing in the staple, the dealers are wonderfully firm. Stock has been replenished regularly, and there are now about 1500 Japanese bales on offer, including every description, coarse and fine. Quotations: Ida, medium, $830 to 860; do. inferior, 750 to 800: Mybash, best parcels offering, 920 to 940; and medium, 840 to 870; Sinchu, inferior, 800 to 820.

DRUGS, &c.—CANTON.—Cassia Lignea: Quoted at $18.60 to $18.70; stocks seem nearly exhausted in the interior, and sales amount to about 100 piculs; no stock left. Cassia Buds: Are again cheaper, and can be bought at $41.50; sales, 60 piculs, and further supplies are shortly expected. Galangal: No change; 300 piculs are being offered at $2. China Galls: Remain scarce at $18 to $19. Vermilion: $38.50 per box. Rhubarb: No transactions. Musk: Has been purchased at about previous prices for the northern ports. No stock left, nor any supplies expected for some time to come.

COTTON.

HONG KONG.—Since the last report 1500 bales of Bombay cotton have come in, but holders are unwilling to sell, though prices have gone up 1 dol. to 1.50, preferring to wait till the Chinese holidays are over, when a large business is anticipated. Some sales have been effected at 22 dols. 20c. to 25 for Bengal, and 26 dols. to 28.50 for China sorts according to quality. Quotations are,—Bengal, 22.75 dols. to 25; Bombay, 24 dols. to 26; China, 26.50 dols. to 28.50. The stock of Bengal is computed at 25,000 bales, but as prices have risen in Calcutta, shipments from that port will be checked.

SHANGHAI.—There are three vessels on the berth loading for Liverpool; the market is quiet, and has not been materially affected by the further rise at home. Quotation:—Taels 18½ to 19½ per picul.

YOKOHAMA.—There are accounts of the purchase of 1000 piculs of Japanese cotton at a considerable decline from the prices hitherto asked by the Japanese, which can only be accounted for by the pressing wants of money on account of the approaching New Year holidays, which, as in China, is the period for settling accounts. There are great stocks in Yedo, but no supplies will be sent unless foreigners can afford to pay higher prices than offered hitherto.

CAMPHOR.—HONG KONG.—The last arrival still remains in the hands of the importers unsold; our stock, therefore, consists of 2000 piculs of Formosa, for which buyers offer 24 dols. packed, the holder asking considerably above that price.

CHINA IMPORTS.

HONG KONG.

Grey Shirtings: Sales include about 11,700 pieces sold at auction. American Drills, &c.: None here. Quotations nominal. Brocades, Damasks, Chintzes: No sales to report.

WOOLLENS.—Have been but little sought for and sales are very limited. A few Long Ells have found buyers, but there is little or no demand.

IRON.—Has advanced in price, and clearances considerably exceed those last reported. Lead: Continues in brish demand both by speculators and consumers, and prices continue to advance. 2400 piculs have been sold in Canton. Quicksilver: 250 flasks sold in Canton.

COALS.—HONG KONG.—The arrivals during the fortnight have reached 5000 tons, of which 4700 are English and North Wales, and 300 Australian. Holders are firm at dols. 13.50 to dols. 14 for Welsh and dols. 13 for English. The above parcel of Australian realised dols. 11.75, but a cargo has subsequently been sold to arrive at dols. 11.25. Shanghai.—We have again to note large receipts, arrivals since our last having been 5673 tons from Great Britain, 840 tons from Sydney, and 1090 from Formosa. Foreign purchasers having supplied their immediate wants from previous arrivals, have shown less inclination to meet the demands of sellers, while the Chinese being out of the market until after the holidays, sales have been but 930 tons British, 125 tons Sydney, and 870 tons Formosa, at declining prices, and in view of the dead lock in all branches of trade at this season, holders will probably have to land their cargoes or submit to lower rates still. As shipments from Great Britain in October were not excessive, and in November small, while supplies on the way from other quarters are trifling, we do not anticipate a material and permanent decline. We quote:—American Anthracites, tls. 11 to 11.5. (67s. to 69s. 11d.); English, tls. 9.7.5 to 10.2.5. (59s. 4d. to 62s. 4d.); Welsh, tls. 11 to 11.2.5. (66s. 7d. to 68s. 5d.); Sydney, tls. 8.7.5 to 9. (53s. 3d. to 54s. 9d.); Newcastle (N.S.W.), tls. 8.5 to 8.7.5. (51s. 8d. to 53s. 3d.) per ton of 2,240 lbs. from ship's side. Japan, tls. 7 to 8; Formosa, tls. 5 to 6.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—From Amsterdam: Jan. 25, Bantam.

At SHANGHAI.—From London: Jan. 28, Maiden Queen; 30, Sir W. F. Williams; Feb. 4, Antipodes; 5, Lansdowne. From Cardiff: Jan. 29, Electricity; Feb. 5, Ironside; 6, Monarchy. From Swansea: Jan. 31, Georges; Feb. 5, Moldavian. From Newcastle: Feb. 1, Talbava. From Hamburg: 5, Mathilde.

At HONG KONG.—From London: Feb. 1, Taitsing. From Liverpool: 5, Sir Lancelot; 11, Lochnagan. From Cardiff: Feb. 1, Catharina Laroba Henriette. From Sunderland: 10, Anne Longton. From Bergen: 5, Madura.

At MACAO.—From New York: Feb. 4, Harlford.

At MANILA.—From Liverpool: Jan. 27, Ameliana. From Glasgow: 24, Mastacia.

At SINGAPORE.—From London: Feb. 20, Couranto. From Liverpool: 14, Charmer; 20, Queensburg. From Sunderland: 10, O'Shyen. From Cardiff: 14, Oceanus; 18, Robert Lowe (str.). From Newport: 14, Pania. From Hamburg: 8, Melissa. From Marseilles: 9, Capitole (str.).

At PENANG.—None.

At BATAVIA.—From London: Kaap Hoorn. From Glasgow: County of Renfrew.

At HONG KONG.—From Havana: Feb. 10, J. A. V.

DEPARTURES.

From YOKOHAMA.—None.

From SHANGHAI.—For New York: Jan. 26, Indus; 28, Hotspur.

From FOO-CHOW.—None.

From AMOY.—For New York: Feb. 6, Constantia.

From HONG KONG and CANTON.—For London (via Macao): Feb. 2, Queen of the Age, 3rd Victoria. For Liverpool: Jan 31, Engel. For New York: Feb. 1, Dan; 10, Peep o' Day. For Hamburg: 1, Iris.

From MANILA.—For Liverpool: Feb. 25, Feliz. For Falmouth: 23, Ferozepore; 27, Cinco Hermanos. For Hamburg: Feb. 3, Voladora. For Boston: Jan. 27, Mindoro; 30, Dorchester; Feb. 1, Bengal, Sacramento.

From SINGAPORE.—For London: Feb. 14, Nancy Brysson. For Falmouth: 14, Leontine. For Bordeaux: 20, Felix. For New York: 10, Herschel. For Boston: 14, Newcastle.

From PENANG.—For Boston: Feb. 14, Agnes.

From HONG KONG and CANTON—For Havana: Feb. 1, Baron Killner; 7, Antoinette, Mousse de Nantes; 11, Constantin.

LOADING.

At YOKOHAMA.—For London: None. For New York: Louisa, Bragington.

At NAGASAKI.—For London: Chanticleer.

At SHANGHAI.—For London: James Sheppard, Jubilee. For Liverpool: Ærolite, Empress, Scawfell. For New York: Resolute, Catalpa.

At FOOCHOW.—For New York: Anglo-Saxon (full).

At AMOY.—For New York: Marco Polo, Amaranth.

At HONG KONG and CANTON.—For London: The Ethels. For New York: Eastward Ho.

At MANILA.—For London: Margaret Wilkie. For New York: Santee, Endeavour.

At SINGAPORE.—For London: Como, Moneka, Golconda. For Liverpool: Fortuna. For New York: Apellina, Jane Anna (via Padang).

At PENANG.—For London: Kinnaird, Ocean Home.

At BATAVIA.—For Channel: Insulaneren, Wilhelmina, Ann Buckle, Almonde, Duc de Richelieu, Nornen. For Boston: Cezard. For Amsterdam: Maria, A. R. Fatck, Ouderkerk and Amstel. For Rotterdam: Johanna, Medea.

FREIGHTS AND CHARTERS.

YOKOHAMA.—To Shanghai, per steamer; for silk, $3.50 per bale; measurement, $5 per ton; per sailing vessel, $3 50 to 4 measurement 40 cubic feet nom. To London, cotton, and tea £2 to £2. 10s. per ton. Silk, £4 to £4. 10s. per ton of 50 cubic feet.

SHANGHAI.—Nothing has been done in charters for Europe or America. In coasting charters there is an improved activity. The rates to London are £2. 10s. to £3 per ton of 50 cubic feet. To Liverpool, £2. 5s. to £2. 10s.

FOOCHOW.—No vessel on the berth either for Europe or America. One small vessel is expected to hand for London, which will complete the shipments for the season.

HONG KONG AND CANTON.—To London the Ethels has taken the berth at £2. 10s. per ton. There is less demand for vessels to the rice ports. To New York the rate is £2. 10s. per ton of 40 feet. The circular of Geo. Holmes estimates the number of disengaged vessels in harbour (exclusive of Siamese) at 41, representing a tonnage of 23,786.

MANILA.—The Margaret Wilke has been laid on for London, taking 200 tons of clayed sugar at £2. 10s., 70 tons of unclayed at £2. 12s. 6d., and filling up with light goods at £4 per 50 cubic feet.

SINGAPORE.—There is less activity in the freight market, and tonnage in the harbour is large; the rates for dead weight for Europe is £2, and measurement goods £2. 10s.

PENANG.—The Kinnaird and Ocean Home are both on the berth for London, the former at £2. 2s. 6d. for dead weight and light freight, and the latter £2 for dead weight, £2. 10s. for light freight and £3 for measurement. The vessels are experiencing great difficulty in loading, as there is none of the latter article offering, while the former is to be had in any quantity.

VESSELS PASSED STRAITS OF SUNDA.

From ENGLAND AND CONTINENT TO CHINA, &c.—Feb., 12, Albert Victor, Liverpool to Singapore.

From CHINA, &c., TO ENGLAND AND CONTINENT &c.—Jan. 21, Caroline, Canton to Havana; 23, Lombard, Macao to Havana; 27, Layard, Hong Kong to London, M. Thorbecke, Batavia to Rotterdam, Reconnaissance, Hong Kong to Bordeaux; Feb. 1, A. D. Ruyter, Batavia to Holland; 2, Light Brigade, Amoy to Demerara; 3, Emigrante, Macao to Havana; 4, St. Agincourt, Hong Kong to Spithead, Taffarette, Hong Kong to Havre; 5, County of Ayr, Singapore to London; Mountain Ash, Macao to London; 6, William Simpson, Singapore to London; 6, Rajah of Cochin, Shanghai to London; 7, Petchelee, Shanghai to London; 8, M. and Hillegonda, Batavia to Rotterdam; 9, A. Petronelia, Batavia to Rotterdam; 11, Feliz, Manila to Liverpool, Cinco Hermanos; 12, Manila to Cork, Roslin Castle, Singapore to Liverpool.

From CHINA, &c., to UNITED STATES.—Jan. 22, Lucerne, Japan to New York; 31, Marco Polo, Amoy to New York; Feb. 6, Goethe, Manila to Boston; 9, Royal Saxon, Zebu to New York.

CASUALTIES.

The Loda, Melbourne to Shanghai, has been destroyed by fire; crew saved. Telegram from Point de Galle, March 17.

The well-known China clipper ship Dora, Captain Carty, has been given up as lost, not having been heard of since leaving Shanghai for Foochow, on the 11th of November last. She was bound to Foochow to load tea for London.

COMMERCIAL POSTSCRIPT.

ARRIVALS NOT INCLUDED IN THE TABLES.—March 23, at Falmouth from Moulmain, Frans Scharlow; 21, at Texel from Banjoewangie, Abel Tasman; at Helvoet from Batavia, Candati; 18, at Ile Dien from Singapore, Maria; 25, at Ballycotton Bay from Moulmein, Alarm; at Deal from Ceylon, Elizabeth Douthwaite; at Liverpool from Shanghai, Patna; March 25, at London, from Foo-chow-foo, Juanpore, from Columbo, Woodcote; 24, at Deal, from Foo-chow-foo, Jubilee; 27, from Macao, Santon, from Ceylon, Gladiator, Star of Devon.

DEPARTURE.—March —, from Rotterdam for Batavia, Kosmopoliet II.

SPOKEN.—Elizabeth, Batavia to Rotterdam, 25 Jan., 26 S. 5 E.; Verena Collet, Macao to Havana, 23 Jan., 30 S. 10 E.; Bothwell Castle, Canton to New York, 31 Jan., 19 S. 4 E.; Lottie Warren, Manila to London, 18 Feb., 17 S. 5 E.; Johann Christoph, Foo-chow to Falmouth, 11 Dec. in Straits of Sunday; Daniel Draper, Boston to Batavia. 2 Jan. 22 S. 26 W.; Rhoderick Dhu, Shanghai to New York, 1 Jan. 49 (?) S. 108 E.; Robin Hood, Shanghai to London, Feb. 15, 40 N. 33 W.; Aquila, London to Ceylon, Feb. 26, 4 N. 24 W.; John Norman, Cardiff to Yokohama, Feb. 27, 5 N. 24 W.

CASUALTIES.—The Seringapatam, Wyeth, from Yokohama to London, put into St. Helena, February 12, with loss of mainmast, foretop-gallantmast, &c., having experienced a typhoon November 14, in lat. 18 N., long. 127 E., which lasted 36 hours. She left again on the 13th, under jury mainmast.

MISCELLANEOUS.—At St. Helena: Feb. 5, from Singapore, G. H. Wappous, Kammann, and sailed 6, for the Channel; 6, Burnswark, Bugstocke, and sailed for Liverpool; 7, From Yokohama, Anita, Askins, and sailed for New York; from Shanghai, George Becker, Bencke, and sailed for New York; 12, from Batavia, Doelwyk, Hoefman, and sailed 13 for Rotterdam; 17, from Bankok, Bessie, Jones, and sailed 18 for Queenstown or Falmouth. Off St. Helena: Feb. 8, from Singapore, Rosella.

At Table Bay: Jan. 18, from Macao, Aml Trehoult, Catte, and sailed 21 for Havana; from Sourabaya. B. D. Metcalf, Andersen, and sailed 20 for Rotterdam; from Macao, Verena Collet, Vigoureux, and sailed 21 for Havana; 20, Ottilia, Messel, Ange Gardien, Boju, and both sailed 23 for Havana; 22, Woizlava, Malchin, and sailed 25 for Hamburg; 27, from Newcastle, Suomi, Nordberg, and sailed 31 for Singapore; 31, from Sarawak, Wye, Houston, and sailed 1st Feb.; for London, Feb. 9; from Mainla, Fort George, Welch; 10, from Colombo, Dunphaile Castle, Fleck; 13, from Sourabaya, Webfoot, Sturrock, and sailed 14 for Amsterdam; from Macao, St. Julian, Nolte; 14, Emma, Mathilde, Behrens; from Hong Kong, Gitawa, Dugdale.

LAID ON.—At London: for Colombo, Spanker; for Hong Kong and Canton, Portland; for Singapore, Caldbeck.

THE LATE SECOND KING OF SIAM.—A ludicrous instance of the ignorance frequently displayed even by the leading journals on subjects connected with the Far East occurred in a late nuber of the *Illustrated London News*. That paper, in giving a memoir of the Second King of Siam, accompanied it with an authentic portrait, not of the subject of the memoir, but of the First King. We understand that the office of the Second King will now remain dormant, no other prince having been elevated to that dignity.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, MARCH 23.

The most important Parliamentary fact, before the Easter recess, was that Mr. Thorbecke entered again the House and took his seat for Groningen. He was much cheered both from the Opposition as well as from the Liberal benches. There was general enthusiasm amongst the members of Parliament, and every one was eager to congratulate him. The business of the last few days was, of course, not of much interest, the discussion about the cattle plague excepted. The Minister of the Home Department again asked a credit of 200,000f. for this purpose, and consequently every one had to say something thereabouts. But in spite of the measures taken by the Government, and all the talking of the members of Parliament, the plague spreads more and more.

The First Chamber of the States-General will meet on the 4th of April, to approve the Bills which are voted in the Second Chamber.

The financial condition of our trade here is very bad, and a crisis is feared. Several houses, especially in the tobacco trade, suspended payment; amongst the most important houses appear Bergsmans Brothers (with 250,000f.), and Terpstra (with 200,000f.). The failure of P. C. Starckenborg van Straten at Amsterdam was also made known to-day. The fact that the house of W. van Dorp (distillers) here had also stopped payment has created much sensation; it was one of the oldest and most respectable firms in that branch.

From the 14th to 19th of April a monster flower-show will be held at Amsterdam, in the Crystal Palace. The capital will be visited by the King in May next, when their Majesties intend making a further trip to Friesland.

COMMERCIAL.

COFFEE.—Since the auction of the Trading Company there is much demand for the numbers offered there, but holders decline to operate without a considerable advance. The private transactions include: 1,600 b. Java, ex Galilei; 2,040 b. do., ex Madura; 1,500 b. do., ex do., at 43c. to 44 c.; 1,200 b., ex Dageraad, at 43½c.; 431 b., ex Pudsey Dawson, at 48¾c. The market closes firm.

SUGAR (RAW).—The market was very firm in the contrary of the London market, were the tendency in prices is still downwards. The Trading Company's public sales of 70,300 baskets Java, which was held on the 21st inst., has for the brown and yellow qualities gone off at ¼ to ¾ guilder below November rates, but for the white (Nos. 16 to 20) at 1 guilder above November. Refined: With a good demand, since the results of the auction were known.

RICE.—The market remains without alteration, the demand for cleaned being moderate and for uncleaned limited. On the 27th will be offered in public sale 13,000 bags Kandanghauer Table, ex Malabar, imported via Havre, much or less damaged.

SPICES.—Prices nominal, and without much business doing. The quotations are, Nutmegs: No. 1, 84c. to 85c.; No. 2, 78c. to 79c. Mace: D, 102c.; E, 100c. Amboina Cloves: No. 2, 27½c.; but the latter cannot be sold under 28c., in consequence of the small quantities in first hands.

DRUGS.—Market unaltered. The Dutch Trading Company announced its public sale of 971 b. Japan Camphor on the 17th of April. Gummi Damar cannot be bought under 33 c.

Digitized by Google

INDIGO (JAVA).—The market is still firm, but a trifling business is doing by want of stock. Only 13 ch. were sold at previous rates. 100 Cer. Guatemala arrived, and will be brought shortly in the market.

BANCA TIN.—Before the auction of the Trading Company the market was rather firm. Several parcels, amounting to 3,000 slabs, were sold at 52¾f. to 53f., but since the auction the market is excited. The Trading Company sold the whole quantity, say 111,746 slabs, at 49¾f. to 52¼f., an average of 49f. 86c. There were so many foreign orders that every buyer will be shortened.

TEA.—The trade are inspecting the cargo ex Hydra, which, without any doubt, will be sold at full prices. The Company have announced the Java tea auction, at which are to be offered 1,577 ¾ and 857 ½-chests.

SAPANWOOD.—164 piculs are brought into the market at 8⅞f., but are still unsold.

HIDES.—Although the market continues relatively quiet, prices remain nearly on a par with former quotations. The sales are 227 p. Sourabaya Rinder ex Dageraad, at 42⅛ (3 to 3¼ no.); 3,170 p. Samarang ex Paul Johan (3¼ no.); 697 p. do. ex Kosmopoliet, 11 (3¾ to 4 no.); 3,251 p. ex Tuisko (4¾ to 5.)

CHANGE.—London: 3 mo., f.11. 71½; 2 mo., f.11.77½; short, f.11.89. Paris: 3 mo., f.46.57½; 2 mo., f.46.72½; short, f.47.05. Hambro: 3 mo., f.34.87½; 2 mo., 35; short, f.35.20. Bremen: 2 mo., f.189.40.

ARRIVALS.—March 16, at Hellevoet, from Batavia, Schwinge, Lichtstraal; 19, at Brouwershaven, from Batavia, Kosmopoliet I., Hendrick Ido Ambacht; from Tjilatjap, Emilie; 20, at Texel, from Banjoewangie, Abel Tasman, Prinses Amelie; 21, at Hellevoetsluis, from Batavia, Candati; 22, at Brouwershaven, from Batavia, Marie.

DEPARTURES.—March 20, from Brouwershaven, for Batavia, Kosmopoliet II.

LOADING AT ROTTERDAM.—Susanne, for Batavia and Sourabaya; Willem Poolman, Bestevaer, for Batavia and Samarang; Jacob, for Decima and Kanagawa; Krimpen ad. Lek, for Hong Kong (direct); Koning Willem III., for Macassar; Francina Willemina, for Melbourne (H.B.); Brouwershaven, for Padang; Vijf Vrienden, for Samarang; Henr. Gerar. Susanne, Petronella, for Singapore; Ellina, for Singapore and Hong Kong; Madura, for Sourabaya.

PASSENGERS INWARD.

From JAVA.—Per Lichtstraal: Messrs. H. Steffens and H. J. van Hoogenhuyze. Per Hendrik Ido Ambacht: Mrs. E. Schultz, Messrs. C. C. van Demelen and S. A. Quack.

LATEST.—Tin (Banca): The Dutch Trading Company held its auction on the 23rd, and offered 111,746 slabs, which were sold at 49¾f. to 52¼f., in average f.49.86. There were but a few orders for outward ports, but the orders here were of so much importance and so extensive that buyers obtained 20 pcs. less than they desired. The market closes firm, and an advance of ½f. is paid for 500 slabs. Arrack: 150 casks ex Walloroo, Batavia, were offered by inscription, but they were not sold; they are brought now into the market at 150f. Tea: The Trading Company and others will sell in auction on the 25th April 19,346 chests Java. Yesterday the auction of China tea ex Hydra took place, 6,579 chests were sold, and 385 chests were bought in. The Congou was paid with 91 to 139 c., the Souchong from 166 to 168. The quality was excellent for our market, so that prices were paid above valuation. A parcel of Java tea, ex Madura, consisting in 108 chests, was sold at very firm prices. 50 chests ordinary China Hysans Schin were paid with 38c. to 43c. The quotations of good ordinary China Congou is 95c. to 100c., and ditto Java 93c. to 95c. Rattans: The Trading Company sold by auction 120,700 bundles, which were paid with f.8.10 to f.16.80 for Banjermassing; f.13.40 for Padang; f.8.80 to f.11.20 for Koetie. Java Indigo: On the 1st and 3rd of May the Trading Company will sell in public auction 4,000 chests Java Indigo. The quotation now is 30c. higher than on the 1st of January for good quality. Coffee: To-day 1,500 bags Java ex Schwinge were sold at secret prices. Arrivals: March 22, at Texel from Java, Maria Elise; 23, Friedrich, Schwinge; 24, Grootmeester Nationaal; 24, at Brouwershaven from Batavia, Macassar, Vooruit; 25, at Texel from Banjoewangie, Koning Willem III.

RUSSIA, GERMANY, &c.

(FROM OUR CORRESPONDENT.)

HAMBURG, MARCH 23.

Great excitement has been created at St. Petersburg by the discovery of one of those mysterious links between the present and the past in the shape of a full-grown Mammoth, not petrified into rock, but imbedded in the ice, and in as perfect a state as when the animal died, though many centuries have elapsed since then, for the race has long been extinct. Hitherto, there have been but two specimens discovered, the first by our fellow-countryman Mr. Adams, who accompanied Count Golowkin on his mission to China in 1806 in the capacity of a *savant*, and on his return overland through Siberia heard by chance that an unknown animal of gigantic proportions had been discovered by some of the nomadic tribe of the Tungoose at the mouth of the Lena. He contrived to obtain the skeleton, though by no means in a perfect condition and sent it to St. Petersburg, where it is now exhibited in the Zoological Museum of the Imperial Academy of Sciences. When first discovered the meat of the animal was so well preserved by the ice, that when thawed it was greedily devoured by the wolves, wild dogs, and other beasts of prey. The second exemplar was found on the banks of the lake, near the great Bay, in 1839, into which the River Jenissei falls, and was brought to Moscow in 1849, and placed in the museum of that city.

As the truth of the new discovery has been fully confirmed the Emperor, by decree of the 12th of February, ordered a scientific expedition to be organised, to examine the body of the animal on the spot, and take measures to have it transported to St. Petersburg, though the distance is as great as from St. Petersburg to Madrid, as the exact locality is on the banks of the Bay of Tas or Tasow, lying west of the mouth of the Jenissei, and east of the meridian of Nova Zembla. Mr. Schmidt, M.A., of the University of St. Petersburg, is appointed to command the expedition. This gentleman is favourably known to the public by his geological researches in various parts, as well as by the travels he made in the Amoor country and his discoveries in the Island of Sachalin at the expense of the Russian Geographical Society a few years ago. He will be accompanied by a sufficient staff of assistants, among whom is one of the Preparators of Animals in the service of the Zoological Museum. The commission appointed by the Emperor to make all the arrangements for the expedition consists of the Academicians, Messrs. F. von Brandt, von Baer, G. P. von Helmersen, and L. J. von Schrenck, whose names alone are a sufficient guarantee that the instructions they have drawn up for the guidance of Mr. Schmidt will be as perfect as possible. According to the present arrangements the expedition will start on the 22nd inst., in order to travel by sledges as far as Dudinskoye, and thence continue their journey to the Tundra.

The first intelligence of this wonderful discovery was conveyed to Germany in a letter from the celebrated Arctic traveller and Academician Herr von Middendorf to Dr. Petermann of Gotha, and the latter gentleman considers this a proof of the mildness of the winter in the high latitudes, and thinks it a good prognostic for the German Arctic exploring expedition, which is to start as early in the spring as is commensurate with the safety of the ships and crews, without over hurrying the preparations.

The Oldenburg Eastern Ship Company, now in course of winding up and liquidating its affairs, is understood to have lost no less than 250,000 dollars during the few years of its existence. There is, however, sufficient left not only to pay off all outstanding claims, but to make a trifling return to the shareholders.

The Senate of Hamburg, in conjunction with the Senates of Lubeck and Bremen, have appointed Mr. James Milisch to be Hanseatic Consul at Tam-Sug, on the Island of Formosa.

Owing to the threatening aspect of the quarrel between Austria and Prussia, which, unless some peaceable solution be found, may easily lead to hostilities between those two countries, it is understood that the Austrian expedition to the Far East is given up for the present, and postponed till a more favourable conjuncture. In the meantime the corvette *Archduke Frederick*, Captain Wiplinger, that was to have taken part in it and rendezvoued with the *Schwartzenberg* at Singapore, left Kiel—where she has passed the winter—for Bremerhaven, at the mouth of the Weser, where she will be docked and thoroughly overhauled, so as to be prepared for any emergency. As Kiel is now the head quarters of the Prussian navy, it was nothing more than prudent to remove the corvette to a neutral port; for in the event of hostilities she would have been infallibly caught as in a trap, had she remained at Kiel.

COMMERCIAL.

COFFEE.—Market unaltered, firm at late advance. The large deliveries daily begin to tell on the stocks in warehouse, and have produced a lively demand, which justifies holders in requiring higher prices. The firm attitude of the market is further increased by the result of the sales in Holland, and favourable advices from the Brazils. Sales, 12,000 bags.

SUGAR.—Raw continues calm, and prices depressed, with but trifling demand. Of Refined 10,000 loaves were taken at last week's quotations.

RICE.—After a long period of calm a considerable demand has sprung up, and a good deal of business has been done at full prices. Our assortment of the most current descriptions is very poor, or the sales would have been of far more importance.

SPICE.—Cassia lignea is again in favour, but not higher; 4,000 chests were sold for delivery on arrival at previous rates. Ginger: Firm, but not higher, with a fair demand. A trifling improvement has taken place in the value of Mace, and Nutmegs command more attention. The opinion for Pepper is better. No alteration in Cloves.

SPELTER.—A calm has set in; the only sales recorded are 1,000 centners for spring delivery at 16.2, and 1,000 centners for July and August at 16.3. Prices are considered too high to answer in foreign markets; but as no forced sales were required, holders see no reason to lower their demands, and thus prices remain as last quoted.

SHIPPING.—Arrived: March 15, Asia from Foo-chow-Foo. Sailed: March 19, Carlota to Singapore.

THE HONG KONG MINT.

(To the Editor of the *London and China Telegraph.*)

SIR,—In the "China Overland Trade Report" of the 1st Feb. last is a letter signed "Colonist," condemnatory of the Hong Kong Mint establishment, and foretelling its failure. The arguments advanced by "Colonist" in support of his opinions appear to me to tell against him. The

Digitized by Google

very fact of the great variations, through scarcity or otherwise, in the value of the coin of authorised currency at present shows how advantageous it is to have, as currency, a coin at all times procurable at a fixed premium (viz. Mint charges), or its intrinsic value in bullion. When foreigners retired from Canton to Macao at the time of the Elliot war, the currency for foreign trade consisted of "chopped" pillar dollars; and, owing to the Chinese hoarding these, the foreign merchants were much inconvenienced to meet engagements contracted in that currency, although possessed of ample means in Sycee silver and Mexican dollars. Mexican dollars were then at a considerable discount, and their ever becoming the currency was looked upon as unlikely to take place. They have since become the currency, yet in times of scarcity the perfect coin obtains a considerable premium on the same coin when classed as a chopped dollar and current only by weight. If the Empire of Mexico become a reality the present republican dollar must of necessity cease to be coined; and unless a substitute be soon provided there will be a recurrence of former monetary disturbances. The British dollar will become the substitute, and, with a mint at Hong Kong, any possible demand for the coin can be met. The cost of placing the dollar in China for produce purchases, now a matter of uncertainty to those who do not wish to speculate in exchanges, will no no longer be an uncertain item in their calculation.

Although approving of the establishment of a mint, I cannot but express my regret that it has been decided to have the likeness of the reigning Sovereign on the coin. It would have been better to have had some device not requiring change on the accession of a new ruler—say the Royal arms, or the figure of "Justice blinded."—I am, Sir, your most obedient servant,

CURRENCY.

London, March 24, 1866.

AGRA AND MASTERMAN'S BANK (LIMITED).

On Saturday the 17th inst. the annual general meeting of the proprietors of this bank was held at the London Tavern, Bishopsgate-street. GEORGE GORDON MACPHERSON, Esq., the chairman of the board of directors, presided.

Mr. MACKINTOSH BALFOUR (the general manager) read the notice convening the meeting. The report of the directors (which appeared in our last) was taken as read.

The CHAIRMAN said: I shall, with your permission, and as is usual on such occasions, offer some observations on the management of the affairs of this bank during the past year, previously to moving for the adoption of the report. In the first place, I would remark that, although the dividend earned and paid is not so large as that of last year, nor as I fear so large as some of our friends expected, still it cannot but be considered, in what I would term a legitimate banking point of view, a handsome one; and I think that the shareholders have good reason to be satisfied with the amount resulting from the operations of a year which has proved so disastrous to many commercial establishments, both at home and abroad, occasioning at times, as you may well imagine, considerable anxiety on the part of your directors. (Hear, hear.) A year, too, which has been by no means propitious for banking in, and more especially for carrying on exchange transactions with, those countries with which we are most intimately connected; owing not so much to the dearness of money ruling on this side (which of course had some effect), but to the constant fluctuations in its value, evinced by the fact that the Bank of England rate has been altered no less than 16 times during the period embraced in this report, and now under review. (Hear, hear.) It will be recollected that at the last general meeting I took occasion to refer to the then very unsatisfactory and unsettled state of monetary and commercial affairs in almost every direction, but more particularly in China and Bombay. I stated on that occasion that we had no reason to anticipate any loss from our transactions in China. Contrary, however, to our anticipations, firms of high position and long standing, in whom we had every confidence, collapsed; our instructions in some instances were not attended to, and loss accrued. To add to this unpleasant state of affairs, we had the misfortune to lose our manager, Mr. Henry Noble, at Hong Kong, a gentleman highly esteemed by us, who was drowned in a voyage to Foochow, undertaken for the benefit of his health. This melancholy news was communicated without delay by telegram to Calcutta, and fortunately Mr. Barnes, our inspector of branches, who was then at Bombay on his way home to report, at once, with that promptitude and decision which he has always evinced in the service of the bank, proceeded to Hong Kong, and there assumed the management, which he retained until satisfactory arrangements were made for the conduct of all our affairs in China. We trust that the ordeal through which China has passed will lead to a sound description of business, where the field is large, and ought, under good management, to prove remunerative. (Hear, hear.)

In Bombay, on the other hand, there had been an extent of speculation, or, more properly speaking, gambling, almost unprecedented, in schemes for the reclamation of land from the sea, and in fact for every conceivable purpose, which soon terminated, as you were led to expect, in a total collapse and panic, reducing many who but a short time previously considered themselves possessed of great wealth to utter ruin and beggary. I mentioned at the last meeting that this bank had not only kept entirely aloof from such business, but that, owing to the very serious aspect of things, your directors had long before the crisis arrived deemed it prudent to curtail local business in that presidency, and to limit the shipments of gold from Australia—precautions, as events have proved, most salutary; and so zealously were their instructions responded to by Mr. Ilbery, the manager on the spot, that the losses sustained by the bank during that eventful period were comparatively very small. (Hear, hear.) The position of our manager at the time alluded to was a most difficult one, requiring not merely a thorough knowledge of his business, which he eminently possessed, but great firmness of character and tact, inasmuch as, having large funds at the time alluded to under his control, he was beset on all sides for assistance—and many of us know how difficult it becomes to resist such appeals in a small community—he, however, managed to steer his vessel, almost uninjured, as I have stated, through all the shoals and breakers that surrounded him, for which he has had the cordial thanks of your directors. (Cheers.) In Calcutta and other parts where we have ranches there has been no excessive speculation, but the markets have been influenced by the state of the times, and interest on money has for many months during the year ruled unusually low—a state of things which has prevailed over the most of the East; consequently very large profits could scarcely be expected, but on the whole we have no reason to complain of our returns.

After long and careful consideration on the part of the directors, we opened, as stated in the report, a branch at Paris, our object being to facilitate transactions between the continent of Europe and the East, which had long been steadily increasing; and the working of this branch since its establishment fully equals our expectations. (Hear, hear.) It will be gratifying to learn that the branch has already been appointed the agents of several banking establishments. (Hear, hear.) You will observe from our balance-sheet that our property account continues to increase; we have purchased, as mentioned in the report, freehold premises in Paris. There, as elsewhere, the directors have recognised the very great advantages the bank derives from being its own landlord, and that property, you will be glad to learn, stands in our books at a much lower figure than could readily be realised for it, wherever it is situate. (Hear, hear.) As regards the London or home business, it is unnecessary for me to say much about the amalgamation, which has now become an old story, further than that we continue to get on most comfortably in every respect. One or more of the partners of the old firm are regularly to be found in the bank—(hear, hear)—where they have frequently to confer with some of their old customers, who as yet do not, strange to say, quite recognise the superiority of a joint-stock over a private bank in transacting their business. (Hear, hear, and laughter.) The balance-sheet shows that our progress has been satisfactory as regards the increase of deposits. The increase of our connections cannot be so easily measured by figures, but we may fairly hope that the results will more prominently appear hereafter. (Hear, hear.) Before closing it affords me pleasure to tell you that our business at home and with our branches during the current year has been such as to give fair promise for the rest of the year. (Hear, hear.) No other point suggests itself to me; but I shall be happy to answer any question, or furnish any information that may be desired. I shall conclude by moving, that the report and accounts now submitted to the meeting, and previously circulated to the shareholders in Europe, be adopted.

Mr. F. MILDRED (deputy-chairman) said, after the full and lucid statement of the worthy chairman, it would ill become him to take up the time of the meeting, and therefore he would content himself by seconding the adoption of the report and accounts.

Mr. MORLAND said he could not but congratulate his co-proprietors upon the result of the past year's operations, and no one, he was sure, could say that, under the circumstances, the dividend that had been earned was otherwise than highly satisfactory. (Hear, hear.) There were, however, two points upon which he should like some little information, because he felt assured that the replies to his questions would be perfectly satisfactory. The first question he would ask was, whether the bank would realise from the building purchased in Paris anything in the shape of rent; and the second was, what connection the bank had with the Marseilles Land Company?

The CHAIRMAN said the directors considered themselves most fortunate in having secured the premises in Paris, because from all the inquiries made, extending over a period of fully six months, nothing so eligible was met with. The directors found that the demand in the shape of rent for buildings such as would suit this bank was something fabulous; they, therefore, determined to make this purchase, and they fully expect—in fact they know—that that portion of the building not required for the purposes of the bank could be rented upon such terms as would enable them to sit in that splendid locality for less than one-fourth of the amount for which they could have rented a similar office in an equally good site. (Hear, hear.) As regarded the Marseilles Land Company, he might state that when he first saw the prospectus—and he only did so after publication—he was by no means pleased with the manner in which the bank was made to appear mixed up with the financial company. The bank was simply one of the bankers of the Marseilles Land Company, and did not hold the smallest interest in it. He might add that the account was such that any bank in London would be glad to have. (Hear, hear.)

A SHAREHOLDER inquired the amount of loss incurred in Bombay and China, and also the amount of profit realised by the Paris branch.

Mr. MORLAND, as a proprietor, protested against those questions being answered, for the secrets of the bank must never be divulged. (Hear, hear.)

The CHAIRMAN thought it was perfectly sufficient for the directors to state—as they had done in their report—that all losses had been provided for, and that the accounts had been audited by gentlemen whose position was a guarantee that everything was implicitly correct. (Hear, hear.) As he had said upon previous occasions, their audit was conducted altogether differently from general audits. Theirs was a continuous audit, and the auditors had at all times every access to all the books. Their visits were frequent and long, and the manner in which they devoted themselves to their duties was beyond all praise. (Hear, hear.)

The motion adopting the report and accounts was then put and carried unanimously.

Upon the proposition of Mr. BRACKEN, seconded by Sir GEORGE POLLOCK, G.C.B., and K.S.I., the retiring directors were re-elected. Upon the proposition of Mr. MORLAND, seconded by Mr. W. T. FAWCETT, the auditors were re-appointed. Upon the proposition of Mr. P. C. FRENCH, seconded by Colonel MACGEORGE, votes of thanks were passed to the board of directors, to the general manager, to the London managers, to the inspector, and to the local committees and managers of the branches, for their able and satisfactory conduct of the bank's affairs for the past year, and to the auditors for their efficient supervision of the accounts.

Mr. G. HAY DONALDSON esteemed it a privilege to acknowledge the compliment which had been paid to the directors and management. There could be no greater encouragement to those entrusted with the conduct of the bank's affairs than to feel that they possessed the entire confidence of the shareholders. They had always done their utmost to promote the best interests of the bank, and it would be their aim to continue to do so. The proceedings closed with a vote of thanks to the chairman.

—o—

PROPOSED TELEGRAPH ROUTE TO CHINA.

"ON every occasion that projected lines of railway and telegraph to the Far East have been brought before the public, the practicability of the proposed routes has always been a matter more or less of conjecture; and until some survey be taken, no matter how general in its character so long as it is accomplished by competent parties, all such schemes will remain mere paper projects. It is too much the fashion for "fireside travellers" to sit at home and draw lines across a map, pointing out the shortest cuts from one place to another, with the most superficial knowledge of the intervening country—as if by a stroke of the pen they could overcome all engineering difficulties. Even those who are resident in China, or who have visited the country for railway or telegraph purposes, have not based their plans upon trial sections or examination of the geographical obstacles to be overcome; but have contented themselves with loose statements, obtained chiefly by hearsay from native sources, which are not to be relied on. Hence the public have shown no desire to support, or the Government to encourage, the proposed routes of communication between India and China put forward by Sir MACDONALD STEPHENSON from Calcutta, and Captain SPRYE by way of Rangoon. In like manner the submarine route proposed by the Anglo-Australian and China Telegraph Company, *via* Singapore, has met with no encouragement on account of the insufficient and uncertain data on which it is supported. As far, therefore, as any actual survey is concerned, or fresh geographical data is before the public, no advance has been made to shape out a more feasible scheme than those referred to. Yet the question of direct telegraph communication between China and England by way of India is once more the topic of the day amonst the colonists and the press of Hong Kong.

In the *China Mail* the subject is not only discussed in an impartial manner regarding the projects already on foot, but a new route is proposed that demands the attention and consideration of all who have an interest in China and India. Instead of following the coast line, or traversing the southern provinces, the writer recommends a line through Central India and Tibet, into Sze-chuen and the other central provinces to Hankow. Judging this proposed route by the same standard as the others, on the want of engineering information, it might fairly be consigned to the limbo of paper projects. But the author of the scheme bases its probable success on political considerations, which in this case are of more importance than a mere geographical foundation. On this head he discusses the proposed lines through Burmese territory, assuming that they could be protected by the King of that country to the boundary of his dominions, and asks, "What is likely to "be the further course the electric line must pursue? "Across the frontier from the Burmese forests stretch "the forests of Yun-nan, the wildest and least known region "of China Proper;' a land of dense jungle and rugged moun- "tains, inhabited by wild tribes owning scarcely a nominal allegi- "ance to the Emperor of CHINA, and devastated for years past in "its more civilised departmeurts towads the north and east by "chronic insurrections, which the central Government of the "Empire has scarcely so much as endeavoured to repress. "When the distrust of a Government at once feeble and obsti- "nate is to be counted on, together with the intractability of "mountain tribes and the lawlessness of half-civilised "marauders, it must be confessed that belief in the completion "and maintenance of the enterprise requires both a sanguine "disposition and a considerable degree of happy ignorance. "For our own part, we refrain equally from professing such a "belief, and from accepting the likelihood of any trade in the "direction of Yun-nan, for many years to come, of sufficient "value to weigh with our Government in establishing official "posts at such places on the frontier as the semi-fabulous "Esmok, and the other cities respecting which enterprising but "ill-informed Chambers of Commerce have of late years im- "portuned the Foreign-office."

Having shown the political and social difficulties that in all probability would attend the line through the turbulent districts of Yun-nan, the writer goes on to show the favourable condition of the central route. And it is worthy of remark that, appearing as it does in a Hong Kong journal representing the interests of the southern ports in China, it is of more than ordinary weight, and evincing a wide and liberal policy. "Our view, then, is that marine telegraphy being yet too little "developed to command perfect confidence, and the land line "*via* Yun-nan being, as we consider, thoroughly impracticable, "a third means of transit should be sought for, and may be "found in a route traversing Nepaul, Tibet, and the Chinese "province of Sze-chuen, arriving eventually at Hankow as a "central station for the whole Empire. It is not at random "that we have selected Nepaul as the region through which the "telegrapic line on leaving British India should first be carried. "The amicable relations existing between the present ruler of "that State and the British Government in India is universally "known, but the public may not be equally familiar with the "fact that the same JUNG BAHADOOR is also a direct tributary "of the Emperor of CHINA, and subject, nominally at least, to "the control of the Chinese High Commissioners resident at "Tibet. So lately as the 29th November last, indeed, "the *Peking Gazette* contained a rescript addressed to one of "these functionaries, giving orders in reply to a memorial by "the Nepaulese ruler respecting the tribute due in 1867; and "so suggestive a fact as this should not be lost sight of." Then, as regards the authorities of Tibet. "The Dalai Lamas, "whose spiritual influence extends from the gates of Peking to "the borders of Bengal, have on more than one occasion mani- "fested a friendly spirit towards their British neighbours; and, "in any case, with a Chinese High Commissioner at Lassa "specially instructed by his Government to advance the nego- "tiation, we cannot conceive much difficulty in enlisting the "authority of the Budhist Pope on the side of the elec- "tricians."

Under these circumstances the protection of the posts and wire might be maintained to the frontier of Sze-chuen, where it would pass through a "comparatively tranquil and sub- "missive region, under the authority of the central Govern- "ment." "The *primum mobile* to be acquired, ere the "enterprise can in anywise be commenced, whether through "Yun-nan or by any other route, is undoubtedly the consent "and co-operation of the Chinese Government." In this opinion we fully concur. Until their sanction is obtained, or a decided expression of their views upon the subject, it is just so much time wasted in planning schemes that are merely futile. Action on this point should be taken by the residents in China memorialising the British Minister at Peking to bring the subject before Prince KUNG. We are afraid, however, that the most influential merchants would not stir themselves in the matter, where it would be against their interests to obtain direct telegraphic information *pro bono publico*. The old leaven of monopolising special information for speculative purposes is not yet eradicated, and we fear that the old firms will give the "cold "shoulder" to any project, railway or telegraph, that will interfere with their self-aggrandisement. This, coupled with the jealousy of the Chinese Provincial Governments at any foreign innovation that would bring them nearer the central authorities, will maintain the barrier of exclusiveness for some time to come. Meanwhile it would be advisable that the mercantile community in India trading with China brought the question before Government, who might possibly entertain it favourably. It is to be regretted that Sir FREDERICK BRUCE did not permit Captain BLAKISTON and Mr. MARQUIS to proceed to explore the route as they proposed in 1862.

THE GARRISON AT HONG KONG.

OWING to the repeated efforts of Colonel NORTH, the deplorable condition of the Hong Kong garrison has at length come to be recognised as a question of great public importance. By reference to our Parliamentary Intelligence it will be seen that on the 20th instant the honourable and gallant colonel moved for a select committee to inquire into the late mortality among the troops there, the causes which led to it, and the conduct of those departments whose duty it is to administer to their wants. The motion was of course assented to by the Government; indeed no possible excuse could have been found for refusing to accede to it. As Colonel NORTH justly said, it was no party question—but one which equally enlisted the sympathies of members on either side of the House; and the Committee having been granted without opposition we have every reason to hope that the matter will have a thorough and searching investigation. Unfortunately, Colonel NORTH'S motion came on at a very late hour, when the House was dwindling away, and a general desire was exhibited to terminate the sitting. Had it been otherwise, the debate would probably have been better sustained and more light thrown on the subject; as it is however we must wait patiently the result of the inquiry, which necessarily involves some delay. In the meantime, it is worthy of remark that the Marquis of HARTINGTON distinctly states that no intention ever existed on the part of the War-office to replace the native troops who served in Hong Kong last year by a British regiment. With regard to the truth of this assertion we must leave our readers to form their own opinions; for ourselves we are inclined to doubt its accuracy. We most distinctly believe that it was intended by the War-office to withdraw all native troops, as they really did, in order to save the Indian batta allowances; and that what followed has made them anxious to ignore this proceeding.

OUR RELATIONS WITH JAPAN.

IN our last issue we had the satisfaction of publishing the official correspondence respecting the ratification of our treaties with Japan, which we consider must set at rest the doubts raised by some persons interested in the Japan trade. True, the ratification has been followed by rumours of the immolation of the officials connected with the transactions, but this is simply a sample of what we have been long accustomed to in China. True or not true, it is next to impossible to ascertain. In one of the despatches of Sir HARRY PARKES it will have been seen that the Tycoon distinctly declines to avail of Earl RUSSELL'S alternative of opening new ports in lieu of the payment of the remaining instalments of the indemnity, and in confirmation of this we have now the intelligence that the second quarterly instalment of the indemnity, amounting to $500,000, has been paid at Yokohama, leaving four payments of similar amount to complete the full sum of $3,000,000 stipulated for in the Simonoseki convention. We may add, that the whole complexion of our official relations with Japan is in a highly favourable condition.

REINFORCEMENTS FOR JAPAN.

NOTWITHSTANDING the fatal experience which the War-office has gained during the past year in landing troops in Hong Kong during the hot season, we find that they are about to perpetuate it by despatching, per *Gresham*, to leave on the 2nd April, a detachment of the 9th Regiment. This vessel will, according to the usual passage at this season of the year, arrive at Hong Kong about the 20th July, just the very hottest time of the year, and, in fact, just in time to take a share of the fever, dysentery, and other ills which prevail throughout July and August, culminating in the burial-ground which is designated as the "Happy Valley." Why these troops, which are intended for service in Japan, should be sent to Hong Kong at all while they could be sent by one of the vessels now loading for Yokohama direct, is a problem that we cannot solve. This we do know, that the cost will be very materially increased.

PIRACY IN CHINA.

OUR merchants, shipowners, and underwriters will be glad to know that we are authorised to state, that the subject of piracy in China has been seriously considered by Her Majesty's Government, and with a view to obtaining the immediate consideration of the Chinese Government, a combined representation has been made by all the Treaty Powers on the subject. We trust therefore shortly to see that steps have been organised for the suppression of this now long-felt curse. Considering that we have been instrumental in procuring the collection and due payment into the Chinese Treasury of the duties, we think a distinct claim is established that our commerce should be protected from the depredations of these mosquitoes of the sea. With regard to Hong Kong, we observe that cases of piracy on board of vessels actually in the harbour are reported, and it certainly weakens our claim on the Chinese Government that we permit such under our very noses. We hold it to be distinctly our duty to keep Hong Kong and its immediate neighbourhood clear, and we trust soon to hear of the completion of arrangements to this end. We feel convinced that nothing short of having a gunboat or two at the disposal of the local Government will meet the case—in addition to an improved police force—and we are glad to know that Mr. Cardwell, the Secretary of State has rendered the colony most valuable aid in carrying out this project by procuring the consent of Her Majesty's Government to permit one-half of the military contributions, viz., £10,000, to be appropriated towards this object. The carrying out of this matter and relieving our navy from a repetition of the errors they have committed, through the overzeal of the officers in the service, is well suited to engage the attention of Sir Richard MacDonnell on his arrival. A reference to our correspondent's letter will fully confirm the importance of this subject.

THE SURRENDER OF THE ALLEGED MO-WANG.

THE despatch of Mr. MERCER, the Acting-Governor of Hong Kong, in reply to the request of the SECRETARY of STATE as to the allegation made against him in the *Daily Press*, and brought to the notice of Government by Colonel SYKES, has now been published, and according to this it seems quite clear that the man surrendered was one HO-YU-TEEN, charged with the robbery of a Chinese boat. The identification of Chinese to the satisfaction of the European mind is always a most difficult matter, but as we have stated in a previous issue we think Mr. MERCER used every precaution to avoid being imposed on by the Chinese, and we quite agree with the SECRETARY of STATE in acquitting him of any blame in the matter. The following is an extract from Mr. MERCER'S despatch:—

In a reduced and intelligible form, then, the charges against me are two: that the man was wrongfully surrendered, and that I surrendered him knowing him to be the Mo-Wang, a Taiping chief.

The above papers will, I think, show that Ho-yu-teen, the criminal in question, was not wrongfully surrendered, and that every legal and other precaution was taken against the possible surrender of an innocent man.

As to his being the Mo-Wang, or a Taiping chief, I beg to point out that his counsel (for he was defended by an able barrister), Mr. Pollard, Q.C., endeavoured to elicit this in cross-examination, and failed. I also enclose extract from a news-sheet published in Canton, in which it is stated confidently that the said Mo-Wang was killed before Soochow on the 29th November, 1863.

To recapitulate, the real facts are briefly these:—On the 22nd April last the Viceroy of the Two Kwang made formal demand, under Treaty, for the rendition of Ho-yu-teen, charged with robbery from a boat on a certain river in Chinese territory, and within Chinese jurisdiction.

The accused was arrested, and in due form, as laid down by Ordinance, was taken before the sitting magistrate.

At the same time, as the Canton authorities had recently complained of the discharge of Chinese subjects similarly demanded, I requested the Attorney-General to watch the case, the prisoner being defended by counsel.

Ho-yu-teen was committed on the charge, and, as the Attorney-General shows, there was no alternative but to hand him over to the officers of his own Government.

This was done, and the British Consul properly notified.

There the action and control of this Government ceased, and I submit that throughout the proceedings every care was taken and all due caution observed.

The following is the despatch of the SECRETARY of STATE:—

It is shown by the explanation now before me, that a man carrying on business in Hong Kong, under the name of How Hoi Low, was claimed by the Chinese Government in virtue of the Treaty of Tien-tsin as having committed robberies in China; that he was brought before the police magistrate in pursuance of the Ordinance, No. 2, of 1852.

The charge rested on the evidence of two witnesses. How Hoi Low was defended by counsel, and although a variety of technical objections were raised, it does not appear to have been alleged that he was a political refugee, still less that he was the Taiping Mo-Wang, as now stated. If the statements which have been laid before Her Majesty's Government respecting the mode in which this man was put to death are at all true, it must be a matter of great regret that he was delivered to the Chinese Government, and as you are aware, fresh instructions have been issued which will prevent such an occurrence hereafter. But having reference to the terms of the treaty under which Mr. Mercer was acting, I am satisfied, after full consideration, that he adopted every precaution in his power to carry the provisions of the Treaty of Extradition into proper execution. The man was not charged with piracy, which would be justifiable at Hong Kong, but with robbery, which brought him within the terms of the treaty. The case was properly investigated, and there was abundant evidence to support the decision of the magistrate.

I have, therefore, much pleasure in stating that no blame attaches to Mr. Mercer in this matter whilst he was administering the Government of Hong Kong.

CEYLON.

THE steadiness of purpose with which the resources of Ceylon are being developed is well calculated to excite the attention and interest of other British communities, if only for the energising strength of character contributing to the force of the impulsion. In the announced policy and projects of the Government, such as the reorganization of the Works Department, in municipal action and well-considered local combination, we have an earnestness of the rapidity with which past inertia is being thrown off. Every impediment that unduly hampers political action, will, in like manner, be counted with the things that were. Mr. GEORGE WALL's representations when in England are known to have had an excellent effect in stimulating official appreciation of the British community in Ceylon, and we attribute to the manly course he adopted no small portion of that urbanity which marked Mr. CARDWELL's reception of the late deputation of the Ceylon League. The advices brought by the last mail from Ceylon as to the prospects of the coffee crop have been widely canvassed; and the differences of opinion here very fairly reflect those of Colombo. Whatever the proportions of the crop, confidence is entertained that not only will present rates maintain their buoyancy, but that even in face of large arrivals from other quarters prices will exhibit an upward tendency. The supply on hand in the principal continental ports on the 1st inst. was actually 5,000 tons less than at the same time in 1865, notwithstanding our large export European trade. As to augmenting continental consumption, the increasing preference for Ceylon descriptions is observable, and this added to the demand from the United States, and the curtailment of our supplies through direct shipment from Ceylon to that country, Australia and elsewhere, renders it probable that even were the present Ceylon crop reported higher, no apparent effect would be produced on our quoted rates. The anticipation of a much increased foreign consumption is confirmed by the advance made on previous prices at the Dutch sales on the 14th inst. It is worth noting that the stock in Holland on the 1st inst. was but two-thirds of the amount held at the corresponding period of 1865. Even with a superabundant supply of East India descriptions, it is little likely that prices would give way to anything like the extent witnessed in April of last year. Mindful of the experience of that year, which witnessed an advance of 5s. per cent. on many descriptions of coffee in November, and this in view of a rising Bank-rate, holders will be inclined to more firmness throughout the current year, putting greater trust in the export trade; and as a result we are likely to have more steady prices. We have hopes that the increased care and skill applied in Ceylon to the manufacture will induce for 1866 higher average rates than in 1865, both for native and plantation.

THE BRINDISI ROUTE.

WE noticed in our last the convenience afforded by the Italian railway companies connected with the Brindisi route. We now find that our Government has at last consented to despatch an officer to report on the above line with a view to the conveyance of the India and China mails, as it involves a saving of nearly three days, and on the completion of the rail over Mont Cenis, as also through a tunnel, the time will be further shortened. Captain Tyler, R.E., one of the inspectors of the Board of Trade, has been appointed to proceed on this mission. It is also announced that the French propose to shorten their route between Marseilles and London by about 200 miles by the formation of a direct line from Marseilles to Calais.

THE JAPANESE EXCHANGE QUESTION.

The appended letter calls attention to statements made by the Hong Kong correspondent of the *Daily Telegraph* regarding the Exchange privileges allowed to officials in Japan. The inferences deduced by the writer are palpable enough, and exactly coincide with those we have already put forward. The letter comes very opportunely as corroborative evidence of the truth of the testimony brought forward by "ICHIBOU," and of our own remarks on the subject. The report of Mr. Arbuthnot, promised by Mr. Gladstone in reply to Lord Stanley's motion, has not yet been published.

(To the Editor of *The London and China Telegraph.*)

SIR,—It is a somewhat curious coincidence that at the very time I was addressing you here on the subject of the Ichibou exchanges to officers in H.B.M.'s service stationed or residing in Japan, the Hong Kong correspondent of the *Daily Telegraph* should have been writing to his principals on the same subject, with the same line of argument, and with the same end in view. He writes thus on February 1st (see *Daily Telegraph* this date under the head of "The Garrison at Hong Kong"):—

"Generals and admirals in this part of the world have a great weakness for going to Japan, and of course the salubrity of the climate is enough to account for the propensity; but it is unfortunate that the arrangements of the Japanese Custom House should be calculated to throw suspicion on motives which may often be perfectly innocent. The Japanese have established a scale at the Custom House, in accordance with which they give native currency in exchange for dollars at the rate fixed by the treaty to Europeans of the naval, military, and diplomatic services. The rate is unfavourable to the Japanese, so much so that a double exchange transaction gives the European a profit of about 30 or 40 per cent. On the part of the mercantile community the claim to exchange at the treaty rate has been waived by the consuls; but the Japanese have, as I say, established a scale in accordance with which they grant par exchange to officials in proportion to their rank. The Oriental idea is, of course, to bribe the governing class; but, although I do not wish to hint that English officers and consuls are influenced in their dealings with the Japanese by the privilege, nevertheless they do take advantage of it to the utmost limit of the right conceded. Generals and admirals do not think it wrong to benefit by the prevailing custom, but they regularly pass their pay through the Yokohama Custom House when in Japan, and turn every three hundred dollars into four hundred by this simple process. To me it seems injurious to our moral influence on the Chinese and Japanese Governments; but some people defend the practice on the ground that the rate is that fixed by the treaty, and that the abandonment of it by us—so far as merchants are concerned—was a concession on our part. In reality, it could not have been kept up. The Japanese Government must have been ruined, and the concession was dictated by the necessities of trade. While the old rate is continued to the official class, the native Government is the loser, and of course this loss is only accepted because it is under one of two impressions—either it thinks that the British ships-of-war would be applied to the treasury if the applications of officers were refused, or that by bribing them voluntarily it will gain some advantage at the expense of the mercantile community. Anyway, the officers and consuls cannot, so long as the system goes on, be regarded by the Japanese with much personal respect."

It is curious, too, that this support of the statements which you have published should appear in the same columns which report the assent of the Secretary at War to Colonel North's motion for a committee of inquiry, and his acknowledgment that "undoubtedly both the House and the country, and more especially the friends of those who have perished, have the fullest right to demand investigation and inquiry as to whether the causes of that mortality resulted from the action of the Government or that of the commanders of the troops."—Yours very truly,

March 21, 1866. ICHIBOU.

IMPERIAL BANK OF CHINA—APPEAL CASE.—This appeal from the judgment of Lord Romilly, the Master of the Rolls, was decided by the Lords Justices on the 24th inst. The Master of the Rolls had dismissed with costs the petition of Mr. R. Montgomery Martin and another for winding up the company. Lord Chief Justice Turner now delivered his judgment—that the petitioners be authorised to use the name of the Imperial Bank of China against the Bank of Hindustan for the recovery of their claims. The petitioners and other dissentients are holders of 1,045 shares on which £5 per share has been paid.

THE CONSUL AT MANILA.—According to a semi-official organ Mr. Randall Callander will not proceed to Manila, but to Stockholm, and Mr. Harry Rainals has been appointed to Manila. The antecedents of this gentleman are—Admiralty Agent for the British fleet in the Baltic from 1854 to 1856; was appointed Vice-Consul at Copenhagen, Feb. 16, 1859; was employed on special service for the purpose of instituting inquiries into and reporting upon the state of affairs in the Duchy of Schleswig, in December 1860 and January 1861; and was appointed Consul at the Danish Island of St. Croix, in the West Indies, June 18, 1863.

Literature.

The Colonial Office List for 1866. By W. ROBINSON and A. N. BIRCH, of the Colonial Office. Harrison, Pall Mall. The fifth annual publication of this most useful hand book is now before us, with a preface dated the 20th December. We can heartily reiterate our former commendation of the manner and spirit in which the compilers have carried out the arduous and toilsome task they set before themselves. The errors we noticed in the volume for 1865 have all been rectified, and a continuation of similar watchfulness and painstaking care will at last render this List accurate and complete as anything of the kind can hope to attain to. The plan of the book is excellent and the arrangement all that can be wished; but a stricter editorial supervision is yet requisite to get rid of some remaining faults. Entries of the kind following are rather too numerous:—

Maycock, Colonel J. G.—Adjutant-General of Militia; appointed May, 1861. Is a Captain 1st Batt. 14th Foot.

It will be observed that the locality—probably one of the West India islands—in which Colonel Maycock holds his appointment, is omitted. The Cape of Good Hope seems to have received a very insufficient share of attention, Mr. Denyssen still appears in the list of the House of Assembly, though he vacated his seat early in 1865, on being appointed one of the Judges of the newly-formed Court for the Eastern District. It is clear that to render the book useful to the

Digitized by Google

extent contemplated by the authors, every page should be withheld from the press to the latest possible moment. Mr. Melmoth Osborn was gazetted on the 9th November last as Resident Magistrate for Natal; but, though his name is duly registered in the alphabetical list at the end of the book, it does not appear under the head of "Natal" in the first portion of the volume. We could point out other oversights of the same class, but have contented ourselves with adverting to two or three only, which are just enough to stimulate the evidently zealous editors to increased vigilance, and to show those interested in the colonies how full to minuteness is the information within their reach, and how comparatively few are the deficiencies to be detected after a severe search. We observe that important additions have been made to a most useful and indeed invaluable portion of the book, that which, under the geographical and historical account of each, gives a clear statement of the legal constitution of every colony. In times like these, when the constitutional question becomes of absorbing interest, as in those two great dependencies of the British Crown, Victoria and Jamaica, the information afforded by the List is peculiarly acceptable, and indeed is nowhere else to be met with in a handy and collected form. The various Colonial Governments should make it a point of duty to supply the compilers with regular announcements of all changes that affect the immense mass of appointments and senatorial and official positions so laboriously catalogued in this work, for the authors are fairly entitled to every aid and assistance that can be afforded them in making the COLONIAL-OFFICE LIST a perfect and unimpeachable record.

A work that will interest political circles, and probably be honoured by frequent reference and quotation, is Mr. A. G. Stapleton's *Intervention or Non-Intervention*, a criticism on the Foreign Policy of Great Britain from 1790 to 1865. If we are not mistaken, the author was in his earlier days Private Secretary to the illustrious Canning, and is known to have been all his life long a thoughtful politician. His indictment, therefore, against the system pursued for more than a quarter of a century by the various Ministers who have directed the course of Britain in her European and Asiatic relations is eminently worthy of perusal and reflection. Each reader must form for himself an estimate of the force of the writer's argument, which he will probably do according to his own preconceived sentiments. It will be enough here to give the author's conclusions, which will serve to indicate with some definiteness his train of reasoning. They are as follows:—"(1.) That the reign of force without any real moral antagonism is now established throughout all the four quarters of the globe. (2.) That Great Britain is no longer honoured and trusted as she was—her statesmen having lost that moral influence which, quite as much as physical fear, serves to restrain unscrupulous Governments in a career of wrong-doing."—Belonging to the same grave political class is Dr. Herbert Broom's *Constitutional Law*, which will be found of great service for consultation by persons holding official positions abroad. It is not a mere laudatory comment on English institutions, but a thoroughly practical work, being a selection from the Reports of the "leading cases," by which the doctrines of our constitutional law were established; or, which, by attracting the attention of Parliament to the point discussed, led to a settlement of the question in dispute. A note is added to each case, in which its significance is explained. The arrangement is simple, so that an unprofessional person may easily refer to any point on which information is desired.—Mr. A. M'Neil-Caird's *Mary Stuart, her Guilt or Innocence*, adds another to the innumerable dissertations that have been written in defence or accusation of the unfortunate Queen of Scots. However much the stern moralist and philosopher may differ from Mr. Caird's partiality towards the subject of his book, he will yet have to admit that it is an agreeable and useful *resume* of her history, and that of the "dour" and ruthless men among whom she lived, and sinned, and suffered.—Mr. Farley's *Turkey* is a sound and solid work on the actual state of the Ottoman Empire. He is no new writer on the topic, has benefited by a personal experience of the country, and has had access to official papers; so that he has produced a book, containing an amount of authoritative *data* nowhere else to be met with in so handy a form.

In Fiction, Mr. Mark Lemon has come out with a clever and interesting tale called *Falkner Lyle*—well-written, and with a healthy tone throughout. It professes to be a Story of Two Wives, and is altogether so good that we can heartily recommend it to general perusal.—In *Land at Last* Mr. Yates gives us new characters, new positions and a new plot We are introduced to the London Bohemia of painters and picture-dealers, and many of his portraits are so sharply drawn as almost to justify the assertion that they are individual sketches from the life. The feminine delineations in the volumes possess the merit always to be found in those emanating from Mr. Yates's studio; though we must object to the character of Margaret Dacre as needlessly and inconsistently wicked. However, the ordinary novel-reader will not trouble himself to investigate the reasons for her eccentric course, but will find himself carried swiftly forward by the vigour of the style and the highly dramatic nature of the various scenes, till he arrives at the goal intimated in the title.—*Sans Merci, or Kestrels and Kites*, by the author of "Guy Livingstone," is a stronger, healthier, and more satisfactory novel than either the one just named or "Sword and Gown." We have laid before us several groups of well-contrasted characters, and though the artist has embarrassed himself by attempting to work out a double story, he deserves much credit for the distinctiveness which he has given to each. The women, too, placed on the stage of the incidents are all flesh-and-blood, such as one may readily encounter in the world. In fact, the volumes overflow with characters and events, and stand out from the common run by their redundancy of strength.

Among the Illustrated publications that have been issued since our last notice, of the kind for which the firm is famous we must particularise three from Messrs. Day and Son—a *Visit to the Suez Canal*, described by pen and pencil; a folio volume of examples of *Chinese Ornaments*, selected from objects in the South Kensington Museum by Mr. Owen Jones; and an illuminated edition of *Gray's Elegy* by Lady Willoughby.

Clarke's Catechism of the Rudiments of Music; West's Questions relating to the Theory of Music; Hamilton's Dictionary of 3,500 *Musical Terms; Hamilton's Modern Instructions for the Pianoforte.*—The above, all published by Cocks and Co., of New Burlington-street, have established for themselves a high reputation as is evidenced by the number of editions they have passed through. The titles convey a very definite idea of the contents of each, and we need do no more to recommend them to the use of public or private teachers, or to the self-instructed, than to add our commendation of the type, engraving, paper and general appearance of the whole of them, in addition to their extremely moderate price.

Parliamentary Intelligence.

HOUSE OF COMMONS.

THE EAST INDIAN SQUADRON.

(March 19th.) Mr. MOFFATT (Southampton, L.) inquired why a portion of the expense incurred by keeping up a naval force on the coast of India was not borne by the Indian Government. It was quite true the fleet of seven ships stationed there might not be exclusively employed for purposes connected with India, but it was mainly so, and for that reason he thought some portion at least of its cost should be charged against the revenues of the Indian Government, instead of being wholly borne by the Imperial Government.—Lord C. PAGET remarked that, although the fleet of seven ships referred to undoubtedly did duty in behalf of India, they also performed Imperial duties. He believed Sir Charles Wood had expressed the opinion that the requirements of the Indian Government would be satisfied by an occasional ship in the Persian Gulf, and another to visit the Red Sea. Indeed, if the fleet in that neighbourhood was only wanted for the protection of the Indian coast, it would be very small; but he was under the impression that at least three of the vessels composing the East Indian Squadron were constantly employed in the suppression of the slave-trade in the Mozambique, where it was carried on extensively by means of small vessels. The Government had not overlooked the matter, but, upon consideration, thought it inadvisable that any charge on the account referred to should be thrown upon the Indian Government.

MORTALITY OF TROOPS IN HONG KONG.

(20th.) Colonel NORTH (Oxfordshire, C.) rose to move for a select committee to inquire into the mortality of the troops in China, the causes which led to it, and the conduct of those departments of the Government whose duty it was to administer to the wants of those troops. He said as the Government had expressed their willingness to grant the committee he would make but very few remarks upon the subject. The fact that the committee would be granted was *prima facie* evidence that he was not about to give unnecessary trouble by the motion which he was about to make. On the 8th of December last the feelings of the people of this country were most painfully excited by a statement in *The Times* of the deplorable condition in which a detachment of the 11th Regiment landed in Japan, and of the melancholy state of health of the force at Hong Kong. Feeling the deepest interest in these unfortunate men, and especially in those of the 11th Regiment, in which he commenced his military service, and in which he was subsequently adjutant, he communicated his intention to his noble friend that as soon as the House met he should move for all the correspondence, and for any information which could be given on the subject of this deplorable event. It was only fair to his noble friend opposite to say that every request which he had made for information in connection with the case had been instantly complied with with his

Digitized by Google

al courtesy. The question, he might add, was no party question. on. gentlemen on both sides of the House had relations and friends in he army; but, independent of all such considerations, it was, he thought, the duty of the House to bear in mind the interests of a body of men who always served with fidelity their Sovereign and their country, and who never shrunk from exposing their lives to the unhealthy influences of climate or the bullets of an enemy. As there would be no opposition to the granting of the committee, he should merely call attention to two or three of the letters contained in the correspondence which had been placed in his hands. It opened with a letter from General Guy, the commander of the forces in China, dated 12th of November, 1864, which, after stating his intentions as to the accommodation of the 9th Regiment on its arrival, and pointing out the difficulty of providing for them, closed as follows:—"I would therefore request your Lordship's instructions as to the disposal of the 2nd battalion 11th Regiment, which by Horse Guards' letter of the 26th August last it is proposed to send to China, as under existing circumstances it will be impossible to provide for it in this country." The result of that statement not having been attended to, he would presently show. The second battalion of the 9th Regiment landed at Hong Kong on the 7th of February, 1865. Its strength on landing was 34 officers, 839 men, 47 women, and 19 children. Within eight months and a-half one officer, 36 men, five women, and 23 children—amounting in all to 65 persons—had died, while one officer, 78 men, 20 women, and 27 children were invalided, making a total, dead and invalided of 193 persons. The second battalion of the 11th Regiment landed at Hong Kong on the 28th of May, 1865. It consisted of 25 officers, 784 men, 54 women, and 92 children, and out of that number, in the course of only 4½ months two officers, 49 men, three women, and 48 children, or in all 102 persons, had died; while three officers, 124 men, 16 women, and 14 children were invalided—making a total of 259 dead and invalided. That report was made up to the 15th of October last, and did not include the Artillery, the Engineers, or the Staff. A ship, he might add, was freighted for the purpose of taking many of the invalids to England, but on the passage from Hong Kong to the Cape, out of the 234 persons who embarked on board the *Gresham* 31 men, three women, and six children, making a total of 40, died. He should, with the permission of the House, read an extract from a letter dated Capetown, December 18, 1865, which said:—"The *Gresham* left Hong Kong on the 13th of October, 1865, with 239 persons on board, and arrived at Simon's Bay on the 6th of December, having lost by death 31 men, three women, and six children, principally from dysentery, the remaining invalids being in a very unhealthy state. The commodore had the troops immediately removed from the ship, some, the healthiest, were put into huts; some not so well were sent on board Her Majesty's ship *Seringapatam*, and the remainder, 21, were sent to the Royal Naval Hospital, of whom five men and one child have already died, and there are but slight hopes that any of the others will recover. In consequence of the state of debility that many of the men and women were reduced to, and very advanced stages of their diseases, it was considered advisable some should be left behind. I therefore made a careful selection, and regret to state that there we 34 men who did not present any favourable hope of arriving in England." On the arrival of the *Gresham* and *Portsmouth* his Royal Highness the Commander-in-Chief had ordered a report to be made, with the view of ascertaining whether the mortality was attributable to any defect in the ship, and the following was the letter of Deputy Inspector-General Innes, dated Portsmouth, February 5, 1866:—"Sir,—I have the honour to report that a Board of officers on which I attended was ordered by his Royal Highness the Field-Marshal Commanding in Chief to ascertain whether the mortality on board the hired transport *Gresham*, on her late voyage from Hong Kong to Spithead, is to be traced to any of the arrangements on board that ship. The result of a careful and minute inquiry into all the circumstances was a unanimous finding in the negative. The accommodation for the troops was spacious, thoroughly ventilated; the supplies and medical comforts good and abundant; the *excreta* from the sick were promptly thrown overboard, and disinfectants freely used. The ship was easy at sea, carrying her ports always open. The soldiers and their families on board expressed the fullest satisfaction with the treatment and accommodation they had received. The Board ventured to express a high opinion of the attention and care displayed by Captain Burland, the officer commanding, and Staff Assistant-Surgeon Adams, in medical charge. The detailed proceedings of the Board were forwarded to the military authorities." The amount of the deaths and invalidings in those two unfortunate detachments was, in the case of the 9th, 193; and the 11th, 259; making a total of 452 persons—of whom 40 died on the passage to the Cape; at the Cape, 5; 34 being left at the Cape, as there was no favourable prospect of their reaching England. The *Agincourt*, he might add, was now on her way home with the remainder of those regiments. The expense, according to the account which he had received the other day as being paid by the Government from China was £29 10s. per head for 235 men, or no less a sum than £6,827, and that merely for one detachment. He did not wish to impute to anybody blame in the matter, but it was, he thought, the duty of the House to ascertain to what cause the frightful mortality to which he had called their attention was to be attributed. He could not close his observations without expressing the greatest admiration for the conduct of the military medical department, and especially for the conduct of Dr. Saunders, surgeon of the 9th Regiment, who, in the absence of his senior, took the whole responsibility on his own shoulders and saved many valuable lives. (Hear.).—Sir H. VERNEY (Buckingham, L.), in seconding the motion, thanked the hon. and gallant gentleman for the manner in which he had submitted it to the notice of the House, observing that the officers and men of our army, unlike that of other countries, were frequently obliged to spend a considerable time away from their homes in unhealthy climates, and that it was the duty of the House of Commons to see that the necessary precautions were taken to provide for their health and safety.—The Marquis of HARTINGTON, in assenting to the motion, said that the Government, in common with the House and the country, deeply regretted the unfortunate occurrences narrated. Undoubtedly, both the House and the country, and more especially the friends of those who had perished, had the fullest right to demand investigation and inquiry as to whether the causes of that mortality resulted from the action of the Government or that of the commanders of the troops. While acknowledging the candid and impartial manner in which the subject had been brought before the House, he must state that he should be prepared to deny that these unfortunate events had occurred through the shortcomings of the Government. It might be said that the matter might have been disposed of in the House, and that the question of the responsibility of the Government, or of individuals, might have been decided there, but there were circumstances which rendered it more advisable that the subject should be investigated in a committee. In a discussion in that House when the conduct of individuals was called in question, assertions were often made and rumours were referred to which it might be impossible at the moment to deny, but which on further investigation might prove to be perfectly groundless, and such rumour and charges could be more properly met in a committee than in a debates. So far as he was aware, every one connected with the Government and with the War Department, including his noble predecessor, was anxious that the affair should be thoroughly investigated, and was ready when called upon to state what had passed in reference to these transactions. His hon. and gallant friend had said that the mortality had occured in consequence of the Government not having attended to the recommendation of the General; but his representations were not neglected by the War Department, as two letters in the correspondence would show. In the first reply of the War-office to General Guy he was told that the distribution of the troops which would remain at his disposal in the command between Hong Kong, Kowloon, and Japan, was left to his discretion, subject, of course, in the case of Japan, to his consulting Her Majesty's Minister there. A subsequent letter, dated the 23d of March, contained the following more specific instruction:—"With regard to the difficulty which you anticipate in providing sufficient accommodation for a second regiment at Hong Kong and Kowloon, I am to acquaint you that the Lords Commissioners of the Admiralty have decided on withdrawing the Royal Marines now serving in Japan. There will, therefore, be no objection to your sending the 2d battalion 11th Foot on its arrival from the Cape, or such portion of it as you may be unable to accommodate at Hongkong, to Yokohama, where the climate is better suited than that of China to the European constitution." It never was intended, as had been stated in the press, to replace the Indian troops who were last year serving in Hongkong by a British regiment. What was intended was the reduction of the garrison in China. It was thought that a force of three battalions was an unnecessarily large one to be stationed at Hong Kong, as it was never intended that the force there should exceed one or one and a half battalion. It was possible the Government might be accused of attempting to get rid of some responsibility in leaving the matter to the consideration of a Committee; but if it were thought necessary afterwards to bring forward a motion impugning the action of the War Department, he would then make any statement which he was now prepared to make. If it were said they were delegating to a committee a duty which more properly devolved upon that department—an inquiry as to the degree of responsibility that ought to attach to any of the officers of the army,—he repeated, as far as he was personally concerned, he was quite ready, if it were the wish of the House, to undertake the responsibility of an investigation. After a few words from Colonel NORTH, the motion was agreed to.

Naval and Military.

The reinforcements proceeding per Gresham were detailed in our last. The names of the officers are—Capt. G. H. French and Ensign C. H. Shepherd, 2nd battalion, 9th Regiment; and Capt. A. N. Adams, 2nd battalion, 20th Regiment.

The Icarus, 3, screw steam sloop, 580 tons, 150-horse power, recently commissioned at Sheerness by Commander S. P. Townsend, was taken for a final trial at the measured mile off Maplin Sands, previous to leaving Sheerness for foreign service. The vessel was in charge of Capt. G. G. Randolph, of the Sheerness Steam Reserve, and the trial was most satisfactory, the vessel making a speed of nearly nine knots an hour. The Icarus, it is reported, will leave Sheerness for China to-day.

It is stated that the Indian reliefs will all be provided from Regiments on home service this year, and that the following battalions will embark about July or August next:—2nd battalion 1st Royals, 1st battalion 2nd Queen's, 1st battalion 3rd Buffs, 1st battalion 5th Fusiliers, and the 37th Regiment.

The *Army and Navy Gazette* announces that the unattached majorities and lieutenant-colonelcies about to be given with the view of facilitating the reduction of the battalions on home service by two companies each will be confined to the officers of the reducible regiments, but will be distributed through the infantry generally, and mainly, if not altogether, having regard to the seniority of the regimental captains and majors who may desire to obtain them.

Messrs. Laird Brothers have just completed another iron-cased turret ship for sea-going and coast defences, named the Bellona. She is 1,340 tons, and is fully protected by armour-plates 4½ inches thick, tapering slightly at the ends, is fitted with double screws, and rigged as a barque, and has two turrets on the principle of Captain Cole's, fitted for four 150-pounders Whitworth rifled guns, two in each turret.

Capt. Hall, private secretary to the Duke of Somerset, is appointed Captain Superintendent of Pembroke Dockyard, vice Rear-Admiral Loring, C.B. Capt. F. A. Campbell is to succeed Capt. Hall as private secretary to the First Lord.

Her Majesty's screw steam vessel Sylvia, of 4 guns, was launched in a most successful manner. The Sylvia was laid down about six years ago, but her completion was suspended in consequence of the decision of the Admiralty to discontinue the building of timber vessels.

Lord Clarence Paget, who proceeds in May to assume command of the Mediterranean fleet, will hoist his flag at first on board Her Majesty's ship Victoria. His lordship's flag captain will be Captain Allan Gardner, and his flag-lieutenant the Hon. Victor Montagu. Colonel Hamley, R.A., will succeed Colonel Elwyn, as member of the Council of Military Education. Colonel Hamley has been for five years a professor of the Royal Military College Sandhurst. He is the author of a well-known work on the Crimean war, and also of "Lady Lee's Widowhood." It is under-

Digitized by Google

stood that he has at the present moment in the press a work on military tactics.

Mr. H. H. Shanks, Paymaster, late secretary to Admiral Sir Augustus L. Kuper, K.C.B., will be appointed secretary to Lord Clarence Paget.

Letters received from Her Majesty screw troopship Adventure, dated at Hong Kong, January 30, state that she was expected to be paid out of commission there, and the officers and crew sent to England in the Orontes screw troopship.

Captain Oliver J. Jones is to be appointed Commodore, 2nd Class, at Hong Kong, and will hoist his flag within a very short period to proceed to his destination. We believe Mr. Francis A. Carter, Assistant-Paymaster of Her Majesty's ship Achilles, will go as his secretary.

We hear that Major-General Milman will have the command at the Mauritius. This officer served with his regiment, the Coldstream Guards, in the Canadian Rebellion, and was employed in India during the Sepoy War.

The movements on the Flag List will promote Vice-Admiral Sir Charles Talbot to be a full admiral, and it is rumoured that he will be succeeded as Commander-in-Chief at Sheerness by Vice-Admiral Sir George Rodney Mundy, K.C.B.

Lieutenant James C. Patterson, recently appointed to the command of Her Majesty's gunboat Grasshopper, vice Morant, promoted, proceeds by this mail. Also Mr. A. G. St. G. Ponsonby, Second Master, recently appointed to Her Majesty's ship Rifleman, for surveying service, and Mr. Easter, Second Master, appointed additional to the Princess Royal.

The following is a list of the ironclads we now possess either actually in commission or nearly ready for sea, and exclusive of those which, like the Hercules, &c., have not long been laid down :—

Ship's Name.	Tonnage.	Horse Power.	Length.	Beam.	No. of Protected Guns designed for	Thickness of Armour.	Thickness of Backing.
			Ft.	Ft.		Inches.	Inches.
Achilles	6,221	1,250	380	58	26	4½	18

Wivern	1,857	350	220	43	4	4½ and 3	9

Among the gentlemen presented at the late *levée* were the following :—Mr. Randal Callander, Her Majesty's Consul at Manila, by the Earl of Clarendon; Mr. Townsend Farquhar, on his appointment as Second Secretary to Her Majesty's Mission in China, by the Earl of Clarendon; Ensign Richard Andrews Mitchell, 2nd battalion 9th Regiment, by the Adjutant-General; Colonel W. G. Suther, C.B., R.M., on return from foreign service, and being nominated a Companion of the Bath, by Major-General Strantham; and Captain H. B. Vaughan, 20th Regiment, by the Adjutant-General.

PROCEEDINGS OF LEARNED SOCIETIES.—At a late meeting of the Royal Asiatic Society there was exhibited the photograph of a large picture brought from Peking by Colonel Barnard, representing the celebrated sandalwood figure of Buddha, and some notes by the Rev. S. Beal, concerning its history were read.—At the Entomological Society, Mr. S. Stevens and Mr. Tegetmeier severally exhibited collections of Japanese insects, one from Hakodadi, the other from Nagasaki. Mr. E. Saunders read a paper entitled, "Catalogue of Buprestidæ, collected by the late M. Mouhot in Siam, &c., with descriptions of new species." Thirty-four species were enumerated, of which thirty three were described as new, and three new genera were characterised under the names of Cardiaspis, Engycera, and Oncomœa.

RIVALS OF THE SIAMESE TWINS.—Two negro children are now on exhibition at Raleigh, North Carolina, that excite much curiosity. They are 14 years of age, and were born of slave parents in Anson county. The connection between these girls is closer than in the Siamese twins, there being more of the physical and mental organs common to each. The connection begins below the neck and terminates at the extremity of the spine. To touch one at any point of her body below the connection sends a sensation to the brain of each; while a touch of either above the connection is felt by that one only. They can talk to different persons at the same time on entirely different subjects; and one can engage in a game of whist while the other reads or sings.

LAUNCH OF THE P. & O. CO.'S STEAMER "SURAT."—The screw steamer Surat—noticed in our last—built for the Peninsular and Oriental Company, was launched from Messrs. Day and Co.'s shipbuilding yard at Northam, Southampton, on the 17th inst., in the presence of several directors and leading officials of the company, and a large concourse of spectators. This vessel is the largest ever built at Southampton, and will also be one of the largest and finest in the noble steam fleet of this powerful company. Her leading dimensions are as follows :—Length between perpendiculars, 318 ft. 5 in.; length over all, 350ft. 6in.; beam, 41 ft. 5 in.; depth of hold, 33 ft.; tonnage, builders' measurement, 2,666. She will be fitted with engines of 500-horse power, cylinders (which are steam-jacketed and provided with expansion valve) 80 in. in diameter and 3 ft. 6 in. stroke, and superheater and boilers on Lamb and Summers's plan. The surface condensers are fitted with ten miles of copper tubes, tinned inside and out to prevent the internal corrosion of the boilers. The screw propellor has four blades and a diameter of 18 ft., with 24 ft. pitch. The Surat is built of iron, with steel plates to form her top sides, thus saving about 60 tons of top weight, and at the same time obtaining a greater amount of strength. The spar and main decks are of teak, and she will be brig-rigged, the masts being of iron. There is great height between decks, and her ports are higher out of water than most other vessels carry them, which will enable passengers to keep the ports open in ordinary weather. The side ports are large, and in addition the most ample means for ventilation are provided throughout the ship. She will have accommodation for about 200 passengers. The ice-house has stowage room for 20 tons, and she has capacity in her bunkers for 800 tons of coal, or about 18 days' consumption at full speed.

BURNT AT SEA.—The *Maggie Atkinson* left Tuticorin November 16, with a cargo of cotton for London. On the 13th of February, lat. 26 N., long. 39 15 W., smoke was observed issuing from the after cabin, and, although every effort was made to suppress the fire, it gained on the crew. At 10 A.M. the mizen boom fell on the quarter, the foot of the mizenmast caught fire, and the flames blazed furiously. The crew got into the long boat and pinnace, but the latter being leaky they were obliged to abandon her. They kept close to the wreck as long as she was burning, in hopes that the flames might attract some passing ship. At sundown they examined their stock of provisions, which consisted only of four pumpkins, a live pig weighing 30 lb., and 20 gallons of water. They had no chronometer, compass or chart. February 14, rigged a small sail and stood to the eastward; at noon served one half a pumpkin with a gill of water to each man; caught a little rain. 15th, at noon, the estimated course and distance from the Cape Verde Islands was S.E. 190 miles; P.M., killed the pig, and served a small quantity of blood to each man. 16th, served one half a pumpkin, and the remainder of the pig's blood, with a gill of water to each man; scurvy of a mild character made its appearance; at noon the course and distance was S.E. 100 miles. 17th, at 4 P.M., a sail being reported on the lee bow standing to the northward, all hands were put on the oars and the boat kept close to the wind; at 5.30 the stranger shortened sail and bore down. She proved to be the *Manfred*, from Hong Kong, with tea for London. Captain Scott took all on board, and treated the starving men very judiciously. On the 28th Captain Scott went on board the *Gustave Adolphe*, and on representing his condition Captain Bolstein received the chief officer and four of the crew, supplied them with clothing, and shared with them all the comforts he possessed. The *Gustave Adolphe* arrived safely at Plymouth on the 17th inst., and the *Manfred* a few days later.

MONUMENT TO ENGLISH OFFICERS KILLED IN CHINA.—The *Illustrated News* gives an engraving of the monument, or rather obelisk, erected by subscription among the European residents at Shanghai, in memory of the officers who lost their lives while serving under Colonel Gordon in the memorable operations which resulted in the virtual extinction of the Tai-ping rebellion.

M. HILDEBRANDT'S PICTURES.—The *Illustrated News* has published engravings from some of these clever drawings—among others, the Circular street at Peking, and interior and exterior views of the Chinese theatre at Macao.

THERE were in China, in 1865, 187 missionaries, including ladies. Of these 92 are American, 77 are English, and 18 are German.

Monetary and Commercial.

The report of the Delhi and London Bank, for presentation at the annual meeting on the 29th inst., shows a clear profit for the year of £27,176, out of which two dividends have already been declared, amounting to 9 per cent. per annum, and the sum of £4,676 is carried forward.

The report of the annual meeting of the Agra and Masterman's Bank will be found in another column.

The biddings for £350,000 in bills on India took place at the Bank of England. The proportions allotted were, to Calcutta, £241,200; to Madras, £8,800; and to Bombay, £100,000. The *minimum* price was as before—1s. 11½d. on Calcutta and Madras, and 1s. 11¾d., on Bombay. Tenders on Calcutta and Madras, at 1s. 11¾d., will receive about 11 per cent., and on Bombay, at 2s. ¼d., about 37 per cent.; above those prices in full. The terms thus obtained indicate no material change in the demand for means of remittance to the East.

A general meeting of the shareholders of the Chartered Bank of India, Australia, and China is called for the 18th of April, when a dividend is to be declared.

At the meeting of the Scinde, Punjaub, and Delhi Bank Corporation the resolutions for an amalgamation with the National Bank of India were confirmed.

The second ordinary general meeting of the Commercial Bank Corporation of India and the East is called for the 25th April.

The following with regard to the silver market is from the Circular of Messrs. W. C. Sillar and Co. :—

Digitized by Google

"Silver has been in fair request, and our market closes with firmness. We have had a good inquiry for Bombay by way of Marseilles, the steamer which sailed from that port on the 20th having taken £216.445; and the Messageries Imperiales steamer Said, on the 19th, £440.000 for India and China, and £20,000 for Alexandria. The bars by the Seine were placed on the 20th inst. at 5s. 0⅞d., being the rate at which those by the previous packet were disposed of. Mexican dollars: The price of those by the packet was fixed at 4s. 11½d.; they have been in more request, owing to an unfavourable movement in the Chinese exchanges, and some parcels have been placed by way of Marseilles at 5s. 0⅛d. Specimens of the new Mexican dollars, with the head of the Emperor Maximilian, have been received in London: and it becomes a very interesting question with exporters whether the old Republican dollar will not go to a premium in China, until the new British coin shall become known in the silk and tea districts. From our experience of the Chinese we think it improbable they will receive the Mexican dollar in its altered form."

The Board of Trade returns for the month of January are of a favourable character, the increase in the articles imported extending to nearly all descriptions. The total declared value of exports for January of the present year was £14,354,748, against £10,489,339 in 1865, and £10,413,586 in 1864, which is an increase of £3,865,409 on the former period and of £3,941,162 over the latter. With regard to the exports, there has been an increase in alkali, beer and ale, coals and culm, cotton yarn, cotton manufactures, haberdashery and millinery, linen yarn, linen manufactures, metals, seed-oil, thrown silk, silk manufactures, wool, woollen and worsted yarn, and worsted manufactures. On the reverse side the only articles are machinery and British spirits. With respect to imports, there has been an increase in raw cotton, hides, leather manufactures, flax seed and linseed, tallow, wool, spirits, unrefined sugar, tobacco, and wine; with a falling off in clocks and watches, flax and hemp, saltpetre, raw silk, woollen manufactures, cocoa, coffee, and tea. The returns before us present the following figures referring to trade with the Far East:—

EXPORTS TO CHINA AND HONG KONG.

	Quantity for the Month ended 31st January, 1864.	1865.	1866.
Cotton yarn	1,000 ..	153,722 ..	388.080 lbs.
Cotton manufactures ..	2,135 981 ..	4,138,368 ..	12,996,763 yds.
Worsted stuffs	743.014 ..	576.978 ..	935,820 „
Woollen & Worsted cloths.	78,293 ..	65,604 ..	244,875 „
Lead	506 ..	333 ..	467 tons
	Value for the Month ended the 31st January.		
Cotton yarn	£180 ..	£17.571 ..	£41.908
Cotton manufactures ..	63.251 ..	101.093 ..	316.100
Worsted stuffs	53.865 ..	48,437 ..	72.453
Woollen and worsted cloths	16.947 ..	13.207 ..	33.370
Lead	10,810 ..	7,710 ..	10,360

The Cotton Manufactures exported to other ports and countries of the Far East during the month of January were in quantity and value as follows:—

	Quantity for the month ended 31st January, 1864.	1865.	1866.
Ceylon..	1,728.083 ..	542.912 ..	1,305.297 yds.
Singapore	660,508 ..	2,653.494 ..	2,210,429 „
Java	361,415 ..	1,386.297 ..	—
Philippine Islands ..	2,213,905 ..	3,051,403 ..	1,746,608 „
	Value for the Month ended 31st January.		
Ceylon..	£53.471 ..	£16,620 ..	£33,050
Singapore	15,818 ..	62 588 ..	50,490
Java	11,125 ..	36,435 ..	—
Philippine Islands ..	61,003 ..	79,872 ..	50,516

Of Cotton Yarn 46,600 lbs. were forwarded to Singapore during the month, of the value of £5,603. To Ceylon 14,000 lbs. were despatched, of the value of £2,700.

IMPORTS.

From the following it will be seen that China has disappeared, for the present, from the list of countries supplying us with Raw Cotton. The import of that material for the month of January in the present and two preceding years is thus given:—

	1864.	1865.	1866.
British India..	22,973 ..	27.861 ..	91,465 cwts.
China	7,851 ..	17,396 ..	—
All parts	81,639 ..	151,264 ..	373.944 „

We are now furnished also with the value of the Raw Cotton imported during the past and two preceding years; and as the items form an interesting indication of the whole course of the trade, we present them in full:

From	Import of Raw Cotton for the year ended 31st Dec. 1863.	1864.	1865.
United States	£644.138 ..	£1,711,890 ..	£12,035,484
Bahamas and Bermuda ..	2,983,801 ..	4,884.504 ..	1,379,338
Mexico	2.067,939 ..	2,954,127 ..	2,834,187
Brazil	2,077,688 ..	4,379,793 ..	4.373,811
Turkey	1,032,208 ..	1,745,878 ..	1,276,711
Egypt	8,841.557 ...	14,300,507 ..	13.906,641
British India	34.700,661 ..	38,214,723 ..	25,005,856
China	2,164,995 ..	6,242 504 ..	1,593,405
Other Countries	1,764,966 ..	3,769,803 ..	3,626,760
Total	£56,277,953	£78,203,729	£66,032,193

Of Unrefined Sugar there was no import during the month of January last from Java and the Philippine Islands.

The article of Hemp from the Philippine Islands presents a similar, return; but of this latter we can now give the value of the import for the year—

	1863.	1864.	1865.
Of Hemp from the Philippine Islands	£421,004 ..	£309,251 ..	£309,516

The import of Coffee from Ceylon was as follows:—

	1864.	1865.	1866.
Quantity to 31st January (lbs).	3,619.207 ..	2,812,099 ..	244,986
	1863.	1864.	1865.
Value for the year ended 31st December	£2.898.086 ..	£2,370,129 ..	£3,112,765

The value of the Exports of British and Irish Produce and Manufactures will form part of the next return, when we shall also have the value of the Imports from the various parts of the world for the last and two preceding years.

The amount of bullion by the P. and O. Company's steamer *Massilia*, from Southampton on the 20th inst., was—in gold to Madras, £6,251. In silver, to Singapore, £4,000; to Foochow-Foo, £2,000; to Shanghai, £14,450. Total—in gold, £6,251; in silver, £20,450.

MANCHESTER MARKETS.

The markets are quiet, both for yarns and goods. Prices are nominally a shade higher, but any advance on recent rates serves to check the disposition to purchase. Grey Shirtings, 7 lb., 14s. 9d. to 15s.; 8 lb. 4 oz., 18s. to 18s. 6d. Mule Twist, Nos. 16 to 24, 2s. 3d. to 2s. 4½d.; 28 to 32, to 2s. 4½d. to 2s. 6d.

ARTICLES OF IMPORT.

TEA.—Our market has been extremely quiet, there still being an unusual absence of orders both for home consumption and export, whilst during the past ten days the arrivals have been very numerous, amounting in all to twenty-one vessels. The further reduction in the Bank rate to 6 per cent. has as yet had no effect, but as the shipments from China now seem very moderate we trust that shortly there may be some revival of demand. Importers generally are giving support to the market, but the great bulk of the samples from the recent arrivals have not yet been placed on the market. The supplies of the dusty and broken-leaf kinds of Congou have been large, and prices show a decline of ¼d. to ½d. per lb. Fair to good common show no alteration. In fair flavory kinds there has been but little doing, and prices must be quoted rather easier. In good Kaisows the few sales have been at former prices. In fine to finest there has been scarcely anything doing. Common black-leaf Congous have sold rather higher, there being now but little to be met with under 1s. per lb. Fair qualities continue difficult of sale. The good medium kinds remain firm, also fine up to 2s. 2 per lb., but in the finest kinds there have been no sales of importance. In new-made Canton kinds the medium sorts have been sold at public sale at a decline of 1d. to 2d. per lb. In Oolongs transactions have been limited, and prices show a reduction of 1d. to ½d. per lb. Souchongs have sold to a fair extent, but the medium qualities about 1d. per lb. lower. Flowery Pekoes show no alteration. Scented Teas remain much as before;

Digitized by Google

the fair qualities of Orange Pekoe have sold steadily, also common to fair Capers under 1s. 4d. per lb.; the good to fine kinds remain difficult to move. Uncoloured Japans have sold readily at extreme prices, there being a good demand for export. In Green Teas there has not been much business. The great bulk of the recent arrivals have not yet been shown, but prices have been firmly supported for all the better kinds, common qualities still remaining dull of sale. In Canton Young Hysons and Gunpowders further sales have been made at the decline last quoted.

SILK.—We have as yet no real improvement to notice in the silk market, though, perhaps, within the last few days the feeling amongst buyers has been less desponding. China Silk: Good qualities still hold their ground much better than ordinary and inferior sorts; hence a few bales of classic No. 3 Tsatlee have been sold from 29s. to 29s. 6d., while for any commoner grades buyers can only be found at relatively very low rates. Japan Silk: Some 600 bales of Mibash just entered by one importer have been placed, it is generally supposed, at rather a low figure, though the actual price paid has not transpired. Deliveries from 1st to 23rd inclusive—China, 1,900 bales; Japan, 586 bales; total, 2.486 bales. Quotations are—No. 1 Tsatlee 31s. to 31s. 6d., Taysaam, No. 1 27s. to 27s. 6d., Mibash, No. 1 33s. to 35s.

COTTON.—Owing to the advance reported in our last not being responded to in Manchester, together with heavy arrivals in Liverpool, and free receipts at the American ports, holders have since shown more anxiety to realise, and prices have again declined ¼d. to ⅜d. per lb., closing irregularly at barely last week's quotations. In the early part of the week there was considerable inquiry for Bengal afloat, and prices advanced 1d. per lb., which, however, has since been lost. 3,600 bales of Tinnivelly have been sold in the London market at from 15d. to 16¼d. for fair to fully good fair. Sales to arrive have been 2,000 bales Tinnivelly, at 15d. to 15¾d., March to November, guaranteed good fair, closing at 15d. for January shipment. The report from Liverpool is—The supply of East India at the early part of the week was quite inadequate to the demand, and prices improved about ¼d. per lb.; but with the quietness that has existed during the past three days, and the supply from the recently-arrived vessels, the market has become somewhat irregular, losing the previous advance, and closing flatly. Holders of China having submitted to about ½d. decline, a few small sales have been effected at this reduction. The following are the official quotations:—Fair Orleans, 21½d.; middling, 20d.; fair Mobile, 20¾d.; middling, 19½d.; fair Uplands, 20⅛d.; middling, 19½d.

SUGAR.—The market was depressed during the whole of the week, continuing so to the close, and prices, with few exceptions, ruled, at the close of business on the 23rd, 6d. to 1s. per cwt. below those of the 16th. By private contract, on the 23rd, 1,500 bags clayed Manila were sold at 30s.

COFFEE.—Prices are steadily maintained. At public sale on the 23rd a small parcel of Plantation Ceylon went off steadily, and 950 bags Native were half sold, good ordinary 67s.

RICE.—A quiet tone has pervaded during the week, and only limited sales have been effected at the former value.

CARDAMOMS.—Firm; 23 cases Malabar at auction mostly sold at 5s. 6d. to 6s. 1d. per lb. for fair to good; and of 20 bags Madras three-fourths sold at 5s. to 5s. 6d. per lb. good to fine Aleppy, and 3s. 5d. to 4s. ordinary to middling.

CAMPHOR.—Subsequently to our last, prices further advanced to £6. 10s. per cwt. for China, and £6. 12s. 6d. Japan, with a very fair extent of business; more recently the drug has become flat, and prices have gone back 5s. for China, and 2s. 6d. Japan.

CASSIA LIGNEA.—Very firm: with large business privately upon fully former terms to 2s. per cwt. advance. Buds: Retail business done at the advanced quotations.

CINNAMON (CEYLON).—We quote 1st sort 2s. to 2s. 10d. per lb., superior, 3s. to 3s. 4d.; 2nd, 1s. 9d. to 2s. 9d.; 3rd, 1s. 8d. to 2s. 4d.; 4th and Jungle, 1s. 4d. to 1s. 9d. Market quiet. 180 bales at auction partially sold at about previous value.

COCOA-NUT OIL.—This market has been very firm at 20s. per ton advance for Cochin, and 10s. Ceylon. Transactions not large: 18 casks Cochin, 228 casks Ceylon, 16 casks Sydney, and 9 casks Zanzibar at auction.

DRUGS.—Cubebs: Cheaper: of 390 bags at auction, one fourth sold at 82s. to 82s. 6d. per cwt. Dragon's Blood: Of 20 cases at auction, two-thirds sold at £6 10s. to £8 17s. 6d. per cwt., being, on the average, fully the former worth. Galangal Root: Flat: of 220 bags, very few sold at 13s. 6d. per cwt. Rhubarb: Dearer: considerable busines done privately; and of 103 boxes at auction, one-third (a recent importation) sold at 8s. 9d. to 9s. 4d. per lb. for fair flat and round; and 3s. 9d. to 3s. 10d. inferior.

GUMS.—Benjamin: Siam is £2 to £3 per cwt. cheaper; of 69 chests at auction, half sold: 2nds at £38 per cwt.; 3rds £30 to £32; 4ths £25 to £28 10s.; seed drop in block £20 10s; dust in block £15 to £15 5s.; and dark brown gum with few almonds £20 to £24 15s. Sumatra steady; but of 122 chests offered, only one-fourth sold, 2nds at £12 10s., and 3rds at £7 per cent. Damar: Firm; but of 203 cases at auction, only a few sold at 60s. per cwt. for very good picked. Gamboge: Very scarce, and again dearer; and of 18 cases at auction, one-half found buyers at £19 10s. to £23 per cwt. for fair to good pipe; and £14 15s. ordinary broken.

GUTTA PERCHA.—Quiet; and of 121 baskets and 105 tons at auction, a small portion only sold at 1s. 6d. to 1s. 10d. per lb. for middling to fair natural; and 5¼d. to 7½d. reboiled.

HEMP.—Manila: Firm; auctions unimportant; private business moderate, upon fully previous terms.

HORNS.—Buffalo: Are 2s. to 3s. per cwt. dearer, the greatest advance being on the large horns; Tips are likewise 2s. dearer: 57 tons Madras, 6 tons Siam, and 10 tons Calcutta sold at auction at 49s. 6d. per cwt. for 3 lbs. average; 39s. 6d. to 41s. for 2 lbs.; and 27s. 6d. to 34s. 6d. for 1¼ to 1½ lb.; 8 tons Calcutta Tips sold at 35s. 6d. to 36s. 6d. Deer: Are rather easier; and 36 tons Madras, 1 ton Siam, and 1 ton Calcutta sold at auction at 55s. to 60s. per cwt. for 1⅝ lb.; and 41s. to 51s. for 2½ to 1¼ lb.

INDIA RUBBER remains depressed. 63 baskets Singapore, and 106 baskets Assam at auction all retired. Limited business privately within our quotations, of 1s. 9d. to 1s. 11d.

JAPAN WAX steady: Of 528 boxes at auction half sold at 73s. 6d. to 84s. per cwt. for ordinary to good saucers, and 72s. to 74s. middling block.

OILS.—Anniseed: Very quiet, and selling in retail at our quotations of 9s. 5d. to 9s. 6d. Cassia: Flat, and lower, the latest transactions having been at 8s. 3d. per lb.; business very limited. Cinnamon: Only 2 cases at auction, retired. Citronelle: Remains firm; of 39 cases at auction, one-third sold at 4d. per oz., at which price there are still buyers. Lemon Grass: Of 4 cases at auction, 3 sold at 1s. 3¾d. to 1s. 4d. per oz., being a shade cheaper.

PEPPER.—Black: Has become very quiet, with most restricted business, but no reduction in terms; 354 bags Sincapore at auction, retired; and of 2,752 bags Penang, a few only sold at 3⅞d. per lb. White: Is also flat, and 107 bags Penang at auction were all retired; very little doing by private treaty.

SPICES.—Cloves: Quiet for all descriptions; 300 bags Zanzibar at auction all retired. Mace: Auctions confined to 45 packages Batavia, of which half sold at 1s. 4d. to 1s. 6d. per lb. for ordinary to middling, being barely the previous worth. Nutmegs: Have gone back 1d. to 2d. per lb.; and of 46 cases Penang, 6 cases Sincapore, and 29 casks Batavia at auction, one-third sold at 1s. 3d. to 2s. 1d. for ordinary small to fair medium.

SAGO.—1s 6d. per cwt. cheaper: of 1,751 boxes at auction, half sold at 21s. 6d. per cwt. for good bold, and 18s. 6d. to 19s. 6d. middling to fair small. Flour: Rather dearer; moderate business done at 15s. 9d. per cwt. for good; 804 bags at auction retired.

TERRA JAPONICA.—Cutch, Pegue: Quiet, and 1,560 packages at auction all retired. Gambier: Rather dearer, and 749 bales at auction mostly sold at 21s. 3d. to 22s. per cwt. for middling to good.

TIN.—This market has been active, with large transactions and material variations in value; the lowest cash price for Straits having been £83 10s., and highest £86; for arrival £87, 3 months' prompt. At the Periodical Dutch Sale, 22nd inst., 111,800 slabs sold at f.49¾, eqnal to £87 10s. delivered in London.

MISCELLANEOUS.—Black Lead: Dearer, especially fine lump; of 878 barrels at auction, three-fourths sold at 11s. to 22s. per cwt. for ordinary to fine lump; 16s. to 16s. 6d. chips, and 9s. 3d. to 9s. 6d. dust. Ebony Wood: Quiet; only 8 tons Ceylon at auction retired. Galls: All Galls of the Bussorah character remain very flat; China steady, and of 211 cases at auction a few sold at 70s. per cwt., and small private sales also made at the same price; Japan inquired for. Musk: Scarce and firm; on grain, at auction, 13 tins sold at 50s. to 57s. 6d. per oz. Rattans: Quiet; of 18,850 bundles Singapore at auction, half sold at 3s. 1d. to 4s. 6d. per 100. Sapan Wood: Steady, but without any trade of consequence. Mother o' Pearl Shells: Dearer; sales effected privately at very high prices; no auctions. Soy: Quiet; 20 casks at auction retired; arrivals of Japan. Star Anniseeds: Quiet; and of 80 cases at auction, a few only sold at £7. 2s. 6d. per cwt. for fair. Sticklac, Siam: Steady; of 265 cases at auction, one-fourth sold at 52s. 6d. to 53s. per cwt. for good. Tortoise Shell: A single case Singapore at auction sold at 12s. 6d. per lb. for ordinary, being the previous worth. Vermilion: Scarce; 6 boxes at auction retired at 4s. per lb.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £7.; nail rod, £8. 10s. to £9; hoops, £9. 15s. to £10; sheets, single, £10. 10s. to £10. 15s.; Staffordshire bars, £8. 10s. to £9. 15s.; rails, £6. 10s. to £7.

STEEL.—Swedish keg, £15. 10s. to £16.

COPPER.—Sheet and Sheathing, £96 to £98 per ton; yellow metal, 8¼d. to 9d. per lb.

TIN.—£91 for block; £92 for common bars. Tin plates, best charcoal, I.C. 34s. to 35s.

LEAD, &c.—English pig, W.B., £22. 5s. to £22. 10s.; shot, patent, £23. 15s.; sheet, £21. 15s.; spelter, £24. 5s. to £24. 15s.; zinc, English sheet, £32; quicksilver, £8.

The following is from the Circular of Messrs. French and Smith:—There is little of importance to notice in the metal market. The Scotch pig iron speculation, in spite of increasing stock, has been maintained with some little fluctuation. Copper: Reduced £5 per ton since our last. Tin Plates: Remain firm, and for some brands the manufacturers oversold. Lead: Steady; and for Spanish a 5s. advance has been obtained. Tin: The sale in Holland went at 43¾ guilders, equal f.87.10 here.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton from the 1st January by the P. and O. Company's mail steamers.

FREIGHTS AND CHARTERS.

Notwithstanding the recent numerous arrivals, the increased ease in the money market, and the more favourable aspect in commercial circles, have well maintained all berth freights, and ships may yet be advantageously placed. Homewards, however, nothing is doing.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Shanghai: 40s. weight, 30s. to 35s. meast. To Hong Kong: 40s. weight, 30s. meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Ceylon: 40s. weight, 20s. measurement.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel. For Hong Kong: £45 to £47. For Galle: £40. For Singapore: £39. For Shanghai: £55. For Batavia: £35. From Newport, Cardiff or Swansea, per ton. For Hong Kong: £2 3s. For Manila: 35s. For Galle: £1 18s. For Singapore, 35s. For Shanghai: £2 15s. For Batavia: £1 12s. 6d.

The Admiralty have invited tenders for the conveyance of 27 tons combustibles, 5 tons empty cartridges, &c., 93 tons naval stores, and 3 boilers, weighing 59 tons, from the River Thames to Trincomalee, and have ordered the Invincible to be surveyed for the conveyance of stores to Hong Kong.

CASUALTIES.

The crew of the Fortuna de Groot, from Shields for Singapore, which vessel was stranded at Adinkerke, near Furnes, on the morning of the 14th March., were saved by the lifeboat. The vessel was supposed to have sustained much damage, having had 6 feet of water in her hold; but advices from Antwerp, under date March 17, report that after throwing overboard 80 tons of coal she was got off and towed into Ostend, and beyond being very leaky, had sustained but little damage.

The West Wind, Blandford, from Cardiff, for Shanghai, which put into Lisbon March 5, with a trifling leak forward, has commenced discharging.

The Golden Fleece, of Boston, from Manila, &c., to New York, which arrived there March 5, touched the ground in the Swash Channel on the 3rd inst. but backed off without apparent damage.

The Lucy E. Ashby, from Shanghai to New York, which was stranded on the reef in the Pernambuco roadstead Feb. 12, has been sold with the cargo still on board. Most of the tea saved goes to New York.

The Betty, from the Clyde for Batavia, has put into Queenstown leaky.

MISCELLANEOUS.

AT ST. HELENA.—Jan. 23, from Batavia, Copernicus, Algra, and sailed 24 for Rotterdam; 24, Cosmopoliet, Koning, and sailed for Dordt; 25, from Banjoewangie, Anthony, Von Hoboken, Hazewinkel, and sailed for Amsterdam; from Batavia: Ternate, Cars, and sailed 27 for Rotterdam; 26, from Pasaroeang, Gleaner, Boston; from Batavia, Grootmeester Nationaal, Gilsne, and both sailed for Amsterdam; 27, from China, Santon, Cresswell, and sailed for London; 28, from Penang, Balnagnith, Markham, and sailed 30 for London; 31, from Amoy, Red Riding Hood, Nicoleon, for Trinidad; Feb. 7, from Shanghai, Geo. Becker, 10 from Japan, Seringapatam; 19, from Java, Sandringham.

At MAURITIUS.—Feb. 10, from Singapore, Analyet, Crosby; 11, from Saigon, Jean Baptiste, Ardouin; 16, from Singapore, Sea Ripple, Pringle.

The Patriot King, from Liverpool for Singapore, put back March 20, her crew refusing duty.

LAUNCH.—On the 14th inst. Messrs. Charles Connell and Co. launched from their West Shipbuilding Yard at Overnewton a fine iron sailing ship of 1,000 tons register, classed AA at Lloyd's. She was named the "City of Vienna" by Miss Margaret Orr, of Fenwick, is owned by Messrs. George Smith and Sons, of Glasgow, and is intended, for their East India trade. This is the fourth vessel built by Messrs. Connell and Co. for the same firm.

THIRTY-SECOND ANNUAL GENERAL MEETING OF SHAREHOLDERS OF

THE AGRA & MASTERMAN'S BANK

(LIMITED),

Held at the LONDON TAVERN, Bishopsgate-street, E.C., on SATURDAY, March 17, 1866—

GEORGE GORDON MACPHERSON, Esq., Chairman, in the Chair.

The Notice convening the Meeting and the following Report and Statement of Accounts were read:—

The Directors beg to submit to the Proprietary the audited Accounts for the year ended Dec. 31 last, and to report that, after making ample provision for bad and doubtful debts, the available surplus is £250,254. 2s. 9d. Out of this sum the Directors have paid two half yearly dividends at the rate of 10 per cent. per annum, adding on each occasion a bonus of 15s. per share, thus making the total distribution for the year 16 per cent., free of income-tax, on the increased capital of one million and a-half sterling. The balance, £10,254. 2s. 9d., is carried forward to profit and loss account for the current year.

The Directors have the pleasure to report that during last Session an Act of Parliament was obtained for enabling the Bank to divide the original shares of £100 each into two shares of £50 each. The subdivision has been carried out, and the capital of the Bank now consists of 60,000 shares of £50 each, of which £25 per share has been paid up.

The Directors have opened a branch of the Bank in Paris, under the management of an influential local board, and they are glad to report that the results from the commencement have been satisfactory. They have purchased the premises 10, Place Vendome, for the conduct of the business of the branch, and the cost is added to the property account.

The Directors regret the loss which the Bank has sustained by the death of their much-esteemed colleague General Duncan Sim. It is not intended to fill up the vacancy in the direction thus occasioned. The Proprietors will have to elect Auditors for the ensuing year, and the present Auditors, being eligible, offer themselves for re-election.—By order of the Board, MACKINTOSH BALFOUR, General Manager.

BALANCE-SHEET, December 31, 1865.

No. 1. DR. LIABILITIES.

G. B. DALBY, Chief Accountant.

We have examined the preceding statements (Nos. 1 and 2), with the books, vouchers, and securities at the head office in London, and with the detailed returns and balance-sheet, signed by the Auditors of the several branches, and we hereby certify to the correctness and satisfactory character thereof.

London, March 12, 1866. J. HILL WILLIAMS, W. FARR, } Auditors.

The following Resolutions were duly moved, seconded, and carried unanimously:—1. That the report and accounts now submitted to the meeting and previously circulated to the shareholders in Europe, be adopted.—2. That Colonel James Horsburgh Macdonald, James Sydney Stopford, Esq., Charles Grenville Mansel, Esq., and James Thomson, Esq., be re-elected Directors.—3. That John Hill Williams, Esq., and William Farr, Esq., F.R.S., be re-elected auditors for the present year.—4. That the thanks of the shareholders be given to the Board of Directors, to the General Manager, to the London Mangers, to the Inspector, and to the local Committees and the Managers of Branches, for their able and satisfactory conduct of the Bank's affairs for the past year, and to the Auditors for their efficient supervision of the accounts.—5. That the thanks of the Meeting be given to the Chairman for his able conduct in the chair. G. G. MACPHERSON, Chairman.

THE AGRA AND MASTERMAN'S BANK, LIMITED.

The Corporation grant Drafts, collect and negotiate Bills of Exchange, payable at the above places, issue Letters of Credit and Circular notes, and conduct every description of Banking business connected with the East.

They effect the purchase and sale of Indian Securities, the receipt of Pay, Dividends, &c., and undertake the safe custody of securities.

They also receive Deposits, bearing interest, for fixed periods.

Rates of interest and Exchange may be ascertained at the Head Office.

By order of the Board,
F. W. LAWRENCE,
Acting General Manager.

PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power, ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer, and a Blacksmith. Dry Godowns for the reception of vessel's stores, &c., when requiring to discharge them.

Amoy, March, 1865.

HOLLOWAY'S OINTMENT AND PILLS.—When the weather is wet, the winds chilling, and the temperature changeable, these excellent remedies should always be at hand; by this means any defective action can be at once rectified, any irregular function can be corrected without delay. The Ointment well rubbed upon the chest and throat will remove hoarseness, sore throat, diphtheria, relaxed uvula, and enlarged tonsils, and without pain or inconvenience will check incipient inflammation in the air passages, and prevent the accumulation of phlegm, alike distressing to the patient and bystander. The influenza, so fatal to the aged, when it ravages the town and devastates the country, is certainly and safely relieved by the persevering inunction of this cooling and purifying Ointment.

Silk, Alpaca, Gingham Steel Frames, Canes, Fittings and all kinds of Materia for the Trade. Oiled and japanned silks and cambrics.

CAUTION.

THE GROSS FRAUDS which continue to be practised by obscure manufacturers, more particularly in Germany, by imitating the Labels attached to JOHN GOSNELL and Co.'s PERFUMERY, render it imperative upon the Proprietors to Caution the public against such nefarious proceedings, and to request their friends and patrons to purchase only of respectable dealers, who import direct from JOHN GOSNELL and Co., and invite special attention to the address, 12, THREE KING-COURT, LOMBARD-STREET, LONDON, E.C.

JOHN GOSNELL and Co.'s SELECT PERFUMES.—Ess Bouquet, Royal Yacht Club Bouquet, Jockey Club Perfume, Essence of Wood Violet, Victoria Bouquet, Garibaldi Bouquet, Frangipanni, Military Bouquet, The Bride's Bouquet, Tea Rose, Russian Leather Perfume.

JOHN GOSNELL and Co.'s Real Old Brown Windsor Soap.

JOHN GOSNELL and Co.'s Golden Oil—Moelline—Macassar Oil, Bear's Grease, &c., for the Hair.

JOHN GOSNELL and Co.'s Extra Highly Scented Toilet and Nursery Powder.

JOHN GOSNELL and Co.'s Stereodesmie or Dentists Tooth Brushes and Trichosaron Hair Brushes, warranted to purchasers.

JOHN GOSNELL and Co.'s Instantaneous Hair Dye.

JOHN GOSNELL and Co's Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it on the contrary, is beneficial to the system, and when the hair is once restored one application per month wil keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty and by Special Appointment to H.R.H. the Princess of Wales, London.

Keating's Cough Lozenges.

JUDGED BY THE IMMENSE DEMAND this Universal Remedy now stands the first in public favour and confidence: this result has been acquired by the test of fifty years' experience. These Lozenges may be found on sale in every British colony, and throughout India and China. They have been esteemed wherever introduced. For COUGHS, ASTHMA, and all affections of the Throat and Chest, they are the most agreeable and efficacious remedy.

Prepared and sold in boxes and tins of various sizes, by THOMAS KEATING, Chemist, &c., 79, St. Paul's Churchyard, London. Sold retail by all druggists and patent medicine vendors in the world.

N.B.—To prevent spurious imitations, please to observe that the words "KEATING'S COUGH LOZENGES," are engraven on the Government Stamp of each Box, without which none are genuine.

Apply to NUTTALL and Co., 19, Chapel-street, Liverpool.

WEATHERLEY and MEAD'S LINE of CLIPPERS for JAPAN Direct.

FOR YOKOHAMA (Kanagawa), the splendid clipper barque MINNIE, A 1 twelve years, 407 tons register, DAVID BLACK, Commander; well-known in the China trade, having the greater part of her cargo engaged, will be despatched the end of the month.

For Freight or Passage apply to the owners, Messrs. ADAMSON and RONALDSON, 1, Leadenhall-street; or to WEATHERLEY and MEAD, 21, Water-lane, Great Tower-street, E.C.

LINE OF PACKETS FOR YOKOHAMA, JAPAN.

Has the bulk of her cargo engaged, and will have prompt despatch,

THE splendid Liverpool-built clipper barque CARIOCA, D. HUGHES, Commander; 312 tons, A 1 at Lloyd's for thirteen years, only two years old, has proved herself to be one of the fastest vessels belonging to the port, and in every respect an unrivalled conveyance.

For Freight or Passage apply to Messrs. WAKEFIELD, NASH, and Co., to Messrs. C. SAUNDERS and Co.; or to E. C. FRIEND and Co.

With immediate Despatch.

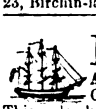
DIRECT for COLOMBO, the well-known clipper ship NEVILLE, A 1 ten years, 715 tons register, J. ROBINSON, Commander; West India Docks. This magnificent vessel is noted for her rapid passages, and the good order in which she invariably delivers her cargoes.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

COLOMBO DIRECT, having the whole of her dead weight engaged, and only room for light measurement goods, the magnificent China clipper ship WYNAUD, A 1 13 years, JAMES W. SMITH, Commander, loading in the West India Docks. This splendid vessel has a very lofty cabin, with every accommodation for the comfort and convenience of passengers.

For Passage apply to W. H. TINDALL, 5, Tokenhouse-yard, and for Freight or Passage, apply to F. TLLAACK, 23, Birchin-lane, Cornhill, E.C.

Will have very quick despatch.



DIRECT for COLOMBO, the magnificent clipper-built ship SPANKER, A 1 10 years, 477 tons register, JAMES CANDLISH, Commander, West India Docks. This splendid Vessel is well known for her very rapid Passages, and the good order in which she invariably delivers her Cargoes, thus offering a favourable opportunity to Shippers of fine Goods.

For Freight or Passage apply to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

Will have very quick despatch.

DIRECT FOR COLOMBO.—The beautiful new Jersey-built Clipper Ship CAROLINE HUTCHINGS, A 1 Eleven Years, 287 tons register, G. H. COTHER, Commander; lying in the West India Docks. This splendid new ship, from her fine lines, is expected to make a very rapid passage.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

Will meet with quick despatch.

DIRECT for BOMBAY, the splendid new clipper ship, MARINE MINISTER VON ROON, 3.3rds L 1. 1.—A 1 9 years, 1,018 tons register, J. C. ELLER, Commander, lying in the East India Docks. This magnificent new vessel having the greater portion of her cargo engaged, is confidently recommended to shippers of fine goods.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, No. 31, Great St. Helen's, Bishopsgate-street, E.C.

To follow the "MARINE MINISTER VON ROON," and will have quick despatch.

DIRECT for BOMBAY, the magnificent clipper ship WHITEHALL A 1 fourteen years, 936 tons register, WILLIAM CHAPMAN, Commander; lying in the East India Docks. This splendid high classed ship is now quite ready for cargo, and being one of the fastest vessels afloat (having made the passage to Sydney in 76 days), offers a most desirable opportunity to shippers of fine goods.

For Freight or Passage apply to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

The next P. and O. mail, with dates from Hong Kong to the 1st March, is expected on the 11th inst. Telegrams have been received in advance of the mail of the 15th March from Hong Kong, announcing that the rebels have been defeated in the North, with a loss of 50,000 killed and captured.

List of Passengers.

PASSENGERS OUTWARD.

Per P. and O. steamer, Massilia, from Southampton, March 20.—To Hong Kong: Mr. H. A. Easter, R.N., Lieut. J. C. Patterson, R.N., Mr. A. G. H. G. Ponsonby, R.N., Mr. W. Miller and two second-class passengers. To Penang: Mr. and Mrs. C. B. Plunket. To Ceylon: Mr. F. R. Bone, Mr. and Mrs. Prime, two infants and child, Mr. and Mrs. T. Ashton, infant, and two children. Mr. G. Plaice and Son, Mr. J. A. Smith, Mr. F. Harper, Captain and Mrs. Roddy, Mr. and Mrs. Nasmyth, four second-class passengers, and one infant. To Calcutta: Mr. and Mrs. Longlands, Mr. J. Barnett, Mr. L. Sparks, Mr. H. J. Barnard, Dr. J. H. Blount, Mrs. G. Ham, Mr. W. Jackson, Mr. and Mrs. Baynes, Mr. D. J. Walch, Mrs. Walch, Lieut. and Mrs. F. H. Thomas, Mr. R. Remfrey, and fifteen second-class passengers. To Madras: Mr. J. B. Thomas, Mr. H. Going, and one second-class passenger. To Aden: Mr. W. H. Salmon, and one second-class passenger.

From Marseilles, March 28.—To Shanghai: Mr. A. Dumelin, Mr. Eric Farquhar, and European male servant. Mr. and Mrs. P. H. Underwood, Mr. and Mrs. E. Morris and infant, Mr. Butler, Mr. G. A. Munro. Mr. J. T. Brand, and one second-class passenger. To Hong Kong: Mr. A. Joost, Mr. H. A. Dircks and friend, Mr. A. Leysner, Mr. and Mrs. G. McKay, Rev. Mr. and Mrs. Piercy, Mr. J. Birdseye, Mr. Jaffray, Mr. F. Abella, Mr. N. T. Armeis, Mr. T. A. Lyon, Mr. Fussell, Mr. Helbling, two first and one second-class passengers. To Singapore: Mr. J. A. Lorenzen. To Ceylon: Mr. W. B. Smith, Mr. Fernando G. Carey, and three second-class passengers. To Calcutta: Mr. and Mrs. Stirling and European female servant, Mr. T. H. Wordie, Mr. R. H. Banister, Mr. Maxwell, Mr. Dunbar, Captain Therry, Mr. C. Kelvey, Mr. and Mrs. A. Hills, infant, and native female servant, Mr. Macdonell. To Madras: Miss A. Cherry, Mr. Blaikie, Mr. J. Peirson. To Alexandria: Major Wilson.

Per P. and O. steamer, from Southampton, to Tanjore, April 4.—To Shanghai: Mr. E. Wadman, Mr. C. G. Webb. To Ceylon: Mr. R. Reid, Mr. P. W. Conolly. To Hong Kong: Rev. John Macgowan, and child. To Singapore: Mr. and Mrs. Sinclair and three children (for Labuan).

From Marseilles, April 12.—To Hong Kong. Mr. and Mrs. Thomas Thomas, Mr. P. F. Coare, Mr. John Smith, Mr. W. H. Renshaw, Mr. W. Park, Mr. E. Tobin. To Shanghai: Mr. C. J. Skegrs.

From Suez.—To Singapore: Mr. and Mrs. W. T. Martin and infant. To Hong Kong Mr. A. C. Levysohn.

Per P. and O. steamer, Pera, from Southampton, April 20.—To Hong Kong: Mr. J. W. Lewis, Mr. H. W. Heitmann. To Ceylon: Mr. J. H. Purdon.

Per P. and O. steamer, from Marseilles, May 5.—To Singapore via Bombay: Mr. C. Grey McClelland.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

From this port dates are to the 8th of February, but our usual files of papers have not come to hand. There appears, however, to be little of importance to chronicle.

Sir Harry Parkes had paid an official visit to Yedo. A member of the Gorogio, who had come down to Yokohama, on business connected with the payment of the second instalment of the indemnity, had returned to Yedo in a singular manner, being driven on the Tokaido by Mr. Macdonald, of the English Legation, in his carriage. The fact is worth recording, as it establishes the hitherto disputed right of foreign horsemen and carriages to travel on this great highway. The envoy is said to have been charmed with the easy and rapid mode of transit.

The *Japan Times* says: "It is evident that the silk season is drawing to a close: the supply is becoming as inferior in quantity as it is deficient in quality. We have always been of opinion that the silk-producing power of this country is—at present—limited. The extraordinarily large crop of the year 1862-3 was the result of a happy combination of natural causes not likely soon to occur again, and until time has been given to the Japanese to put a greater breadth of land under the mulberry and greater facilities given to trade, until, in fact, Art. XIV. of the Treaty of 1858 is faithfully carried out, we think our merchants would be unwise in counting on crops averaging more than 14,000 bales per annum."

Messrs. Glover and Co., have purchased the *Otentosama*, a liltle specimen of the twin screw principle, with which Messrs. Randolph Elder and Co. of Glasgow have lately so successfully fitted H. M. S. *Constance* for the British Government The *Otentosama* left on the 28th January Nagasaki via the Inland Sea, where she will probably run as a treasure and dispatch boat for some time. The Russian frigate *Variag* arrived here from Hakodate on the morning of the 28th January, she brings no news of any great importance from the North.

The *Japan Times* has the following particulars of the extensive fire at Yedo, which was reported in our last:—

At 10 P.M. on the night of Sunday, the 28th January, a fire broke out by some accident, which has not been discovered, in a street called Kawara-tcho, in the quarter of Asaksa where is situate one of the finest and most venerated of the temples at Yedo, dedicated to the goddess Kwa-noong. A high wind blowing at the time, and the houses in the quarter being built of wood and most densely packed together, the conflagration spread most rapidly, and the suburb was almost immediately fired in thirteen different places at once. The sparks were carried across the river, which runs there as broad as the Thames at Putney, and fired the opposite suburb. The glare of the conflagration was distinctly seen in Yokohama, a distance of 15 miles as the crow flies. Some idea of the extent of the damage done may be gathered from the fact that the number of houses estimated to have been destroyed is 30,000. The Japanese police have excellent means of making a return of this character, and we have in our possession a document giving a list of the streets burnt, and the number of houses in each. Some Daimio's palaces have shared the fate of their humbler neighbours. We regret to say that there has been considerable loss of life. When our reporter left Yedo a list of upwards of 30 deaths had been returned; he himself saw many

Digitized by Google

charred fragments of human bodies. These unhappy people met their death, it appeared, thus. Under the idea that the goddess would protect them—the people in the neighbourhood crowded into the temple enclosure, and piled all their baggage around the edifice. But the furniture took fire, though strange to say the temple itself remained comparatively unharmed. The priests shut the gates of the enclosure, and the people immediately outside were jammed into a narrow burning street by the constantly increasing crowd behind, whose *impedimenta* formed a barricade behind them which soon took fire also, and [the] unhappy victims thus perished miserably. The fire raged without intermission for twelve hours, when it burnt itself out.

There was a rumour in circulation of renewed operations against Chosiu. A notification was said to have been issued by the Gorogio to the Daimios at present at Miako, to the effect that renewed negotiations with the rebel Prince having failed they were to prepare for immediate action.

A Foot-Ball Club has been successfully established in Yokohama, more than forty names having been put down as willing to support it, and a meeting to arrange ways and means was held on the 26th January.

The following letter, and appended extract from the *Japan Herald* with regard to the progress of the Belgian treaty, is interesting. It will be noticed that Mr. de Roodenbeek contradicts the statement made by the *Japan Herald* to the effect that the Gorogio intimated the unwillingness of the Government to enter into new alliances, while on the other hand he asserts that the assurances he received were most satisfactory. It would seem from this, that however unwilling the Japanese may be to submit to pressure, they are ready to join in friendly intercourse with Western Powers of every degree of importance.

(To the Editor of the *Japan Herald.*)

SIR,—You affirm in your paper of yesterday's date, No. 204, that at the reception of the Envoy of Belgium at Yedo, "the wish was expressed that Belgians and others whose countries have not already treaties, would arrange to settle for purposes of business under the protection of present treaty powers, as it was not the desire of the Government to enter into new alliances."

As your affirmation is without the least foundation, and as [contrary to this the Gorodjo has given to me the most satisfactory assurances, I beg to request you, for the information of all the nations in general, whose interests Japan are identical, to insert in your next number the present as a rectiation.

I do not wish to answer on your considerations, by which you give indirectly the advice to the Japanese Government not to conclude a treaty with Belgium, having too much confidence in the sagacity of your readers and of the Government itself.—I am, Sir, your obedient servant,

AUGT. KINT DE ROODENBEEK,
Plenipotentiary and Envoy of Belgium.

On reference to our informant, we find we were wrong in connecting the wish of the Japanese Government with the interview of his Excellency the Belgian Minister. Such desires were expressed by members of the Gorogio, but on quite a different occasion. With regard to our indirectly giving advice to the Japanese Government not to yield to the Belgians a treaty, this is putting a construction on our remarks that was never intended by us, and is really very far fetched. We do indeed remark that there is but one Belgian subject established here, but it is only to add that the fact of the treaty being entered into will soon bring plenty more, and we plainly enough show our real views by saying—"the more the merrier." We would ask his Excellency how many American, English or French subjects were in Japan at the time of the treaties with their respective countries being entered into? We suppose not one; yet any one stating this fact would hardly have been considered as advising the Japanese not to make those treaties. As the admission of foreigners into Japan is an accomplished fact, we opine that the sooner the Japanese have treaties of amity with the whole world the better for them, and for all.—Ed. *Japan Herald.*

CHINA.

HANKOW.

Dates are down to the 9th February.

Mr. Halkett has been relieved of his duties by Commissioner Giquel, who took charge of the Customs establishment on the 2nd, and is about to form a Volunteer corps of the members. The praiseworthy manner in which Mr. Halkett has conducted the Customs here, for a period of seven or eight months, has given general satisfaction and will doubtless be rewarded by speedy promotion.

The gunboat *Slaney* arrived on the 8th, so we have now (writes an Occasional Correspondent to the *Friend of China*) three gunboats, Merchants' and Customs' Volunteer corps to rely on in the hour of need. This being Chinese new year time, business is dull. The Customs are closed for five days. The *Elfin*, a Chinese steamer, has just arrived and reports a great many fires; and thousands of poor people are rendered homeless. Since my last, we have had no cause for alarm, although rumours of danger are on the Bund every half hour. The latest news from the country is that the "rabble" are burning all they come across. Thousands of poor wretches are crowding in here; and their distress is appalling. Many are lying dead in the street. A charitable concert was given at the club, and some 400 taels were collected. Madame D'Abry, the French Consul's wife, presided at the piano, and her beautiful singing was highly appreciated. The Amateur Company are again going to perform in a few days; "Charles the Second" being one of the pieces. Mr. Gram, who so tastefully designed the scenes for "Bombastes Furioso," is busy repainting and getting the little Drury again ready.

SHANGHAI.

Dates are down to the 23rd February. The London mail of the 26th December arrived out on the 12th February.

Messrs. Meynard, Schmidt, and Barron handed over their accounts as Municipal Councillors for the French Concession on the 9th February, at the meeting appointed for that purpose. The meeting consisted of the Consul-General; Provisional Councilmen Messrs. Morel, Allen, Tyson, and Bernard; Secretaries Ortmans and Dillon; French subjects: Messrs. Duglere, Nachtrieb, Millot, Brecheux, and Viault. The accounts being tabled (the balance in favour of the rejected treasurer being over a hundred dollars), Mr. Schmidt rose and addressed the Provisional Council as follows:—

Gentlemen,—Allow me to ask if you are the deputies of the nation? If so, you agree to be governed by French law; and by the fact of your being members of the Provisional Committee, become French subjects. If not, then the advertisement which has called us together is incomprehensible. My colleagues and myself are not aware of any clause in the land regulations which can justify the proceedings which have been taken against us. We have all along refused to recognise the validity of the ordonnance issued by the Governor-General for France on the 12th of October last, and by which he took upon himself the responsibility of dissolving the then existing Municipal Council, and of appointing a Provisional Committee in its stead; for that he did appoint and choose you, and not the land renters, I am prepared to prove. Be that as it may, at present we are here to hand over to you certain papers. Before doing so, however, I would wish to make a statement, so that you and those interested may know who is really to blame in this matter. In his Ordonnance of the 12th October the Consul-General says, in the last paragraph, "We hold the old Conseil d'Administration Municipale responsible for the acts of its management, and we order that according to the terms of 7th Art. of the Ordonnance of 1681 they should give up, without delay, and before one month, to the Provisional Committee above named, a detailed account of their management of money and affairs of the community." You know by the advertisement that the 7th Art. of 1681 ordains that such accounts should be given up in presence of all the newly-elected deputies (not a part only of them) and of the oldest established merchants. We are willing to accept the conditions of this article, not that we consider it applies to the circumstances of the case in any way, but because it bears some slight analogy in its application to a Municipal Council. When we saw the result of the meeting of 19th Oct. we agreed to give up the papers, &c., when called upon to do so, on the conditions implied, and we waited until a public announcement to this effect should be made. It was not our duty to tell the Consul-General, or the Provisional Committee, what they had to do. They had the ordonnance, and it was for them to carry it out. But instead of this, what did they? They instructed their secretary to write to me, and request me to give my accounts into his hands. This proceeding appeared to me so extraordinary and so contrary to all precedent, that I did not think it necessary to answer such a request. What followed you, gentlemen, all know. Your chairman thought proper to insist upon our giving up these accounts in the mode he thought proper to insist upon; giving no attention to the last paragraph of the ordonnance of the 12th October; and he carried this persecution so far as to bring about the judgment of the 2nd February. My colleagues and myself think that a little conciliation on the part of those in authority would have brought about a very different result from what has been obtained by the employment of rigorous measures, whose legality we are not disposed to discuss here; and we insist upon the fact that we have never refused to give up the papers required of us, but that no opportunity for so doing has until now been offered us. As it is, although the land renters have not been invited to attend this meeting as we requested they might, we wish to be rid of all responsibility regarding these papers, and we will thank you to verify them, and give us a receipt in due form, and which will hold us harmless from any claims that may be made hereafter by the land renters, and from all further molestation or prosecution by yourselves.

To this there was no response, and the business would have been ended by the Consul-General but for the refusal of the ejected Councillors to leave the hall till they had a full and complete receipt for their papers.

The *Friend of China* gives an interesting account of the Kiangnan Machine Manufactory, Hongque. It says:—As our local readers know, the site of this establishment was formerly Messrs. T. Hunt and Co.'s—then, as now, under the superin-

Digitized by Google

tendence of Mr. Thomas Falls, an American engineer of some eminence in his profession. Since the establishment has changed proprietors,—although only monthly tenants,—the Chinese, on Mr. Falls' suggestions, have made several valuable additions and improvements on the property; one of them being a furnace of greater capacity for castings than any East of the Cape, we are told. But it is to the work done on the premises to which we would draw attention. We see there, in profusion, howitzers in iron and brass, light and heavy, of exquisite finish; shell of all sizes; the place around being resonant with the roar of a steam polisher of balls as they emerge from the foundry; fusees completed, from the sheet of brown paper and paste, up; muskets in all stages of manufacture, from the small screws which secure the springs of the percussion locks to the barrels rolled and welded as they come from the furnace; boring machines and lathes of every size, for the mortar or the pistol; immense drops for punching; cupolas for melting the crude ore; ovens for baking; draughtsmen, moulders, blacksmiths, boilermakers, coppersmiths; in a word, a native arsenal as ponderous and compact as the best of those we see at home. The number of artizans employed by Mr. Falls, on an expenditure for salaries of some $5,000 a month, is over three hundred, fifteen of whom are Americans or Europeans. Mr. Stephenson has charge of the Draughting Department, Mr. McIlwrath of the heavier engineering. Among some pieces prepared for shipment by the *Confucius* for transport last week to Nanking, and thence for the various war fields over the country, were some beautiful 3-pounder howitzers, weighing, mounted on iron carriages, the insignificant total of 500 pounds; 12-pounder howitzers, similarly mounted, 520 pounds; while there were heavy howitzers for ship board or shore use of over 900 pounds weight; one 68-pounder howitzer, of cast iron, being just ready for placing in the lathe. The wheels of the carriages seem to be particularly well made.

A week or so ago there was a trial of some of the guns at Woosung—all proving in a most satisfactory manner, a Parrot gun, in particular, was highly delighted in by the Mandarins inspecting by order of the Taoutai. The distances being calculated for 500 and 700 yards, the fusees for those distances burnt with excellent precision; the bullets with which the shells were filled spreading on over distances as far again.

Among the three hundred artizans are men from various provinces, the best, however, being Cantonese. As many as thirty are educated youths from Peking. Though now begrimed with the soot of the forge, or the dust of the laboratory, they are "swells" at home. Two of them, under Mr. Stephenson's tuition, promise well as draughtsmen; and if the Manchous could only secure themselves from the intrigue of native haters, their tenure of the Chinese throne, relying on such establishments as now described—might be considered safe for another century.

NINGPO.

Officialdom at Ningpo had a goodly addition to the usual festivities this Chinese New Year. Unaided by foreign arms, the Ningpo coastguard squadron, after a fight in which ninety men were put *hors de combat*, succeeded in capturing some piratical vessels which had long been the terror of the neighbourhood, and brought them in on New Year's-day in great triumph. Besides 50 or 60 prisoners, the capturers had several heads; among them being that of the pirate chief, who was shot during the engagement. A Macao boatwoman, too, Asee, of the tribe of Cheong, the reputed wife of said chief, was shot in the arm, and will, it is said, be cut into a thousand pieces. Another prisoner is a Macao Portuguese of the name of Antonio Chagas, a young man, whose tale runs that, when serving on board a lorcha convoying at Sing-ka-mun (the Chusan group), he, with the boat in which he was a mariner, was captured, some ten days or a fortnight ago, by the pirates whose career is now opportunely put a stop to.

Although a season of general holiday, the Che-hien, or Chief Magistrate, has held inquiries daily, and finding that fully thirty of the prisoners had been pressed into the pirate's service he directed their release. Selecting on each examination a victim for the torture, on each occasion a victim died, either from the immediate effect of the punishment inflicted, or the aggravation of wounds received in the naval engagement. Lately there was an examination of all the prisoners; persons who had been robbed or ill-treated by pirates at any time being called far and near to testify whether the imprisoned men were of those who troubled them.

HONG KONG.

From Hong Kong we have dates to the 26th February. The mail of 10th January arrived out on the 21st February.

The *Hong Kong*, a Bordeaux coolie ship, which left Whampoa for Havana a few days before the departure of this mail, had been seized by the emigrants. The incidents of the *Pride of the Ganges* case seem to have been closely imitated. The captain had been murdered, and seven of the crew were still in the hands of the Chinese. The news of the seizure was brought to the French consulate by the French Vice-consul of Macao, to which port ten men of the *Hong Kong's* crew, who succeeded in making their escape, proceeded in one of the ship's boats. The ship left the river with 260 coolies on board under the command of Captain Duval. Although nothing occurred which raised any suspicion of the intention of the emigrants, they suddenly rose on the following day. The captain was killed at once by a blow with a hatchet, and the crew fled for protection to the cabin, where they defended themselves as long as their ammunition lasted. At last the Chinese, by pretending to surrender, induced them to come out of their retreat. The coolies profited by this opportunity to possess themselves of weapons, and the fight continued. Seeing that they were overpowered, those of the crew who were able succeeded in launching one of the boats and escaped. The seven others, who were all more or less wounded, remain in the hands of the Chinese. Amongst them are the first and second mates. The Governor of Macao, to whom the French Vice-consul at once applied, had no gunboat at his disposal to send in search of the mutineers, but promised to furnish military assistance if a steamer could be obtained by other means. This, however, could not be done, and the Vice-consul came over to Hong Kong in the *White Cloud*, and laid the whole case before M. du Chesne. He, of course, immediately visited Admiral King, and obtained a promise that a gunboat should be despatched as soon as possible in pursuit of the captured ship.

The Parsee community had subscribed a sum of $1,500 for the purpose of defraying the cost of a band-stand in the public gardens. Some of our readers may remember (says the *Daily Press*) that about the time of the last regatta a letter written by a member of the Parsee community appeared in the *Daily Press*. In this letter it was urged that the band of the 9th might very usefully give the public garden the benefit of its performances twice instead of once a week. It was then suggested in our leading columns that if the Parsees enjoyed the playing of the band so much, they might as well provide a stand, of which the garden was very much in need. With public spirit, which does them credit, they came forward immediately and expressed their readiness to show the sincerity of their demand by acting on the proposal which had been made. In making the suggestion, we were under the impression that the necessary outlay would not exceed two or three hundred dollars, but when the matter was placed in the hands of an architect, and an estimate was prepared, it was found that the first idea had been expanded far beyond its original dimensions. On the plan we beheld a handsome wrought iron structure, standing on a granite base and at the foot of the estimate a row of four figures. We believe that before now architects have been known to enlarge upon crude ideas of amateur builders, sometimes to the serious chagrin of their employers, but in the present instance the community of Hong Hong reaps great benefit from the architect's glowing fancy. The Parsees were highly pleased with the design, and in no way appalled by the row of four figures. The matter took a little longer time to arrange, that was all. The money has now been found, and we shall no doubt have the satisfaction of seeing the stand commenced in a very short space of time. The stand will be erected in the centre of the gardens, on an octagonal granite base, approached from every side by three steps. The roof will consist of wrought iron and zinc, supported on eight cast-iron pillars. A weather vane surmounts the whole structure.

We learn from Canton that the New Year's holidays have passed off there and at Whampoa without any of the customary disturbances. The rebels, who were recently reported as holding the city of Kia-ying-chow, in the north-east of Kwangtung, and as threatening Ch'aou-chow-fu, are stated to have recently evacuated the first-named place, which was reoccupied by the Imperial forces on the 9th Feb., and to have advanced upon the district city of Tung-shun, about 25 miles north-east of Ch'ao-chow-fu, which city it was apparently their design to attack about the Chinese New Year. As they have now approached so near the coast, it may be that they will pay

Swatow a visit; though as a rule these unwieldy bands of pillagers have taken the best of care to edge away from too dangerous proximity to the sea-board. Should Ch'ao-chow-fu appear too strong to invite attack, the only course that will remain open to this forlorn vestige of Tai-ping-dom will be a foray over the mountans into Fukien, since, by evacuating Kia-ying-chow, they have enabled the Imperialists to concentrate a preponderating force upon their rear.

The latest tidings respecting the rebels in the north-east of the province are of success to the Imperial arms in actual fight. We learn that the bands which lately evacuated Kia-ying-chow, on the death of their leader the K'ang Wong, were taken in flank by the troops under General P'ao-ch'ao, and are represented as thoroughly routed. The fact that about a thousand prisoners have been taken is evidence at least of a substantial success. What has become of the remaining bands we are not informed.

On the 16th and 17th February a cricket match was played on the Hong Kong ground between the Hong Kong and Shanghai Clubs. The result was a complete victory for the civilians of the Hong Kong Club in one innings, with 264 runs to spare, their score of 430 runs being, we believe, quite unprecedented in the cricketing annals of the colony. Shanghai went first to the wicket, and at the close of their innings the telegraph showed 107 runs, the chief contributors being Messrs. Hearne and H. Dent, whose scores were obtained by careful play. On the side of Hong Kong Mr. Starkey headed the list with 99, obtained by brilliant hitting, including one 8 and one 7, carrying off the presentation bat for the highest score. Mr. Clifford played very prettily for 71, while Messrs. Davidson, Mercer and Wallace secured their runs in good style, and Mr. Bird's innings of 28 showed good cricketing skill. In the 2nd innings of Shanghai Mr. Welsh contributed 38 out of a total of 59, defending his stumps with his usual obstinacy, the rest, in racing language, being "nowhere." Notwithstanding the difficulties they had to contend with in playing on a ground so different to their own, the Shanghai Eleven fielded in a most plucky manner throughout. Especial praise must be accorded to Mr. McDonell, who filled the thankless office of long stop without a mistake, the only bye recorded being through no fault of his. Their bowling, however, seemed decidedly weak. Mr. Mackenzie, for the Hong Kong Club, bowled throughout, and was particularly killing on the second day, his services on this occasion being recognised on the part of the Club by the presentation of a ball.

The steamer *Yeddo*, belonging to Messrs. Adamson and Company, had been peremptorily ordered by the naval authorities to haul down the house-flag of that firm, in a manner which reflects small credit on Admiral Jones. Mr. George Laily, the master of the *Yeddo*, gives the following narrative of the circumstance:—

"On Saturday, the 17th February, Vice-Admiral King sent on board my vessel, the S. S. *Yeddo*, requesting me to haul down the house-flag on account of a supposed similarity to the St. George's Cross used by men-of-war; such a step being extremely detrimental to the interests of my employers (as the Chinese solely recognise the vessel by the flag), I waited on the Admiral, pointed out the serious inconvenience caused by his act, and offered to make any alterations he might suggest which would not entirely destroy the character of the flag. He then called on several of his officers to state what flag they would take the *Yeddo's* for if they saw it at a ship's mast head, and they with one accord said, "for a St. George's Cross Ensign, sir." Admiral King then turned to me and said, "You see my officers are of the same opinion as myself, and you have no business to come here to argue the point with the admiral, but should have taken the officer's word that you were wrong." I said, "I beg your pardon, sir, I have a right, I am simply doing my duty," and again requested he would point out what alterations he required; to which he rudely replied, "I do not care a d—n what alterations you make, but you shall not hoist that one." Now, without in any way denying the jurisdiction of the Commander-in-Chief on such matters, I would point out that his last remark was not at all courteous, and that as the flag has been flying unmolested for the last ten years, and frequently in company with the late Admiral's, the act does seem somewhat arbitrary."

A spectacle, which fortunately is a rare one in the British army, was exhibited at the Murray Barracks. A staff sergeant —Thompson by name—was reduced to the ranks by sentence of court martial. His uniform buttons, facings, medal, &c., were publicly torn off, and he was then drummed out of the regiment to the tune of the "Rogue's march," his punishment being completed by a sentence of one hundred and sixty-eight days' imprisonment in the garrison goal. The particulars of his trial are said to be unfit for publication.

With regard to the garrison, the *Evening Mail* has the following remarks:—In accordance with its expressed wish the garrison of this establishment is to be reduced, and henceforth its protection is to be entrusted to one Regiment of Infantry, a battery of Artillery, and a few Engineers. The 11th Regiment is ordered to Bengal, the 9th to Japan, and the 20th come thence here. It is said that the first named corps is to proceed to one of the hill stations to recruit its health; but how is it possible to conceive that any person in his senses would select India as a sanitarium? In plain English, it amounts to this; a regiment decimated over and over again by death and invaliding, will land at Calcutta about June next some 300 strong, almost every man of which has either suffered from disease or bears about him the germs of it. On landing it will be 600 or 700 miles from the nearest hill station, and although the railroad is open to Delhi still there is between 200 and 300 miles to travel on foot. What happened at the landing of a detachment of this regiment at Japan may give us a fair idea of consequences that will ensue. We venture to predict that not a third reaches its destination. In addition to the above-mentioned instance of gross mismanagement, it is intended to bring the 20th from the healthy climate of Japan to this colony at the very commencement of the summer. What the result will be it is not difficult to foresee. Exposure, night work, &c., with the increased duties, which were found too much for two last summer, will soon tell their tale in fevers, dysenteries, and death; and fortunate will it be if it fares no worse than the 11th. Statistics show that Europeans are totally unfitted for military service during summer in the unhealthy climate of Hong Kong, and that Indians are the only troops that can stand it without suffering greatly. The loss amongst the police of that nation last year was, we are informed, less than 3 per cent., that of the Europeans for the summer months 15 or 16. These facts alone speak volumes, but a false economy causes the War Department to count the lives of British soldiers as nothing in comparison with a few paltry pounds they would have to pay to officers and men in the shape of Indian allowances were a regiment of Sepoys ordered here.

No less than three cases of hydrophobia are reported in the colony. The first case was that of M. le Vicomte O'Mahony, *Chancelier* of the French Consulate, who was bitten by a rabid dog, said to belong to M. Vaucher, and died two days afterwards. Two soldiers of the 9th Regiment had also died of the same dreadful disease.

The Spring race meeting took place on the 20th, 21st, and 22nd, and was highly successful; full details will be found in another column. The race ball came off on the 24th with great *eclat*. The attendance was however not so full as was expected, only thirty-nine ladies being present. H.E. the Acting Governor and Mrs Mercer arrived about 9.45 P.M., and dancing was kept up with great spirit till an early hour in the morning. The arrangements for supper were as usual admirably made, seats being placed for eighty people. The Challenge Cup was displayed at the head of the table, and attracted much attention. The band of the 9th Regiment was in attendance.

The gunboat *Opossum* had returned from a successful cruise on the coast after pirates. Full particulars are not yet published, but it appears that a nest of these ruffians was discovered at Paksui, where a three-gun battery was destroyed by the *Opossum*. She afterwards took a large junk and forty men, which were handed over to the Chinese mandarins at Quanghai. During her cruise she has destroyed fifty-three guns belonging to pirates.

A new paper, called the "English Edition of the *Echo do Povo*," has been started in Hong Kong. Its opening address states that there is no other weekly paper in the English language published at this place (an absurd misstatement), and one of its paragraphs advocates the establishment of a police corps exclusively composed of Chinese.
